Plant variety protection.
Reciprocity limits for Israeli nationals, 56751
Raisins produced from grapes grown in Calif., 54423, 56512

This INDEX is based on a consolidation of contents entries appearing in the July-September issues of the FEDERAL REGISTER together with broad subject references. It is published monthly, quarterly, and annually. A general index to the entire Code of Federal Regulations, the CFR INDEX, is revised as of July 1 each year.

Numerical Finding Aids. The LSA, a cumulative list of CFR sections affected, is published monthly and is cumulated for 12 months, keyed to the revision dates of the various CFR volumes.

All FEDERAL REGISTER publications are available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Wash. D.C. 20402.

This publication was prepared under the editorial direction of Rose Steinman, with Judie Craine as Chief Editor.

INQUIRIES may be made to the Finding Aids Unit at area code 202—523-5227.

SUGGESTIONS concerning this and other publications of the Office will be welcomed by Fred J. Emery, Director, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

Portsmouth Gaseous Diffusion Plant, Ohio, 53657
Rocky Flats Plant Site, Colo., 53989
Savannah River Plant, S.C., 56539
Special nuclear material of U.S., origin, retransfer and reprocessing approval; rulemaking petition denied, 54331
Uranium hexafluoride; charges, enriching services, specifications, and packaging; correction, 55843
Uranium supply policy; correction, 55843

ENGINEERS CORPS

RULES

Flood control regulations: Allocated storage, 56329
Inflation impact statements, 54286, 56329
Phase I General Design Memoranda; approval, 54286

PROPOSED RULES

Flood control: Reservoir projects; regulation for flood control and navigation; storage use, 53637
Inflation impact statements, 53638

ENVIRONMENTAL PROTECTION AGENCY

RULES

Air pollution; standards of performance for new stationary sources: Sulfuric acid mist emission guideline, 55797
Air pollution control, new motor vehicles and engines: Editorial changes and corrections, 56736
Air programs; energy-related authority: Georgia, 56608
Air quality implementation plans; various States, etc.: Alabama, 55811
California, 53962, 53963, 56113, 56606
New Mexico, 53963
New York, 56607
North Dakota, 55471
Oklahoma, 55472
Pennsylvania, 54416

Grants; general regulations and procedures: Resource conservation and recovery, 56051

Grants, State and local assistance: Program grants, 56051

Grants; subagreements:

Procurement under EPA grants; minimum standards; extension of time, 53600

Grants research and demonstration; resource conservation and recovery, 56056

Grants training and manpower forecasting; resource conservation and recovery, 56057
Inflation impact statements, 56736, 56739
Pesticide chemicals in or on raw agricultural commodities; tolerances and exemptions, etc.: Aluminum phosphide, 56113
Chlorothalonil, 56114
Inert ingredients in pesticide formulations; correction, 56114
Procurement, 54552
Waste management, solid: Suits, citizen; prior notice, 56115
Water pollution; effluent guidelines for certain point source categories: Meat products and rendering industry; processing plants, 54419
Water pollution control: Secondary treatment information; wastewater treatment ponds suspended solids limitations, 54665
Water quality standards; State program regulations removed, 56740

PROPOSED RULES

Air pollution; standards of performance for new stationary sources: Gas turbines, stationary, 53782
Air pollution control, new motor vehicles and engines: Light duty vehicles; emission testing procedures, 56298
Air quality implementation plans; various States, etc.: Arizona, 55481
Tennessee, 53981
Inflation impact statements, 53788, 55237, 56302

Noise abatement programs: Transportation equipment; buses; correction, 53647

Pesticide chemicals in or on raw agricultural commodities; tolerances and exemptions, etc.: Aluminum phosphide, 55482

4-Amino-6-(1,1-dimethylethyl)-3-(methylthio)-1,2,4-Triazin-5(4H)-one, 54842

Terbacil, 55829

Pesticide programs: Packaging, special; requirements and testing protocols, 55235

Solid waste; management, treatment, etc.: Hazardous waste, transportation and disposal; development of regulations with DOT; meeting; correction, 54314

Toxic substances: Inventory reporting and general provisions; reproposal, 53804

NOTICES

Air pollution; health effects and ambient air concentrations; cadmium, arsenic, and polycyclic organic matter; inquiry, 56786

Air pollution; standards of performance for new stationary sources: Gas turbines, 53657

Washington; authority delegation, 55492

TITLES 42-50

Changes October 3, 1977
through October 31, 1977

PARALLEL TABLE OF U.S.C.-C.F.R.

LSA—LIST OF CFR SECTIONS AFFECTED

The LIST OF CFR SECTIONS AFFECTED is designed to lead users of the Code of Federal Regulations (CFR) to amendatory actions published in the Federal Register (FR). It should be shelved with current CFR volumes. Entries are by CFR title, chapter, part, and section. Proposed rules are listed at the end of appropriate titles, except for Title 41, in which proposed rules follow each chapter.

HOW TO USE THIS FINDING AID

The CFR is revised annually according to the following schedule:

Titles 1-16—as of Jan. 1
17-27—as of April 1
28-41—as of July 1
42-50—as of Oct. 1

To bring these regulations up to date, consult this LIST OF CFR SECTIONS AFFECTED for any changes, additions, or deletions published after the revision date of the volume you are using. Then check the CUMULATIVE LIST OF PARTS AFFECTED appearing at the front of the latest Federal Register for less detailed but timely changes published after the final date included in this publication.

Cite a page reference from this publication as 41 FR for 1976 page numbers and 42 FR for 1977 page numbers.

PARALLEL TABLE OF U.S.C.-C.F.R.

LSA—LIST OF CFR SECTIONS AFFECTED

The LIST OF CFR SECTIONS AFFECTED is designed to lead users of the Code of Federal Regulations (CFR) to amendatory actions published in the Federal Register (FR). It should be shelved with current CFR volumes. Entries are by CFR title, chapter, part, and section. Proposed rules are listed at the end of appropriate titles, except for Title 41, in which proposed rules follow each chapter.

HOW TO USE THIS FINDING AID

The CFR is revised annually according to the following schedule:

Titles 1-16—as of Jan. 1
17-27—as of April 1
28-41—as of July 1
42-50—as of Oct. 1

To bring these regulations up to date, consult this LIST OF CFR SECTIONS AFFECTED for any changes, additions, or deletions published after the revision date of the volume you are using. Then check the CUMULATIVE LIST OF PARTS AFFECTED appearing at the front of the latest Federal Register for less detailed but timely changes published after the final date included in this publication.

Cite a page reference from this publication as 41 FR for 1976 page numbers and 42 FR for 1977 page numbers. Example: Page 5678 cite as 42 FR 5678 if it is a 1977 page number.

ISSUES TO BE SAVED

There is no single annual issue of the LIST OF CFR SECTIONS AFFECTED. Four ANNUAL ISSUES must be saved: the DECEMBER issue is the ANNUAL for Titles 1-10; the MARCH issue is the ANNUAL for Titles 17-27; the JUNE issue is the ANNUAL for Titles 28-41; the SEPTEMBER issue is the ANNUAL for Titles 42-50. ANNUAL ISSUES to be saved are clearly designated on the cover.

PARALLEL TABLE OF STATUTORY AUTHORITIES AND RULES

A table is included after Title 50 which contains references to the U.S. Code sections cited as authority for CFR regulations added or revised since July 1, 1977.

TABLE OF FEDERAL REGISTER ISSUE PAGES AND DATES

A table is included at the end of this publication which identifies the inclusive page numbers and corresponding Federal Register issue dates for the period covered.

INDEXES

An INDEX to the daily Federal Register is published monthly, quarterly, and annually for the calendar year. A separate volume, the CFR INDEX to the entire Code of Federal Regulations, is revised as of July 1 each year.

INQUIRIES AND SUGGESTIONS

This publication was prepared under the editorial direction of Rose Steinman, with Carol Blanchard as Chief Editor assisted by Loren Myers. INQUIRIES, telephone 202-523-5227.

SUGGESTIONS concerning this and other publications of the Office will be welcomed by Fred J. Emery, Director, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

Additions to Table 1, July through October 1977

This table lists the sections of the U.S. Code and U.S. Statutes at Large which are being added to Table 1 as a result of authority citations carried in the Federal Register from July through October 1977. Recent legislation is carried by public law number at the end of the list.

Table 1 is presently in the Finding Aids volume revised as of Jan. 1, 1976. Additions from January 1976 through June 1977 are in the June 1977 List of CFR Sections Affected.

In order to determine the Federal Register page numbers of the parallel CFR citations, consult the List of CFR Sections Affected above.

MONDAY, OCTOBER 3, 1977

highlights

SUNSHINE ACT MEETINGS..... 53717

WHITE CANE SAFETY DAY

Presidential proclamation..... 53591

VOCATIONAL EDUCATION

HEW/OE implements regulations to assist States and Commissioner's discretionary programs (Part VI of this issue) 53822

FLOOD CONTROL

DOD/Engineers proposes policy and procedures for regulating reservoir projects and use of storage allocated for flood control and navigation purposes; comments by 10-31-77 53637

TRANS-ALASKA PIPELINE LIABILITY FUND

Interior provides instructions for reporting oil discharge incidents 53682

CIVIL AIRCRAFT OPERATIONS

DOT/FAA proposes to revoke regulations prohibiting operation of civil aircraft between the United States and Canada or Mexico; comments by 1-3-78..... 53632

CCC NON-COMMERCIAL RISK ASSURANCE PROGRAM

USDA/CCC proposes regulations to protect U.S. exporters who sell agricultural commodities on deferred payment terms; comments by 11-2-77..... 53628

REPROGRAMMED SPECIAL CRISIS INTERVENTION PROGRAM FUNDS

CSA waives the non-Federal share requirement in support of weatherization activities..... 53600

ARCHITECTURAL GLAZING MATERIALS

CPSC proposes to amend safety standards; comments by 11-2-77 (3 documents) (Part IV of this issue).. 53798, 53801

RESOURCE CENTER FOR SCIENCE AND ENGINEERING PROGRAM

NSF publishes draft guide for the preparation of proposals for FY 1978..... 53683

TOXIC SUBSTANCES CONTROL

EPA issues supplemental notice to proposed inventory reporting requirements; comments by 11-2-77 and solicits comments by 10-13-77 on draft reporting forms (Part V of this issue)..... 53804

CONTROLLED SUBSTANCES

Justice/DEA issues proposed 1977 revised aggregate production quota-mixed alkaloids of opium under Schedule II..... 53682

CONTINUED INSIDE

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

INFORMATION AND ASSISTANCE

contents

THE PRESIDENT

Proclamations
White Cane Safety Day..... 53591

EXECUTIVE AGENCIES

AGRICULTURAL MARKETING SERVICE
Rules

Lemons grown in Ariz. and Calif. 53593
Milk marketing orders:
Inland empire..... 53595
Oranges (Valencia) grown in Ariz. and Calif. 53593
Pears (Beurre D'Anjou, Beurre Bosc, etc.) grown in Calif., Oreg., and Wash. 53594

AGRICULTURE DEPARTMENT
See also Agricultural Marketing Service; Commodity Credit Corporation.

Notices
Meat import limitations:
Fourth quarterly estimates.... 53649

ARMY DEPARTMENT
See Engineers Corps.

CIVIL AERONAUTICS BOARD

Rules
Organization and functions:
Operating Rights Bureau, Director; authority delegation. 53699

Notices
Meetings:
Air Charter Tour Operators of America; cancelled..... 53649
Hearings, etc.:
Aspen Airways, Inc., et al.; correction 53649
International Air Transport Association (2 documents) 53649, 53650
Wichita case et al. 53649

CIVIL RIGHTS COMMISSION

Notices
Meetings, State advisory committees:
Pennsylvania..... 53650
Wisconsin..... 53650

COMMERCE DEPARTMENT
See also Foreign-Trade Zones Board; National Bureau of Standards; National Oceanic and Atmospheric Administration.

Notices
Committees; establishment, renewals, terminations, etc.:
Western Pacific Fishery Management Council Advisory Panel 53651
White House Conference on Balanced National Growth and Economic Development Advisory Committee..... 53652

COMMODITY CREDIT CORPORATION

Proposed Rules
Export programs:
Risk assurance, non-commercial 53628

COMMUNITY SERVICES ADMINISTRATION

Financial management, grantee; Crisis intervention program

Rules
funds, non-Federal share waiver 53600

CONSUMER PRODUCT SAFETY COMMISSION

Proposed Rules
Architectural glazing materials; safety standards..... 53798

Notices
Architectural glazing materials; safety standards; petitions denied (2 documents)..... 53801

CUSTOMS SERVICE

Notices
Organization and functions; field organization; ports of entry, etc.:
Columbus, N. Mex.; reduction of hours; effective date extended 53695

DEFENSE DEPARTMENT

See also Engineers Corps.

Notices
Meetings:
Armed Forces Epidemiological Board (2 documents) .. 53654, 53655
Science Board task forces; Counter - Communications, Command and Control..... 53654

DRUG ENFORCEMENT ADMINISTRATION

Notices
Schedules of controlled substances; production quotas:
Opium, mixed alkaloids..... 53682

EDUCATION OFFICE

Rules
Vocational education programs; State and Commissioner's discretionary programs..... 53822

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

Proposed Rules
Electric and hybrid vehicle research development, and demonstration project; performance standards..... 53630

Notices
Committees; establishment, renewals, terminations, etc.:
Solar Working Group; establishment 53655
Environmental statements; availability, etc.:
Coal Research, Dev. & Dem. Program 53655
Nevada Test Site, Nev. 53656

Idaho Chemical Processing Plant, Idaho..... 53656
Portsmouth, Gaseous Diffusion Plant, Ohio..... 53657

ENGINEERS CORPS

Proposed Rules
Flood control:
Reservoir projects; regulation for flood control and navigation; storage use..... 53637

ENVIRONMENTAL PROTECTION AGENCY

Rules
Grants; subagreements:
Procurement under EPA grants; minimum standards; extension of time..... 53600

Proposed Rules

Air pollution; standards of performance for new stationary sources:
Gas turbines, stationary..... 53782
Noise abatement programs:
Transportation equipment; buses; correction..... 53647
Toxic substances:
Inventory reporting and general provisions; reproposal; clarifications 53804

Notices

Air pollution; standards of performance for new stationary sources:
Gas turbines..... 53657
Meetings:
National Drinking Water Advisory Council..... 53659
Science Advisory Board..... 53659
Pesticide applicator certification and interim certification; State plans:
Illinois 53657
Pesticide programs:
Toxicology Data Auditing Program; hearings..... 53660
Pesticide registration:
Heptachlor 5-G; denial withdrawn 53660
Water pollution; effluent guidelines for certain point source categories:
Pulp, paper and paperboard; variances, final decision..... 53661

FEDERAL AVIATION ADMINISTRATION

Rules
Airworthiness directives:
Boeing 53595
Pilatus 53596
Rolls Royce Dart..... 53597
Reporting points..... 53598
Restricted areas and Federal airways; correction..... 53598

Proposed Rules

Air traffic operating and flight rules:
Canada or Mexico, certain flight plan requirements eliminated. 53632
Airworthiness directives:
McDonnell Douglas..... 53631
Transition areas..... 53632

CONTENTS

FEDERAL COMMUNICATIONS COMMISSION

Proposed Rules
Telephone companies; jurisdictional separation:
Hawaii, Alaska, Puerto Rico and Virgin Islands..... 53647

Notices

Telephone automated dialing devices used for unsolicited recorded messages; extension of time 53661

FEDERAL HIGHWAY ADMINISTRATION

Notices

Road or highway projects; processing of grant applications; memorandum of understanding with Economic Development Administration and Commerce Department 53694

FEDERAL INSURANCE ADMINISTRATION

Rules

Flood Insurance Program, National:
Special hazard areas, map corrections (26 documents) 53742-53752

Proposed Rules

Flood Insurance Program, National:
Flood elevation determinations, etc. (51 documents) 53753-53780

FEDERAL MARITIME COMMISSION

Notices

Agreements filed, etc.:
Far East Conference et al. 53661
Guam Port Authority et al. 53663
Indiana Port Commission et al. 53662
Matson Navigation Co. et al. 53663

FEDERAL POWER COMMISSION

Rules

Policy and interpretations:
Alaska Natural Gas Transportation Act, implementation; report preparation, *ex parte* restrictions 53599

Notices

Hearings, etc.:
Area Rate Proceeding, et al. 53671
Arizona Public Service Co. 53663
Burk Royalty Co. et al. 53664
Central Telephone & Utilities Corp 53665
Duke Power Co. 53665
Eastern Shore Natural Gas Co. 53665
Flambeau Paper Co. et al. 53666
Illinois Power Co. (2 documents) 53666, 53667
Mesa Offshore Co. et al. 53672
Northern States Power Co. (2 documents) 53669
Pacific Gas & Electric Co. 53669
Panhandle Eastern Pipeline Co. 53670
Public Service Co. of Indiana... 53670
Puget Sound Power & Light Co. 53671
Southern California Edison Co. 53672
Southwestern Public Service Co. 53672
Transcontinental Gas Pipe Line Corp 53673
Washington Water Power Co. 53672

Wisconsin Electric Power Co et al 53673

FEDERAL REGISTER OFFICE

Rules
CFR checklist; 1976 and 1977 issuances..... 53593, 53627

FEDERAL RESERVE SYSTEM

Notices

Applications, etc.:
304 Corp..... 53675

FINE ARTS COMMISSION

Notices

Meetings 53654

FISCAL SERVICE

Notices

Surety companies acceptable on Federal bonds:
Republic-Franklin Insurance Co. 53695

FISH AND WILDLIFE SERVICE

Rules

Migratory bird hunting:
Steel shot, use of for waterfowl hunting in 1977 season; Minnesota, effective date postponed 53627

Notices

Endangered and threatened species permits; applications (2 documents) 53680, 53681

FOREIGN-TRADE ZONES BOARD

Notices

Foreign-trade zone applications:
Orange County, N.Y..... 53650

GENERAL SERVICES ADMINISTRATION

Notices

Property management regulations, temporary:
Travel, government; correction. 53675

HEALTH CARE FINANCING ADMINISTRATION

Notices

Health Insurance Programs; schedule of limits for cost reporting periods beginning Oct. 1, 1977 53675

HEALTH, EDUCATION, AND WELFARE DEPARTMENT

See Education Office; Health Care Financing Administration.

FEDERAL REGISTER PAGES AND DATES—OCTOBER

Pages	Date
53591-53891	Oct. 3

Table of Effective Dates and Time Periods—October 1977

This table is for use in computing dates certain in connection with documents which are published in the FEDERAL REGISTER subject to advance notice requirements or which impose time limits on public response. Federal Agencies using this table in calculating time requirements for submissions must allow sufficient extra time for FEDERAL REGISTER scheduling procedures.

In computing dates certain, the day after publication counts as one. All succeeding days are counted except that when a date certain falls on a weekend or holiday, it is moved forward to the next Federal business day. (See 1 CFR 18.17)

A new table will be published monthly in the first issue of each month. All January dates are in 1978.

Dates of FR publication	15 days after publication	30 days after publication	45 days after publication	60 days after publication	90 days after publication

Title 3—The President

PROCLAMATION 4528

White Cane Safety Day, 1977

By the President of the United States of America

A Proclamation

The white cane, an ingeniously simple device in an age of complex technology, helps assure that those with impaired or lost vision can lead rich and useful lives.

Remarkable progress in public attitudes toward blindness has been made in recent years. It is now widely understood that blindness need not be a barrier to full participation in social and economic life, and the white cane is responsible for some of this progress.

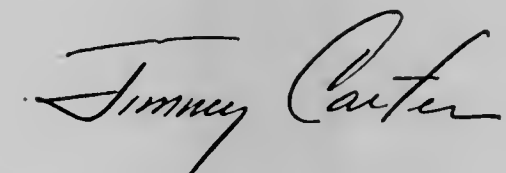

Nevertheless, in certain situations—on a busy street, near construction sites, or wherever there are unusual obstacles or hazards—a white cane user may still need help. Yet some people may be reluctant to offer it, for fear of saying or doing the wrong thing. Most blind people understand this hesitancy and are glad to explain their needs if they are asked.

The white cane also signals to motorists and cyclists that the user is blind—but it cannot signal the user that a vehicle is approaching. Thus it is the driver's responsibility to exercise extra caution.

To heighten public awareness of the importance of the white cane to the independence and safety of thousands of blind and visually handicapped Americans, the Congress, by a joint resolution approved October 6, 1964 (78 Stat. 1003; 36 U.S.C. 169d), has authorized the President to proclaim October 15 of each year as White Cane Safety Day.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim October 15, 1977, as White Cane Safety Day.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of September, in the year of our Lord nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and second.

1976/1977 Issuances

NOTE: The CFR checklist appears at page 53627 of this issue.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKET- ING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 574; Amdt. 1]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This amendment increases the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period September 23-29, 1977. The amendment recognizes that demand for Valencia oranges has improved, since the regulation was issued. This action will increase the supply of oranges available to consumers.

DATES: Weekly regulation period September 23-29, 1977.

FOR FURTHER INFORMATION CONTACT: Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-3545).

SUPPLEMENTARY INFORMATION: *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of recommendations and information submitted by the Valencia Orange Administrative Committee, established under the marketing agreement and order, and other available information, it is found that the limitation of handling of Valencia oranges as provided in this amendment will tend to effectuate the declared policy of the act.

(2) Demand in the Valencia orange markets has improved since the regulation was issued. Amendment of the regulation is necessary to permit orange handlers to ship a larger quantity of

Valencia oranges to market to supply the increased demand. The amendment will increase the quantity permitted to be shipped by 75,000 cartons, in the interest of producers and consumers.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information became available upon which this amendment is based and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restrictions on the handling of Valencia oranges.

(a) *Order, as amended.* The provisions in paragraph (a) (1) (i), and (ii) of § 908.874. Valencia Orange Regulation 574 (42 FR 47819) are hereby amended to read as follows:

§ 908.874 Valencia Orange Regulation 574.

(a) * * *

(1) * * *

(i) District 1: 330,000 cartons;

(ii) District 2: 495,000 cartons.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674).

Dated: September 28, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and
Vegetable Division, Agricultural
Marketing Service.

[FR Doc. 77-29010 Filed 9-30-77; 8:45 am]

[Lemon Reg. 113]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period October 2-8, 1977. This regulation is needed to provide for orderly marketing of fresh lemons for the regulation period because of the production and marketing situation confronting the lemon industry.

EFFECTIVE DATE: October 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-3545).

ment of Agriculture, Washington, D.C. 20250, telephone 202-447-3545.

SUPPLEMENTARY INFORMATION: *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of such lemons, as provided in this regulation, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the specified week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation for the quantity of lemons it considers advisable to be handled during the specified week. The recommendation resulted from consideration of the factors covered in the order. The committee further reports the demand for lemons continues good. Average f.o.b. price was \$7.45 per carton the week ended September 24, 1977, compared to \$7.34 per carton the previous week. Track and rolling supplies at 115 cars were down 5 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be established as provided in this regulation.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this regulation is based became available and the time when it must become effective to effectuate the declared policy of the act is insufficient. A reasonable time is permitted, for preparation for the effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for lemons and the need for regulation. Interested persons were afforded an opportunity to submit information and views at the meeting. The recommendation

tion and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning the provisions and effective time has been provided to handlers of lemons. It is necessary, to effectuate the declared policy of the act, to make this regulation effective as specified. The committee meeting was held on September 27, 1977.

§ 910.113 Lemon Regulation 113.

(a) Order. (1) The quantity of lemons grown in California and Arizona which may be handled during the period October 2, 1977, through October 8, 1977, is established at 205,000 cartons.

(2) As used in this section, "handled" and "carton(s)" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: September 28, 1977.

Director, Fruit and Vegetable
Division, Agricultural Market-
ing Service.

[FR Doc.77-28985 Filed 9-29-77; 11:26 am]

[3410-02]

[Pear Reg. 16, Amdt. 1]

PART 927—BEURRE D'ANJOU, BEURRE BOSC, WINTER NELIS, DOYENNE DU COMICE, BEURRE EASTER, AND BEURRE CLAIRGEAU VARIETIES OF PEARS GROWN IN OREGON, WASHINGTON, AND CALIFORNIA

Minimum Grade, Quality and Size Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final Rule.

SUMMARY: This regulation sets minimum grade and size requirements for fresh shipment of Beurre D'Anjou variety winter pears shipped from Oregon (except the Medford District), Washington, and California, and certain quality requirements for shipments from designated areas of Oregon and Washington, during the period August 8, 1977, through June 30, 1978. This action is necessary to assure that the pears shipped will be of suitable quality and size in the interest of consumers and producers.

EFFECTIVE DATE: August 8, 1977, through June 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-3545).

SUPPLEMENTARY INFORMATION: Findings. Notice was published in the FEDERAL REGISTER issue of August 18, 1977 (42 FR 41644), that the Department was giving consideration to a proposal sub-

mitted by the Control Committee to amend § 927.316 by changing the expiration date thereof from September 30, 1977, to June 30, 1978. The notice invited interested persons to submit written data, views, or arguments on the proposal not later than September 9, 1977. No such material was received.

However, subsequent to the notice period the committee recommended that the limitation specified in the regulation with respect to 180 size pears should not apply to pears of such size shipped in export markets. This recommendation is based on the current and prospective demand for such pears by export market outlets.

This amendment to Pear Regulation 16 is to be issued under the applicable provisions of the amended marketing agreement and Order No. 927 (7 CFR Part 927), regulating the handling of Beurre D'Anjou, Beurre Bosc, Winter Nelis, Doyenne du Comice, Beurre Easter, and Beurre Clairgeau varieties of pears grown in Oregon, Washington, and California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

After consideration of all relevant matters presented, including the recommendations made by the committee and other available information, it is hereby found that the regulation, as hereinafter set forth, is in accordance with the said amended marketing agreement and order and will tend to effectuate the declared policy of the act.

It is further found that good cause exists for not postponing the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that: (1) Shipments of D'Anjou Pears are currently in progress and to effectuate the declared policy of the act, the regulation, as hereinafter amended, should be extended without interruption for the remainder of the season; (2) compliance with the regulation will not require any special preparation on the part of handlers which cannot be completed by the effective time hereof; and (3) except for less restrictive size requirements on export shipments the provisions of this amendment are identical with the recommendation of the committee which was published in the aforesaid notice.

The provisions of § 927.316 (Pear Regulation 16; 42 FR 39670) are hereby amended to read as follows:

§ 927.316 Pear Regulation 16.

(a) During the period August 8, 1977, through June 30, 1978, no handler shall ship any Beurre D'Anjou variety of pears, except such variety grown in the Medford District, unless such pears meet the following requirements or are handled in accordance with paragraph (b) of this section: *Provided*, That, any Beurre D'Anjou pears shipped from the Medford District shall meet the requirements of subparagraph (2) of this paragraph.

(1) Beurre D'Anjou pears shall be of a size not smaller than 165 size and shall grade at least U.S. No. 2 except that any

handler may ship a quantity of Beurre D'Anjou pears that are not smaller than 180 size and not less than U.S. No. 1 grade which quantity shall not exceed 2 percent of the total U.S. No. 1 or better grades of such variety shipped by the handler, during the aforesaid period: *Provided*, That such limitation with respect to 180 size pears shall not apply to pears of such size shipped to export markets: *Provided further*, That, pears of such variety which bear unhealed skin punctures not exceeding 3/16 of an inch in diameter may be shipped if they otherwise grade at least U.S. No. 1 and are of a size not smaller than 135 size: *Provided, Further*, That, pears of such variety which fail to meet the U.S. No. 2 grade requirements only because of serious damage but not very serious damage caused by healed hail marks or by frost, may be shipped if the shape of the pear is such that it will cut at least one good half;

(2) Buerre D'Anjou pears shipped from the Medford, Hood River-White Salmon-Underwood, Wenatchee, and Yakima Districts through November 1, 1977, shall have an appropriate certification by the Federal-State Inspection Service, issued prior to shipment, showing that the core temperature of such pears has been lowered to 35 degrees Fahrenheit or less and any such pears for domestic shipment shall have an average pressure test of 14 pounds or less.

(b) During the aforesaid period, each handler may ship on any one conveyance up to, but not to exceed, 200 standard western pear boxes of Beurre D'Anjou variety of pears, or an equivalent quantity of pears in other containers computed by weight to the nearest 5 pounds, without regard to the inspection requirements of § 927.60(a), under the following conditions:

(1) Each handler desiring to make shipments of Beurre D'Anjou variety of pears pursuant to this paragraph shall first apply to the committee, on forms furnished by the committee, for permission to make such shipments. At the time of any such shipment the handler shall report to the committee on forms furnished by the committee, the car or truck number and the destination of the shipment.

(2) On the basis of such individual reports the committee shall require spot check inspection of such shipments.

(c) When used herein, "U.S. No. 1" and "U.S. No. 2" shall have the same meaning as when used in the United States Standards for Winter Pears (7 CFR 51.1300-51.1323); "135 size," "165 size," and "180 size," shall mean that the pears of such designated sizes will pack, in accordance with the sizing and packing specifications of a standard pack as specified in said United States Standards, 135, 165, or 180 pears, respectively, in a standard western pear box (inside dimensions 18 inches long by 11½ inches wide by 8½ inches deep); and, except as otherwise specified, all other terms shall have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Dated: September 28, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable
Division, Agricultural
Marketing Service.

[3410-02]

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK) DEPARTMENT OF AGRICULTURE

[Milk order No. 133]

PART 1133—MILK IN THE INLAND EMPIRE MARKETING AREA

Order Suspending Certain Provisions and Termination of Proceeding

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules and termination of proceeding.

SUMMARY: This action relaxes for September, October and November 1977 the limits on the amount of milk not needed for fluid (bottling) use that may be moved directly from farms to manufacturing plants and still be priced under the order. The suspension is based on a cooperative association's proposal considered at a public hearing held for this order on September 15, 1977, in Spokane, Wash. This action will aid in the continued association of milk of producers under the order.

EFFECTIVE DATE: October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-7183).

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of Hearing—Issued August 29, 1977; published September 2, 1977 (42 FR 44243).

This order of suspension and termination of proceeding is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the order regulating the handling of milk in the Inland Empire marketing area.

It is hereby found and determined that for the months of September, October and November 1977 the following provisions of the order do not tend to effectuate the declared policy of the Act and are hereby suspended.

1. In § 1133.13(c) (1) and (2), the words "50 percent in any of the months of September through March, and", and the words "in any of the months of April through August,".

STATEMENT OF CONSIDERATION

This action increases the limit on the amount of producer milk that a coopera-

tive association or other handlers may divert from pool plants to nonpool plants during the months of September, October and November 1977. In the case of a cooperative, the limit is increased from 50 percent to 70 percent of its total member milk received at all pool plants or diverted therefrom. For the operator of a pool plant, the higher 70 percent limit would apply to the milk received at or diverted from such pool plant from producers who are not members of a cooperative that has diverted milk. The order now permits diversions of up to 50 percent of such receipts for the months of September through March and 70 percent for all other months.

Such action is based upon a public hearing held for this order on September 15, 1977, at Spokane, Washington. A cooperative association that supplies the market with a substantial part of its fluid milk needs and handles most of the market's reserve milk supplies proposed that emergency action be taken to provide for the months of September, October and November 1977 the same diversion limits (a maximum of 70 percent) that apply during the heavy milk production months of April through August. The proposal was unopposed at the hearing.

Reserve milk supplies in this market, most of which are diverted from pool plants to nonpool manufacturing plants by the proponent cooperative, usually decline during the fall months. However, beginning in September this year reserve milk supplies are expected to exceed the quantity of milk that could be diverted to nonpool manufacturing plants under the present diversion limitations and still maintain producer status for all such milk.

At the hearing, the cooperative indicated that the present build up in the market's reserve milk supplies is largely due to a substantial increase in milk production by producers regularly supplying the market. Deliveries by producers are above year earlier levels (up over 10 percent for the first seven months of 1977 compared to the same months in 1976). At the same time, fluid milk sales have declined (down 2.4 percent during the first seven months of 1977 from the comparable period in 1976). Consequently, the need to divert additional reserve milk to manufacturing outlets, as indicated by the cooperative, will be necessary beginning in September. The cooperative also indicated that without immediate action, it expects that some of the milk of its member producers, who have regularly supplied the fluid milk needs of the market, and whose milk is expected to be needed when the supply-demand situation improves, will be excluded from the pool beginning in September. Immediate action is thus necessary to assure that producers who are regular suppliers of milk for the fluid market will continue to have their milk pooled and priced under the order.

Any delay in relaxing the limits on diversions could deprive certain dairy farmers producer status under the order beginning in September. Therefore, this suspension order is the only practicable

means of assuring continued producer status of certain dairy farmers associated with the market for September, October and November 1977. There is insufficient time to resolve the diversion problem for September and October 1977 on an amendatory basis, and amendatory action for November could be accomplished only through emergency procedures, which would entail the omission of a recommended decision and the opportunity to file exceptions thereto. It is concluded, therefore, that the requested relief for all three months should be resolved by this suspension and that the hearing proceeding be terminated.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that substantial quantities of milk of producers who regularly supply the fluid market otherwise would be excluded from the marketwide pool, thereby causing a disruption in the orderly marketing of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Producers requested this suspension at a public hearing held on September 15, 1977, and such action was not opposed.

Therefore, good cause exists for making this order effective upon publication in the FEDERAL REGISTER.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended with respect to fluid milk marketings during the months of September, October and November 1977, and that the proceeding which began August 29, 1977 (Docket No. AO-275-A29; 42 FR 44244) is hereby terminated.

(Secs. 1-19, 48 Stat. 31, as amended; U.S.C. 601-674.)

Effective date: October 3, 1977.

Signed at Washington, D.C. on September 27, 1977.

JERRY C. HILL,
Deputy Assistant Secretary.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 77-NW-25-AD; Amdt. 39-3048]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: This amendment revises Airworthiness Directive (AD) 77-18-06 which requires inspections of the horizontal stabilizer center section front spar

junction fitting on Boeing Model 727 series airplanes. The amendment is necessary to relieve an unnecessary burden by clarifying the repetitive inspection requirements of that AD.

DATES: Effective date: October 3, 1977.
FOR FURTHER INFORMATION CONTACT:

Gerald R. Mack, Airframe Section, ANW-212, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108, telephone 206-767-2516.

SUPPLEMENTARY INFORMATION: Amendment 39-3034 (42 FR 45629), AD 77-18-06, was issued on September 1, 1977, to require inspections for cracks of the horizontal stabilizer center section front spar junction fittings, which were made from 7079-T6 aluminum alloy material, on Boeing Model 727 series airplanes. Due to adverse service experience, this AD superseded AD 77-10-08, which required a one-time visual inspection within 750 flight hours and a one-time eddy current or dye penetrant inspection within 3,000 flight hours.

After issuing Amendment 39-3034, the FAA became aware that the first repetitive inspection for airplanes inspected prior to the effective date of the amendment (September 12, 1977), may be required far earlier than intended. The repetitive inspections would unintentionally penalize operators.

Accordingly, paragraph C of the AD is being revised to clarify the intended compliance time for the initial repetitive inspection of previously eddy current or dye penetrant inspected airplanes.

Since this amendment is relieving in nature and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are Gerald R. Mack, Engineering and Manufacturing Branch, FAA Northwest Region, and Jonathan Howe, Regional Counsel, Northwest Region.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13), Amendment 39-3034, AD 77-18-06, is amended by amending paragraph C to read as follows:

C. 1. Except as provided for in paragraph C.2 below, repeat the inspections per paragraph B of this AD at intervals of either a or b below:

a. 1,500 flight hours time-in-service or nine (9) months from the last inspection, whichever occurs first, or

b. 3,000 flight hours time-in-service or eighteen (18) months from the last inspection, whichever occurs first, if the fittings are reworked in accordance with Boeing Alert Service Bulletin No. 727-55-A69, Revision 1, or later FAA approved revisions, or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

2. Airplanes which were inspected prior to the effective date of this AD (September 12, 1977), and since April 20, 1977 (by eddy current or dye penetrant methods equivalent to those specified in paragraph B of AD 77-10-08), may be reinspected in accordance with a or b below but are subject to the limitations set out in c below:

a. Within 1,500 flight hours time-in-service from the last inspection.

b. Within 750 flight hours time-in-service from the effective date of this AD (September 12, 1977).

c. Notwithstanding the provisions of paragraph a and b above, the repeat inspection must be accomplished no later than nine (9) months from the effective date of this AD and thereafter at the intervals specified in c.1.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to Boeing Commercial Airplane Co., P.O. Box 3707, Seattle, Wash. 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Wash. 98108.

This amendment becomes effective October 3, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); and Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Seattle, Wash., on September 23, 1977.

J. H. TANNER,
Acting Director,
Northwest Region.

(The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.)

[FR Doc. 77-28992 Filed 9-30-77; 8:45 am]

[4910-13]

[Docket No. 14806; Amdt. 39-3050]

PART 39—AIRWORTHINESS DIRECTIVES

Pilatus Aircraft, Ltd., and Fairchild Hiller Model PC-6 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires repetitive inspections and anticorrosive treatment or replacement, if necessary, of the wing struts on all Pilatus Aircraft, Ltd., and certain Fairchild Hiller Model PC-6 airplanes and of wing strut brackets on Pilatus Aircraft, Ltd., Model PC-6 airplanes. This AD is required to prevent degradation of wing

strut and wing strut bracket structural strength beyond safe limits which could result in wing structural failure.

DATES: Effective November 3, 1977. Compliance schedule, as prescribed in the body of the AD.

ADDRESSES: The applicable service bulletins may be obtained from Pilatus Aircraft, Ltd., 6370 Stans, Switzerland and Fairchild Republic Division, Hagerstown, Md. 21740. Copies of the service bulletins are contained in the Rules Docket, Rm. 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium. Tel. 513.38.30.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring repetitive inspections and anticorrosive treatment of the wing struts and the wing strut attachment brackets on Pilatus Model PC-6 airplanes manufactured by Pilatus Aircraft, Ltd., was published in the FEDERAL REGISTER at 40 FR 30980. The proposal was prompted by reports of corrosion developing inside the wing struts and on the wing strut attachment brackets of Pilatus PC-6 airplanes that could result in weakening and eventual failure of the struts and brackets with consequent wing structural failure.

Interested persons were afforded an opportunity to participate in the making of this amendment. No comments were received. However, the FAA has determined that certain Model PC-6 airplanes manufactured by Fairchild Hiller are subject to the same wing strut corrosion problem as the Model PC-6 airplanes manufactured by Pilatus Aircraft, Ltd. Therefore, the applicability statement of the proposal has been revised to cover specified Fairchild Hiller Model PC-6 airplanes. In addition, several clarifying changes have been made to the proposal. These include the addition of the words "certificated in all categories" to the proposal's applicability statement and the reorganization of the proposal to more clearly state the requirement for replacing struts or brackets. Since this AD is needed to prevent wing structural failures in service, it is found that additional notice and public procedure hereon are impracticable.

DRAFTING INFORMATION

The principal authors of this document are D. C. Jacobsen, Europe, Africa, and Middle East Region, J. J. Presba, Flight Standards Service, and R. Lane, Office of the Chief Counsel.

ADOPTION OF AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

PILATUS AIRCRAFT, LTD. AND FAIRCHILD HILLER. Applies to Model PC-6 airplanes (all variants) manufactured by Pilatus Aircraft, Ltd., up through S/N 724 and to Model PC-6 airplanes (all variants) manufactured by Fairchild Hiller, S/N's 2001 through 2047, certificated in all categories.

Compliance is required within the next 25 hours time in service after the effective date of this AD, unless already accomplished within the last 75 hours time in service, and thereafter at intervals not to exceed 100 hours time in service from the last inspection, until the conditions of paragraph (c) are met.

(a) To prevent a hazardous degree of corrosion from developing inside the wing struts, accomplish the following:

(1) Visually inspect the internal surface of each wing strut for corrosion in accordance with paragraph 2.1 of Pilatus Aircraft Ltd., Service Bulletin No. 105, dated May 1971, (hereinafter S.B. No. 105) for Pilatus manufactured airplanes or paragraph 2A of Fairchild Hiller Service Bulletin PC6-57-3, dated July 15, 1971 (hereinafter S.B. PC6-57-3), for Fairchild Hiller airplanes, or an FAA-approved equivalent.

(2) If only light corrosion (corrosion which has not caused surface blistering) is found during an inspection required by paragraph (a) (1) of this AD, within the next 100 hours time in service or within the next 60 days after finding the corrosion, whichever occurs sooner, remove the corrosion from, and apply an anticorrosive treatment to, the inside of the wing strut in accordance with paragraph 2.3 of S.B. No. 105 or paragraph 2D of S.B. PC6-57-3, as applicable, or an FAA-approved equivalent.

(3) If corrosion is found during an inspection required by paragraph (a) (1) of this AD which has resulted in exceeding the limits prescribed in paragraph (a) (2), within the next 100 hours time in service or within the next 60 days after finding the corrosion, whichever occurs sooner, replace the wing strut with a serviceable strut of the same part number that has had anticorrosive treatment applied to the inside surface in accordance with paragraph 2.3 of S.B. No. 105 or paragraph 2D of S.B. PC6-57-3, as applicable, or an FAA-approved equivalent.

(b) For Pilatus Aircraft, Ltd., Model PC-6 airplanes, S/N's 338 through 701, to prevent a hazardous degree of corrosion from developing on the wing strut attachment brackets, accomplish the following:

(1) Visually inspect each wing strut attachment bracket for corrosion in accordance with paragraph 2.1 of Pilatus Aircraft, Ltd., Service Bulletin No. 93, dated June 1969, (hereinafter S.B. No. 93) or an FAA-approved equivalent.

(2) If only light corrosion (corrosion which has caused 2 percent to 10 percent reduction in cross-section per paragraph 2.2 of S.B. No. 93) is found during an inspection required by paragraph (b) (1) of this AD, within the next 100 hours time in service or within the next 60 days after finding the corrosion, whichever occurs sooner, remove the corrosion and apply an anti-corrosive treatment to the wing strut attachment bracket in accordance with paragraph 2.4 of S.B. No. 93, and reinstall the bracket in accordance with paragraph 2.5.1 of S.B. No. 93 or an FAA-approved equivalent.

(3) If corrosion is found during an inspection required by paragraph (b) (1) of this AD which has resulted in exceeding the limits prescribed in paragraph (b) (2) of this AD, within the next 100 hours time in service or within the next 60 days after finding the corrosion, whichever occurs sooner, replace the wing strut attachment bracket with a new wing strut attachment bracket [P/N 111.35.06.055 (left) or 111.35.06.056

(right)] in accordance with paragraph 2.5.2 of S.B. No. 93 or an FAA-approved equivalent.

(c) The inspections required by paragraph (a) (1) or (b) (1) of this AD may be discounted, in accordance with the following:

(1) Inspection of the wing strut when the strut has had light corrosion removed and has had the anticorrosive treatment in accordance with paragraph (a) (2) or when the strut has been replaced in accordance with paragraph (a) (3) of this AD.

(2) Inspection of the wing strut attachment bracket when the bracket has had light corrosion removed and has had the anticorrosive treatment in accordance with paragraph (b) (2), or when the bracket has been replaced in accordance with paragraph (b) (3) of this AD.

This amendment becomes effective November 3, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on September 23, 1977.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[4910-13]

[Docket No. 17053; Amdt. 39-3049]

PART 39—AIRWORTHINESS DIRECTIVES

Rolls Royce Dart Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires an inspection of the "Aeroquip" fuel burner feed and manifold pipes and reworking or replacement, if necessary, of the pipes on certain Rolls Royce Dart engines to prevent the failure of the pipes which could result in fuel leaks and a fire.

DATES: Effective November 3, 1977. Compliance required within the next 2,000 hours engine time in service after the effective date of this AD, unless already accomplished.

ADDRESSES: The applicable service bulletin may be obtained from: Rolls Royce, Ltd., P.O. Box 31, Derby, DE 8 BJ, England.

A copy of the applicable service bulletin is contained in the Rules Docket, Rm. 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa,

and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, Tel. 513.38.30.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring an inspection of the "Aeroquip" fuel burner feed and manifold pipes and reworking or replacement, if necessary, of the pipes on certain Rolls Royce Dart engines, was published in the FEDERAL REGISTER at 42 FR 38387 on July 28, 1977. The proposal was prompted by reports of failures of the fuel burner feed and manifold pipes on certain Rolls Royce Dart engines that could result in fuel leakage and a fire.

Interested persons have been afforded an opportunity to participate in the making of the amendment. No objections were received. Accordingly, the proposal is adopted without change.

The principal authors of this document are R. E. Follensbee, Western Region, R. F. Nugent and F. H. Kelley, Flight Standards Service, and K. May and R. Burton, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

ROLLS ROYCE AERO, LTD. Applies to Dart engines Series 506, 510, 511, 514, 526, 528, 529, 532 and variants, installed on, but not necessarily limited to, BAC Viscount 744 and 745D; Fokker F-27 Mk. 100, 200, 300, 400, 600, 700; Fairchild F-27, 27A, 27B, 27F, 27G, 27J, 27M; Fairchild-Hiller FH-227, 227B, 227C, 227D, 227E; Armstrong Whitworth Argosy 650, Series 101; Grumman G-159; and Hawker Siddeley HS-748 Series 2A aircraft.

Compliance is required within the next 2,000 hours engine time in service after the effective date of this AD, unless already accomplished.

To prevent the failure of the fuel burner feed and manifold pipes that could result in fuel leakage and a fire, accomplish the following:

(a) Inspect the fuel burner feed and manifold pipes and determine if any of the pipes meet both of the following specifications:

(1) The pipe is an "Aeroquip" pipe incorporating Dart Modification 1587 and having one of the following part numbers:

RK. 38457A Pipe Assembly—Fuel Feed to No. 4 Burner.

RK. 38458A Pipe Assembly—Fuel Feed to Nos. 1, 2 and 7 Burners.

RK. 38456A Pipe Assembly—Fuel Feed to Nos. 3 and 6 Burners.

RK. 38458A Pipe Assembly—Fuel Feed to No. 5 Burner.

RK. 45363A Fuel Manifold—Assembly No. 5 to F.C.U. Bulkhead Connection.

(2) The pipe was manufactured prior to March 1, 1974, and the metal identity tag located around the fireproof sleeve of the pipe (which contains the date of manufacture) has not been marked with (i) the marking "DRS.685"; (ii) an engine number or a running time; (iii) a second date marking in brackets which is later than March 1, 1974; or (iv) the marking "ZERO".

(b) If, during the inspection required by paragraph (a) of this AD, a pipe is found that meets the specifications contained in

paragraph (a) of this AD, before returning the engine to service, inspect the pipe for the presence of corroded, cracked, or broken wires using 5X or 10X magnification in accordance with the instructions contained in paragraphs 4A and 4B of Rolls Royce Dart Service Bulletin Da 73-73, dated August 29, 1975 (hereinafter SB Da 73-73), or an FAA-approved equivalent, and comply with paragraph (c) or (d) of this AD, as applicable.

(c) If, during the inspection required by paragraph (b) of this AD, the pipe wires are found to be corroded, cracked or broken, before returning the engine to service, replace the pipe with a serviceable pipe or rework in accordance with paragraph 4B(7) of SB Da 73-73, or an FAA-approved equivalent.

(d) If, during the inspection required by paragraph (b) of this AD, the pipe is found to be serviceable, before returning the engine to service, clean and identify the pipe in accordance with paragraphs 4B(4) and 4B(6) of SB Da 73-73, or an FAA-approved equivalent.

(e) The FAA-approved equivalent means of compliance specified in paragraphs (b), (c), and (d) of this AD must be approved by the Chief, Aircraft Certification Staff, FAA, Europe, Africa, and Middle East Region, c/o American Embassy, APO New York, N.Y. 09667.

This amendment becomes effective November 3, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on September 23, 1977.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[Airspace Docket No. 76-AL-16]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Reporting Points

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment redesignates the FRIED and MOCHA reporting points for high and low air traffic use and rescinds the MUZON reporting point. This action will assist in the control of air traffic in the area southwest of Annette Island, Alaska.

EFFECTIVE DATE: December 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AT-230), Airspace and Air Traffic Rules Division,

Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

HISTORY

On August 15, 1977, the FAA published for comment a proposal to designate and alter two reporting points southwest of Annette Island, Alaska, and to rescind the MUZON reporting point which is collocated with the MOCHA reporting point (42 FR 41136). Interested persons were invited to participate in the rule making proceeding by submitting written comments on the proposal to the FAA. No comments were received.

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations (FARs) redesignates two reporting points, one at FRIED and one at MOCHA intersections for use in both high and low flight operations. It also rescinds the MUZON reporting point to avoid having a single reporting point with two different names.

DRAFTING INFORMATION

This principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart I of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 626) is amended, effective 0901 GMT, December 1, 1977, as follows:

In § 71.211 (42 FR 638) FRIED: "(INT Nichols, Alaska, NDB 236°; Sandspit, British Columbia, Canada, NDB 314° bearings)." is deleted and "(INT Annette Island, Alaska, 237°, Sandspit, British Columbia, Canada, 313° radials)." is substituted therefor.

In § 71.211 (42 FR 638) MOCHA: "(INT Nichols, Alaska, NDB 236°; Sandspit, British Columbia, Canada, 331° bearing)." is deleted and "(INT Annette Island, Alaska, 237°, Sandspit, British Columbia, Canada, 331° radials)." is substituted therefor.

In § 71.211 (42 FR 638) MUZON: title and text is deleted.

In § 71.213 (42 FR 640) "FRIED: Lat. 54°14'23" N., Long. 133°39'49" W. (INT Annette Island, Alaska, 237°, Sandspit, British Columbia, Canada, 313° radi-

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), and 1510); Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal

requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on September 26, 1977.

EDWARD J. MALO,
Acting Chief, Airspace and
Air Traffic Rules Division.

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

PART 73—SPECIAL USE AIRSPACE

Alteration of Federal Airway and Restricted Area—Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: In a rule published in the Federal Register of August 15, 1977, Volume 42, page 41110, a set of geographic coordinates were inadvertently omitted. This correction includes the geographic coordinates of "Lat. 20°36'20" N., Long. 156°34'50" W.," which should have been included.

EFFECTIVE DATE: October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION: FR Doc. 77-23324 was published on August 15, 1977 (42 FR 41110), with an effective date of October 6, 1977, and realigned a segment of VOR Federal Airways identified as V-2 and V-21 Hawaii and redefined Restricted Area R3104 Island of Kahoolawe, Hawaii. In the description of R-3104 a set of geographic coordinates were inadvertently omitted. Action is taken herein to correct this error.

ADOPTION OF THE CORRECTION

Accordingly, pursuant to the authority delegated to me by the Administrator, FR Doc. 77-23324, appearing on page 41110 in the Federal Register of August 15, 1977, the amendatory language to § 73.31 is corrected to read as follows:

In R-3104A, R-3104B, and R-3104C Island of Kahoolawe, Hawaii, "20°37'00" N., Longitude 156°35'15" W.," is deleted and "20°36'20" N., Longitude 156°36'30" W.," to Latitude 20°36'20" N., Longitude 156°34'50" W.," is substituted therefor.

(Sec. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) of 1354(a); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)) and 14 CFR 11.69.)

Issued in Washington, D.C., on September 27, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air
Traffic Rules Division.

[FR Doc. 77-28989 Filed 9-30-77; 8:45 am]

[6320-01]

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER E—ORGANIZATION REGULATIONS

[Reg. OR-121, Amdt. 63]

PART 385—DELEGATIONS AND REVIEW OF ACTION UNDER DELEGATION; NON-HEARING MATTERS

Amendment of Delegation of Authority to the Bureau of Operating Rights

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This rule grants the Bureau of Operating Rights delegated authority to dismiss, when technically inadequate, certain applications for removing or modifying restrictions in a certificate of public convenience and necessity. Since dismissal of such applications does not involve policy decisions, the Board initiated this rule to remove an administrative burden.

DATES: Effective: September 27, 1977. Adopted: September 27, 1977.

FOR FURTHER INFORMATION CONTACT:

Barry S. Spector, Bureau of Operating Rights, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5334).

SUPPLEMENTARY INFORMATION: The Board's regulations set forth special rules applicable to proceedings on certain applications for removal or modification of restrictions in certificates of public convenience and necessity. These rules are contained in Subparts M (§§ 302, 1301-1315) and N (§§ 302.1401-1405) of the Board's Procedural Regulations. They generally provide for a more limited evidentiary hearing and certain expedited procedures following the hearing.

Each subpart contains a provision that upon consideration of an application and responses filed under that subpart, the Board may dismiss the application, without prejudice to refile in amended form or under the normal certificate procedure, if the Board finds that the application is not in compliance with the provisions of the subpart sections 302.1305 and 302.1405. Such dismissals are based solely on technical compliance with the special rules set forth in Subparts M and N. No policy determinations are made by the Board.

In view of the above, the Board has determined that the administration and operation of its regulations will be improved by delegating to the Bureau of Operating Rights authority to dismiss Subpart M and N applications when they do not comply with the provisions of

those subparts. By delegating this authority to the Bureau, the Board can relieve itself of an administrative burden in an area that does not require any policy decisions from the Board.

Since this amendment is administrative in nature, affecting a rule of agency organization and procedure, it is found that notice and public procedure are unnecessary, and that the rule may become effective immediately.

Accordingly, the Board hereby amends Part 385 of its Organization Regulations (14 CFR Part 385) as follows:

In § 385.13, a new paragraph (j) is added to read as follows:

§ 385.13 Delegation to the Director, Bureau of Operating Rights.

(j) Dismiss applications filed under §§ 302.1301-1315 and §§ 302.1401-1415, without prejudice to refile in amended form or under the normal certificate procedure, if the application is not in compliance with the provisions of these sections.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 49 U.S.C. 1324; Reorganization Plan No. 3 of 1961, 75 Stat. 837, 26 FR 5989; 49 U.S.C. 1324 (note).)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL POWER COMMISSION

SUBCHAPTER B—REGULATIONS UNDER THE NATURAL GAS ACT

[Docket No. RM77-6; Order No. 558-G]

PART 2—STATEMENT OF PROCEDURE PRESCRIBED FOR THE IMPLEMENTATION OF THE ALASKA NATURAL GAS TRANSPORTATION ACT OF 1976, 15 U.S.C. 719, ET SEQ.

Order

AGENCY: Federal Power Commission.

ACTION: Final rule.

SUMMARY: This order amends the Commission's regulations implementing the Alaska Natural Gas Transportation Act of 1976. The Commission is required to submit a Report to the Congress commenting upon the President's selection. The Report is due twenty days after the President's transmittal. This order provides for designation of a group to prepare the Commission's Report. It also provides that designated members are not bound by certain ex parte restrictions imposed previously.

EFFECTIVE DATE: September 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Brian J. Heisler, Office of the General Counsel, 202-275-4286.

SUPPLEMENTARY INFORMATION:

ORDER PRESCRIBING FURTHER PROCEDURES AND AMENDING SECTION 2.100 OF THE COMMISSION'S GENERAL POLICY AND INTERPRETATIONS

Pursuant to Section 16 of the Natural Gas Act (52 Stat. 830, 15 U.S.C. 717o) and Sections 3, 5 and 8 of the Alaska Natural Gas Transportation Act of 1976 (90 Stat. 2904, et seq., 15 U.S.C. 719c), the Commission is hereby amending § 2.100 of its General Policy and Interpretations (13 CFR 2.100) to prescribe procedures for preparation of a report to the Congress commenting upon the President's decision which is scheduled for September 1, 1977. In preparation of its Report the Commission is directed to submit its comment within 20 days of the President's transmittal and to include any information with regard to the President's decision which the Commission considers appropriate. This order expands the procedural schedule set out in Order No. 558, issued December 14, 1976, which culminated in the Recommendation to the President issued May 1, 1977.

In order to permit preparation of this report to the Congress in the 20 days allotted, it will be necessary to utilize all Commission employees without regard to their previous roles in the development of the record. In this regard an exception must be provided to the procedures previously adopted in Paragraph (e) of § 2.100, Part 2, Subchapter A, Chapter I, Title 18 of the Code of Federal Regulations, which presently provides as follows:

§ 2.100 Statement of procedures prescribed for the implementation of the Alaska Natural Gas Transportation Act of 1976, 15 U.S.C. 719, et seq.

(e) The ex parte rule of the Commission, as set forth in 18 CFR 1.4(c), shall not apply hereunder except that the Commission or a delegate shall not receive communications regarding matters of substance from any of the following persons:

- (1) Any applicant, or affiliate thereof, or any witness for an applicant;
- (2) Counsel for any applicant or party to the proceeding; and
- (3) Any party or any witness for such party, if such person has advocated on the record the approval or rejection of any project proposed by any applicant.

The restrictions in this subsection shall not apply to written communications for presentation of or analysis of supplemental information or data that are filed or received pursuant to the terms of Order 558-C.

The restrictions imposed in this section were designed in part to insure impartiality in the process through which the exceptions of the parties were considered and to allow a continued advocacy role for the Staff members who participated as a party throughout the hearings and in the oral argument. The consideration of the exceptions raised by the parties was concluded by the Recommendation to the President issued May 1, 1977,¹ and Staff's advocacy role

¹ We rejected El Paso Alaska Company's petition for reconsideration on June 10, 1977.

was completed in oral argument. The rationale of subsection (e) with respect to Staff communication thus no longer applies and should not remain in effect for the comment prepared pursuant to this order. Of course, the Commission in evaluating materials presented by Staff members will be cognizant of any position previously taken by such person.

The Commission finds: (1) It is necessary and appropriate in carrying out the provisions of the Alaska Natural Gas Transportation Act of 1976 that § 2.100 of the Commission's General Policy and Interpretations be amended to provide for preparation of a report commenting on the President's decision as provided herein.

(2) In view of the purpose, intent and effect of the amendment, good cause exists for making it effective upon receipt of the report from the President.

The Commission, acting pursuant to the provisions of the Alaska Natural Gas Transportation Act of 1976, (90 Stat. 830, 15 U.S.C. 719 et seq.) particularly Sections 3, 5 and 8 thereof, and pursuant to the Natural Gas Act, particularly Section 16 thereof (52 Stat. 830, 15 U.S.C. 7170) orders:

Section 2.100, Part 2, Subchapter A, Chapter I, Title 18 of the Code of Federal Regulations is amended by adding a new paragraph (f) to read as follows:

§ 2.100 Statement of procedures prescribed for the implementation of the Alaska Natural Gas Transportation Act of 1976, 15 U.S.C. 719 et seq.

(f) Notwithstanding the provisions of paragraph (d) of this section, the Chairman shall designate by letter persons to assist the Commission in preparation of its report to the Congress commenting upon the President's decision. Ex parte restrictions imposed by paragraphs (d) and (e) of this section shall not apply to communications from such persons to the Commission in concerning this report.

By the Commission.

KENNETH F. PLUMB,
Secretary.

Title 40—Protection of Environment CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER B—GRANTS AND OTHER FEDERAL ASSISTANCE [FRL 797-1]

PART 33—SUBAGREEMENTS

Minimum Standards for Procurement Under EPA Grants

AGENCY: Environmental Protection Agency.

ACTION: Interim rule.

SUMMARY: This amendment changes the effective date of the interim sub-

agreement regulations to allow additional time to consider alternatives.

EFFECTIVE DATE: March 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Alexander J. Greene, Director, Grants Administration Division (PM-216), Environmental Protection Agency, Washington, D.C. 20460 (202-755-0850).

SUPPLEMENTARY INFORMATION: Interim subagreement regulations were promulgated by the Environmental Protection Agency on February 8, 1977 (42 FR 8089) with an effective date of March 31, 1977, which was subsequently extended to October 1, 1977 (42 FR 33033). By this action, the effective date is changed as follows:

EFFECTIVE DATE. These interim Part 33 subagreement regulations shall become effective on March 1, 1978, and shall govern all procurement actions under grants awarded on or after that date. Procurement actions taken under grants awarded prior to March 1, 1978, are subject to these regulations if the grant (1) includes a special condition requiring compliance with 40 CFR Part 33, or (2) is a Section 208 FWPCA grant subject to EPA Program Guidance Memorandum SAM-14 (published April 27, 1976, at 41 FR 17702).

Dated: September 27, 1977.

DOUGLAS M. COSTLE,
Administrator.

Title 45—Public Welfare

CHAPTER X—COMMUNITY SERVICES ADMINISTRATION

[CSA Instruction 6802-8]

PART 1068—GRANTEE FINANCIAL MANAGEMENT

Subpart—Waiver of Non-Federal Share; Reprogrammed Special Crisis Intervention Program Funds

AGENCY: Community Services Administration.

ACTION: Final rule.

SUMMARY: The Community Services Administration is waiving the non-Federal share requirement for those funds which are converted from Program Account No. 22 in the Special Crisis Intervention Program to Program Account No. 21 in support of Weatherization. CSA had previously stated that those funds would be subject to existing CSA non-Federal share requirements. This rule will relieve grantees of the burden of mobilizing additional matching resources for which they had no opportunity to plan due to circumstances beyond their control.

DATE: This rule becomes effective October 3, 1977, since it benefits all grantees involved.

FOR FURTHER INFORMATION CONTACT:

Mr. Walter Lumpkin, Community Services Administration, Office of Operations, Emergency Energy Conservation Program, 1200 19th Street NW., Washington, D.C. 20506. Telephone: 202-254-5240.

SUPPLEMENTARY INFORMATION: On June 29, 1977 CSA published in the FEDERAL REGISTER a letter and a memorandum dated May 25, 1977, by which the Governor of each State, Puerto Rico, and the Virgin Islands and the Mayor of the District of Columbia had been notified that funds for the Special Crisis Intervention Program were available and which detailed the conditions under which the program would be operated. The memorandum also noted that the funds granted to each State which could not be obligated effectively for crisis intervention by the expiration date of the program would be reprogrammed for support of weatherization activities and that those funds would be subject to existing CSA non-Federal share requirements.

However, grantees had no way of knowing about the extent of this additional funding, or whether in fact funds would be available at all for conversion to weatherization, and therefore have had no opportunity to plan for additional matching resources. Moreover, these funds came at the same time as grantees received a three hundred percent increase in energy funding which itself has all but exhausted the sources of such non-Federal assistance. Under these circumstances and inasmuch as these funds were originally appropriated by the Congress for a program with no non-Federal share requirement, CSA has determined that it is programmatically logical to waive the non-Federal share requirement for those funds which are converted from Program Account No. 22 in the Special Crisis Intervention Program, to Program Account No. 21 in support of Weatherization.

GRACIELA (GRACE) OLIVAREZ,
Director.

45 CFR Part 1068 is amended by adding a new subpart as follows:

Subpart—Waiver of Non-Federal Share; Reprogrammed Special Crisis Intervention Program Funds

Sec.
1068.25-1 Applicability.
1068.25-2 Policy.

AUTHORITY: Sec. 802, 78 Stat. 530; (42 U.S.C. 2942).

Subpart—Waiver of Non-Federal Share; Reprogrammed Special Crisis Intervention Program Funds

§ 1068.25-1 Applicability.

This subpart applies to grants made under section 222(a)(12) of the Economic Opportunity Act of 1964, as amended, for the Special Crisis Intervention Program funds which were part of the fiscal year 1977 Supplemental Appropriation.

§ 1068.25-2 Policy.

A waiver of the non-Federal share requirement is granted for those Special Crisis Intervention Program funds which were a part of the fiscal year 1977 Supplemental Appropriation, which could not be effectively spent under that program, and which, in accordance with the language of the Senate Appropriations Committee Report, are being converted from Program Account No. 22 to Program Account No. 21 to support weatherization activities.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1276]

PART 1033—CAR SERVICE

Michigan Interstate Railway Company Authorized To Operate Portion of Former Ann Arbor

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Service Order No. 1276).

SUMMARY: Service Order No. 1276 authorizes the Michigan Interstate Railway Company (MI) to operate over the former Ann Arbor (AA) line between Ann Arbor, Michigan, and Toledo, Ohio. Present operation of the entire line of the former AA between Toledo and Frankfort, Michigan, passing through Ann Arbor, is being terminated September 30, 1977, because of the cancellation of the operating agreement between the State of Michigan and ConRail. The portion of the railroad west of Ann Arbor will be operated by the MI as Designated Operator for the State of Michigan. The State owns the portion of the AA between Ann Arbor and Toledo, Ohio, and this portion is being leased to the MI. Operation by the MI over these tracks of the former AA between Ann Arbor and Toledo is necessary to continue essential rail service to shippers served by the line, and to maintain through connections with that portion between Ann Arbor and Frankfort.

DATES: Effective 12:01 a.m., October 1, 1977. Expires 11:59 p.m., January 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION: The Order is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service

Board, held in Washington, D.C. on the 28th day of September, 1977.

The Michigan Department of State Highways and Transportation (State), the owner of those portions of the former Ann Arbor (AA) extending between Toledo, Ohio, and Ann Arbor, Michigan, and between East Pittsfield, Michigan, and Saline, Michigan, has terminated its agreement with the Consolidated Rail Corporation (ConRail) for operation of these lines on its behalf, effective at 12:01 a.m., October 1, 1977. These lines have been leased by the State to the Michigan Interstate Railway Company (MI), which will also become the designated operator for the State of the remaining lines of the former AA between Ann Arbor and Frankfort, Michigan, thence via car ferries between Frankfort and certain ports in Wisconsin on the west shore of Lake Michigan. Operation by the MI of the lines it has leased from the State and of the additional lines as designated operator for the State must commence at 12:01 a.m., October 1, 1977, in order to provide uninterrupted rail service to shippers using these lines. In the opinion of the Commission, operation by the MI over these tracks of the former AA is necessary in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1276 Service Order No. 1276.

(a) Michigan Interstate Railway Company authorized to operate portions of former Ann Arbor. The Michigan Interstate Railway Company (MI) is authorized to operate over tracks of the former Ann Arbor (AA) between:

(1) Toledo, Ohio, and Ann Arbor, Michigan, a distance of 47.54 miles, and between;

(2) East Pittsfield, Michigan, and Saline, Michigan, a distance of 5.6 miles.

(b) Application. The provisions of this order shall apply to intrastate, interstate and foreign traffic.

(c) Rates applicable. Inasmuch as this operation by the MI over tracks previously operated by the Consolidated Rail Corporation (ConRail) and over tracks of the AA is deemed to be due to carrier's disability, the rates applicable to traffic moved over these lines shall be the rates applicable to traffic routed to, from, or via these lines which were formerly in effect on such traffic when routed via ConRail, until tariffs naming rates and routes specifically applicable via the MI become effective.

(d) In transporting traffic over these lines, the MI, and all other common carriers shall proceed even though no interchange agreements or contracts, agreements, or arrangements with reference to the divisions of the rates of transportation applicable to that traffic now exist between them. Interchange arrange-

ments and divisions shall be those in effect March 31, 1976, when operation of these lines by the former AA ceased, unless other interchange or divisional agreements have been voluntarily agreed upon between the carriers, or unless other bases for interchange or division of revenues have been established by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(e) Effective date. This order shall become effective at 12:01 a.m., October 1, 1977.

(f) Expiration date. The provisions of this order shall expire at 11:59 p.m., January 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1, 12, 15, and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

[Ex Parte No. 325]

PART 1091—PRACTICES OF FOR-HIRE MOTOR COMMON CARRIERS OF PROPERTY PARTICIPATING IN ALASKAN MOTOR-OCEAN-MOTOR (AMOM) SUBSTITUTED SERVICE

Substituted Service—Water-For-Motor Service (Fishyback Service)—Alaskan Trade

AGENCY: Interstate Commerce Commission.

ACTION: Rulemaking.

SUMMARY: In response to the June 28, 1976, notice of proposed rulemaking and order, the Administrative Law Judge to whom the rulemaking proceeding was assigned, after submission of pleadings in the matter, would impose rules and regulations to govern the use of substituted water-for-motor service in the Alaskan trade. The rules applicable to motor common carriers which hold operating rights between points in Alaska, on the one hand, and, on the other points in all or part of the 48 contiguous States, but which do not hold authority to serve the port points at which substitution by maritime water carrier would be effected.

EFFECTIVE DATE: February 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Mrs. Janice M. Rosenak, Deputy Director, Section of Rates, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, phone No. 202-275-7693.

SUPPLEMENTARY INFORMATION: Background: The Interstate Commerce Commission in rendering decisions concerned with substituted service generally has held that in order for the motor common carrier under Part II of the Interstate Commerce Act to tender freight to and be retendered freight from another carrier mode in substituted service, the points at which the motor carrier effects the exchange of freight must be points which it is specifically authorized to serve. It has been held that mere possession of authority from ultimate origin to ultimate destination (so-called overhead authority) was insufficient to allow substitution at points not specifically authorized. Certain motor common carriers holding such overhead rights had been operating between their respective territories in the United States and Alaska by operating over the Alcan highway. Such carriers by tariff rule sought in early 1976 to be allowed in addition to their Alcan operations to use Seattle and Tacoma, Wash., as points where they would substitute the services of a maritime water carrier for movement between Seattle and Tacoma and Anchorage, Alaska. Objections were raised and the matter was subsequently placed in a rulemaking posture to ascertain the need for possible departure from prior Commission holdings regarding the need to have specific rights at the points where substituted service would be effected. The concerned motor carriers desiring to have rules promulgated in their favor would also be willing to publish tariffs which hold out the substituted service year round and at lower rates than the Alcan route, with the shipper always having the benefit of the less costly substituted service route unless it specifically directed movement over the Alcan.

The report of the Administrative Law Judge finds there are exceptions to the general rule noted above and that same should be recognized here by way of specific rules which also would provide for a dual rate structure to insure the shipping public would always have the benefit of the less costly substituted service route unless otherwise directed by a shipper.

The new rules set out the definition of the motor-ocean-motor substituted service, who can participate in same, and what each irregular route motor common carrier's tariff publication must set forth, particularly the dual rate structure. While the motor carriers in favor of rules would hold allowance of the service of the port of Anchorage, Alaska, the rules set out in the report of the Judge would run to all Alaskan seaports.

Parties to the pleadings have 30 days

from the date of service of the Judge's report to file exceptions to his findings.

Issued at Washington, D.C., September 23, 1977.

H. G. HOMME, Jr.,
Acting Secretary.

Subchapter A of Chapter X of Title 49 of the Code of Federal Regulations is amended by adding a new part 1091, as follows:

- Sec.
1091.1 Definition of AMOM Service.
1091.2 Motor carrier operating rights requirement for participation.
1091.3 Rate division arrangements with ocean carriers.
1091.4 Tariff notice for AMOM Service and shipper designation feature.
1091.5 Motor carrier bill of lading designation.
1091.6 Motor carrier tariff inclusions for AMOM Service.
1091.7 Motor carrier two-tier rate structure—conditions for use.
1091.8 Nonapplicability of AMOM Service to exempt commodities.

AUTHORITY: Secs. 553 and 559 of the Administrative Procedure Act (5 U.S.C.), the national transportation policy (49 U.S.C. preceding section 1) and Parts I, II, III, and IV of the Interstate Commerce Act, and particularly sections 2, 3, 15(3), 15(10), 15(12), 17(3), 204(a)(6), 206(a)(1), 208(b), 210a, 216(c), 218(d), 218(e), 217, 222, 304, 305, 307, 402, 403(a), 404, 406, and 410(a) of the Interstate Commerce Act (49 U.S.C.).

§ 1091.1 Definition of AMOM Service.

Alaskan Motor-Ocean-Motor (AMOM) Service means the use of a common carrier by water subject to the Shipping Act, 1916, as amended, (hereafter referred to as the ocean carrier) by an irregular route motor common carrier authorized to transport property in interstate or foreign commerce under authority granted by the Interstate Commerce Commission between points in Alaska, on the one hand, and, on the other, any points in the continental 48 States (hereafter referred to as the motor carrier) for the movement of its loaded or empty equipment between a seaport in Alaska, on the one hand, and Seattle or Tacoma, Wash., on the other.

§ 1091.2 Motor carrier operating rights requirement for participation.

All motor carriers authorized under irregular route authority to provide service between any point in Alaska, on the one hand, and, on the other, any point in the continental 48 states may tender empty or loaded equipment to and receive their previously tendered empty or loaded equipment in AMOM Service from ocean carriers at a seaport in Alaska and Seattle or Tacoma, Wash.

§ 1091.3 Rate division arrangements with ocean carriers.

Motor common carriers may enter into arrangements with ocean carriers for the division of revenue derived by motor carriers when AMOM Service is utilized.

§ 1091.4 Tariff notice for AMOM Service and shipper designation feature.

Motor carriers may participate in AMOM Service only if their tariff publi-

cations give notice that such service will be utilized, and that the shipper has the right to elect with regard to any particular shipment that AMOM Service not be provided.

§ 1091.5 Motor carrier bill of lading designation.

Bills of lading of motor carriers using AMOM Service must include the following designation:

"☐ Transportation by all-highway service requested.

Notice.—Unless the above box is checked, shipment will be transported by carrier over a substituted water route between Seattle or Tacoma, Washington, and a seaport in Alaska."

§ 1091.6 Motor carrier tariff inclusions for AMOM Service.

Tariffs embracing AMOM Service rates or charges, including substituted service directories, if used, shall set forth the underlying operating rights (overhead) relied upon, the service covered by the published rates or charges, the points of substitution between modes of transportation, and the names of the carriers participating therein.

§ 1091.7 Motor carrier two-tier rate structure—conditions for use.

Motor carriers utilizing AMOM Service may publish tariffs setting forth different rates or charges for AMOM Service and for all-highway service if the AMOM Service is available throughout the year and charges and cost incurred are less than the charges and costs incurred for all-highway service.

§ 1091.8 Nonapplicability of AMOM Service to exempt commodities.

Tariffs setting forth charges for AMOM Service may be published only with respect to commodities the transportation of which is subject to economic regulation throughout the entire movement provided for in such tariffs.

[FR Doc. 77-28916 Filed 9-30-77; 8:45 am]

[7035-01]

SUBCHAPTER B—PRACTICE AND PROCEDURES
[Ex Parte No. 290]

PART 1102—PROCEDURES GOVERNING RAIL CARRIER GENERAL INCREASE PROCEEDINGS

Procedures Governing Rail General Increase Proceedings

AGENCY: Interstate Commerce Commission.

ACTION: Final amended rule.

SUMMARY: In the Commission's report and order in this proceeding, regarding procedures governing rail general increase, served March 10, 1976, as modified by order served February 8, 1977, certain rules and regulations were adopted which require the submission of data and information in support of the proposed rail carrier general increases. Petitions for leave to reopen and for reconsideration were filed by respondent railroads on the grounds that changed circumstances and technical errors in the regulations and schedules justified

their request. The Commission granted the petition to reopen. Technical changes in the regulations were made as set forth below, to eliminate any discrepancies in the data which might arise because of the new Uniform System of Accounts. Schedules D, E, and F were simplified, instructions were clarified where warranted in all schedules, and errors in computations were corrected. Otherwise, no substantial changes were made in the rules and regulations.

EFFECTIVE DATE: Service date of order, September 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Mrs. Janice M. Rosenak, Deputy Director, Section of Rates, Interstate Commerce Commission, Washington, D.C. 20423, phone No. 202-275-7693.

SUPPLEMENTARY INFORMATION: In the report and order in the above-entitled proceeding (351 I.C.C. 544 (1976)), as modified by order served February 8, 1977, certain regulations were prescribed setting forth the filing and serving requirements of rail carrier submissions in a general freight increase proceeding. The respondent railroads, in petitions for leave to reopen and for reconsideration, filed April 28, 1977, showed that changed circumstances warranted the reopening of the proceeding. The Commission upon reopening the proceeding in its order served September 28, 1977, disposed of the arguments presented in respondents' petition. Changes in the schedules were warranted in light of Docket No. 36367, "Revision to the Uniform System of Accounts for Railroads," served June 24, 1977, to eliminate incompatible expense data which would arise from data based on two different accounting systems. The information to be submitted in some of the schedules was also simplified or clarified. Technical errors in mathematical computations or references to wrong lines, were also corrected. Recyclable commodities not included in the list of commodities to be reported in Schedules C and H were also added in light of our investigation in Ex Parte No. 319, "Investigation of Freight Rates for the Transportation of Recyclable or Recycled Materials," served February 4, 1977. Respondents' request for major changes in the schedules, for example, the elimination of interterritorial district data in Schedule C, the elimination of Schedules G and H, the filing of some schedules on an annual basis etc., were denied, since these changes would deny the Commission and the parties of information needed to determine the justifiability of a general increase. Respondents' request that this proceeding be held in abeyance pending a decision in Ex Parte No. 338, "Standards and Procedures for the Establishment of Adequate Railroad Levels," or in the alternative, incorporation of this proceeding into Ex Parte No. 338, was also denied since that would unduly burden the record in that proceeding and in the interim, deny the Commission and the par-

ties of evidence necessary to consider the merits of the general increase proposal. The modified instructions and schedules which have been prescribed are set forth below. The changes are effective as of September 28, 1977.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

- Sec.
1102.1 Application.
1102.2 Data and information related to the last prior general increase.
1102.3 Financial and revenue need data.
1102.4 Cost and revenue data.
1102.5 Employment, wage, productivity, rate data.
1102.6 Affiliate data.
1102.7 Official notice.
1102.8 Service.
1102.9 Availability of underlying data.

49 CFR 1102.1 through 1102.9 shall be revised as follows:

§ 1102.1 Application.

Upon the filing of tariff schedules containing proposed general increases in freight rates or charges for the account of substantially all common carriers by railroad in the United States or in any of the three primary ratemaking territories, namely, eastern, western, or southern, or of a petition seeking authority to file such schedules by relief from outstanding orders of the Commission, or other relief related thereto, the carriers on whose behalf such schedules or petitions are filed shall, concurrently herewith, file and serve as provided hereinafter, verified statements presenting and comprising the entire evidential case which is relied upon to support the proposed increases. Carriers subject to this rule are hereby notified that special permission to file general increase schedules shall be conditioned upon the publishing of an effective date at least 30 days later than the date of filing, to enable proper evaluation of the evidence presented. Data to be submitted in accordance with these regulations represent the minimum data required to be filed and served, and in no way shall be considered as limiting the type of evidence that may be presented. If a formal proceeding is instituted, the carriers are not precluded from updating the evidence previously submitted to reflect the contemporary situation. Nothing stated in this part shall relieve the carriers of their burden of proof imposed under the Interstate Commerce Act. An increase in freight rates or charges, by the carriers indicated, applying to a substantial number of commodities or services, for which the justification is revenue need, shall be deemed a general increase under this rule. Included within the verified statements required herewith will be copies of a news release and a summary of the increase proposal as hereinafter described:

(a) **News release.**—A news release regarding the increase proposal will be prepared so that the public in general may be apprised of the proposal, and pursuant to this purpose will contain as a minimum essentially the following:

(1) A statement directed to the editor of a newspaper indicating that the news release has been prepared in accordance with regulations of the Interstate Commerce Commission and requesting that the information being forwarded be given prominent placement in the newspaper so that as large a segment as possible of the public in general may be apprised of the increase proposal.

(2) A description in language sufficient to apprise a reader who is not an expert in transportation matters, of the nature of the proposal including the amount of increase, the proponent(s), its geographic scope, and in general terms any holddowns, flagouts, or exceptions.

(3) A statement summarizing the supporting rationale for the increase including why it is needed, what it will accomplish, and in general terms accounting for the presence of the holddowns, flagouts, and exceptions.

(4) A statement indicating that copies of the proposal and supporting evidentiary material have been forwarded to regional and district offices of the Commission and State regulatory agencies responsible for such matters in all States served by the carrier and affected by the proposal; and indicating that the public may obtain copies of these documents by writing to "(Here the name and address of the carrier of publishing agent will be inserted)."

(b) **Summary.** A summary of the increase proposal, drafted in language directed at a reader who is not an expert in transportation matters, will be prepared in sufficient detail to apprise such a reader of the nature of the increase proposal. Pursuant to this purpose, included within the contents of the summary will be the following:

(1) A general description of the essentials of the increase proposal including its proponent(s), effective date, geographic scope, the amount of the increase, and a general description of holddowns, flagouts, and exceptions.

(2) A summary of the supporting rationale for the increase including why it is needed, what it will accomplish and an explanation in general terms for the presence of the holddowns, flagouts, and exceptions.

(3) A statement indicating that copies of the proposal and the entire evidentiary case in support thereof have been forwarded to regional and district offices of the Commission and to the State regulatory agencies responsible for such matters in all States served by the carrier and affected by the proposal; and

(4) A statement as follows: "The proposed tariff contents the only legal terms of the increase binding on the parties" ["(A) nd/or petition" if applicable].

¹ The prescribed procedures also incorporate changes recently adopted in Ex Parte No. 290 (Sub-No. 1), Procedures—Rail Car. General Increase Proceedings, 349 I.C.C. 22 (1974), and Ex Parte No. 286, Notice of Increases in Frt. Rates and Pass. Fares, 349 I.C.C. 741 (1975).

§ 1102.2 Data and information related to the last prior general increase.

Upon the filing of a petition for authority to publish a general rate increase, the following data and information shall be provided by individual class I line-haul railroads and summarized for each district and all districts combined for the period, beginning with the first calendar quarter after the effective date of the last general increase to and including the last complete calendar quarter ending at least 31 days prior to the filing of a petition for a new general rate increase (hereinafter referred to as the study period); *Provided*, That in the event the study period so determined fails to cover a minimum of one calendar quarter, then the study period shall begin with the effective date of the last general increase and run to and including the last complete month ending at least 31 days prior to the filing of a petition for a new general rate increase; *And further provided*, That in the event that the study period exceeds 18 months, the Commission may, at its discretion, shorten such period to the extent deemed by it to be necessary, either upon its own motion or upon petition filed by the railroads.

(a) *General data.* The following shall be submitted for line-haul traffic:

(1) Total estimated revenues for the study period if the last authorized increase had been fully applied.

(2) Total actual revenues, ton-miles, and revenue per ton-mile based on rates actually applied during the study period.

(3) Total actual revenue, ton-miles, and revenue per ton-mile for the corresponding period (calendar quarters) in the year preceding the study period.

(4) Explanation of any significant differences between items (2) and (3), such as changes in traffic levels, average length of haul, traffic mix, rate changes, and other relevant factors.

(5) Total increase in revenues obtained by application of the last authorized general increase (item (2) less item (3)).

(b) *Accessorial services data.* The following shall be submitted for those special and accessorial services such as collection on delivery and wharfage charges listed on page 13 of Tariff of Increased Rates and Charges, X-281-A:

(1) Total estimated revenues for the study period if the last authorized increase had been fully applied.

(2) Total actual revenues based on charges actually applied during the study period.

(3) Total actual revenues for the corresponding period (calendar quarters) in the year preceding the study period.

(4) Total increase in revenues obtained by application of the last authorized general increase (item (2) less item (3)).

(c) *Availability of underlying data.* All underlying data used in preparation of the material outlined above shall be made available for inspection upon reasonable request in writing, and shall be furnished by the railroads to the Commission upon request. The underlying data shall be made available also at the

hearing, but only if and to the extent specifically requested in writing and required by any party for the purpose of cross-examination.

§ 1102.3 Financial and revenue need data.

The railroads shall submit the data required in Schedules A, B, and I. The purpose of these schedules is to obtain such financial data as will facilitate an analysis of the financial posture and revenue needs of individual petitioning railroads, as well as groups of railroad by district (Eastern, Southern, and Western), and all groups combined, as appropriate. Petitioning railroads shall also submit such evidence as will permit a determination of the cost of debt and equity capital, and the respective amounts of this capital which they need to attract in order to insure their financial stability and their capacity to render service.

§ 1102.4 Cost and revenue data.

(a) The railroads shall submit the cost and revenue data required in Schedule C (in four parts). The purpose of Schedule C is to obtain, for the time periods therein provided, cost and revenue data as appropriate for specified commodities transported by individual railroads in Eastern, Southern, and Western districts, by district totals and for districts combined.

(b) To develop these data, traffic and cost studies will be required. The traffic studies should, among other things, (1) develop the number and kind of traffic service units to which the appropriate service unit costs should be applied, and (2) develop the actual revenues associated with the transportation of the specific commodities. The cost study should develop the appropriate service unit costs referred to in subparagraph (1) of this paragraph.

(c) Both the traffic and the cost study should be developed for the same year. The study year shall be referred to as the "Base Period (Year)-Actual." That year shall be the four-quarter period ending no later than 4 months prior to the filing date of the proposed rate increase.*

(d) The traffic study shall include a probability sampling of the actual traffic handled during identical time periods for each study carrier (each class I line-haul

railroad) and shall be statistically valid at the individual study carrier level. The sample shall be taken according to acceptable standards of probability sampling principles and practices. The carriers shall explain and evaluate the probability sample from the standpoint of purpose, sample design (including explanation of estimation procedure and disclosure of sampling errors for derived characteristics), quality control aspects involved in processing and tabulating data, and any statistical analysis performed on the sampled data.²

(e) The cost study shall be based on service unit costs developed for each individual study carrier through the use of Rail Form A costing procedures. These service unit costs shall be appropriately adjusted, if necessary, to reflect the transportation characteristics of the specified commodities and shall be applied to the respective individual carrier's traffic service units as determined from its traffic study. Since the determination of relative revenue/cost relationships among the various commodity movements is important, the Rail Form A costing technique is required. However, this requirement does not preclude the use of other uniform costing procedures the result of which may be submitted in addition to the Rail Form A costs. In this event appropriate explanation of the principles and procedures must be furnished.

(f) The carriers shall be allowed to use appropriate mileage or per diem rates, or both, increased for general overhead for the car(s) being sampled, as an alternative to Rail Form A car costs.

(g) The cost study shall be based on two levels of cost, namely, (1) the variable, as computed in Rail Form A costing procedures, and (2) the fully allocated expense level (F.A.E.). The latter level is similar to the "fully allocated costs" described by the Commission in Docket No. 34013, *Rules to Govern Assembling and Presenting Cost Evidence*, 337 I.C.C. 298, but excludes return on investment. The F.A.E. level is identical to the so-called T.O.E. level, i.e., total operating expenses, rents, and taxes (other than Federal income taxes).

(h) Traffic and cost study data shall be developed for the following time periods; (1) the "Base Period (year)-

*The following illustrates the base period (year)-actual depending on when the proposal is filed. These dates would apply in all schedules where the term base period (year)-actual is used unless specified otherwise.

Filing date of proposed increase	Base period (year)-actual (four quarter period ending)
January	June 30, preceding year.
February	September 30, preceding year.
March	Do.
April	Do.
May	December 31, preceding year.
June	Do.
July	Do.
August	March 31, filing-month year.
September	Do.
October	Do.
November	June 30, filing-month year.
December	Do.

² Although not adopted by the Commission, attention is called to a staff report "Guidelines for the Presentation of the Results of Sample Studies," February 1, 1971, available from the Superintendent of Documents, Washington, D.C.

Actual" as defined in paragraph (c) of this section and (2) the "Present Proforma Year" which shall be the "Base Period (Year)-Actual" restated to reflect the wage, price, traffic, productivity, and rate (present and proposed) conditions prevailing on or near the effective date of the proposed general increase. The time periods identified above are identical to those in Schedule B, Part I and Schedules D through G.

§ 1102.5 Employment, wage, productivity, and rate data.

(a) The class I railroads shall submit the wage, operations, productivity and other statistical data required in Schedules D through G. A major purpose for the supporting data required in these schedules is to measure the validity of the total increases in railway operating expenses shown in Schedule B, pro forma year over the base year-actual. Since Schedules E and F represent only the major segments of railway operating expenses, it is realized that the totals of those schedules will not reconcile to Schedule B, line 2. Data required in Schedules D through G are required only by district groupings of carriers in the Eastern, Southern, and Western districts, and for all districts combined. The time periods required to be used are the base year-actual, the pro forma period (the "base year-actual" restated to reflect conditions prevailing on or near the effective date of the proposed rate increase).

(b) The class I railroads shall also submit the data required by Schedule H which develops specific rate and revenue information to measure the revenue impact of holddowns and other exceptions proposed by the carriers.

§ 1102.6 Affiliate data.

Each railroad shall submit details of transactions with its parent, subsidiary, or affiliated companies in each of the last 3 calendar years as follows: (a) Advances whether in cash or property; (b) encumbrances of railroad assets or the assets of a parent, and affiliate, or subsidiary for noncarrier purposes; and (c) any other monetary or property transactions, including the payment and receipt of dividends. Normal transactions, such as interline settlements, and any other considered necessary to and normally considered in the course of railroad business, need not be reported for the purpose of this particular section. In addition to these data, Schedule J shall be submitted as a composite district and nationwide basis. The purpose of this schedule is to facilitate an assessment of the effect on the carriers' profits of transactions with affiliates.

§ 1102.7 Official notice.

Official notice will be taken of all the railroads' annual and quarterly reports on file with the Commission.

§ 1102.8 Service.

(a) The detailed information called for herein shall be in writing and shall be verified by a person or persons having knowledge thereof. The original and 24 copies of each verified statement for the use of the Commission shall be filed with the Secretary, Interstate Commerce Commission, Washington, D.C. 20423. One copy of each statement shall be sent by first-class mail to each of the regional offices of the Commission in the area affected by the proposed increase, where it will be open to public inspection.

(b) A copy of each statement shall be mailed by first-class mail to each party of record in the last formal proceeding concerning a general rate increase nationally or in the affected area or territory, and to regional and district offices of the Commission and State regulatory agencies responsible for such matters in all States served by the carrier and affected by the proposal, and that fact shall be evidenced by a certificate of service filed with the petitions. Where service is made by mail, the statements shall be mailed in time to be received on the date the original is filed with the Commission. A copy of such statement shall be furnished to any interested person upon request.

(c) A copy of the news release, whose contents are described in § 1102.1 above, will be transmitted to the major news wire services and the principal newspaper of general circulation in the capitol and four largest cities of all States served by the carrier and affected by the proposal. For the purpose of this requirement, the principal newspaper of general circulation is that newspaper of general circulation published in a city having the largest average daily circulation. Where service is made by mail, the news release shall be mailed in time to be received on the date the original is filed with the Commission.

(d) The fact of service as herein required shall be evidenced by a certificate of service filed with the petition.

§ 1102.9 Availability of underlying data.

All underlying data used in preparation of the material outlined above shall be made available in the office of the party serving such verified matter during usual office hours for inspection by any party of record desiring to do so, before hearing, or when no hearing is held, and shall be made available to the Commission upon request therefore. The underlying data shall also be made available at the hearing, but only if and to the extent specifically requested in writing and required by any party for the purpose of cross-examination.

RULES AND REGULATIONS

Schedule B (part I)

Purpose: Schedule B (part I) is designed to provide the Commission with an indication of the carriers' past, present, and forecasted income statement data which will facilitate an analysis of their financial stability and revenue need position.

Instructions:

Schedule B (part I) should report income statement data for class I carriers only. A separate Schedule B (part I) should be prepared for each of the following:

- (1) composite district class I carriers, if appropriate.
- (2) composite nationwide class I carriers, if appropriate.

Time frame requirements:

Columns c, d, and e—Data reported in columns c, d, and e should be based on the most recent four-quarter period ending 4 months prior to the filing month of the proposed increase. "Quarter period" is defined as a calendar year quarter (e.g., January-March, October-December, et cetera). The data reported in these columns will always be based on a 12-month period ended either on March 31, June 30, September 30, or Decem-

ber 31. If, for example, the proposed increase is filed during the month of November 1975, data reported in columns c through e should be based on the 12 months ended June 30, 1975. It is possible that the data reported in these columns will correspond to a calendar year. If, for example, the proposed increase is filed during the month of May 1975, data in these columns should be based on the 12 months ended December 31, 1974 or calendar year 1974.

The data reported in column c of Schedule B should tie in with the data reported in column e of Schedule A.

Columns f and g—Columns f and g should report pro forma year income statement data for the carriers' freight service only.

It should be kept in mind that the pro forma year data does not represent a forecast. It represents the results of 12 months of operation at cost and rate levels existing at a specific time.

The data reported in column f should be the base year actual (column d) restated to reflect conditions (wage, price, productivity, et cetera) prevailing on or near the effective date of the proposed rate increase. Revenues

in column f should be based on rates and charges which are currently in effect.

The data reported in column g should also be the base year actual (column d) restated to reflect conditions (wage, price, productivity, et cetera) prevailing on or near the effective date of the proposed rate increase. Unlike column f, however, revenues in column g should be based on the proposed rates.

The sum of money reflected in column g should be supported by evidence that it is a just and reasonable amount. This evidence should enable the Commission to find that the proposed rate increase:

(a) is cost justified and does not reflect future inflationary expectations.

(b) takes into account expected and reasonable productivity gains.

(c) is not excessive in terms of the carriers' ability to provide adequate and safe service or to provide for necessary expansion to meet future requirements for transportation services.

(d) is not excessive in terms of the rate of return needed by the carriers to attract debt and equity capital at reasonable costs.

RULES AND REGULATIONS

Schedule B (part II)

Purpose: Schedule B (part II) is designed to identify the various enterprises from whom the railroads lease equipment and the nature of their relationship with the carriers.

Instructions: Schedule B (part II) should report rents payable data for class I carriers only. A separate Schedule B (part II) should be submitted for each individual class I carrier.

Schedule B (part II) will be restricted to only those lessors in which the respondent has some affiliation. Transactions aggregating less than \$30,000 need not be reported in this Schedule.

Time frame requirements: The data reported in this schedule should be based on the most recent calendar year available.

COMMODITY LIST FOR SCHEDULE C

The commodity list herein is derived from the exhibits and verified statements submitted by the Special Projects Counsel (SPC) to the Interstate Commerce Commission, in Ex Parte No. 270, Investigation of Railroad Freight Rate Structure. Commodity groups selected for the traffic study herein (Schedule C) are noted by asterisks.

The commodity list prepared effective with the Standard Transportation Commodity

Code (STCC) classification on January 1, 1972, has been updated to reflect STCC No. 1-C, effective January 1, 1975, including Supplement No. 3.

In addition, the recyclable commodities investigated in Ex Parte No. 319, Investigation of Freight Rates for the Transportation of Recyclable or Recycled Materials, served February 4, 1977, have also been included.

Where competitive relationships were established with virgin and recyclable materials, the virgin materials have also been included.

Ex Parte No. 290 Appendix

Additional Commodities to be Included in Attachment I to Appendix II of the Report and Order in Ex Parte 290

SPC Commodity Group No.	Description	STCC Code Conversions 1975
16	Nonferrous concentrate (excl. copper concentrate)	
*** 16.1	Copper concentrate	10 212

SCHEDULE C-4

Revenue/variable cost ratios for present pro forma year by commodity and by district—revenues at present and proposed levels*

(In percent to 1 decimal)

Commodity: STCC _____

Part I. Ratios based on present revenues				
1.	Eastern district			
2.	Southern district			
3.	Western district			
4.	Total all districts			
Part II. Ratios based on proposed revenues				
5.	Eastern district			
6.	Southern district			
7.	Western district			
8.	Total all districts			

*See explanation following Schedule C-1.
Ratios based on data in Schedule C-2.

Purpose and explanation of Schedule C. The purpose of Schedules C-1 through C-4 is to obtain cost and revenue data for specified commodities, separated between single line and interline, transported by railroads in Eastern, Southern, and Western districts, by district totals and for all districts combined, as appropriate. Costs and revenues should be provided for two time periods, namely, (1) base period (year)-actual (Schedule C-1), and (2) present pro forma year, reflecting present costs and both present and proposed revenues (Schedule C-2). Schedules C-3 and C-4 require revenue/variable cost ratios, by commodity and by districts. These ratios are developed from data provided in Schedules C-1 and C-2, respectively.

(a) **Time periods: Base period (year)-actual and present pro forma period.** The study year shall be referred to as the "Base Period (Year)-Actual." That year (except as noted below) shall be the four-quarter period ending no later than 4 months prior to the filing date of the proposed general increase.

Traffic and cost study data for the base period (year)-actual shall be updated to reflect wage, price, traffic, productivity, and rate (present and proposed) conditions prevailing on or near the effective date of the proposed increase. The time period reflecting these data, stated on an annual basis, shall be referred to as the "Present Pro forma Year."

If an increase is filed during the period from August 1, 1978 through April 30, 1979, however, the base period (year)-actual should be based on 1977 calendar year results (cost and traffic) updated to reflect the required present pro forma year.

(b) **Cost levels: Variable and fully allocated expenses.** Costs, for Schedule C purposes, shall be based on two levels, namely, (1) the variable, as computed in Rail Form A costing procedures, and (2) the fully allocated expense level (F.A.E.). This level of costs is similar to the "fully allocated costs" described by the Commission in Docket No. 34013, Rules to Govern Assembling and Presenting of Cost Evidence, but excludes return on investment. The F.A.E. level is identical to the so-called T.O.E. level, i.e., total operating expenses, rents, and taxes (other than Federal income taxes). Both levels of cost must be furnished.

(c) **Revenues.** Freight revenues for the base period (year)-actual, and the present pro forma year, including both present and proposed revenues, shall include revenues obtained from all rates and charges and not only that associated with the line-haul traffic.

(d) **Commodity: STCC No.** The commodities or commodity classes to be used shall be at least those set forth in Attachment I, hereto. The sample may be expanded to include other commodities if it is so desired. In addition, all other commodities or commodity classes not shown individually shall be grouped and shown in a "Total Carload Traffic" category.

(e) **Interline intradistrict.** This is interline traffic in which the entire through movement is handled only by carriers assigned to the same district (Eastern, Southern, or Western) as the reporting carrier.

(f) **Interline interdistrict.** This is interline traffic in which a portion of the entire through movement is handled by a carrier or carriers assigned to a district other than the one to which the reporting carrier is assigned. The revenue and cost data required in this schedule, should be based on the actual divisional interchange point regardless of the territorial border point.

SCHEDULE G*

Labor costs and productivity data district (U.S., East, South, West)

Line No.	Item	Source	Base period ¹ (year-actual)	Pro forma year ¹
1.	Net revenue ton-miles-----	Annual Report Form R-1, Schedule 531, line No. 36, 2		
2.	Total labor cost-----	Schedule E line 1 + Schedule F line 12		
3.	Freight labor cost-----	Schedule E line 6 + Schedule F line 15		
4.	Freight labor cost per net revenue ton-mile-----	Line 3 ÷ line 1		
5.	Freight service hours-----	Schedule D line 7		
6.	Net revenue ton-miles per freight service hour-----	Line 1 ÷ line 5		
7.	Percent charge from previous year-----			
8.	Net revenue tons-----	AR Schedule 531, line 31		
9.	Fuel freight service cost-----	AR Schedule 320, lines 115 + 121 column (c)		
10.	Materials and supplies expenses-----	(3)		

¹ Same periods as for Schedule D.

For projected periods, take into consideration expected levels of economic activity, anticipated sources of traffic losses or gains, effect of proposed rate increase intermodal and intramodal competition, et cetera.

² Total operating expenses, less employee compensation chargeable to operating expenses, health and welfare benefits, fuel and power, loss and damages, personal injuries, insurance and pensions, and depreciation and retirements.

* See explanation following.

Purpose and explanation of schedules D-G.—Schedules D through G require data on recent, present, and projected levels of employment, wages and fringe benefit costs, and productivity. This information was initially required to effectively implement the regulations promulgated by the Commission in its report and order in Ex Parte No. 280, *Special Procedures for Tariff Filings under the Wage and Price Stabilization Program*, on July 13, 1972. These regulations, particularly, sec. 1311.0(c), required that expected and obtainable productivity be taken into account, as well as labor cost increases.

Schedule D provides data and estimates on present and expected employment levels based on present and past employment and productivity experience, and anticipated traffic and productivity levels. Schedule E provides data on present and expected wage and salary costs, based on provisions of existing labor contracts and projected employment levels. Schedule F provides like information on health and welfare costs, payroll taxes for old age benefits and unemployment insur-

ance, and pension plans. Schedule G summarizes direct and indirect labor costs, and provides a measure of past, present, and projected productivity of freight employees (net revenue ton-miles per service hour) and unit labor costs (total freight labor costs per ton-mile). Productivity change must be measured in terms of material as well as labor. Materials and supply data are needed to measure the increase in these costs which constitutes sound and proper justification for a rate change to reflect unit changes in material costs as well as labor costs.

Estimates based on actual and projected traffic levels are required because of the decline in railroad employment and increases in productivity in recent years, both of which appear to be strongly influenced by the level of freight traffic.

Schedule H

Purpose and Explanation of Schedule H. Essentially the purpose of this schedule is to require data on holdowns and other excep-

tions¹ for specific commodity groups from the proposed general rate increase.

Specifically the schedule provides (1) for data to identify the specific holdowns and other exceptions proposed in the master tariff and the revenue effect of such variances; (2) justification and demonstration of the need for the exceptions in the rates charged (whether greater or less than the proposed general increase); and (3) the cumulative impact by district on carrier revenues resultant of the holdowns exceptions or other variances.

Summarily, these data which determine the overall revenue yield generated by the proposed general rate increase are considered essential in assessing railroad revenue needs.

¹Due to the added emphasis on selective rate increases, such exceptions could include variances in the rates charged on specific commodity groups greater than the proposed general rate increase.

200	73	(b)-(c)

1/ Annual report sources refer to the 1977 Annual Report R-1. For years subsequent or prior to 1977, use comparable annual report sources.

Schedule I

Purpose: Schedule I is designed to provide the Commission with an indication of the carriers' sources and uses of funds over the recent past.

Instructions: Schedule I should report funds flow data for class I carriers only. A separate Schedule I must be prepared for the following:

- (1) Each individual class I carrier.
- (2) Composite district class I carriers.
- (3) Composite nationwide class I carriers, if appropriate.

The term "funds" for the purpose of this Schedule shall include all assets or financial resources even though a transaction may

not directly affect cash or working capital. For example, the purchase of property in exchange for bonds or shares of stock would be an application of funds for investment in property provided by the issue of securities. Sources and uses of funds should be individually disclosed. For example, outlays for fixed assets should not be reported net of retirements.

Time frame requirements:

Column b.—Data reported in column b should be based on the 3d calendar year preceding the effective year of the proposed rate increase.

Column c.—Data reported in column c should be based on the 2d calendar year pre-

ceding the effective year of the proposed rate increase.

Column d.—Data reported in column d should be based on the 1st calendar year preceding the effective year of the proposed rate increase.

The time frame requirements outlined above apply only if the proposed rate increase is effective during the last 6 months of the calendar year. If the proposed rate increase is effective during the first 6 months of the calendar year, the data in columns b, c, and d should be based on the fourth, third, and second calendar years, respectively, preceding the effective year of the proposed rate increase.

11	Total affiliate income from operations before income taxes			

Schedule J

Purpose: Schedule J is designed to facilitate an assessment of the effect on the carriers' profits of transactions with affiliates. Instructions: Schedule J should report affiliate data for Class I carriers only. A separate Schedule J must be prepared for the following:

- (1) Composite district class I carriers.
 - (2) Composite nationwide class I carriers, if appropriate.
- Affiliate transactions aggregating less than \$30,000 need not be reported in this Schedule. Time frame requirements (same as Schedule A):

Column b—If the rate increase is filed during the first 6 months of the calendar year, the data reported in column b should be based on the 3d calendar year preceding the filing year. If the rate increase is filed during the last 6 months of the calendar year the data reported in column b should be based on 2d calendar year preceding the filing year.

Column c—If the rate increase is filed during the first 6 months of the calendar year the data reported in column c should be based on the 2d calendar year preceding the filing year. If the rate increase is filed during the last 6 months of the calendar year the data reported in column c should be based on the 1st calendar year preceding the filing year.

Column d—Data reported in column d should be based on the most recent four-quarter period ending 4 months prior to the filing month of the proposed increase.

Schedule K

Data concerning uneven effects of the increase (including information on commodities, localities, types of traffic, and where necessary individual carriers) and suggestions on the avoidance of possible detrimental effects.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER C—ACCOUNTS, RECORDS, AND REPORTS

[No. 36556]

PART 1207—CLASS I AND CLASS II COMMON AND CONTRACT MOTOR CARRIERS OF PROPERTY

PART 1249—REPORTS OF MOTOR CARRIERS

Annual Reports and Uniform System of Accounts for Class I and Class II Motor Carriers of Property

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: The Commission has adopted certain revisions to the 1977 annual reports and uniform system of accounts prescribed for Class I and Class II common and contract motor carriers of property. These changes are necessary to obtain consolidated data, reduce the reporting burden on carriers, improve data disclosure, provide a single combined annual report for household goods carriers and revise the system of accounts to accommodate reporting. Revised reporting will be a significant improvement for the motor carrier industry. It includes provisions for substantial reduction in reporting requirements as well as a provision for consolidated reporting that is very desirable from a ratemaking viewpoint and beneficial to the carriers. The general public will not be affected.

EFFECTIVE DATE: January 1, 1977.

FOR FURTHER INFORMATION CONTACT:

James H. Bayne, Chief, Section of Reports, Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423. Phone No. (202-275-7331).

SUPPLEMENTARY INFORMATION:

By Notice of Proposed Rulemaking and Order dated June 14, 1977, served July 5, 1977, and published in the FEDERAL REGISTER on June 28, 1977 (42 FR 32814), the Commission made public that it had under consideration major revisions to the 1977 annual reports prescribed for Class I and Class II motor carriers of property 49 CFR 1249 and attendant modification to the Uniform System of Accounts (49 CFR 1207). Revisions provide for (1) "respondent" and "consolidated" reporting, (2) reduction in reporting burden and other modifications to improve data disclosure, (3) separate annual report form for household goods carriers, and (4) revisions to the Uniform System of Accounts prescribed for Class I and Class II common and contract motor carriers of property. Interested parties were given the opportunity to submit their written views and comments by August 5, 1977. This date was subsequently extended to August 22, 1977.

The public notification of proposed rulemaking in the FEDERAL REGISTER provided that any person desiring to participate could do so by filing written statement of facts, views, or arguments by August 22, 1977. Comments were received from 10 motor carriers, 5 industry associations and 2 Certified Public Ac-

countants. Discussions and conclusions reached on specific issues are set forth in the Report and Order of the Commission in Docket No. 36556.

Upon investigation and consideration of views, arguments, and representations of the parties the Commission finds that Parts 1207 and 1249 of Chapter X of Title 49 of the Code of Federal Regulations should be amended as detailed in the Notice of Proposed Rulemaking and Order except for the revisions set forth in the Report of the Commission; and that such rules are reasonable and necessary to the effective enforcement of the provision of Part II of the Interstate Commerce Act, as amended; that such rules are otherwise lawful and, to the extent so found in this report, consistent with the public interest and the national transportation policy; and that this decision is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

It is ordered that: (1) Effective January 1, 1977, the regulations prescribed in Parts 1207 and 1249, of Chapter X, Subchapter C of Title 49 of the Code of Federal Regulations be, and they are hereby, revised to read as shown below upon advice from the Comptroller General of the United States that they comply with the Federal Reports Act.

(2) That service of this order shall be made on all affected carriers; and to the Governor of every State and to the Public Utilities Commissions or Boards of each State having jurisdiction over transportation; and that notice of this order shall be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

(49 U.S.C. 12 and 20.)

Issued at Washington, D.C. September 28, 1977.

H. G. HOMME, Jr.,
Acting Secretary.

Parts 1207 and 1249 of Chapter X, Title 49, Code of Federal Regulations, are amended as set forth below.

A. Part 1207, Uniform System of Accounts for Class I and Class II Common and Contract Motor Carriers of Property, is amended as follows:

18. Account 3500—Containers, Packing, and Unpacking Services (classes I and II) is amended by deleting the words "Account 2020—Payables to Affiliated Companies (class II); and" and "(class I)" from Note A.

19. Account 3500—Containers, Packing, and Unpacking Services (classes I and II) is amended by deleting the words "Account 2020—Payables to Affiliated Companies (class II); and" and "(class I)" from Note A.

20. Account 3500—Containers, Packing, and Unpacking Services (classes I and II) is amended by deleting the words "Account 2020—Payables to Affiliated Companies (class II); and" and "(class I)" from Note A.

21. Account 3500—Containers, Packing, and Unpacking Services (classes I and II) is amended by deleting the words "Account 2020—Payables to Affiliated Companies (class II); and" and "(class I)" from Note A.

22. Account 3500—Containers, Packing, and Unpacking Services (classes I and II) is amended by deleting the words "Account 2020—Payables to Affiliated Companies (class II); and" and "(class I)" from Note A.

23. Account 3500—Containers, Packing, and Unpacking Services (classes I and II) is amended by deleting the words "Account 2020—Payables to Affiliated Companies (class II); and" and "(class I)" from Note A.

24. Account 3500—Containers, Packing, and Unpacking Services (classes I and II) is amended by deleting the words "Account 2020—Payables to Affiliated Companies (class II); and" and "(class I)" from Note A.

25. Account 3500—Containers, Packing, and Unpacking Services (classes I and II) is amended by deleting the words "Account 2020—Payables to Affiliated Companies (class II); and" and "(class I)" from Note A.

26. Account 3500—Containers, Packing, and Unpacking Services (classes I and II) is amended by deleting the words "Account 2020—Payables to Affiliated Companies (class II); and" and "(class I)" from Note A.

27. Account 3500—Containers, Packing, and Unpacking Services (classes I and II) is amended by deleting the words "Account 2020—Payables to Affiliated Companies (class II); and" and "(class I)" from Note A.

panies (class II); and "and" and "(class I)" from Note A.

3. Account 3600—Supplementary Transportation Services (classes I and II) is amended by deleting the words "Account 2020—Payable to Affiliated Companies (class II); and" and "(class I)" from Note A.

4. Account 3900—Other Operating Revenue (classes I and II) is amended changing the reference to Account 1210 to read "1211."

ACCOUNT EXPLANATIONS—OPERATING EXPENSES

The operating expense account explanations for household goods carriers are amended as follows:

1. Account 6200—Tires and Tubes is amended by deleting the words "Account 1140—Prepayments (class II) or" and "(class I only)" in the first paragraph.

2. Account 7330—Other Outside Services—Professional Services is amended to read as follows:

7330 Other Outside Services—Professional Services.

NOTE C. . . . law expenses and expenditures incident to securing authorization for issuance of long-term debt or capital stock shall be charged to Account 2338—Unamortized Discount in Debt or Account 2339—Unamortized Premium or Debt or Account 2633

NOTE D. . . . shall be charged to Account 1512 Deferred Debits and amortized by charges to this account.

3. Account 8120—Depreciation—Revenue Equipment is amended by deleting the words "Account 1230—Other Carrier Property (class II), or" and "(class I)."

4. Account 8140—Depreciation—Buildings and Structures is amended by deleting the words "Account 1210—Land and Structures (class II) or" and "(class I)."

5. Account 8150—Depreciation—Furniture and Office Equipment is amended by deleting "Account 1230—Other Carrier Property (class II) or" and "(class I)."

6. Account 8170—Depreciation—Undistributed Property is amended by deleting the words "(class I)."

7. Account 8210—Amortization of Leasehold Improvements is amended by deleting the words "Account 1230—Other Carrier Property (class II), or" and "(class I)" in the first paragraph.

8. Account 8400—Taxes and Licenses is amended by deleting the second paragraph.

9. Account 8910—Gains on Disposition of Operating Assets is amended by deleting the words "Accounts 1221 through 1232" (class II) and" and "(class I)" in paragraph (a).

CLASS I AND CLASS II MOTOR CARRIER CHART OF ACCOUNTS

OTHER INCOME AND EXPENSES

The Class I and Class II Motor Carrier Chart of Accounts is amended, under Class II, to read as follows:

CLASS II ACCOUNTS*

8700/9700	Income taxes on income from continuing operations.
8710/9710	Federal Income Taxes.
8720/9720	State Income Taxes.
8730/9730	Other Income Taxes.

OTHER INCOME AND EXPENSE ACCOUNT EXPLANATIONS

The Other Income and Expense Account Explanations are amended as follows:

1. Account 8320/9320—Lease of Distinct Operating Units—Credit is amended by deleting the words "Account 1232—Accumulated Depreciation and Amortization, Other Carrier Property (class II) or" and "(class I)" in Note A.

2. Account 8700/9700—Income Taxes on Income from Continuing Operations is amended by deleting "class I" in paragraph (a); and deleting paragraph (b) and classifying (b) as "Reserved."

3. The title of Account 8710/9710 is amended to read: Federal Income Taxes (classes I and II).

4. The title of Account 8720/9720 is amended to read: State Income Taxes (classes I and II).

5. The title of Account 8730/9730 is amended to read: Other Income Taxes (classes I and II).

6. Account 8800/9800—Extraordinary Items (classes I and II) is amended by deleting "class I" in paragraphs (a) and (f); and by deleting the texts of paragraphs (b) and (c) and classifying them as "Reserved."

7. The title of Account 8810/9810 is amended to read: Extraordinary item (net) (classes I and II).

8. The title of Account 8850/9850 is amended to read: Income taxes on extraordinary items (classes I and II).

9. The title of Account 8851/9851 is amended to read: Provision for deferred taxes—extraordinary items (classes I and II).

B. Part 1249, Reports of Motor Carriers, Chapter X, Title 49 of the Code of Federal Regulations is revised as follows:

Sec.	
1249.1	Annual reports of Class I and Class II carriers of property.
1249.2	Annual reports of Class I and Class II carriers of household goods and dual authority carriers.
1249.3	Annual reports of motor carrier holding companies.

AUTHORITY: 49 U.S.C. 12 and 20.

§ 1219.1 Annual reports of Class I and Class II carriers of property.

(a) Commencing with reports for the accounting year 1977, as described in part 1207 instruction 3 of this chapter, and thereafter, until further order, all class I and class II motor carriers of property, as described in § 1240.5 of this chapter, are required to file annual reports in accordance with Motor Carrier Annual Report Form M. Such annual report shall be filed in duplicate in the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before March 31 of the year following the year to which it relates.

§ 1249.2 Annual reports of Class I and Class II carriers of household goods and dual authority carriers.

Commencing with reports for the accounting year 1977, as described in part 1207 instruction 3 of this chapter, and thereafter, until further order all class I and class II motor carriers of household goods and dual authority carriers, as described in § 1240.5 of this chapter, are required to file annual reports in accordance with Motor Carrier Annual Report Form M-H. Such annual report shall be filed in duplicate in the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before March 31 of the year following the year to which it relates.

§ 1249.3 Annual report of motor carrier holding companies.

(a) Each person which is not a motor carrier, but which shall be considered a motor carrier subject to provisions of section 220 of the Interstate Commerce Act by reason of effective control over one or more motor carriers through ownership of securities issued or assumed by such controlled motor carrier or carriers, shall file a report of its financial transactions in accordance with Motor Carrier Annual Report Form M as prescribed in § 1249.1. Such reports hereby required to be filed shall be complete as to all schedules, declarations, replies, attachments, and other requirements of Motor Carrier Annual Report Form M, other than those which relate solely to the direct ownership and operation of highway equipment, and shall be filed in duplicate in the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before March 31 of the year following the year to which it relates. Such persons shall also file similar reports annually, prepared in accordance with requirements for compiling Motor Carrier Annual Report Form M, as those requirements are now in effect or may in the future be modified, for each succeeding calendar year, or accounting year of thirteen 4-week periods, such annual reports to be filed in duplicate with the Commission on or before March 31 of the year following the year to which the report relates.

(b) Commencing with reports for the accounting year 1977, as described in part 1207 instruction 3 of this chapter, and thereafter, until further order, each company subject to this section is hereby required to file with this Commission, in addition to said Annual Report Form M, a supplemental consolidated report, Form M-4, setting forth the complete financial condition of such company and its subsidiaries in the scope and form indicated in the instructions to the supplemental consolidated report Form M-4 for the accounting year 1977 and each succeeding year thereafter. Such supplemental financial reports shall be attached to and considered an integral part of Motor Carrier Annual Report Form M filed by each company.

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

SUBCHAPTER 8—TAKING, POSSESSION, TRANSPORTATION, SALE, PURCHASE, BARTER, EXPORTATION, AND IMPORTATION OF WILDLIFE

PART 20—MIGRATORY BIRD HUNTING

Emergency Amendment Regarding the Use of Steel Shot for Waterfowl Hunting in Portions of Minnesota in 1977

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule delays implementation of the regulation requiring use of non-toxic shot for waterfowl hunting in designated zones in Minnesota. This delay has been caused by a lack of availability of non-toxic shot shells in the State. This rule will permit hunters to hunt waterfowl with toxic shot between October 1 and October 14, 1977. The non-toxic shot regulations become effective October 15, 1977.

EFFECTIVE DATE: September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert I. Smith, Special Projects Coordinator, Office of Migratory Bird Management, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240 (202-343-8827).

SUPPLEMENTARY INFORMATION: On April 28, 1977, the Service published in the FEDERAL REGISTER (42 FR 21618) descriptions of certain areas in the State of Minnesota in which non-toxic shot regulations would be applicable for waterfowl hunting in seasons commencing in 1977. Since these seasons commence on October 1, 1977, the regulations were applicable to Minnesota beginning on that date. During the last week of August 1977 a survey of stores that sell ammunition in the State of Minnesota indicated that supplies of shotshells loaded with steel shot were available at only a few locations. The State was notified that a potential problem existed with regard to the availability of steel-shot ammunition. Efforts were made by the State to correct this problem during September. Surveys of stores conducted in mid-September indicated that the problem had been partially corrected, but many stores had placed orders too late to receive shipments prior to October 1. Therefore, the Service in consultation with the State has decided to delay the implementation of steel shot requirements for waterfowl hunting in those portions of Minnesota described in 42 FR 21618 to allow shipments of steel shotshells which are now on order to arrive at the stores. Since it was found that immediate corrective action was required, notice and public procedure was impractical and contrary to the public interest, therefore this shall become effective September 30, 1977.

This final rulemaking was authored by Robert I. Smith, Office of Migratory Bird Management, U.S. Fish and Wildlife

Service, Department of the Interior, Washington, D.C. 20240 (202-343-8827).

Accordingly, the Service amends 50 CFR, Chapter 1, Subchapter B, Subpart K by adding the following to that portion of § 20.108 which describes the non-toxic shot zones for Minnesota.

3. In the areas described above in the State of Minnesota use of non-toxic shot for waterfowl hunting will not be required prior to October 15, 1977.

NOTE.—The Fish and Wildlife Service has determined that this ruling does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 28, 1977

LYNN A. GREENWALT,
Director,
U.S. Fish and Wildlife Service.

CHAPTER I—ADMINISTRATIVE COMMITTEE OF THE FEDERAL REGISTER

CFR CHECKLIST

1976/1977 Issuances

This checklist, prepared by the Office of the Federal Register, is published in the first issue of each month. It is arranged in the order of CFR titles, and shows the revision date and price of the volumes of the Code of Federal Regulations issued to date for 1976 and 1977. New units issued during the month are announced on the back cover of the daily FEDERAL REGISTER as they become available.

For a Checklist of current CFR volumes comprising a complete CFR set, see the latest issue of the Cumulative List of CFR Sections Affected, which is revised monthly.

The rate for subscription service to all revised volumes issued for 1977 is \$350 domestic, \$75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-05]

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

[7 CFR Part 1487]

CCC NON-COMMERCIAL RISK ASSURANCE PROGRAM (GSM-101)

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Proposed rule.

SUMMARY: Certain segments of the U.S. agricultural commodity export trade, particularly exporters of cotton, have experienced increasing difficulty in obtaining adequate financing for their sales to foreign buyers on private credit terms. Private banking institutions currently financing export credit sales of agricultural commodities have indicated they would be disposed towards making additional financing available if they could be protected against certain type of non-commercial risk occurrences which prevent remittances pursuant to a foreign bank letter of credit. Among these risks are acts of government which prevent conversion of local currency to U.S. dollars. To provide this kind of protection, Commodity Credit Corporation (CCC) is proposing a non-Commercial Risk Assurance Program (GSM-101) under which CCC would enter into assurance agreements with U.S. exporters who sell U.S. agricultural commodities on deferred payment terms. Under the assurance agreements, CCC would pay the exporter the assured amount of any default under a foreign bank letter of credit arising from certain specified non-commercial risks.

DATE: Comments must be received by November 2, 1977.

FOR FURTHER INFORMATION CONTACT:

L.T. McElvain or Francis A. Woodling, Commercial Export Programs, Office of the General Sales Manager, U.S. Department of Agriculture, 14th Street and Independence Avenue SW., Washington, D.C. 20250, telephone 202-447-3224 or 447-3573.

The public is invited to submit written comments regarding the proposed rule to the Office of the General Sales Manager, Commercial Export Programs, U.S. Department of Agriculture, Washington, D.C. 20250, no later than November 2, 1977, to be sure of consideration. Each person submitting comments regarding the proposed rule shall include his name and address and give reasons for any suggested change in the proposed rule. Copies of all written communications re-

ceived will be available for examination by interested persons in room 4079, South Agriculture Building, 14th Street and Independence Avenue SW., Washington, D.C. 20250, during regular business hours. Accordingly, it is proposed to amend Chapter XIV of Title 7 of the CFR by adding a new Part 1487—Non-Commercial Risk Assurance Program (GSM-101) to read as follows:

PART 1487—CCC NON-COMMERCIAL RISK ASSURANCE PROGRAM (GSM-101)

GENERAL

- Sec.
1487.1 General statement.
1487.2 Definition of terms.

ASSURANCE AGAINST NON-COMMERCIAL RISK DEFAULTS

- 1487.3 Application for assurance agreement.
1487.4 Assurance agreement.
1487.5 Assurance rates.
1487.6 Assurance fees.

DOCUMENTS REQUIRED AFTER EXPORT

- 1487.7 Evidence of export.

LOSSES CAUSED BY NON-COMMERCIAL RISK DEFAULTS

- 1487.8 Notice of default.
1487.9 Payment of losses.
1487.10 Recovery of losses.

MISCELLANEOUS PROVISIONS

- 1487.11 Assignment.
1487.12 Covenant against contingent fees.
1487.13 Shipment of commodities on vessels calling at north Vietnamese ports.
1487.14 Officials not to benefit.
1487.15 Exporter's records and accounts.
1487.16 Communications.

AUTHORITY: Sec. 5(f), 62 Stat. 1072 (7 U.S.C. 714c(f)).

GENERAL

§ 1487.1 General statement.

(a) This part contains the regulations governing the Commodity Credit Corporation Non-Commercial Risk Assurance Program, also referred to as "GSM-101." Exporters of U.S. agricultural commodities usually require importers to guarantee payment of the selling price of commodities sold on a deferred payment basis. Generally, the guarantee is in the form of an irrevocable bank letter of credit issued in favor of the exporter who draws drafts for the deferred payments as they fall due on the bank issuing such letter of credit. GSM-101 is designed to protect the exporter from losses should a draft be dishonored as the result of a non-commercial risk occurrence. By transferring the non-commercial risk of loss of deferred payments from exporters and their financing institutions to CCC, GSM-101 is intended to (1) facilitate exportation, (2) forestall

or limit declines in exports, (3) permit exporters to meet competition from other countries, and (4) increase commercial exports of U.S. agricultural commodities.

(b) GSM-101 will be administered by the Office of General Sales Manager, U.S. Department of Agriculture.

(c) The provisions of Pub. L. 83-664 (Cargo Preference Act) are not applicable to shipment of commodities assured as to non-commercial risk under GSM-101.

(d) GSM-101 will be supplemented by USDA announcements.

§ 1487.2 Definition of terms.

(a) "Assistant Sales Manager" means the Assistant Sales Manager, Commercial Export Programs, Office of the General Sales Manager.

(b) "Assured Value" means the maximum amount CCC agrees to pay the exporter under the assurance agreement. The assured value shall not exceed the unpaid balance of the port value of the commodity prior to shipment plus interest of not more than six percent per annum on such unpaid balance.

(c) "Assurance Agreement" means the written agreement under which CCC undertakes to reimburse the exporter for losses resulting from defaults in remittances due to non-commercial risk under a foreign bank letter of credit securing the exporter's export credit sale.

(d) "CCC" means the Commodity Credit Corporation, U.S. Department of Agriculture.

(e) "Date of Export" means the on-board date of an ocean bill of lading or onboard ocean carrier date of an intermodal bill of lading.

(f) "Date of Sale" means the earliest date the exporter has knowledge that a contractual obligation exists with the importer under which a firm dollar and cent price has been established or a mechanism to establish the price has been agreed upon.

(g) "Export Credit Sales" means an agreement by an exporter to sell eligible agricultural commodities for U.S. dollars to an importer. The agreement shall provide for export of the commodities to eligible countries within 12 months from the contract date and for payment by the importer on a deferred payment basis not exceeding 36 months from the date(s) of export.

(h) "Exporter" means an individual, group of individuals, partnership, corporation, association, cooperative, or any other entity (1) that is financially responsible, (2) engaged in the business of buying or selling commodities for export and for this purpose maintains a bona fide business office in the United States, its territories or possessions, and has

someone on whom service of judicial process may be had within the United States, and (3) not suspended or debarred from contracting with or participating in any program administered by CCC on the date of issuance of the assurance agreement.

(i) "Foreign Bank Letter of Credit" means an irrevocable commercial letter of credit issued in favor of the exporter by a banking institution in the destination country pursuant to an export credit sale, which provides for deferred payments in U.S. dollars.

(j) "Importer" means a foreign buyer who enters into an export credit sale contract on a deferred payment basis with a U.S. exporter.

(k) "Non-Commercial Risk" means the risk of loss as a result of failure by the foreign bank, through no fault of its own, to make remittances pursuant to the bank letter of credit issued by it because of (1) war, hostilities, civil war, rebellion, insurrection or civil commotion; or (2) expropriation, confiscation, or like action by government; or (3) the imposition by governmental authority of any order, decree, or regulation of general applicability having the force of law; or (4) the failure of the central exchange authority to transfer local currency into dollars.

(l) "OGSM" means the Office of the General Sales Manager, U.S. Department of Agriculture.

(m) "Port value" means the total value of the export credit sale, less any discounts or allowances, basis f.a.s. or f.o.b. at U.S. ports. Such value shall include, the value of the upward loading tolerances, if any, as provided for by the export credit sales contract.

(n) "USDA Announcement" means an announcement issued by the U.S. Department of Agriculture supplementing these regulations. An announcement may include identification of eligible agricultural commodities and countries, dollar limitation of CCC exposure in a country and other information.

(o) "Vice President, CCC" means the Vice President who is the General Sales Manager, OGSM.

ASSURANCE AGAINST NON-COMMERCIAL RISK DEFAULTS

§ 1487.3 Application for assurance agreement.

(a) An exporter shall submit a written application for an assurance agreement to the office specified in § 1487.16. An application may be made by telephone, but it must be confirmed in writing. An application shall include the following:

- (1) Name of the destination country.
- (2) Name and address of importer.
- (3) Date of sale.
- (4) Exporter's sale number.
- (5) Delivery period.
- (6) Kind and description of the commodity.
- (7) Quantity.
- (8) Port value.
- (9) Assured value.
- (10) Estimated payment schedule(s) for each shipment to be made under the

assurance agreement showing the estimated payment due dates and estimated amounts due separately for both principal and interest.

(b) An application for an assurance agreement may be rejected, approved with modifications, or approved as submitted by the Assistant Sales Manager. In the event the application is approved, the Assistant Sales Manager shall cause an assurance agreement to be issued in favor of the U.S. exporter.

§ 1487.4 Assurance agreement.

(a) The assurance agreement shall provide that CCC shall pay the U.S. exporter in U.S. dollars for losses resulting from the failure of the foreign bank, which issues the bank letter of credit securing the export credit sale, to honor drafts drawn upon it or otherwise remit amounts properly due when such defaults are caused by the occurrence of non-commercial risks arising after export.

(b) The assurance coverage shall become effective on the date(s) of export(s) and continue in force for the period covered by the payment schedule for such export(s). Exports made prior to receipt by CCC of a telephonic or written application for an assurance agreement are ineligible for assurance coverage.

(c) The assurance agreement may contain such terms, conditions, and limitations not inconsistent with GSM-101 as are deemed necessary or desirable by the Assistant Sales Manager.

(d) The assurance agreement may be amended provided such amendment is in conformity with GSM-101 at the time of amendment and is approved by the Assistant Sales Manager. Amendments may include a change in the credit period and an extension of time to export. Any amendments of the assurance agreement may be subject to an increase in the assurance fee. Any amendment shall indicate its effective date and shall apply only to exports made on or after that date.

ASSURANCE RATES AND FEES

§ 1487.5 Assurance rates.

The assurance rates will be based upon the length of the payment terms provided by the export credit sale contract, the degree of risk that CCC assumes, and any other factors which CCC believes should be considered. Assurance rates charged by CCC under GSM-101 will be available upon request from the office specified in § 1487.16.

§ 1487.6 Assurance fees.

(a) The assurance fee will be computed on the basis of the portion of the port value, plus interest not to exceed 6 percent, which is assured under the assurance agreement.

(b) The exporter shall remit, with his written application, the full amount of the fee based on an applicable rate. If the application is submitted by telephone, telex, or TWX, final approval of the application will not be given until the fee has been received by CCC. Ap-

proval of the application will be final and refunds of the assurance fee will not be made after approval unless the Assistant Sales Manager determines that such a refund would be in the interest of GSM-101.

(c) If the application for an assurance agreement is not approved or is approved only for a part of the coverage requested, a full or pro rata refund of the remittance will be made. The assurance fee shall be made payable to CCC and mailed to the office specified in § 1487.16.

DOCUMENTS REQUIRED AFTER EXPORT

§ 1487.7 Evidence of export.

(a) The exporter shall provide a written report to the office specified in § 1487.16 within 20 days following each export covered under the assurance agreement. This report shall include the following:

- (1) Assurance agreement number.
- (2) Date of export.
- (3) Exporter's sale number.
- (4) Port value exported.
- (5) Kind, quantity and description of the commodity exported.

(6) Statement that the agricultural commodities of the grade, quality and quantity called for in his sales contract with the foreign importer have been exported.

(7) A statement that he has in his files documents evidencing the obligation of the foreign importer and that he will retain such documents in his files until three years after maturity of the related assurance agreement.

(8) A statement that a letter of credit has been opened in favor of the exporter to cover the port value of the commodity exported.

(9) A payment schedule showing the payment due dates and amounts due separately for both principal and interest for which credit has been extended to the importer.

(b) If the report required by paragraph (a) of this section is not received by CCC within 20 days after the date of the export, the assurance agreement shall become null and void with respect to defaults in payments applicable to such export. This provision may be waived by the Assistant Sales Manager for good cause shown.

LOSSES CAUSED BY NON-COMMERCIAL RISK DEFAULTS

§ 1487.8 Notice of default.

(a) If the foreign bank issuing the letter of credit fails to honor a draft in full conformity with the terms of the letter of credit and such default appears to be attributable to the occurrence of a non-commercial risk, the exporter or the assignee shall promptly furnish a written notice of default to the Treasurer, CCC. The notice shall include the assurance agreement number, the amount due, the date of refusal to pay, and reason for the default.

(b) Within 30 days after the notice of default, the exporter or the assignee shall furnish the following:

- (1) Assurance agreement number.
- (2) A certification that the scheduled payment has not been received.
- (3) A copy, certified as true and correct by the exporter, of each of the following:
 - (i) Foreign bank letter of credit securing the export credit sale.
 - (ii) Export credit sales contract.
 - (iii) Ocean carrier or intermodal bill(s) of lading with onboard ocean carrier date for each shipment.
 - (iv) Invoice(s) showing the port value of the commodities exported.
 - (v) A claim for a loss shall not be honored if it is not made in writing prior to the expiration of six months from the date of default of the scheduled payment.

§ 1487.9 Payment of loss.

- (a) Upon receipt of the information required under § 1487.8, and such evidence as CCC may deem necessary for the purpose of establishing that the loss was occasioned by the occurrence of a non-commercial risk default, CCC shall promptly determine whether or not a loss has occurred for which CCC is liable under the applicable assurance agreement and these regulations. CCC will promptly notify the exporter of its determination.
- (b) CCC's maximum liability will be limited to the assured value as shown in the assurance agreement. The liability of CCC shall be reduced to the extent that the exporter has obtained other valid and collectible coverage compensation for such loss. If the assured value covers only a percentage of the port value of an export credit sale, the liability of CCC shall be limited to such percentage of the loss.
- (c) CCC shall only honor claims for losses on amounts not paid as scheduled. CCC shall not honor claim for amounts due under an accelerated payment clause in the export credit sales contract or the letter of credit unless it is determined to be in the interest of GSM-101 by the Assistant Sales Manager.
- (d) If CCC determines that it is liable to the exporter and/or his assignee, the exporter and/or his assignee shall execute and submit to CCC an instrument, in form and substance satisfactory to CCC, subrogating to CCC, their respective rights for the amount of payment in default under the bank letter of credit and the applicable export credit sale. After receipt of an instrument of subrogation, CCC will remit the amount of the loss plus interest, at the Federal Reserve Bank of New York discount rate in effect on the date of default, beginning with the 31st day after notice of default was received by CCC and continuing to the date payment is made by CCC.
- (e) Upon payment of a claim to the exporter or his assignee, the exporter or his assignee shall cooperate with CCC to effect recoveries from the foreign bank and/or the importer.

- (f) Upon payment of loss to the exporter of his assignee, CCC will notify or the importer and/or the foreign bank of its rights under the subrogation agreement to recover all monies in default under the foreign bank letter of credit.
- (g) In the event monies for the defaulted payment are received by the exporter or the assignee from the importer, foreign bank, or any other source whatsoever, such monies shall be immediately paid to the Treasurer, CCC.
- (h) Recoveries made by CCC from the importer or foreign bank and recoveries received by CCC from the exporter or assignee or any other source shall be allocated by CCC to the exporter or assignee and CCC on a pro rata basis as their respective interest may appear.
- (i) Notwithstanding any other terms of the assurance agreement, the exporter shall be liable to CCC for any amounts paid by CCC under the assurance agreement when, and if it is determined by CCC that the exporter has been or is in breach of any contractual obligation, certification or warranty made by him for the purpose of obtaining the assurance agreement.

MISCELLANEOUS PROVISIONS

§ 1487.11 Assignment.

- (a) The exporter may make an assignment of proceeds payable by CCC under the assurance agreement to only a bank or other financing institutions in the United States. The assignment shall cover all amounts payable under the assurance agreement not already paid and shall not be made to more than one party.
- (b) An original and two copies of the written notice of each assignment of monies that may be due or come due from CCC together with one signed copy of the instrument of assignment, which shall be a true copy of the original, must be filed by the assignee with the Treasurer, CCC, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013.
- (c) Receipt of the notice of assignment shall be acknowledged by an official of CCC.

§ 1487.12 Covenant against contingent fees.

The exporter warrants that no person or selling agency has been employed or retained to solicit or secure the assurance agreement, or that there is any agreement or understanding for commission, percentage, brokerage, or contingent fee except in the case of bona fide employees or bona fide established commercial or selling agencies maintained by the exporter for the purpose of securing business. For breach or violation of his warranty, CCC shall have the right, without limitation of any other rights it may have, to annul the assurance agreement without liability to CCC.

§ 1487.13 Shipment of Commodities on Vessels Calling at North Vietnamese Ports.

Any commodity exported under an assurance agreement shall not be shipped from the United States, or transshipped through Canada via the Great Lakes, at port on the St. Lawrence River, on a

vessel which has called at a North Vietnamese port on or after January 25, 1966, unless a special waiver is granted by the Maritime Administration. Commodities shipped on such vessel shall not be considered to have been covered by the assurance agreement.

§ 1487.14 Officials not to benefit.

No member of or delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of the assurance agreement or to any benefit that may arise therefrom, but this provision shall not be construed to extend to the assurance agreement if made with a corporation for its general benefit.

§ 1487.15 Exporter's records and accounts.

Authorized officials of USDA shall have access to and the right to examine any pertinent books, documents, papers and records of the exporter and/or the financing institution involving transactions related to the export credit sale covered by the assurance agreement until three years after expiration of the coverage of the related assurance agreement.

§ 1487.16 Communications.

Unless otherwise provided, written requests, notifications, or communications concerning the assurance agreement shall be addressed to the Assistant Sales Manager, Commercial Export Programs, Office of the General Sales Manager, U.S. Department of Agriculture, Washington, D.C. 20250.

NOTE.—The recordkeeping and reporting requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

Signed at Washington, D.C., on September 28, 1977.

KELLY HARRISON,
Vice President, Commodity
Credit Corporation and, General
Sales Manager, Office of
the General Sales Manager.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION [10 CFR Part 791]

ELECTRIC HYBRID VEHICLE RESEARCH DEVELOPMENT AND DEMONSTRATION PROJECT

Performance Standards

AGENCY: U.S. Energy Research and Development Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Administrator of the U.S. Energy Research and Development Administration is directed in Pub. L. 94-413 (Electric and Hybrid Vehicle Research, Development, and Demonstration Act of 1976) to promulgate rules establishing performance standards representing the minimum level of performance required of electric or hybrid ve-

hicles to be purchased or leased under provisions of Pub. L. 94-413. This notice is intended to encourage timely public comment for consideration in preparing these performance standards.

DATES: Comments must be received on or before November 18, 1977.

ADDRESS: Send comments to Electric and Hybrid Vehicle Systems, Division of Transportation Energy Conservation, 20 Massachusetts Avenue NW., Washington, D.C. 20545.

FOR FURTHER INFORMATION CONTACT:

Paul J. Brown, 202-376-4681.

SUPPLEMENTARY INFORMATION: The Administrator of the U.S. Energy Research and Development Administration is directed in Pub. L. 94-413 (Electric and Hybrid Vehicle Research, Development, and Demonstration Act of 1976) to promulgate rules establishing performance standards representing the minimum level of performance required of electric or hybrid vehicles to be purchased or leased under provisions of Pub. L. 94-413.

These standards are being developed taking into account factors of energy conservation, urban traffic characteristics, patterns of use for "second" vehicles, consumer preferences, maintenance needs, battery recharging characteristics, agricultural requirements, materials demand and their ability to be recycled, vehicle safety and insurability, cost, and other relevant considerations. In developing supporting material to form a basis for establishing such standards, the Energy Research and Development Administration has contracted by competitive procurement for studies by General Research Corp. of Santa Barbara, Calif., and also by Arthur D. Little, Inc., of Cambridge, Mass. These studies are to develop and document recommendations for the electric and hybrid vehicle minimum performance standards. Interim reports on this work were presented at the Fourth International Symposium on Automotive Propulsion Systems in Washington, D.C., during April 1977. The final report on the General Research Corp. contract is currently available and the Arthur D. Little, Inc., report is scheduled to be available in several weeks. A copy of the contract reports may be obtained from the Office of Electric and Hybrid Vehicle Systems, Transportation Energy Conservation Division, Energy Research and Development Administration, 20 Massachusetts Avenue NW., Washington, D.C. 20545. These reports will also soon be available from the National Technical Information Service, U.S. Department of Commerce, 5282 Port Royal Road, Springfield, Va. 22161.

The Society of Automotive Engineers has been engaged by contract to provide critical comment on the specifications recommended by General Research Corp. and Arthur D. Little, Inc. A copy of this report, when available, may also be obtained from the above sources.

Written public comments and recommendations with respect to the proposed standards are invited from interested individuals and organizations, and will be considered by the Energy Research and Development Administration prior to the required promulgation of minimum performance standards by December 17, 1977. It is requested that all comments and recommendations be mailed to the Office of Electric and Hybrid Vehicle Systems by November 18, 1977, to provide sufficient time for such consideration.

Dated at Washington, D.C., this 26th day of September 1977.

MAXINE SAVITZ,
Director, Division of Buildings
and Community Systems.

[4910-13]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Docket No. 77-WE-31-AD]

AIRWORTHINESS DIRECTIVES

McDonnell Douglas DC-10 Series Airplanes
AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes an airworthiness directive (AD) that would require both of the following to be accomplished on DC-10 series airplanes: (1) The modification of the stall warning installation and (2) the addition of a preflight stall warning check to the FAA Approved Airplane Flight Manual. The proposed AD is needed to prevent aborted takeoffs at speeds above the designated speed for an aborted takeoff, due to a false stall warning which could result in the airplane running off the runway.

DATES: Comments must be received on or before November 3, 1977.

ADDRESSES: Send comments on the proposal in duplicate to: Department of Transportation, Federal Aviation Administration, Western Region, Attention: Regional Counsel, Airworthiness Rules Docket, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009.

The applicable service bulletin may be obtained from: McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, Calif. 90846, Attention: L. A. Eisenberg, CI-750, 54-60. Also, a copy of this service bulletin may be reviewed at, or a copy obtained from: Rules Docket, in Room 916, FAA 800 Independence Ave., SW., Washington, D.C. 20591, or Rules Docket, in Room 6W14, FAA Western Region, 15000 Aviation Blvd., Hawthorne, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Jerry J. Presba, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009, telephone: 213-536-6351.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Interested persons are also invited to comment on the economic, environmental and energy impact that might result because of adoption of the proposed rule. Communications should identify the regulatory docket number and be submitted in duplicate to the Federal Aviation Administration, at the address given in the opening section of this AD. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of the comments received. All comments submitted will be available, both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD will be filed in the Rules Docket.

During the past two years, 58 reported false stall warning annunciations have occurred during takeoff roll at rotation on DC-10 series airplanes. Although the false stall warnings have occurred above the normal abort speed, this condition has resulted in five aborted takeoffs. To alleviate aborted takeoffs induced by false stall warnings, the McDonnell Douglas Corporation has prepared a modification to add a time delay to the stall warning circuitry.

The proposed delay provides a greater time interval between the designated abort speed and any possible false stall warning. The additional delay time will normally result in the airplane becoming airborne before a false stall warning can occur. This should decrease the possibility of an aborted takeoff.

The five second time delay is effected immediately after takeoff only. During the time from nose gear lift off plus five seconds, throughout the flight regime to touchdown, an approach to stall will have a normal undelayed stall warning annunciation.

Since false stall warnings are likely to occur in other airplanes of the same type design, the proposed AD would require accomplishment of the following on DC-10 airplanes: (1) the installation of necessary hardware which will add a normal five second time delay to the stall warning initiation circuitry; and (2) the incorporation in the FAA Approved Airplane Flight Manual of a preflight test procedure that verifies operation of the five second time delay.

NOTE.—In separate but related action, the FAA is proposing the mandatory modification of the angle of attack sensor used on DC-10

and other airplanes, to minimize the probability of false stall warnings.

DRAFTING INFORMATION

The principal authors of this document are Herbert G. Peters, Aircraft Engineering Division, and Dewitte T. Lawson Jr., Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend Section 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

McDONNELL DOUGLAS: Applies to DC-10-10, -10F, -30, -30F and -40 series airplanes, certificated in all categories.

Compliance required as indicated.

To minimize the probability of an aborted takeoff following a false stall warning, add a five second time delay between nose gear lift off and the initiation of a stall warning, by accomplishing the following:

a. Within 2,500 additional hours time in service, or 250 days from the effective date of this AD, whichever occurs earlier, unless already accomplished, or unless incorporated in production, modify the airplanes in accordance with McDonnell Douglas DC-10 Service Bulletin 22-94 dated August 4, 1977, or later FAA approved revisions.

b. Incorporate revisions in the FAA Approved Airplane Flight Manual, Documents MDC-J1010, MDC-J1030, MDC-J5830, MDC-J1040 and MDC-J2140, by adding the following new heading and text in Section III Procedures:

Stall warning preflight check

Rotate "Stall Test" switch to "L (MOM)." Note five second delay before stick shaker activation. Rotate "Stall Test" switch to "R (MOM)." Again note five second delay before stick shaker activation.

c. Equivalent modifications, procedures, or revisions may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

d. Special flight permits may be issued in accordance with FAR's 21.197 and 21.199 to operate airplanes to a base for accomplishment of the modification required by this AD.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, California on September 20, 1977.

WILLIAM R. KRIEGER,
Acting Director, Federal Aviation Administration, Western Region.

Secretary.

[Docket No. 77-80-38]

DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Proposed Designation of Transition Area, Mocksville, North Carolina

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: A public use instrument approach procedure is being developed for the Twin Lakes Airport, Mocksville, N.C., and additional controlled airspace is required for containment of IFR operations. This proposed rule will designate the Mocksville, N.C., transition area and will lower the base of controlled airspace in the vicinity of the airport from 1,200 to 700 feet to accommodate the anticipated IFR operations.

DATES: Comments must be received on or before November 14, 1977.

ADDRESS: Send comments on the proposal to: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

C. Herman Thompson, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320; telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Federal Aviation Administration, Attention: Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before November 14, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public, regulatory docket.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being

placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate the Mocksville, N.C., 700-foot transition area. This action will provide additional controlled airspace to accommodate aircraft performing IFR operations at Twin Lakes Airport, Mocksville, N.C.

DRAFTING INFORMATION

The principal authors of this document are C. Herman Thompson, Airspace and Procedures Branch, Air Traffic Division, and Richard L. Faber, Office of Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Administration Regulations (14 CFR 71) by adding the following:

Mocksville, N.C.

That airspace extending upward from 700 feet above the surface within a 6-mile radius of Twin Lakes Airport (Lat. 35°54'50"N., Long. 80°27'20"W.); within 3 miles each side of the 278° bearing from the Davis RBN (Lat. 35°54'48"N., Long. 80°27'23"W.); extending from the 6-mile radius area to 8.5 miles west of the RBN.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Ga., on September 23, 1977.

GEORGE R. LACAILLE,
Acting Director, Southern Region.

[Docket No. 17235; Notice No. 77-21]

GENERAL OPERATING AND FLIGHT RULES

Proposed Elimination of Certain Flight Plan Requirements for Civil Aircraft Operating Between the United States and Canada or Mexico

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to revoke the regulation prohibiting operation of civil aircraft between the United States and Canada or Mexico without

prior Air Traffic Control (ATC) authorization or filing of an IFR or VFR flight plan. The FAA believes that this requirement works a hardship upon a significant number of private operators who, to comply, may have to fly a considerable distance out of their way and expend additional flight time and fuel. The FAA believes that this proposal will eliminate the hardship without unduly interfering with efforts by law enforcement agencies to curtail the illicit carriage of narcotic and similar substances in civil aircraft operated between the United States and Canada or Mexico.

DATES: Comments must be received on or before: January 3, 1978.

ADDRESS: Send comments on the proposal in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-24) Docket No. 17235, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Walter J. Moylette, Air Traffic Rules Branch (AAT-220), Airspace and Air Traffic Rules Division, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: 202-426-3128.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue SW., Washington, D.C. 20591. All communications received on or before January 3, 1978, will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments in the Rules Docket, for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rule making will be filed in the public regulatory docket.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to: Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, Telephone: 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

DISCUSSION OF PROPOSED RULE

In 1973, the FAA adopted § 91.84 as a part of its concerted effort to assist law enforcement agencies in prohibiting the carriage of illicit narcotics, marijuana, and depressant and stimulant drugs or substances in civil aircraft operated between the United States and Canada or Mexico, and to minimize the operational hazards associated with this illegal use of aircraft. Simultaneously, the FAA adopted a number of amendments that were designed to accomplish this purpose. Section 91.84 of Part 91 currently states:

Unless otherwise authorized by ATC, no person may operate a civil aircraft between Mexico or Canada and the United States without filing an IFR or VFR flight plan, as appropriate.

Based on experience under the rule, the FAA believes that the regulation imposes a substantial burden on many affected flights. The hardship is particularly significant on commercial charter flights and some private operations to remote hunting, fishing, or similar camps located in Canada. Since communications in such areas are limited or nonexistent, compliance with § 91.84 frequently requires pilots to fly many miles out of their way to establish communications in order to file or close flight plans. Consequently, compliance with the rule not only causes inconvenience but frequently imposes additional economic burdens on the affected persons in terms of both fuel consumption and flight time.

Many requests for authorizations for waiver of the requirements of the rule have been received. At least one petition for permanent exemption has also been filed. Because of the undue burden found in some cases, the FAA, in the public interest, has granted numerous authorizations to aircraft operators to deviate from the provisions of the rule. Due to the substantial number of requests for authorization to operate without filing a flight plan, the FAA has reviewed the continued need for § 91.84 and discussed the matter with other Federal agencies. Based on that review, the FAA believes that it can revoke § 91.84 and yet continue to maintain the current level of safety and assistance to other agencies in the elimination of the illicit carriage of narcotics, marijuana, and depressant and stimulant drugs and substances in civil aircraft.

This same level of control would continue to be maintained by the Federal Aviation Administration through its enforcement of several other provisions of the FARs in conjunction with several other Federal agencies (e.g., the Drug Enforcement Administration; the Immigration and Naturalization Service; and the Treasury Department) that are actively engaged in combating the illicit drug traffic.

It should be noted that the adoption of this proposal will not eliminate the necessity for a pilot of civil aircraft to comply with the flight plan requirements

of § 91.11 when he operates his aircraft in or penetrates a coastal or domestic air defense identification zone (ADIZ). It also would not affect the flight plan and ATC clearance requirements that § 91.115 imposes upon a pilot operating an aircraft in controlled airspace under IFR.

DRAFTING INFORMATION

The principal authors of this document are Walter J. Moylette, Air Traffic Service, and Gloria J. Willingham, Office of the Chief Counsel.

THE PROPOSED RULE

§ 91.84 [Reserved]

Accordingly, the Federal Aviation Administration proposes to amend Part 91 of the Federal Aviation Regulations (14 CFR Part 91) by revoking § 91.84 and designating it "[Reserved]."

(Secs. 307(c), and 313(a), Federal Aviation Act of 1958, as amended, 49 U.S.C. 1348(c), 1354(a); and sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)), and 14 CFR 11.45.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on September 19, 1977.

CHARLES H. NEWFOL,
Acting Director,
Air Traffic Service.

[Release Nos. 33-5868, 34-13989, 35-20188, IC-9944]

AUDITOR CHANGES

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The Commission is proposing to amend its rules regarding the reporting of changes of a registrant's independent accountants to require disclosure of (1) the reasons for such changes and (2) whether the decision to change independent accountants was approved by the registrant's Board of Directors or its audit committee. Currently, the reporting of reasons for changing independent accountants is limited to situations involving disagreements between the registrant and its independent accountants on matters of accounting principles or practices, financial statement disclosure, or auditing scope or procedure. The increased disclosure of facts surrounding a change of auditors should aid investors in better understanding and evaluating the registrant's relationship with its independent accountants.

DATE: Comments should be submitted on or before November 30, 1977.

ADDRESS: Comments should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All comments will be available for public inspection (File No. S7-720).

FOR FURTHER INFORMATION CONTACT:

Edward R. Cheramy, Office of the Chief Accountant, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 (202-376-8020).

SUPPLEMENTARY INFORMATION: Beginning in 1971,¹ the Commission has required specific disclosure in a timely Form 8-K filing of any change in the principal independent accountants of the registrant, including disclosure of any disagreements between the registrant and its independent accountants on matters of accounting principles or practices, financial statement disclosure, or auditing scope or procedure. In 1974, in Accounting Series Release No. 165 (40 FR 1010), the Commission modified the Form 8-K rules and added a section to proxy statement rules entitled, "Relationship with Independent Public Accountants."² The current proxy statement requirements call for disclosure of auditor changes and the disagreements described in Form 8-K.

As stated in Accounting Series Release No. 165:

One of the underpinnings of the Commission's administration of the disclosure requirements of the federal securities laws is its reliance on the reports of independent public accountants on the financial statements of registrants. These reports provide the assurance of an outside expert's examination and opinion, thereby substantially increasing the reliability of financial statements.

Since that time, the role of the independent accountant as an outside expert has expanded. Auditors now perform limited reviews of interim financial information and, on occasion, report the results of such reviews in Form 10-Q. Generally accepted auditing standards now require auditors to report material weaknesses in internal ac-

counting controls to their clients.³ In addition, the Commission on Auditors' Responsibilities recommended the following:

The audit function can and should expand from being oriented to periodic financial statements to include information of an accounting and financial nature that management has a responsibility to report, provided that it is produced by the accounting system and the auditor is competent to verify the information.

The audit should be considered as a function to be performed during a period of time rather than an audit of a particular set of financial statements. The audit function should gradually expand to include all important elements of an entity's financial reporting process.⁴

This increased participation by the independent accountant in the financial reporting process will make it even more important that this relationship be fully understood and appreciated by the investors and other users of financial information. To sustain confidence by the users of the auditors' work product, the Commission and the accounting profession have required that auditors remain independent, both in fact and appearance, of the companies they audit. To assure this independence the Commission has encouraged the formation of audit committees comprised of independent members of the Board of Directors.⁵ Such committees can serve as links between the independent accountants and the shareholders and give auditors a level of authority higher than management for the discussion of controversial matters. In furtherance of these objectives, the Commission believes that one of the principal responsibilities of an independent audit committee should be that of recommending the engagement or discharge of the company's independent accountants to the full Board of Directors.

In view of the increased significance of the role of the independent accountant, the Commission believes that investors should be fully informed about the relationship between a company and its auditors. In a concurrent release the Commission is soliciting comment on a rule proposal to require public companies to disclose, in their proxy materials, the services provided by their independent accountants and the related fees.⁶

In this release, rules are proposed to more adequately inform investors and others of the circumstances relating to a change of auditors. Because the continu-

ing relationship between the company and its independent accountants is important, the Commission believes that investors should be informed on a timely basis of the reasons for a change in independent accounts. In addition, because of the significance of the decision, the Commission believes that investors should be advised whether the decision to change independent accountants was considered by the company's Board of Directors or its audit committee. The Commission therefore proposes to amend its Form 8-K and proxy rules to require disclosure of these matters.

EFFECTIVE DATE

If adopted, such rules are expected to be effective for all Form 8-Ks and proxy materials filed with the Commission thirty days after the adoption and publication in the Federal Register of final rules.

COMMISSION ACTION

The Commission hereby proposes (1) to amend § 240.14a-101 of 17 CFR Part 240 by revising Item 8 thereunder by revising paragraph (c) and adding new paragraph (f); and (2) to amend § 249.308 of 17 CFR Part 249 by adding to Item 4 thereunder new paragraphs (b) and (f) and redesignating existing paragraphs (b), (c), and (d) as (c), (d), and (e) respectively, as given below.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

§ 240.14a-101 Schedule 14A. Information required in proxy statement.¹

Item 8. Relationship with independent public accountants. . . .

(c) If a change has or changes in accountants have taken place since the date of the proxy statement for the most recent annual meeting of shareholders, describe the reasons for such change(s) and any disagreement(s) between the accountant and the issuer as previously reported or required to be reported on Form 8-K or in the accountant's letter filed as an exhibit thereto. Prior to submitting the preliminary proxy material to the Commission which contains or amends such description, the issuer shall furnish to any such accountant(s) the reason(s) for the change and a description of any disagreement(s). If such accountant(s) believe that the asserted reason(s) for the change and the description of any disagreement(s) are incorrect or incomplete, he may include a brief statement, ordinarily expected not to exceed 200 words, in the proxy statement presenting his view of the reasons for the change or the description of any disagreement(s). This statement shall be submitted to the issuer within ten business days of the date such accountant(s) received the issuer's reason(s) and description.

(f) If a change has or changes in accountants have taken place since the date of the proxy statement for the most recent annual meeting of shareholders, state whether such change(s) were considered, recommended or approved by the Board of Directors or an audit or similar committee thereof.

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

§ 249.308 Form 8-K, for current reports. . . .

Item 4. Changes in Registrant's Certifying Accountant. . . .

(b) State the reason(s) for the change in certifying accountant.

(c) was (b) . . .

(d) was (c) . . .

(e) was (d) . . .

(f) State whether such change(s) in certifying accountant were considered, recommended or approved by the Board of Directors or an audit or similar committee thereof.

These amendments are proposed to be adopted pursuant to authority in Sections 12, 13, 15(d), and 23(a) (15 U.S.C. 78l, 78m, 78o(d), 78w) of the Securities Exchange Act of 1934. Pursuant to Section 23(a) (2) of the Securities Exchange Act of 1934 the Commission has considered the impact of these proposals on competition and is not aware, at this time, of any burden that such rule amendments, if adopted, would impose on competition. However, the Commission specifically invites comments as to the competitive impact of these proposals, if adopted.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[Release Nos. 33-5869, 34-13990, 35-20189, IC-9945]

DISCLOSURE OF RELATIONSHIPS WITH INDEPENDENT PUBLIC ACCOUNTANTS

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Commission is proposing to adopt rules which would require disclosure in a company's proxy materials of (1) the services provided during the last fiscal year by the company's independent auditors and the related fees, (2) whether the board of directors or audit committee has approved all services, and (3) the company's revenues derived from the independent auditors. The proposed disclosures would provide objective evidence for helping investors to formulate an opinion as to the independence of the auditors. The Commission is also soliciting information and comments on the nature of services auditors provide their audits clients.

DATE: Comments should be submitted on or before November 30, 1977.

ADDRESS: Comments should refer to File S7-721 and should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol St., Washing-

ton, D.C. 20549. All comments will be available for public inspection.

FOR FURTHER INFORMATION CONTACT:

Gary A. Zell, (202-376-8019), Office of the Chief Accountant or J. Rowland Cook, (202-755-1750), Division of Corporation Finance, Securities and Exchange Commission, 500 North Capitol St., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: Rule 2-01 (Qualifications of Accountants) of Regulation S-X (17 CFR 210.2-01) requires auditors to be in fact independent in order to be recognized as independent by the Commission.

This rule states in part:

In determining whether an accountant may in fact be not independent with respect to a particular person, the Commission will give appropriate consideration to all relevant circumstances, including evidence bearing on all relationships between the accountant and that person or any affiliate thereof, and will not confine itself to the relationships existing in connection with the filing of reports with the Commission.

The reports of auditors provide assurance of the reliability of financial statements filed with the Commission and are relied upon by the Commission in administering the securities laws. The independence of auditors is a critical element of the system that has been in effect since the Securities Acts were enacted over 40 years ago.

PRIOR COMMISSION ACTIONS

The Commission has taken several steps in past years to assist auditors in strengthening their independence. These include Accounting Series Releases (ASR) Nos. 47 (11 FR 10930), 81 (23 FR 9777), and 126 (37 FR 14294) which provide guidelines and examples of relationships between registrants and auditors which the Commission or its staff concluded resulted in a lack of necessary independence.

Since 1971 the Commission has required disclosure of disagreements between registrants and displaced auditors which could have required or did require mention in the auditor's report. In 1975 the Commission strengthened this rule and in addition required disclosure in proxy statements of whether the auditors would be present at the stockholders' meeting with the opportunity to make a statement and whether they are expected to be available to answer stockholders' questions with respect to the audited financial statements.

In a concurrent release the Commission has issued for comment a proposed rule, No. 33-5868 (42 FR 53633), which would require that the reasons for a company changing its auditors be disclosed in a public report filed with the Commission and in its next proxy statement.

The Commission continues to seek ways to further strengthen the independence of auditors. It is desirable for all public companies to have audit committees composed of independent directors

and ways are being considered by which such committees might be encouraged or required.

The Commission is continuing to gather evidence of the types of services auditors provide their clients. Specific input on the range of services auditors provide their clients is solicited through this release. Interested persons are specifically requested to respond to the questions raised and supply any other information on this issue they believe may be useful to the Commission.

BACKGROUND

Various services provided by public accounting firms to their audit clients have been asserted to result in a lessening of the independence or appearance of independence of auditors.

The Commission on Auditors' Responsibilities (CAR) recently stated:

There is no evidence that provision of services other than auditing has actually impaired the independence of auditors. However, the belief of a significant minority of users that independence is impaired creates a major problem for the profession. Decisions on the other services offered and used should be made by individual public accounting firms and boards of directors of clients.¹

The CAR summarizes "The Management Services Controversy" as follows:

A pronounced concern with providing management services to audit clients developed in the early 1960s when those services grew at a rapid rate. Since then, the AICPA has had two special committees study the problem. The first, the Ad hoc Committee on Independence (1969), considered only management services and the second, the Committee on Scope and Structure (1974), considered all other services. The AICPA's Ethics Division and Management Advisory Services Division have issued a number of pronouncements limiting the services that can be provided to audit clients.

Many others—primarily college professors—have surveyed user groups, independent auditors, and corporate executives to determine the extent of concern with the effect of management services on independence. The surveys have produced mixed and conflicting results, but generally they have shown that a significant minority of users are concerned about the potential conflict between management services and the audit function. The concern of users decreases as their familiarity with the nature of services offered by public accounting firms increases, and it diminishes substantially when the services are provided by different staff, such as a separate management services division. In general, corporate executives and auditors are less concerned than users. All three groups generally believe management services cause a less serious conflict than other factors such as "flexible" accounting principles or payment of the audit fee by the client.

That any large, although minority, segment of financial statement users views

¹ "Report of Tentative Conclusions," The Commission on Auditors' Responsibilities, 1977, p. 92. (The Commission on Auditors' Responsibilities was established in October 1974 by the American Institute of Certified Public Accountants to study the role and responsibilities of independent auditors.)

management services as potentially reducing the auditor's independence must be a cause for concern. If the views of the minority were supported by empirical evidence of loss of independence, prohibition of management services would be essential.²

This concern has also been reflected in other forums.³

Some people believe that auditors should not provide any services other than auditing to their clients. Professors Mautz and Sharaf stated:

For the good of the profession, auditing must be recognized as a specialty separate from the remaining functions of public accountants. Accountants who serve as auditors should perform no other functions for their clients, and those who perform other functions should not engage in opinion audits. Our reason for so contending is the incompatibility of auditing with other services. We see auditing as something more than a skilled craft. Auditing is a quasi-judicial function and requires a type of independence entirely different from that required for the performance of any other public accounting type of service.⁴

It has also been observed that it is difficult to separate the functions of auditing from providing advice to management. A natural result of the audit process is suggestions to management for improvements in the company's accounting methods, procedures and controls. The auditor thus extends his role to advising management. This advice is generally considered desirable since the auditors' training and experience bring knowledge and expertise not necessarily available within many organizations. Accordingly, some believe that any lessening of independence as a result of such advice to management is more than offset by the benefits resulting from the auditors' expertise.

It has been argued that it is desirable for public accounting firms to provide certain services that result in employing persons with specialized skills who may also contribute to innovation and improvement in auditing methods and procedures. For instance, as a result of providing computerized accounting systems design, firms have had available the specialized skills of the employees providing such services to develop audit tools to be used in auditing computerizing accounting systems. If such services were not offered by the audit firm, it has been argued that audit quality might suffer. Accordingly, the public interest may be better served by permitting auditors to provide certain services even if it results in some lessening of the appearance of independence. Similarly,

certain services (i.e., preparation of income tax returns) may best be provided by accountants who also perform audits since they possess the necessary skills, expertise, and knowledge of the client's financial transactions to most effectively fulfill the responsibilities attendant to the service. The auditors' expertise in certain areas may not be replaceable by practical means and the benefits to independence from prohibiting certain services might be more than offset by the resultant costs.

Various specific services have been suggested as lessening the auditors' independence when such services are rendered to audit clients. Some of these are actuarial services, tax advice and preparation of tax returns, recruiting of executives and placing former partners and employees with clients, plant layout and engineering, market research, and appraisal services.

REQUESTS FOR OTHER COMMENTS AND INFORMATION

The Commission is continuing to gather evidence of the types of services auditors provide. Accordingly, specific responses are solicited from companies, auditors and other interested persons to the following items:

1. A description of each specific kind of service provided by public accounting firms.
2. Information indicating the extent of each such service. Public accounting firms are requested to furnish information as to the amount of fees from each service and the relationship to the audit function.
3. Information as to the reasons any previously provided service has been discontinued, any new service has been initiated, or any service that has been considered is not provided.
4. Should auditors be prohibited from providing their audit clients any non-audit services? If not, which particular services should be permitted? Should any permitted services be limited to a percentage of the audit fee? What is an appropriate limitation?
5. What attributes should be used to evaluate the effect on independence and the desirability of the service being offered by auditors?
6. What services are desirable for auditors to continue in order to maintain employees with specialized skills to contribute to improvements in auditing methods and procedures?
7. Should auditors be permitted to appear before regulatory bodies as experts on matters which affect their clients?

The responses to these matters will provide the Commission with important information in considering proposed rule-making relating to auditors' independence. Respondents are encouraged to supply any other information they believe useful to this issue.

DISCLOSURE OF AUDITOR SERVICES, FEES AND RELATIONSHIPS

The Commission on Auditors' Responsibilities has included a recommen-

dation in its "Report of Tentative Conclusions" that "the nature and extent of other services provided by the auditor should be disclosed in proxy statements."⁵ It further stated that:

As noted earlier, the concern of users that provision of other services impairs the auditor's independence decreases as their knowledge about the services increases. The best way to dispel concerns of any potential conflicts of interest is to disclose the facts. The proxy rules for publicly owned companies already require disclosure of the interests of management and others in certain transactions. The Commission (CAR) recommends that public companies also disclose, in the proxy statements issued to shareholders that include selection or ratification of the election of independent auditors, information on the nature of other services provided to the companies by their independent auditors.⁶

Disclosure in proxy statements of all services provided to public companies by their auditors and the related fees will provide objective evidence of the types and amounts of services being provided by auditors and rules to require this are proposed. Fees earned from affiliates are also proposed to be disclosed.

The case for disclosing audit fees when no other services were rendered is not as strong. However, arguments can be made that the absolute amount of the fees paid may be significant in that they can be compared to fees paid by similar companies. While the relationships may vary for a variety of reasons (e.g., poor internal control, centralization of accounting, number of operating divisions, etc.), the amount may serve as the basis for questions by shareholders. In addition the relative importance of the audit fee to the auditor may provide information as to the auditors' economic dependence on the company.⁷ Further, the Commission believes it is appropriate for all of the relationships of the auditor and the company to be disclosed to shareholders and this includes the amount of audit fees paid.

The Commission believes that objectivity and independence are enhanced if the auditor deals with an audit committee of independent directors or the board of directors in determining services and fees. In order to provide investors with knowledge of whether the board of directors or audit committee has approved all services provided by the auditors, the Commission proposes to require disclosure of whether such approval has taken place.

The Commission is also concerned about the possible effect on the auditors'

⁵ "Report of Tentative Conclusions," The Commission on Auditors' Responsibilities, 1977, p. xxi.

⁶ Ibid., p. 101.

⁷ The American Institute of Certified Public Accountants (AICPA) has adopted a resolution providing that, among other things, firms file with the AICPA, available for public inspection, the number of SEC audit clients each of whose total domestic fees exceed 5 percent of total domestic firm fees and the percentage which each of these clients' fees represent to total domestic firm fees.

independence and objectivity of any understanding or agreement limiting the auditors' fee to an absolute amount. Accordingly, the proposed rule would require disclosure of any such agreement.

Services and products acquired from clients by auditors, if of a sufficient magnitude, may also be perceived as lessening independence. In order to provide investors with objective evidence of the relevant relationships between auditors and their clients, the Commission is also proposing that significant revenues of the company derived from its auditors be disclosed in the proxy statement.

Transactions between the company and its auditors that are on terms not customary in the industry or which differ from those offered other customers may also provide evidence that there has been a lessening of independence. Accordingly, the Commission proposes disclosure of such transactions.

The Commission has not defined its use of the word "customary." As it relates to the fees of the auditors, the Commission is interested in disclosure of situations where the auditor agrees to a fee significantly less than is normal in order to obtain the client or in response to criticism of prior services. The commission specifically requests comments on a better term or an improved definition of the term "customary."

An illustration of the proposed disclosure might be as follows:

Fees to A, B & C, the Company's independent accountants, for the audits for 1977 and 1976 and other services in 1977 were as follows (all of which have been approved by the Board's Audit Committee):

	Dollars
Examination of financial statements for year ended December 31, 1977 (\$95 for 1976).....	100
Limited review of quarterly reports.....	6
Preparation of corporate tax returns.....	20
Conferences with company's staff and tax examiners in connection with IRS examinations.....	20
Design of data processing system for factory payroll.....	25
Other *	15

* Includes items which are in the aggregate under 10 percent of total fees paid during year to A, B & C.

COMMISSION ACTION

Section 240.14a-101 of 17 CFR Part 240 is proposed to be amended by the addition of new subparagraphs (g) and (h) under Item 8 of Schedule 14A as given below:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

§ 240.14a-101 Schedule 14A. Information required in proxy statement.¹

Item 8. Relationship with independent public accountants. * * *

(g) The fee, or estimate, for examination of financial statements of the issuer and its affiliates for the two fiscal years most recently completed and the services, other than audit, provided to the issuer and its

affiliates, officers and directors by the issuer's principal accountant during the issuer's last fiscal year together with the fee for each such service. Indicate also whether the issuer's Board of Directors or its audit committee has specifically approved all such audit and other services provided to the issuer.

Instructions. 1. Broad general categories such as "SEC matters," "tax matters" or "management advisory services" will not be deemed sufficiently specific.

2. Individual services which in the aggregate result in fees of less than 10 percent of the total fees incurred to the principal accountant during the last fiscal year may be combined and disclosed as "other."

3. Describe the circumstances and give details of any services provided by the issuer's independent accountant during the latest fiscal year that were billed at rates or terms that were not customary.

4. Describe any existing understanding or direct or indirect agreement that places a limit on current or future years' audit fees.

(h) The revenues of the issuer during the past fiscal year that are derived from the issuer's principal accountant (and from the partners or owners if the principal accountant is other than an individual practitioner).

Instructions. 1. Activities that result in revenues of less than 20 percent of the total fees disclosed in (g) need not be disclosed.

2. Include a description of each activity resulting in revenue and the amount from each.

3. Notwithstanding the above exemption, describe the terms of any transactions not in the ordinary course of business or if not at trade terms customary in the industry and with other customers.

These amendments are proposed to be adopted pursuant to authority in Sections 12, 13, 15(d), and 23(a) (15 U.S.C. 78i, 78m, 78o(d), 78w) of the Securities Exchange Act of 1934. Pursuant to Section 23(a)(2) of the Exchange Act the Commission has considered the impact of these proposals on competition and is not aware, at this time, of any burden that such rule amendments, if adopted, would impose on competition. However, the Commission specifically invites comments as to the competitive impact of these proposals, if adopted.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

USE OF STORAGE ALLOCATED FOR FLOOD CONTROL AND NAVIGATION PURPOSES

Proposed Revision of Regulations

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Proposed rule.

SUMMARY: This revision of 33 CFR 208.11 regulations prescribes the policy and procedure for regulating reservoir projects capable of regulation for flood control or navigation and the use of storage allocated for such purposes and provided on the basis of flood control and navigation. The revised regulations are applicable to dam and reservoir projects licensed, maintained and operated under provisions of the Federal Power Act (41 Stat. 1063 (16 U.S.C. 791(A)), Pub. L. 83-436, and other similar authorizing legislation; as well as to reservoir projects constructed wholly or in part with Federal funds as directed by Section 7 of the Flood Control Act of 1944. These proposed regulations are intended to establish an understanding between project owners, operating agencies and the Corps of Engineers with regard to certain activities and responsibilities concerning water control management throughout the nation in the interest of flood control and navigation.

DATES: Comments must be received on or before October 31, 1977.

ADDRESSES: Comments to HQDA (DAEN-CWE-HY) Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT:

Mr. Edgar P. Story, Engineering Division, Civil Works Directorate, Office of the Chief of Engineers, Washington, D.C. 20314 (202-693-7330).

SUPPLEMENTARY INFORMATION: Some special Acts of the Congress provide for construction and licensing of dam and reservoir projects by non-Federal agencies or private firms with the stipulation that the operation and maintenance of the dams shall be subject to reasonable rules and regulations of the Secretary of the Army in the interest of flood control and/or navigation. Frequently, no Federal funds are involved so that Section 7 of the 1944 Flood Control Act does not apply. However, if issuance of regulations by the Secretary of the Army is required by the authority under which flood control or navigation provisions are included as functions of the specific project, procedures similar to those followed in establishing regulations under Section 7 of the 1944 Flood Control Act will usually be followed for administrative purposes.

The proposed revisions to the § 208.11 Regulations, published in the FEDERAL

REGISTER Vol. 41, No. 97 on May 18, 1976, (41 FR 20401) include the following changes:

(a) The title of § 208.11 will be changed to "Regulations for Use of Storage Allocated for Flood Control or Navigation, and/or Project Operation at Reservoirs Subject to Prescription of Rules and Regulations by the Secretary of the Army in the Interest of Flood Control and Navigation."

(b) The Federal Power Act, 41 Stat. 1063 (16 U.S.C. 791(A)) and Section 9 of Pub. L. 83-436, 68 Stat. 303 are being added at Authority.

(c) At the second sentence of § 208.11 (a), PURPOSE, the phrase "constructed wholly or in part with Federal funds" is being deleted.

(d) Two new paragraphs are being added at § 208.11(b) as follows:

(1) "Section 18 of the Federal Power Act (41 Stat. 1063 (16 U.S.C. 791(A))), directs the operation of any navigation facilities built under the provision of that Act, be controlled by rules and regulations prescribed by the Secretary of the Army as follows:

The operation of any navigation facilities which may be constructed as part of or in connection with any dam or diversion structure built under the provisions of this Act, whether at the expense of a licensee hereunder or of the United States, shall at all times be controlled by such reasonable rules and regulations in the interest of navigation; including the control of the pool caused by such dam or diversion structure as may be made from time to time by the Secretary of the Army. . . .

(2) Various numbered articles of certain Federal Power Commission licenses require the licensee to operate the project in accordance with an agreement to be entered into by the licensee and the Corps of Engineers for the purpose of determining detailed operating procedures for use during flood periods, such as Article 33 of FPC license No. 2009 which states:

"The Licensee shall operate its project in such manner as the Chief of Engineers, Department of the Army, or his authorized representative may prescribe in order that the flood control and/or other benefits from present and future improvements under the jurisdiction of the Corps of Engineers as authorized by Congress in the . . . River Basin will not be nullified or substantially impaired by operation of the Licensee's project.

(e) A new paragraph is being added at § 208.11(b)(3) as follows: "Section 9 of Pub. L. 436-83d Congress (68 Stat. 303) provides for the development of the Coosa River, Alabama and Georgia, and directs the Secretary of the Army to prescribe rules and regulations for project operation in the interest of flood control and navigation as follows: The operation and maintenance of the dams shall be subject to reasonable rules and regulations of the Secretary of the Army in the interest of flood control and navigation."

(f) The present § 208.11(b)(2) is being renumbered § 208.11(b)(4). A new sentence is being added at the beginning of § 208.11(b)(4) as follows: "This regulation will also be applicable to dam and

reservoir projects, operated under provisions of other existing and future legislative acts wherein the Secretary of the Army is directed to prescribe rules and regulations in the interest of flood control and navigation and not specifically excluded by other sections of this regulation."

(g) Numerous minor grammatical changes are being made throughout the Regulation commensurate with the broadened authority of the added Congressional Acts.

(h) Pertinent project data for the following projects are being added to the list of projects in § 208.11(d)(11).

(1) Corps of Engineers South Pacific Division area:

- (i) Del Valle Dam and Reservoir
- (ii) Wanship Dam & Rockport Lake.
- (iii) Echo Dam & Reservoir.
- (iv) Lost Creek Dam & Reservoir.
- (v) East Canyon Dam & Reservoir.
- (vi) Pineview Dam & Reservoir.

(2) Corps of Engineers Missouri River Division area: Canyon Ferry Dam & Reservoir.

(3) Corps of Engineers South Atlantic Division area:

- (i) Gaston and Roanoke Rapids Dam & Reservoir Projects.
- (ii) Smith Mountain and Leesville Dam & Reservoir Projects.
- (iii) H. Neely Henry Dam & Reservoir.

NOTE.—The Chief of Engineers has determined that this rule does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107 (Statutory Authority Pub. L. 90-483).

Dated: September 20, 1977.

CHARLES I. MCGINNIS,
Major General, USA,
Director of Civil Works.

PART 208—FLOOD CONTROL REGULATIONS

§ 208.11 Regulations for Use of Storage Allocated for Flood Control or Navigation and/or Project Operation at Reservoirs subject to Prescription of Rules and Regulations by the Secretary of the Army in the Interest of Flood Control and Navigation.

(a) Purpose. Revision of policy and procedures. This regulation prescribes the policy and procedure for regulating reservoir projects capable of regulation for flood control or navigation and the use of storage allocated for such purposes and provided on the basis of flood control and navigation, except projects owned and operated by the Corps of Engineers; the International Boundary and Water Commission, United States and Mexico; and those under the jurisdiction of the Columbia River Treaty. The intent of this regulation is to establish an understanding between project owners, operating agencies, and the Corps of Engineers.

(b) Policy. The basic policy of the Corps of Engineers for carrying out the Congressional mandate of the cited authority is set forth below:

(1) Section 7 of the Flood Control Act of 1944 (58 Stat. 890, 33 U.S.C. 709) directs the Secretary of the Army to prescribe regulations for flood control and navigation in the following manner:

Hereafter, it shall be the duty of the Secretary of War to prescribe regulations for the use of storage allocated for flood control or navigation at all reservoirs constructed wholly or in part with Federal funds provided on the basis of such purposes, and the operation of any such project shall be in accordance with such regulations: *Provided*, That this section shall not apply to the Tennessee Valley Authority, except that in case of danger from floods on the lower Ohio and Mississippi Rivers the Tennessee Valley Authority is directed to regulate the release of water from the Tennessee River into the Ohio River in accordance with such instructions as may be issued by the War Department.

(2) Federal Power Commission Licenses.

(i) Section 18 of the Federal Power Act (41 Stat. 1063 (16 U.S.C. 791(A))) directs the operation of any navigation facilities built under the provision of that Act be controlled by rules and regulations prescribed by the Secretary of the Army as follows:

The operation of any navigation facilities which may be constructed as part of or in connection with any dam or diversion structure built under the provisions of this Act, whether at the expense of a licensee hereunder or of the United States, shall at all times be controlled by such reasonable rules and regulations in the interest of navigation; including the control of the pool caused by such dam or diversion structure as may be made from time to time by the Secretary of the Army. . . .

(ii) Various numbered articles of certain Federal Power Commission licenses require the licensee to operate the project in accordance with an agreement to be entered into by the licensee and the Corps of Engineers for the purpose of determining detailed operating procedures for use during flood periods, such as Article 33 of FPC license No. 2009 which states:

The Licensee shall operate its project in such manner as the Chief of Engineers, Department of the Army, or his authorized representative may prescribe in order that the flood control and/or other benefits from present and future improvements under the jurisdiction of the Corps of Engineers as authorized by Congress in the . . . River Basin will not be nullified or substantially impaired by operation of the Licensee's project.

(3) Section 9 of Pub. L. 436-83d Congress (68 Stat. 303) provides for the development of the Coosa River, Alabama and Georgia, and directs the Secretary of the Army to prescribe rules and regulations for project operation in the interest of flood control and navigation as follows:

The operation and maintenance of the dams shall be subject to reasonable rules and regulations of the Secretary of the Army in the interest of flood control and navigation.

(4) This Regulation will also be applicable to dam and reservoir projects operated under provisions of other existing and future legislative acts wherein the

Secretary of the Army is directed to prescribe rules and regulations in the interest of flood control and navigation and not specifically excluded by other sections of this regulation. The Chief of Engineers, U.S. Army Corps of Engineers, is designated the duly authorized representative of the Secretary of the Army to exercise the authority set out in the Congressional Acts. This regulation will normally be implemented by letters of understanding between the Corps of Engineers and project owner and will incorporate the provisions of such letters of understanding prior to the time construction renders the project capable of significant impoundment of water. A water control agreement signed by both parties will follow when deliberate impoundment first begins or . . . at such time as the responsibilities of any Corps-owned projects may be transferred to another entity. Promulgation of this regulation for a given project will occur at such time as the name of the project appears in the FEDERAL REGISTER in accordance with § 208.11(d)(11). When agreement on a water control plan cannot be reached between the Corps and the project owner after coordination with all interested parties, the project name will be entered in the FEDERAL REGISTER and the Corps of Engineers plan will be the official water control plan until such time as differences can be resolved.

(c) Scope and terminology. This regulation applies to Federal authorized flood control and/or navigation storage projects, and to non-Federal projects which require the Secretary of the Army to prescribe regulations as a condition of the license, permit or legislation, during the planning, design and construction phases, and throughout the life of the project. In compliance with the authority cited above, this regulation defines certain activities and responsibilities concerning water control management throughout the nation in the interest of flood control and navigation. In carrying out the conditions of this regulation, the owner and/or operating agency will comply with applicable provisions of Pub. L. 85-624, the Fish and Wildlife Coordination Act of 1958, and Pub. L. 92-500, the Federal Water Pollution Control Act Amendment of 1972. This regulation does not apply to local flood protection works governed by § 208.10, Title 33 of the Code and excludes small reservoirs containing flood control or navigation storage of less than 12,500 acre-feet, unless required by specific law or conditions of a license or permit.

(1) The terms "reservoir" and "project" as used herein include all water resource impoundment projects constructed or modified, including natural lakes, that are subject to this regulation.

(2) The term "project owner" refers to the entity responsible for maintenance, physical operation, and safety of the project, and for carrying out the water control plan in the interest of flood control and/or navigation as prescribed by the Corps of Engineers. Special arrangements may be made by the project

owner for "operating agencies" to perform these tasks.

(3) The term "letter of understanding" as used herein includes statements which consummate this regulation for any given project and define the general provisions or conditions of the local sponsor, or owner, cooperation agreed to in the authorizing legislative document, and the requirements for compliance with Section 7 of the 1944 Flood Control Act, Section 18 of the Federal Power Act or other special Congressional Act. This information will be specified in the water control plan and manual. The letter of understanding will be signed by a duly authorized representative of the Chief of Engineers and the project owner. A "field working agreement" may be substituted for a letter of understanding, provided that the specified minimum requirements of the latter, as stated above, are met.

(4) The term "water control agreement" refers to a compilation of water control criteria, guidelines, diagrams, release schedules, rule curves and specifications that basically govern the use of reservoir storage space allocated for flood control or navigation and/or release functions of a water control project for these purposes. In general, they indicate controlling or limiting rates of discharge and storage space required for flood control and/or navigation, based on the runoff potential during various seasons of the year.

(5) For the purpose of this regulation, the term "water control plan" is limited to the plan of regulation for a water resources project in the interest of flood control and/or navigation. The water control plan must conform with proposed allocations of storage capacity and downstream conditions or other requirements to meet all functional objectives of the particular project, acting separately or in combination with other projects in a system.

(6) The term "real-time" denotes the processing of current information or data in a sufficiently timely manner to influence a physical response in the system being monitored and controlled. As used herein the term connotes . . . the analyses for an execution of water control decisions for both minor and major flood events and for navigation, based on prevailing hydrometeorological and other conditions and constraints, to achieve efficient management of water resource systems.

(d) Procedures.—(1) Conditions during project formulation. During the planning and design phases, the project owner should consult with the Corps of Engineers regarding the quantity and value of space to reserve in the reservoir for flood control and/or navigation purposes, and for utilization of the space, and other requirements of the license, permit or conditions of the law. Relevant matters that bear upon flood control and navigation accomplishment include: runoff potential, reservoir discharge capability, downstream channel characteristics, hydrometeorological data

collection, flood hazard, flood damage characteristics, real estate acquisition for flowage requirements (fee and easement), and resources required to carry out the water control plan. Advice may also be sought on determination of and regulation for the probable maximum or other design flood under consideration by the project owner to establish the quantity of surcharge storage space, and freeboard elevation of top of dam or embankment for safety of the project.

(2) Corps of Engineers involvement. If the project owner is responsible for real-time implementation of the water control plan, consultation and assistance will be provided by the Corps of Engineers when appropriate and to the extent possible. During any emergency that affects flood control and/or navigation, the Corps of Engineers may temporarily prescribe regulation of flood control or navigation storage space on a day-to-day (real-time) basis without request of the project owner. Appropriate consideration will be given for other authorized project functions. Upon refusal of the project owner to comply with regulations prescribed by the Corps of Engineers, a letter will be sent to the project owner by the Chief of Engineers or his duly authorized representative describing the reason for the regulations prescribed, events that have transpired, and notification that the project owner is in violation of the Code of Federal Regulations. Should an impasse arise, in that the project owner or the designated operating entity persists in noncompliance with regulations prescribed by the Corps of Engineers, measures may be taken to assure compliance.

(3) Corps of Engineers Implementation of Real-Time Water Control Decisions. The Corps of Engineers may prescribe the continuing regulation of flood control storage space for any project subject to this regulation on a day-to-day (real-time) basis. When this is the case, consultation and assistance from the project owner to the extent possible will be expected. Special requests by the project owner, or appropriate operating entity, are preferred before the Corps of Engineers offers advice on real-time regulation during surcharge storage utilization.

(5) Water control agreement. (i) A water control diagram (graphical) will be prepared by the Corps of Engineers for each project having variable space reservation for flood control and/or navigation during the year; e.g., variable seasonal storage, joint-use space, or other rule curve designation. Reservoir inflow parameters will be included on the diagrams when appropriate. Concise notes will be included on the diagrams prescribing the use of storage space in terms of release schedules, runoff, non-damaging or other controlling flow rates downstream of the damsite, and other major factors as appropriate. A water control release schedule will be prepared in tabular form for projects that do not have variable space reservation for flood control and/or naviga-

tion. The water control diagram or release schedule will be signed by a duly authorized representative of the Chief of Engineers, the project owner, and the designated operating agency, and will be used as the basis for carrying out this regulation. Each diagram or schedule will contain a reference to this regulation.

(ii) When deemed necessary by the Corps of Engineers, information given on the water control diagram or release schedule will be supplemented by appropriate text to assure mutual understanding on certain details or other important aspects of the water control plan not covered in this regulation, on the water control diagram or in the release schedule. This material will include clarification of any aspects that might otherwise result in unsatisfactory project performance in the interest of flood control and/or navigation. Supplementation of the agreement will be necessary for each project where the Corps of Engineers exercises the discretionary authority to prescribe the flood control regulation on a day-to-day (real-time) basis. The agreement will include delegation of the responsibility. The document should also cite, as appropriate, Section 7 of the 1944 Flood Control Act, Section 18 of the Federal Power Act and/or other Congressional legislation authorizing construction and/or directing operation of the project.

(iii) All flood control regulations published in the FEDERAL REGISTER under this section (Part 208) of the Code prior to the date of this publication which are listed in § 208.11(e) are hereby superseded.

(iv) Nothing in this Regulation prohibits the promulgation of specific regulations for a project in compliance with the authorizing Acts, when agreement on acceptable regulations cannot be reached between the Corps of Engineers and the owner.

(6) *Hydrometeorological instrumentation.* The project owner will provide instrumentation in the vicinity of the damsite and will provide communication equipment necessary to record and transmit hydrometeorological and reservoir data to all appropriate Federal authorities on a real-time basis. For those projects where the owner retains responsibility for real-time implementation of the water control plan, the owner will also provide or arrange for the measurement and reporting of hydrometeorological parameters required within and adjacent to the watershed and downstream of the damsite, sufficient to regulate the project for flood control and/or navigation in an efficient manner. When data collection stations outside the immediate vicinity of the damsite are required, and funds for installation, observation, and maintenance are not available from other sources, the Corps of Engineers may agree to share the costs for such stations with the

project owner. Availability of funds and urgency of data needs are factors which will be considered in reaching decisions on cost sharing.

(7) *Project safety.* The project owner is responsible for the safety of the dam and appurtenant facilities and for regulation of the project during surcharge storage utilization. Emphasis upon the safety of the dam is especially important in the event surcharge storage is utilized, which results when the total storage space reserved for flood control is exceeded. Any assistance provided by the Corps of Engineers concerning surcharge regulation is to be utilized at the discretion of the project owner, and does not relieve the owner of the responsibility for safety of the project.

(8) *Notification of the general public.* The Corps of Engineers and other interested Federal and State agencies, and the project owner will jointly sponsor public involvement activities, as appropriate, to fully apprise the general public of the water control plan. Public meetings or other effective means of notification and involvement will be held, with the initial meeting being conducted as early as practicable but not later than the time the project first becomes operational. Notice of the initial public meeting shall be published once a week for three consecutive weeks in one or more newspapers of general circulation published in each county covered by the water control plan. Such notice shall also be used when appropriate to inform the public of modifications in the water control plan. If no newspaper is published in a county, the notice shall be published in one or more newspapers of general circulation within that county. For the purposes of this section a newspaper is one qualified to publish public notices under applicable state law. Notice shall be given in the event significant problems are anticipated or experienced that will prevent carrying out the approved water control plan or in the event that an extreme water condition is expected that could produce severe damage to property or loss of life. The means for conveying this information shall be commensurate with the urgency of the situation. The water control manual will be made available for examination by the general public upon request at the appropriate office of the Corps of Engineers, project owner or designated operating agency.

(9) *Other generalized requirements for flood control and navigation.* (i) Storage space in the reservoirs allocated for flood control and navigation purposes shall be kept available for those purposes in accordance with the water control agreement, and the plan of regulation in the water control manual.

(ii) Any water impounded in the flood control space defined by the water control agreement shall be evacuated as rapidly as can be safely accomplished without causing downstream flows to ex-

ceed the controlling rates; i.e., releases from reservoirs shall be restricted insofar as practicable to quantities which, in conjunction with uncontrolled runoff downstream of the dam, will not cause water levels to exceed the controlling stages currently in force. Although conflicts may arise with other purposes, such as hydro-power, the plan or regulation may require releases to be completely curtailed in the interest of flood control or safety of the project.

(iii) Nothing in the plan of regulation for flood control shall be construed to require or allow dangerously rapid changes in magnitudes of releases. Releases will be made in a manner consistent with requirements for protecting the dam and reservoir from major damage during passage of the maximum design flood for the project.

(iv) The project owner shall monitor current reservoir and hydrometeorological conditions in and adjacent to the watershed and downstream of the damsite, as necessary. This and any other pertinent information shall be reported to the Corps of Engineers on a timely basis, in accordance with standing instructions to the damtender or other means requested by the Corps of Engineers.

(v) In all cases where the project owner retains responsibility for real-time implementation of the water control plan, he shall make current determinations of: Reservoir inflow, flood control storage utilized, and scheduled releases. He shall also determine storage space and releases required to comply with the water control plan prescribed by the Corps of Engineers. The owner shall report this information on a timely basis as requested by the Corps of Engineers.

(vi) The water control plan is subject to temporary modification by the Corps of Engineers if found necessary in time of emergency. Requests for and action on such modifications may be made by the fastest means of communication available. The action taken shall be confirmed in writing the same day to the project owner and shall include justification for the action.

(vii) The project owner may temporarily deviate from the water control plan in the event an immediate short-term departure is deemed necessary for emergency reasons to protect the safety of the dam, or to avoid other serious hazards. Such actions shall be immediately reported by the fastest means of communication available. Actions shall be confirmed in writing the same day to the Corps of Engineers and shall include justification for the action. Continuation of the deviation will require the express approval of the Chief of Engineers, or his duly authorized representative.

(viii) Advance approval of the Chief of Engineers, or his duly authorized representative, is required prior to any deviation from the plan of regulation pre-

scribed or approved by the Corps of Engineers in the interest of flood control and/or navigation, except in emergency situations provided for in paragraph (d) (9) (vii) of this section. When conditions appear to warrant a prolonged deviation from the approved plan, the project owner and the Corps of Engineers will jointly investigate and evaluate the proposed deviation to insure that the overall integrity of the plan would not be unduly compromised. Approval of prolonged deviations will not be granted unless such investigations and evaluations have been conducted to the extent deemed necessary by the Chief of Engineers, or his designated representatives, to fully substantiate the deviation.

(10) *Revisions.* The water control plan and all associated documents will be revised by the Corps of Engineers, as necessary, to reflect changed conditions that come to bear upon flood control and navigation, e.g., reallocation of reservoir storage space due to sedimentation or transfer of storage space to a neighboring project. Revision of the water control plan, water control agreement, water control diagram, or release schedule requires approval of the Chief of Engineers or his duly authorized representative. Each such revision shall be effective upon the date specified in the approval. The original (signed document) water control agreement shall be kept on file in the Office, Chief of Engineers, Department of the Army, Washington, D.C. Copies of the agreement shall be kept on file and may be obtained from the office of the project owner, or from the office of the appropriate Division Engineer, Corps of Engineers.

(11) *Federal Register.* The following information for each project subject to Section 7 of the 1944 Flood Control Act and other applicable Congressional acts shall be published in the FEDERAL REGISTER prior to the time the projects become operational and prior to any significant impoundment before project completion or at such time as the responsibility for physical operation and maintenance of the Corps of Engineers owned projects is transferred to another entity: (i) Reservoir, dam, and lake names, (ii) stream, county and state corresponding to the damsite location, (iii) the maximum current storage space in acre-feet to be reserved exclusively for flood control and/or navigation purposes, or any multiple-use space (intermingled) when flood control or navigation is one of the purposes, with corresponding elevations in feet above mean sea level, and area in acres, at the upper and lower limits of said space, (iv) the name of the project owner, and (v) Congressional legislation authorizing the project for Federal participation.

(e) *List of projects.* The following tables, "Pertinent Project Data—§ 208.11 Regulation," show the pertinent data for projects which are subject to this regulation.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 67]

[Docket No. 21264; FCC 77-659]

COMMON CARRIERS BETWEEN UNITED STATES MAINLAND AND HAWAII, ALASKA, AND PUERTO RICO/VIRGIN ISLANDS

Integration of Rates and Services for Provision of Communications

AGENCY: Federal Communications Commission.

ACTION: Memorandum Opinion and Order, Docket 21264.

SUMMARY: The Federal-State Joint Board has set a pleading schedule for comments and replies on the question of what separations formula should be applied for Puerto Rico and the Virgin Islands. The Joint Board also adopted procedures it would follow at this stage of its efforts.

DATES: Comments due on or before December 1, 1977, replies due on or before January 16, 1978. Notice of Intent to file and be filed on due October 25, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Francis L. Young, Common Carrier Bureau, 202-632-5550.

MEMORANDUM OPINION AND ORDER

Adopted: September 22, 1977.

Released: September 28, 1977.

In the matter of integration of rates and services for the provision of communications by authorized common carriers between the United States Mainland and Hawaii, Alaska, and Puerto Rico/Virgin Islands, Docket No. 21264.

1. By "Notice of Inquiry, Proposed Rule Making and Creation of Federal-State Joint Board," FCC 77-366, released June

7, 1977,¹ the Commission convened this Joint Board to prepare a recommended decision for its consideration for the purpose of establishing the separations procedure(s) applicable to Puerto Rico and the Virgin Islands. The Joint Board having convened is now in a position to establish the procedures under which it will operate and will establish the pleading schedule for the development of information leading to the preparation of a recommended decision.

2. This proceeding is a result of the Commission's rate integration policy which is designed to eliminate the distinctions in levels of charges and rate patterns between the mainland and Puerto Rico and the Virgin Islands. The Commission has stated that it anticipates that full implementation of rate integration will result in the affected carriers participating in the division of revenues in the interstate revenue pool on the same basis as mainland companies, e.g., the recovery of their costs associated with the provision of interstate service and a rate of return. "Reconsideration of Integration of Rates and Services", FCC 77-364, released June 6, 1977. To accomplish this goal the carriers must separate their interstate costs on the basis of a prescribed methodology. Since no such methodology exists for Puerto Rico and the Virgin Islands, this Joint Board was convened pursuant to Section 410(c) of the Communications Act of 1934, as amended.

3. The notice creating this Joint Board clearly pointed out the Commission's initial impression that the jurisdictional separations procedures applicable on the mainland should also pertain to the carriers providing message telephone service to Puerto Rico and the Virgin Islands. (FCC 77-366, para. 4). The Commission did, however, point out that some of the affected carriers and governments expressed concerns that the existing NARUC-FCC Manual, which incorporate the "Ozark Plan" may require modification. While the Joint Board does not presently have a record of which to draw any impressions at this time, it would appear that a notice and comment procedure would be the most appropriate method to develop an adequate record. Upon completion of such a process the Joint Board will be in a posture to determine what further proceedings, if any, would be appropriate. The base line for this notice and comment procedure shall be the existing NARUC-FCC Separations Manual. All interested persons are invited to file comments on the question as to whether the existing manual should be applied to the provision of service to Puerto Rico and the Virgin Islands in the same manner as it is applied on the mainland. Necessarily included within this question is what changes, if any, should be made to the existing manual.

4. The specific procedures applicable to this notice and comment process are those that apply to any other Commission rule making proceeding except as modified herein. A service list will be

prepared. Parties who desire to file and be filed on are requested to file with the Commission a notice of intent to file and be filed on October 25, 1977. The notice should contain the address to which service should be executed. Failure to file such a notice will not preclude any person from filing comments or replies, however, other parties who have filed such notice will not be required to file copies of their comments and replies on such persons. An original and 6 copies of all documents filed shall be filed in the Commission's offices, and an additional copy shall be filed with each of the State Commissioners serving as participants on this Joint Board. The service list will contain addresses for each of these Commissioners.

5. Inquiries have been addressed to the Joint Board concerning how the routine matters that develop in rulemaking proceedings will be dealt with and whether ex parte rules apply to the Joint Board proceeding. This Joint Board was convened to prepare a recommended decision in a restricted rulemaking proceeding of the Commission. Since the Chief, Common Carrier Bureau is delegated broad authority in rulemaking proceedings before the Commission, we believe he is authorized to conduct the routine matters of this Joint Board including ruling on requests for extensions of time. In the event matters are raised requiring full Joint Board action, the Chief, Common Carrier Bureau is authorized to record the votes of the Joint Board members by means of telephone inquiry. As we previously noted, this proceeding is one phase of a restricted rulemaking. See § 1.1207 of the Commission's rules and regulations. Therefore the Commission's ex parte rules apply to this Joint Board proceeding. While the Commission's rules only identify decision-making Commission personnel, the State Commissioners appointed to the Joint Board fully participate in the decision making process. Therefore, they and their designated staffs are to be considered decision-making personnel fully subject to the provisions of the Commission's ex parte rules. To avoid the possibility of an inadvertent ex parte presentation being made to the staffs of the State Commission members of this Joint Board, the State Commissioners will designate and make part of the docket file maintained at the Commission, names of those staff personnel they will utilize to assist them in this Joint Board effort. All parties are strongly encouraged to review the rules, 47 CFR 1.1201-1.1251.

6. The pleading schedule we will adopt is designed to give all interested parties adequate time to prepare their comments and replies. The normal reply period has been extended since a 30 day period would require preparation of replies in the midst of a major holiday season. We must however emphasize our concern that this proceeding be concluded in a most expeditious manner, since the final phase of rate integration for Puerto Rico and the Virgin Islands is dependent on the development of cost related settlements. Such settlements cannot be developed

¹ See 42 FR 45937, September 13, 1977.

until the separations methodology is prescribed in this docket. In addition, we reemphasize that comments are to be limited to what changes, if any, should be made to the existing NARUC-FCC Separations Manual so as to make it applicable to Puerto Rico and the Virgin Islands. It is imperative that if changes are proposed, that the proposed modifications be supported in the record in such a manner that this Joint Board has a record on which to make its decision.

7. *Accordingly, it is ordered*, That a notice and comment procedure is instituted into the issues specified in paragraph 3 of this Memorandum Opinion and Order:

8. *It is further ordered*, That any interested party may file, on or before October 25, 1977, a notice of intention to participate. The Joint Board shall then issue a Public Notice stating the names of parties intending to participate herein. All comments, replies, and other submissions in this proceeding shall be served on all parties listed in the Public Notice:

9. *It is further ordered*, That any interested person participating in this proceeding shall file comments on or before December 1, 1977, and replies shall be filed on or before January 16, 1978:

10. *It is further ordered*, That all participants shall file an original and six copies of all comments, replies, or other submissions with the Secretary, Federal Communications Commission and one copy with each of the State Commission

members at addresses specified by them. Copies of all filings in this proceeding shall be available for public inspection during regular business hours in the Commission's Reference Room at its headquarters at 1919 M Street NW., Washington, D.C.; and

11. *It is further ordered*, That the routine matters concerning this proceeding will be dealt with by the Chief, Common Carrier Bureau. The Chief, Common Carrier Bureau is authorized to solicit and record the votes of the Joint Board via telecommunications for matters requiring Joint Board action.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1030]

[No. 36572]

CONTRACTS, FORWARDERS—MOTOR COMMON CARRIERS

Petition Seeking Institution of Rulemaking
Proceeding

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Rule-making; Clarification.

SUMMARY. This is to make clear that the proposed rule, published in the FEDERAL REGISTER of September 22, 1977, volume 42, at page 47853, would apply only to motor common carriers and freight forwarders of household goods. The words "of household goods" should be inserted in the text of the proposed rule and in the supplementary information section of the notice after the words "freight forwarder(s)" wherever found.

EFFECTIVE DATE: September 27, 1977.

ADDRESSES: Send comments to: Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, Deputy Director or Harvey Gobetz, Assistant Deputy Director, Section of Rates, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, (202-275-7693).

Accordingly, in the Supplementary Information section and in the proposed amendment to § 1080.2(c) published at 42 FR 47853, September 22, 1977, insert the words "of household goods" after the words "freight forwarder(s)" wherever they appear.

H. G. HOMME, Jr.,
Acting Secretary.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

[3410-01]

DEPARTMENT OF AGRICULTURE

Office of the Secretary MEAT IMPORT LIMITATIONS Fourth Quarterly Estimates

Pub. L. 88-482, approved August 22, 1964 (hereinafter referred to as the Act), provides for limiting the quantity of fresh, chilled, or frozen cattle meat (TSUS 106.10) and fresh, chilled, or frozen meat of goats and sheep except lamb (TSUS 106.20), which may be imported into the United States in any calendar year. Such limitations are to be imposed when it is estimated by the Secretary of Agriculture that imports of such articles, in the absence of limitations during such calendar year, would equal or exceed 110 percent of the estimated quantity of such articles, prescribed by Section 2(a) of the Act.

In accordance with the requirements of the Act, the following fourth quarterly estimates for 1977 are published.

1. The estimated quantity of such articles prescribed by Section 2(a) of the Act during the calendar year is 1,165.4 million pounds.

2. The estimated aggregate quantity of such articles which would, in the absence of limitations under the Act, be imported during calendar year 1977 is less than 110 percent of the estimated quantity prescribed by Section 2(a) of the Act.

Since the estimated quantity of imports does not equal or exceed 110 percent of the estimated quantity prescribed by Section 2(a) of the Act, limitations for the calendar year 1977 on the importation of fresh, chilled, frozen cattle meat (TSUS 106.10) and fresh, chilled or frozen meat of goats and sheep (TSUS 106.20), are not authorized to be imposed pursuant to Public Law 88-482 at this time.

This estimate is based upon information provided by the Department of State that agreements have been concluded with major supplying countries to limit meat imports into the United States in 1977. Were it not for these voluntary arrangements with supplying countries, the estimate of imports would have exceeded 110 percent of the estimated quantity prescribed by Section 2(a) of the Act.

Done at Washington, D.C. this 27th day of September, 1977.

BOB BERGLAND,
Secretary.

WICHITA CASE, ET AL.

Addition of Case for Oral Argument

Improved authority to Wichita case. Docket 28848; additional Dallas/Fort Worth-Kansas City nonstop service case, Docket 28778; Phoenix-Des Moines/Milwaukee route proceeding, Docket 28800; Sacramento-Denver Nonstop case, Docket 28961; Memphis-Twin Cities/Milwaukee case, Docket 29186; Greenville/Spartanburg - Washington/New York subpart M case, Dockets 24778 and 28308.

The Board has decided to include the Greenville/Spartanburg - Washington/New York Subpart M Case, Dockets 24778 and 28308, with the other above-described cases on which oral argument on limited issues heretofore has been scheduled to be held on October 12, 1977 (42 F.R. 52452, September 30, 1977). The

argument will be heard on the issues (a) with respect to the subsidy condition to be imposed on authority granted a local service carrier and (b) whether the authority should be permissive or not, which are being considered in the above-entitled cases. These issues are more fully described on page 3 of Order 77-8-146. The time and place of the oral argument before the Board are October 12, 1977, at 10 a.m. (local time), in Room 1027, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C., as previously established.

The respective views of the local service carriers, the trunkline carriers, the civic parties, and any other groups of parties which may wish to appear shall be presented by a common spokesman for each group of interests. Each of these groups which wishes to participate in the oral argument shall provide the name of the person selected, in writing, to be received in this office on or before October 4, 1977.

Dated at Washington, D.C., September 27, 1977.

[Order 77-9-85; Docket 30332; Appendix C.A.B. 26882]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order; Currency Matters

Issued under delegated authority September 21, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of Traffic Conference 2 of the International Air Transport Association (IATA). The agreement was adopted at the Composite Cargo Traffic Conference held in Vancouver in May 1977.

The agreement would establish currency adjustment factors for application with cargo rates and minimum charges between points within TC2 (Europe/Middle East/Africa), and is intended to relate local currency selling rates more closely to fluctuating foreign exchange values. We will approve the agreement insofar as it affects rates which are combinable with rates to/from the

United States and thus has indirect application in air transportation as defined by the Act.

Pursuant to authority duly delegated by the Board's regulations, 14 CFR 385.17, it is not found that Resolution 275/1977, incorporated in Agreement C.A.B. 26862, is adverse to the public interest or in violation of the Act.

Accordingly, it is ordered, That Agreement C.A.B. 26862 is approved.

Persons entitled to petition the Board for review of this order, pursuant to the Board's regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc 77-29033 Filed 9-30-77; 8:45 am]

Agreement	Specific commodity item No.	Description and rate
CAB 26869	1126	Electronic data storage-processing machines, \$1.99 per kilogram, minimum weight 2,000 kg, from New York to Tokyo; \$1.67 per kilogram, minimum weight 2,000 kg, from Los Angeles to Tokyo.

¹ Expires Mar. 31, 1978.

Pursuant to authority duly delegated by the Board in the Board's regulations, 14 CFR 385.14, it is not found that the agreement is adverse to the public interest or in violation of the Act provided that approval is subject to the conditions ordered.

Accordingly, it is ordered, That:

Agreement C.A.B. 26869 be approved, provided that (a) approval shall not constitute approval of the specific commodity descriptions contained there for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board unless within such period a peti-

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 9-77]

FOREIGN-TRADE ZONE—ORANGE COUNTY, NEW YORK

Application and Public Hearing

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the County of Orange, N.Y., requesting authority to establish two general-purpose foreign-trade zone sites in Orange County, adjacent to the New York City Customs port of entry. Site No. 1 would be located in the Sage Building at Stewart Airport, a former military facility currently owned by the Metropolitan Transportation Authority, a New York State agency. Site No. 2, a 4.9-acre site located on State Route 207, approximately one mile from Stewart Airport, is to be within a proposed 65-acre industrial park. Both sites are within the Town of New Windsor. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81), and the regulations of the Board (15 CFR Part 400). It was formally filed on September 19, 1977. The County is authorized to make application under Chapter 585 of the New York Laws of 1975, effective August 1, 1975.

The proposal was developed under the aegis of the Foreign Trade Zone Management Board of Orange County, consisting of members of the State Legislature and community leaders. This body publicly invited proposals for the devel-

opment and operation of the two sites. A not-for-profit corporation known as the Foreign Trade Development Co., of Orange County, Inc. was selected.

Site No. 1 is a concrete, windowless building containing 84,970 square feet of industrial space on four floors. Site No. 2 will be developed according to the operator's needs and made available on a leasehold basis. Both sites have access to the New York Thruway and Interstate Route 84.

The application includes economic data and information concerning the need for zone services in the area. Several firms have indicated their intention to use the zone for storage, assembly and distribution. Among the products involved are milking machines, centrifugal devices, color control lamps, control systems, analytical instruments, cosmetics, and components for diesel electric generators.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report thereon to the Board. The committee consists of Hugh J. Dolan (Chairman), Office of the Secretary, U.S. Department of Commerce, Washington, D.C.; Francis O'Rourke, Deputy Assistant Area Director, New York Seaport, U.S. Customs Service, 435 East 14th Street, New York, N.Y. 10009; and Colonel Clark H. Benn, District Engineer, U.S. Army Engineer District New York, 26 Federal Plaza, New York, N.Y. 10007.

In connection with its investigation of the proposal, the examiners committee will hold a public hearing on October 27, 1977, beginning at 9:00 a.m., in Building 105 (Administration Building), Metropolitan Transportation Authority, Stewart Airport, Newburgh, N.Y. The purpose of the hearing is to help inform interested persons about the proposal, to provide them with an opportunity to express their views, and to obtain information useful to the committee.

Interested persons or their representatives will be given the opportunity to present their views at the hearing. Such persons should by October 21 notify the Board's Executive Secretary in writing at the address below of their desire to be heard. In lieu of an oral presentation, written statements may be submitted to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through November 25, 1977. Evidence submitted during the post-hearing period is not desired unless it is clearly shown that the matter is new and material and that there are good reasons why it could not be presented at the hearing. A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

U.S. Customs Service, International Arrival Building, Stewart Airport, Newburgh, N.Y. 12550.

Office of the Executive Secretary, Foreign Trade Zones Board, U.S. Department of Commerce, Room 6886-B, Washington, D.C. 20230.

Dated: September 27, 1977.

JOHN J. DA PONTE, Jr.,
Executive Secretary,
Foreign-Trade Zones Board.

National Bureau of Standards COMMERCIAL STANDARD

Intent To Withdraw

In accordance with section 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10), notice is hereby given of the intent to withdraw Commercial Standard CS 243-62, "Stainless Steel Plumbing Fixtures (Designed for Residential Use)."

It has been determined that this standard is technically inadequate and that revision would serve no useful purpose because the subject matter of CS 243-62 is adequately covered by the American National Standards Institute's standard ANSI A112.19.3, "Stainless Steel Plumbing Fixtures (Designed for Residential Use)."

Any comments or objections concerning this intended withdrawal of this standard should be made in writing to the Standards Development Services Section, National Bureau of Standards, Washington, D.C. 20234, within 30 days after publication of this notice. The effective date of withdrawal will be not less than 60 days after the final notice of withdrawal. Withdrawal action terminates the authority to refer to a published standard as a voluntary standard developed under the Department of Commerce procedures from the effective date of withdrawal.

Dated: September 27, 1977.

ERNEST AMBLER,
Acting Director.

SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL AND ITS SCIENTIFIC AND STATISTICAL COMMITTEE AND ADVISORY PANEL AND GULF OF MEXICO FISHERY MANAGEMENT COUNCIL

Public Meeting

The South Atlantic Fishery Management Council and the Gulf of Mexico Fishery Management Council (both established by section 302 of the Fishery Conservation and Management Act of 1976, Pub. L. 94-265) will meet both jointly and separately, at the Hyatt Re-

gency House, 6375 Space Coast Parkway, Kissimmee, Fla. The joint meeting starts at 1:30 p.m., November 15, and adjourns about noon, November 16, 1977.

Proposed agenda. Discussion of mutual matters of interest and concern to both Councils.

The South Atlantic Fishery Management Council, the Scientific and Statistical Committee and its Advisory Panel will meet in separate session November 16-17, 1977, in Kissimmee, Fla. Meeting starts at 1:30 p.m. on November 16 and adjourns about 5 p.m. on November 17.

Proposed agenda. Fishery management plans being developed.

The Gulf of Mexico Fishery Management Council will meet separately November 16-17, 1977, in Kissimmee, Fla. This meeting starts at 1:30 p.m. on November 16 and adjourns about 5 p.m. on November 17.

Proposed agenda. (1) Management plans; (2) personnel and administration matters; (3) review of foreign fishing applications, if any; (4) other fishery management business.

These three meetings are open to the public. For more information on seating, changes to the agenda, or written comments, contact either Mr. Ernest D. Premetz, Executive Director, South Atlantic Fishery Management Council, Southpark Building, Suite 306, 1 Southpark Circle, Charleston, S.C. 29407, telephone 803-571-4366; or Mr. Wayne Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 W. Kennedy Boulevard, Tampa, Fla. 33607, telephone 813-228-2815.

Dated: September 27, 1977.

WINFRED H. MEIBOHM,
Associate Director, National
Marine Fisheries Service.

Office of the Secretary

ADVISORY PANEL FOR THE WESTERN PACIFIC FISHERY MANAGEMENT COUNCIL Establishment

In accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I (Supp. V., 1975)) and the Office of Management and Budget Circular A-63 of March 1974, and after consultation with OMB, the Department of Commerce has determined that the establishment of the Advisory Panel for the Western Pacific Fishery Management Council is in the public interest in connection with the performance of duties imposed on the Department by the Fishery Conservation and Management Act of 1976, Pub. L. 94-265 (16 U.S.C. 1852).

The Panel will provide the parent Council with pragmatic advice in counsel of the people most affected by the Council's management activities on matters of fishery management policy, on the

preparation of fishery management plans, on their views prior to submission to the Secretary, and on their effectiveness in operation.

The Panel will consist of approximately 50 members who are either actually engaged in the harvest, process, or consumption of, or who are knowledgeable and interested in the conservation and management of fishery resources. Members of the Panel will be appointed by the Council.

The Panel will function solely as an advisory body, and in compliance with the provisions of the Federal Advisory Committee Act. Copies of the Panel's Charter will be filed under the Act with the concerned Congressional committees. Inquiries regarding this notice may be addressed to the Committee Liaison Officer, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Rockville, Md. 20852.

Dated: September 26, 1977.

ELSA A. PORTER,
Assistant Secretary
for Administration.

ADVISORY COMMITTEE TO THE WHITE HOUSE CONFERENCE ON BALANCED NATIONAL GROWTH AND ECONOMIC DEVELOPMENT

Establishment

In accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I (Supp. V, 1975)) and Office of Management and Budget Circular A-63 of March 1974, the Advisory Committee to the White House Conference on Balanced National Growth and Economic Development is established as directed by section 204 of the Public Works and Development Act of 1976, Pub. L. 94-487, and in accord with the President's delegation of authority to the Secretary of Commerce.

The Committee will advise the Secretary of Commerce, through the Director of the White House Conference on Balanced National Growth and Economic Development, on the planning of the Conference and the preparation of the interim and final reports of the Conference.

The Committee will consist of 15 or more members appointed by the President, of whom not less than five shall represent business in the private sector, and also includes representatives of State and local government, labor, institutions, and consumer, environmental and other interests. In addition, the Secretaries of Agriculture, Commerce, and Housing and Urban Development, and other relevant Federal program managers designated by the President shall be members.

The Committee will function solely as an advisory body, and in compliance with the provisions of the Federal Advisory Committee Act. Its charter will be filed under the Act concurrent with the publication of this notice.

Interested persons are invited to submit comments regarding the establishment of the Advisory Committee. Those comments, as well as any inquiries, may be addressed to Mr. Clark Tyler, Deputy Director, White House Conference on Balanced National Growth and Economic Development, 2001 S Street NW., Washington, D.C. 20009.

Dated: September 26, 1977.

ELSA A. PORTER,
Assistant Secretary
for Administration.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

EXTENDING THE COTTON, WOOL AND MAN-MADE FIBER TEXTILE AGREEMENT WITH THE REPUBLIC OF KOREA

SEPTEMBER 28, 1977.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Extending the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 26, 1975, as amended, between the Governments of the United States and the Republic of Korea.

SUMMARY: Notes have been exchanged between the Governments of the United States and the Republic of Korea extending the third year of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 26, 1975, as amended, for three-months, through December 31, 1977. Accordingly, the specific levels of restraint previously established for the twelve-month period which began on October 1, 1976, for cotton, wool and man-made fiber textile products, produced or manufactured in the Republic of Korea, are being increased to reflect the extended agreement period.

EFFECTIVE DATE: October 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert C. Woods, International Trade Specialist, Office of Textile, U.S. Department of Commerce, Washington, D.C. 20230, (202-377-5423).

SUPPLEMENTARY INFORMATION: On October 1, 1976, there was published in the FEDERAL REGISTER (41 FR 43440) a letter dated September 29, 1976 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established the levels of restraint applica-

ble to certain specified categories of cotton, wool and man-made fiber textile products, produced or manufactured in Korea and exported to the United States during the twelve-month period which began on October 1, 1976 and extends through September 30, 1977. A correction in certain of the levels of restraint was published in the FEDERAL REGISTER on November 5, 1976 (41 FR 48765).

In the letter of September 28, 1977, published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to limit entry into the United States for consumption or withdrawal from warehouse for consumption of the designated categories of cotton, wool and man-made fiber textile products to the indicated 15-month levels of restraint.

ROBERT E. SHEPHERD,
Chairman, Committee for the
Implementation of Textile
Agreements, and Deputy As-
sistant Secretary for Re-
sources and Trade Assistance,
U.S. Department of Com-
merce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS,

September 28, 1977.

COMMISSIONER OF CUSTOMS,
DEPARTMENT OF THE TREASURY,
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: This directive amends, but does not cancel, the directive issued to you on September 29, 1976 by the Chairman of the Committee for the Implementation of Textile Agreements concerning imports into the United States of certain specified categories of cotton, wool and man-made fiber textile products, produced or manufactured in Korea.

Paragraph 1 of the directive of September 29, 1976 is further amended, effective on October 1, 1977, to read as follows:

"Under the terms of the Arrangement Regarding International Trade in Textiles, done at Geneva on December 20, 1973, pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 26, 1975, as amended, between the Governments of the United States and the Republic of Korea, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective on October 1, 1977 and for the fifteen-month period extending from October 1, 1976 through December 31, 1977, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 9/10, 18/19/26 (printcloth), 22/23, 26 (duck), 39, 42/43 and part of 62, 45/46/47, 48, 49, 50/51, 52, part of 62, and 63; wool textile products in Categories 104, 116/117, 120, 121, and 124; and man-made fiber textile products in Categories 208, 210, 218, 219, 221, 222, 224, 228, 229, 234, 210, 218, 219, 221, 222, 224, 228, 229, 234, 235, 237, and 238 in excess of the following levels of restraint:

Category	Fifteen Month Level of Restraint ¹
9/10	8,339,860 square yards
18/19/26 (printcloth) ²	6,632,884 square yards
22/23	4,560,235 square yards
26 (duck) ³	27,799,546 square yards
39	389,850 dozen pairs
42/43 and part of 62 ⁴	4,000,004 square yards equivalent
45/46/47	4,011,381 square yards equivalent
48	28,445 dozen
49	64,660 dozen
50/51	214,273 dozen (of which not more than 129,454 dozen shall be in Category 50 and not more than 175,220 dozen shall be in Category 51)
52	89,602 dozen
pt. 62 ⁴	214,565 pounds
pt. 63 (T.S.U.S.A. Nos. 380,390 and 382,380)	1,358,696 pounds
pt. 63 ⁴	1,358,696 pounds
104	2,750,000 square yards
116/117	589,696 pounds
120	400,560 numbers
121	242,885 numbers
124	1,265,025 numbers
208	22,500,000 square yards (of which not more than 10 million square yards shall be in T.S.U.S.A. Nos. 338,307 and 338,308)
210	2,187,500 square yards
218	1,122,238 dozen
219	5,153,570 dozen
221	3,530,379 dozen
222	1,298,674 dozen
pt. 224 (only T.S.U.S.A. Nos. 380,042 and 380,813)	51,666 dozen
pt. 224 (only T.S.U.S.A. Nos. 380,042 and 380,813)	60,606 dozen
pt. 224 ⁵	5,448,718 pounds
228	1,116,772 dozen
229	953,266 dozen
234	4,854,826 dozen
235	1,796,336 dozen
237	194,444 numbers
238	276,195 dozen

¹ The levels of restraint have not been adjusted to reflect any imports after September 30, 1976.

TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: This directive
amends, but does not cancel, the directive

Thirteen Month Level of Restraint	
1-10	110,917,730 square yards equivalent
11-20	50,700,996 square yards
21-30	10,673,882 square yards
31-40	16,698,231 square yards
41-50	11,153,737 square yards equivalent
51-60	8,615,911 units
61-70	21,067,661 units of which not more than 20,301,755 units shall be in T.S. U.S.A. 366-180, 366-186, 366-186S, 366-210, 366-216, 366-216S, 366-240
71-80	17,174 units
81-90	20,118,806 square yards equivalent

NOTE: The above levels have not been adjusted to reflect any changes in the U.S. T.S.A. numbers for duck fabric and
 1-10 through 01, 06, 08 328-01 through 04, 06, 08
 11-20 through 01, 06, 08 327-01 through 04, 06, 08
 21-30 through 01, 06, 08 328-01 through 04, 06, 08

Paragraph 2 of the directive of September 29, 1976, is amended by substituting October 31, 1977, for September 30, 1977.

The actions taken with respect to the Government of India and with respect to imports of cotton textiles and cotton textile products from India have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the
Implementation of Textile
Agreements, and Deputy As-
sistant Secretary for Re-
sources and Trade Assistance,
U.S. Department of Com-
merce.

COMMISSION OF FINE ARTS

Meeting

The Commission of Fine Arts will meet in open session to discuss various projects affecting the appearance of Washington, D.C. on Tuesday, October 25, 1977, at 10

issued to you on September 29, 1976 by the Chairman of the Committee for the Implementation of Textile Agreements concerning imports into the United States of certain specified categories of cotton textiles and cotton textile products, produced or manufactured in India.

Paragraph 1 of the directive of September 29, 1976 is amended, effective on October 1, 1977, to read as follows:

"Under the terms of the Arrangement Regarding International Trade in Textiles, done at Geneva on December 20, 1973, pursuant to the Bilateral Cotton Textile Agreement of August 6, 1974, as amended, between the Governments of the United States and India, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed, effective on October 1, 1977, and for the thirteen month period beginning on October 1, 1976 and extending through October 31, 1977, to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textiles and cotton textile products in Categories 1 through 64 in excess of the levels of restraint listed below. These goods shall be accompanied by an export visa.

Thirteen Month Level of Restraint	
1-10	110,917,730 square yards equivalent
11-20	50,700,996 square yards
21-30	10,673,882 square yards
31-40	16,698,231 square yards
41-50	11,153,737 square yards equivalent
51-60	8,615,911 units
61-70	21,067,661 units of which not more than 20,301,755 units shall be in T.S. U.S.A. 366-180, 366-186, 366-186S, 366-210, 366-216, 366-216S, 366-240
71-80	17,174 units
81-90	20,118,806 square yards equivalent

NOTE: The above levels have not been adjusted to reflect any changes in the U.S. T.S.A. numbers for duck fabric and

1-10 through 01, 06, 08 328-01 through 04, 06, 08
 11-20 through 01, 06, 08 327-01 through 04, 06, 08
 21-30 through 01, 06, 08 328-01 through 04, 06, 08

a.m. in the Commission offices at 708 Jackson Place, NW., Washington, D.C. 20006.

Inquiries regarding the agenda and requests to submit written or oral statements should be addressed to Charles H. Atherton, Secretary, Commission of Fine Arts, at the above address.

This notice confirms notice of January 11, 1977, published at 42 FR 2337.

Dated in Washington, D.C., September 27, 1977.

CHARLES H. ATHERTON,
Secretary.

DEPARTMENT OF DEFENSE

Office of the Secretary

DEFENSE SCIENCE BOARD TASK FORCE ON COUNTER-COMMUNICATIONS, COMMAND AND CONTROL (C)

Advisory Committee Meeting

The Defense Science Board Task Force on Counter-Communications, Command and Control (Counter-C) will meet in closed session on 15 October 1977 in the Pentagon, Washington, D.C.

The mission of the Defense Science Board Task Force is to advise the Secretary of Defense and the Director of Defense Research and Engineering on overall research and engineering and to provide long-range guidance to the Department of Defense in these areas.

The Task Force will provide an analysis of the communications, command and control (C) employed by potentially hostile forces and identify countermeasures that might be of significant help if the Department of Defense were required to counter those forces.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Task Force meeting concerns matters listed in section 552b(c) of Title 5 of the United States Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and
Directives, OASD (Comptrol-
ler).

ARMED FORCES EPIDEMIOLOGICAL BOARD

Open Meeting

1. In accordance with section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463) announcement is made of the following committee meeting:

NAME OF COMMITTEE: Subcommittee on Health Maintenance Systems of the Armed Forces Epidemiological Board.

DATE OF MEETING: October 20-21, 1977.

PLACE: Officers' Club Conference Room, School of Aerospace Medicine, Brooks Air Force Base, San Antonio, Tex.

TIME: 0830-1630, October 20, 1977; 0830-1300, October 21, 1977.

PROPOSED AGENDA: The proposed agenda will include a briefing on the U.S. Air Force School of Aerospace Medicine, a briefing on the USAF Health Maintenance Program "HEART", briefings on the hearing conservation program of the three military departments, a discussion of the "Women in the Army Study", a briefing on the development of physical fitness tests for various military occupations, a discussion of data on physical capabilities and limitations of women in the Armed Forces and Committee discussions for the development of recommendations.

2. This meeting will be open to the public, but limited by space accommodations. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. Interested persons wishing to participate should advise the Executive Secretary, DASG-AFEB, Room 1B472 Pentagon, Washington, D.C. 20310.

Dated: September 22, 1977.

DUANE G. ERICKSON,
LTC, MSC, USA,
Executive Secretary.

[3810-70]

ARMED FORCES EPIDEMIOLOGICAL BOARD

Open Meeting

1. In accordance with section 10(a) (2) of the Federal Advisory Committee Act (P.L. 92-463) announcement is made of the following committee meeting:

NAME OF COMMITTEE: Armed Forces Epidemiological Board ad hoc subcommittee on detection of wartime chemical contamination in the field water supplies.

DATE OF MEETING: October 26, 1977.

PLACE: Room 5E069 Forrestal Building, 1000 Independence Avenue SW., Washington, D.C.

TIME: 0900-1600.

PROPOSED AGENDA: The proposed agenda will include the discussion of problems related to detection of chemical contaminants in field water supplies in the combat environment and means available or under development to remove them.

2. This meeting will be open to the public, but limited by space accommodations. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. Interested persons wishing to participate should advise the Executive Secretary, DASG-AFEB, Room 1B472 Pentagon, Washington, D.C. 20310.

Dated: September 22, 1977.

DUANE G. ERICKSON,
LTC, MSC, USA,
Executive Secretary.

[6170-01]

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

SOLAR WORKING GROUP

Determination To Establish

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), I hereby certify that the establishment of a Solar Working Group as hereinafter identified, is in the public interest in connection with the performance of duties imposed upon the Energy Research and Development Administration by the Energy Reorganization Act of 1974 and other applicable law. This determination follows consultation with the Office of Management Secretariat of OMB concurs in the simultaneous publication of this Notice and the filing of the Charter.

Name of Advisory Committee: Solar Working Group.

Purpose: The Committee's objectives and scope of activities and duties are to provide guidance and evaluation by making an assessment of ERDA's solar programs.

Effective date of establishment and duration: The advisory committee is es-

tablished effective October 1, 1977. The advisory committee's termination date will be with the submission of its report but not later than April 1, 1978.

Membership: The membership of the advisory committee shall be balanced fairly in terms of the points of view represented and the functions to be performed by the advisory committee. Approximately 12 members from the fields of science, academia, utilities, and other sectors of the general public will serve on the committee. There will be no discrimination based on race, color, creed, national origin, religion, or sex.

Operation: The Solar Working Group will operate in accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), ERDA policy and procedures (10 CFR Part 707), OMB Circular A-63 (Revised), and other directives and instructions issued in accordance with the implementation of the Act. The Solar Working Group will meet approximately five times. An agenda for each meeting will be developed. The staff of the former General Advisory Committee (GAC) will provide on a continuous basis all information on solar energy programs, issues, and policies reasonably required by the committee to perform its functions. Staff support will be provided to the committee by the staff of the GAC.

HARRY L. PEEBLES,
Deputy Advisory Committee
Management Officer.

SEPTEMBER 29, 1977.

COAL RESEARCH, DEVELOPMENT AND DEMONSTRATION PROGRAM

Availability of Draft Environmental Impact Statement

Notice is hereby given that a Draft Environmental Impact Statement, ERDA 1557-D, Coal Research, Development and Demonstration Program (September 1977) was issued pursuant to the Energy Research and Development Administration's (ERDA) implementation of the National Environmental Policy Act of 1969. The statement was prepared in support of ERDA's Coal Research, Development and Demonstration Program, and assesses the potential impacts of the development of a commercial coal conversion and combustion industry resulting from this program. The statement also assesses the impacts associated with conjunctive developments such as mining and transportation of the coal need to support the industry. In addition, the socioeconomic impacts associated with community development and/or expansion caused by the industry are assessed. The statement also assesses alternatives to the program.

Copies of the draft environmental impact statement have been distributed for review and comment to appropriate Federal agencies, Clearinghouses of all fifty States, public and other organizations

and individuals that may have an interest in this program.

Copies of the statement are available for public inspection at the ERDA public document rooms located at:

ERDA Headquarters, 20 Massachusetts Avenue NW., Washington, D.C.
 Albuquerque Operations Office, National Atomic Museum, Kirtland Air Force Base East, Albuquerque, N. Mex.
 Chicago Operations Office, 9800 South Cass Avenue, Argonne, Ill.
 Chicago Operations Office, 175 West Jackson Boulevard, Chicago, Ill.
 Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho.
 Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nev.
 Oak Ridge Operations Office, Federal Building, Oak Ridge, Tenn.
 Richland Operations Office, Federal Building, Richland, Wash.
 San Francisco Operations Office, 1333 Broadway, Oakland, Calif.
 Savannah River Operations Office, Savannah River Plant, Aiken, S.C.

In addition, a copy will be placed in the:

Regional Energy Environmental Information Center, Denver Public Library, 1357 Broadway, Denver, Colo.

Comments and views concerning the draft environmental impact statement are requested from other interested agencies, organizations and individuals. Single copies of the statement will be furnished for review and comment upon request addressed to W. H. Pennington, Director, Office of NEPA Coordination, Mail Station E-201, Energy Research and Development Administration, Washington, D.C. 20545 (301-353-4241). Comments should be sent to the same address.

In accordance with the guidelines of the Council on Environmental Quality, those submitting comments on the draft environmental impact statement should endeavor to make their comments as specific, substantive, and factual as possible without undue attention to matters of form in the impact statement. However, it would assist in the review of the comments if the comments were organized in a manner consistent with the structure of the draft environmental impact statement. Emphasis should be placed specifically on the assessment of the environmental impacts of the proposed project, and the acceptability of those impacts on the quality of the environment, particularly as contrasted with the impacts of reasonable alternatives to the proposed action. Commenting entities may recommend modifications and/or new alternatives that will enhance environmental quality and avoid or minimize adverse environmental impacts.

Copies of comments received on the draft environmental impact statement will be placed in the above referenced locations for inspection and will be considered in the preparation of the final environmental impact statement, if received within 90 days of this notice.

Dated at Germantown, Md., this 29th day of September 1977.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator,
for Environment and Safety.

[6170-01]

LONG-TERM MANAGEMENT OF DEFENSE HIGH-LEVEL RADIOACTIVE WASTES (IDAHO CHEMICAL PROCESSING PLANT, IDAHO NATIONAL ENGINEERING LABORATORY, IDAHO FALLS, IDAHO)

Preparation of Environmental Impact Statement and Availability of Technical Alternatives Defense Waste Document

Notice is hereby given that in accordance with the National Environmental Policy Act, the Energy Research and Development Administration (ERDA) intends to prepare a programmatic environmental impact statement (EIS) concerning the long-term management of the high-level radioactive wastes that are generated as part of the national defense effort at the Idaho Chemical Processing Plant (ICPP) located near Idaho Falls, Idaho. Currently, these radioactive wastes are stored at the Idaho site.

The environmental impacts of the continuing waste management operations at the plant were assessed in ERDA-1536, a draft environmental impact statement issued in June 1976 (41 FR 27778, July 6, 1976). This new programmatic statement will assess the environmental impacts associated with the reasonably available alternatives for ultimate disposition of the wastes in an environmentally acceptable manner for periods of time required for the radioactivity to decay to safe levels, i.e., hundreds to thousands of years. Research and development programs are being performed at the Idaho Chemical Processing Plant on alternative modes for the long-term management of these defense wastes.

The purpose of this Notice is to present pertinent background information regarding the proposed scope and content of the statement and to solicit comments and suggestions for consideration in its preparation. In order to provide background regarding the state-of-the-art of various technologies to be considered for use in disposal of the wastes, ERDA has prepared a Defense Waste Document (DWD), "Alternatives for Long-Term Management of Defense High-Level Waste" (ERDA-77-43). The preparation of this DWD was announced October 18, 1976, (41 FR 45901). This DWD describes the alternative technologies with respect to their probable relative costs, risks, and uncertainties. Three basic alternatives and several variations are included in the DWD. These alternatives range from continuing the storage of high-level waste as a granular solid (calcine) in stainless steel bins within concrete vaults at the ICPP (which is the "no action" alternative), to conversion of the waste

to a glass form and shipment to an off-site Federal repository.

The EIS will assess the environmental impact of the main candidate plans using the DWD as a reference source of technology input. The EIS will provide environmental input into decisions related to the research, development, demonstration activities and engineering design studies required to establish an environmentally acceptable mode of disposal for these high-level radioactive wastes.

Interested agencies, organizations or persons desiring to submit comments or suggestions on the DWD or the scope or content of the EIS should submit them to W. H. Pennington, Director, Office of NEPA Coordination, Mail Station E-201, U.S. Energy Research and Development Administration, Washington, D.C. 20545, telephone 301-353-4241, on or before November 1, 1977. These comments will be considered in the preparation of the draft EIS. Those desiring a copy of the DWD for use in preparing comments or suggestions, or a copy of the draft EIS when it is issued, should notify Mr. Pennington.

Copies of the DWD, the Idaho waste management EIS (ERDA-1536), and other documentation to be used in the preparation of the new EIS are available for public inspection at the public document room located at the Idaho Operations Office at Idaho Falls. Copies of ERDA-1536; the Savannah River DWD, ERDA 77-42; the ID DWD, ERDA 77-43 are available for public inspection at ERDA's public document rooms located at:

ERDA Headquarters, 20 Massachusetts Avenue NW., Washington, D.C. 20545.
Albuquerque Operations Office, Kirtland Air Force Base East, Albuquerque, N. Mex. 87115.
Chicago Operations Office, 9800 South Cass Avenue, Argonne, Ill. 60439.
Oak Ridge Operations Office, Federal Building, Oak Ridge, Tenn. 37830.
Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nev. 89114.
Richland Operations Office, Federal Building, Richland, Wash. 99352.
San Francisco Operations Office, 1333 Broadway, Oakland, Calif. 94612.
Savannah River Operations Office, P.O. Box A, Aiken, S.C. 29801.

Dated at Germantown, Md., this 27th day of September 1977, for the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator
for Environment and Safety.

[ERDA-1551]

NEVADA TEST SITE, NYE COUNTY, NEV. Availability of Final Environmental Impact Statement

Notice is hereby given that a Final Environmental Impact Statement, ERDA-1551, Nevada Test Site, Nye County, Nev. (September 1977), was issued pursuant to the Energy Research and Development

Administration's (ERDA) implementation of the National Environmental Policy Act of 1969. The statement was prepared to assess the environmental impact of continuing ERDA's underground nuclear testing program and other activities at the Nevada Test Site for Fiscal Year 1978 and beyond.

The cumulative impact on the environment from underground nuclear detonations with yields of one megaton or less and the preparation necessary for such detonations are assessed. The statement also assesses the testing activities of other continuing and intermittent activities, both nuclear and nonnuclear, which can best be conducted in the remote and controlled area of the NTS.

No significant adverse effects on the NTS or surrounding environment are anticipated to result from the continuation of existing programs or initiation of the proposed programs.

Copies of the final environmental impact statement are available for public inspection at the ERDA public document rooms located at:

ERDA Headquarters, 20 Massachusetts Avenue NW., Washington, D.C.
Albuquerque Operations Office, National Atomic Museum, Kirtland Air Force Base East, Albuquerque, N. Mex.
Chicago Operations Office, 9800 South Cass Avenue, Argonne, Ill.
Chicago Operations Office, 175 West Jackson Boulevard, Chicago, Ill.
Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho
Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nev.
Oak Ridge Operations Office, Federal Building, Oak Ridge, Tenn.
Richland Operations Office, Federal Building, Richland, Wash.
San Francisco Operations Office, 1333 Broadway, Oakland, Calif.
Savannah River Operations Office, Savannah River Plant, Aiken, S.C.

In addition, a copy will be placed in the:

Regional Energy, Environmental Information Center, Denver Public Library, 1357 Broadway, Denver, Colo.

Copies of the final statement have been furnished to those who commented on the draft statement that was issued by the Energy Research and Development Administration on January 18, 1977. Copies are also available for public inspection at designated Federal Depository Libraries.

A limited number of single copies of the final statement are available for distribution by the Technical Information Center, P.O. Box 62, Oak Ridge, Tenn. 37830 (615-483-8611), extension 34672. The statement is also available from the National Technical Information Service, Springfield, Va. 22161.

Dated at Germantown, Md., this 29th day of September 1977.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator
for Environment and Safety.

[6170-01]

[ERDA-1549]

PORTSMOUTH GASEOUS DIFFUSION PLANT EXPANSION PIKE COUNTY, PIKETON, OHIO

Availability of Final Environmental Statement

Notice is hereby given that a Final Environmental Statement, ERDA-1549, Portsmouth Gaseous Diffusion Plant Expansion, Pike County, Piketon, Ohio (September 1977), was issued pursuant to the Energy Research and Development Administration's (ERDA) implementation of the National Environmental Policy Act of 1969. At the time the draft statement was issued, it was thought that the demand for additional enrichment capacity required that it be available by 1985. The gaseous diffusion process was the only technology thought to be able to provide the needed additional enrichment capacity in that time frame. Therefore, the draft environmental statement focused on the environmental effects of expanding the capacity at Portsmouth via this process. Upon further review, it was determined that the expansion of uranium enrichment capacity could be delayed from 1 to 2 years permitting the gas centrifuge process to be developed as a reasonable alternative in the new time frame. The President subsequently announced in his April 1977 energy message that the gas centrifuge process will be used in place of the gaseous diffusion process in the next addition to uranium enrichment capacity. Accordingly, Section 5.1.3 on a gas centrifuge plant at Portsmouth has been expanded in the final statement.

Copies of the final environmental impact statement are available for public inspection at the ERDA public document rooms located at:

ERDA Headquarters, 20 Massachusetts Avenue NW., Washington, D.C.
Albuquerque Operations Office, National Atomic Museum, Kirtland Air Force Base—East, Albuquerque, N. Mex.
Chicago Operations Office, 9800 South Cass Avenue, Argonne, Ill.
Chicago Operations Office, 175 West Jackson Boulevard, Chicago, Ill.
Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho
Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nev.
Oak Ridge Operations Office, Federal Building, Oak Ridge, Tenn.
Richland Operations Office, Federal Building, Richland, Wash.
San Francisco Operations Office, 1333 Broadway, Oakland, Calif.
Savannah River Operations Office, Savannah River Plant, Aiken, S.C.

Copies of the final statement have been furnished to those who commented on the draft statement that was issued by the Energy Research and Development Administration on October 15, 1976. Copies are also available for public in-

spection at designated Federal Depository Libraries.

A limited number of single copies of the final statement are available for distribution by the Technical Information Center, P.O. Box 62, Oak Ridge, Tenn. 37830 (615-483-8611), extension 34672. The statement is also available from the National Technical Information Service, Springfield, Va. 22161.

Dated at Germantown, Md., this 29th day of September 1977.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator
for Environment and Safety.

[6506-01]

ENVIRONMENTAL PROTECTION AGENCY

[FRL 777-6]

AIR POLLUTION PREVENTION AND CONTROL

Addition to the List of Categories of Stationary Sources

Section 111 of the Clean Air Act (42 U.S.C. 1857c-6) directs the Administrator of the Environmental Protection Agency to publish, and from time to time revise, a list of categories of stationary sources which he determines may contribute significantly to air pollution which causes or contributes to the endangerment of public health or welfare. Within 120 days after the inclusion of a category of stationary sources in such list, the Administrator is required to propose regulations establishing standards of performance for new and modified sources within such category. At present standards of performance for 24 categories of sources have been promulgated.

The Administrator, after evaluating available information, has determined that stationary gas turbines are an additional category of stationary sources which meets the above requirements. The basis for this determination is discussed in the preamble to the proposed regulation that is published elsewhere in this issue of the FEDERAL REGISTER (see FR Doc. 77-28721). Evaluation of other stationary source categories is in progress, and the list will be revised from time to time as the Administrator deems appropriate. Accordingly, notice is given that the Administrator, pursuant to section 111(b)(1)(A) of the Act, and after consultation with appropriate advisory committees, experts and Federal departments and agencies in accordance with section 117(f) of the Act, effective October 3, 1977, amends the list of categories of stationary sources to read as follows:

LIST OF CATEGORIES OF STATIONARY SOURCES AND CORRESPONDING AFFECTED FACILITIES

SOURCE CATEGORY

1. STATIONARY GAS TURBINES

AFFECTED FACILITIES GAS TURBINES

Proposed standards of performance applicable to the above source category appear elsewhere in this issue of the FEDERAL REGISTER.

Dated: September 21, 1977.

DOUGLAS M. COSTLE,
Administrator.

OPP-42050; FRL 800-4]

ILLINOIS

Submission of State Plan for Certification of Pesticide Applicators

In accordance with the provisions of Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136 et seq.), and 40 CFR 171, the Honorable James R. Thompson, Governor of the State of Illinois, submitted a State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides to the Environmental Protection Agency (EPA) for approval on a contingency basis.

Contingent approval is being requested pending the Governor's signature to the Illinois Structural Pest Control Act, and promulgation of implementing regulations. Copies of pertinent laws, regulations, proposed legislative amendments and regulations, and other related documents are attached to the plan.

Notice is hereby given of the intention of the Regional Administrator, EPA, Region V, to approve this plan on a contingency basis.

A summary of the plan follows. The entire plan, together with all attachments (except written examinations), may be examined during normal business hours at the following locations:

1. Emmerson Building, State Fairgrounds, Springfield, Ill., 62706 (Illinois Department of Agriculture, Division of Agricultural Industry Regulation), telephone 217-782-3817.
2. Room 1147, 230 South Dearborn Street, Chicago, Ill. 60604 (Pesticide Branch, Air and Hazardous Materials Division, EPA, Region V), telephone 312-353-2192.
3. Room 401, East Tower, Waterside Mall, 401 M Street, SW., Washington, D.C. 20460, (Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA), telephone 202-755-4854.

SUMMARY OF STATE PLAN

The Illinois Department of Agriculture (IDA) has been designated as the

State lead agency for the administration of the pesticide applicator certification program including enforcement activities. The Division of Agricultural Industry Regulation, IDA, will be responsible for the implementation and maintenance of state plan provisions, except for certification and enforcement activities relating to pesticide applicators in Industrial, Institutional, Structural, and Health Related Pest Control (category 7). Other responsibilities of IDA include State registration of all EPA registered pesticides sold in Illinois and coordination of field, laboratory, and office activities relating to pesticide regulation under State laws administered by IDA.

Cooperating agencies include the Illinois Department of Public Health (IDPH) and the University of Illinois Cooperative Extension Service (ICES).

The IDPH will be responsible for certifying commercial applicators engaged in Industrial, Institutional, Structural, and Health Related Pest Control (Category 7), under authority found in the Illinois Structural Pest Control Act of 1975. Preparation and administration of training programs and written examinations in Category 7 will be the responsibility of IDPH. Other responsibilities of IDPH include enforcement activities relating to structural pest control and cooperation with IDA in providing training for persons seeking IDA certification in mosquito pest control.

The ICES will have the lead role, pursuant to an Intrastate Service Agreement with the IDA, for the state-wide pesticide applicator certification training program, excluding trainings in Category 7 and mosquito control.

This responsibility includes preparation and administration of training courses, preparation of training materials, and distribution of training manuals.

In order to assure program coordination and uniformity in applicator training, certification, and restricted use pesticide enforcement, the lead agency will coordinate and direct activities with the various cooperating agencies. This will be carried out directly through cooperative agreements, the State Pesticide Planning Committee, and the Interagency Committee on Pesticide Use.

Legal authority for the certification program is contained in The Illinois Custom or Public Application of Pesticides Act (II. Rev. St., Chapter 5, Paragraph 87(d) (1) et seq.); Pesticides Control Law (II. Rev. St., Chapter 5, Paragraph 256 et seq.) and regulations; The Structural Pest Control Act (II. Rev. St., Chapter 111, Paragraph 2201 et seq.); and proposed regulations attached to the plan.

The plan indicates that the State lead agency and cooperating agencies have sufficient qualified personnel and funds necessary to conduct the programs described in the State Plan. Certain EPA funds have been provided to the lead agency to support the certification program. An EPA grant of \$212,019 has been awarded to the IDA for this purpose. Additionally, the University of Illinois Cooperative Extension Service has received from EPA pesticide applicator training monies during FY 1976 and FY 1977.

An estimated 22,000 commercial applicators and 80,000 private applicators will require certification. Wallet size credentials will be issued to pesticide applicators upon successful completion of certification requirements. All credentials will contain name, address and classification of the applicator. For commercial applicators, the credential will also identify the category(ies) or subcategory(ies) of pest control in which the applicator is certified. Credentials issued private applicators unable to read will restrict purchase and use to specific pesticide products for which the applicator has demonstrated competency.

The State lead agency will submit an annual report to EPA not later than March 31 of each year to include the information specified in 40 CFR 171.7. The IDPH will submit specific information on Category 7 certification and enforcement activities to the IDA for inclusion in the annual report.

The IDA plans to continue the commercial applicator categorization scheme previously established under the State applicator licensing program. Categories described in the State Plan are those found in 40 CFR 171.3(b), except for the Category "Public Health Pest Control", which is identified as a subcategory under the State Category "Industrial, Institutional, Structural and Health Related Pest Control", 7(g). Two new categories are proposed: Mosquito control and Grain Facility Pest Control. Subcategories of commercial applicators proposed in the State Plan are as follows:

1. Agricultural Pest Control: (a) Plant: (1) Field Crop Pest Control. (2) Vegetable Crop Pest Control. (3) Fruit Crop Pest Control. 7. Industrial, Institutional, Structural and Health Related Pest Control. (a) Insects, Rodents, and Other Pests Including Those Pests in Food Manufacturing, Food Processing, Food Storage and Grain Handling. (b) Termites and Other Wood Destroying Organisms. (c) Bird Control. (d) Fumigation. (e) Food Manufacturing, Food Processing and Food Storage Facilities. (f) Institution and Multi-Unit Residential Housing Pest Control. (g) Public Health Pest Control.

Standards of competency utilized for commercial applicators conform to 40 CFR 171.4 and 171.6. All commercial applicators will be determined competent based upon passage of a written, closed book examination.

The State Plan identifies and describes four classes of commercial applicators Illinois intends to utilize for certification and licensing purposes. They are (a) Commercial Pesticide Applicator For Hire, (b) Public Pesticide Applicator, (c) Commercial Pesticide Applicator Not For Hire, and (d) Certified Pest Control Technician. The Commercial Pesticide Applicator For Hire classification covers all pest control categories except Category 7, Industrial, Institutional, Structural, and Health Related Pest Control. The State defines such persons as those who own or operate a custom application business and in so doing, purchase and use or supervise the use of pesticides on the property of another person for hire. Public Pesticide Applicators are employees of a state agency, municipality or other governmental agency who use or supervise the use of restricted use pesticides in any pest control category other than Category 7. The Commercial Pesticide Applicator Not For Hire classification includes commercial applicators who use or supervise the use of restricted use pesticides on their own property or property of their employer but are not Public Pesticide Applicators. Commercial Pesticide Applicators Not For Hire encompass all areas of pest control except Category 7. The Certified Pest Control Technician is a commercial applicator with respect to the amended FIFRA and is engaged in Category 7 pest control activities identified in the State Plan. Certification of this class of commercial applicator is the responsibility of the IDPH. For purposes of this notice, and unless otherwise noted, the term "commercial applicator" shall mean and include the above four State defined classes of applicator.

All Certified Pest Control Technicians will be required to either participate in an IDPH approved training course or take a written examination at least once every 3 years to ensure that they continue to meet requirements of changing technology and maintain a continuing level of competency and ability to use pesticides safely and properly. All other commercial applicators will be required to renew their certification at 5 year intervals by taking and passing the appropriate written examination(s).

In accordance with 40 CFR 171.7(e) (3), the State of Illinois has requested that commercial applicators who have been previously licensed by passing written examinations in the following pest control categories and subcategories be certified without further examination:

Field Crop Pest Control (1972-present) Ornamental and Turf Pest Control (1972-present). Right-of-Way Pest Control (1972-present) Aquatic Pest Control (1972-present) Mosquito Pest Control (1972-present). Industrial, Institutional, and Structural Pest Control (1975-1977).

The Agency has determined that persons who passed written examinations in these categories and subcategories within the time frame identified above, will have satisfied the requirements for certification, 40 CFR 171.1-171.6, and may be certified without additional examination.

The standards of competency for private applicators are the same as those listed in 40 CFR 171.5 and 171.6. Private applicator certification will be accomplished by one of the following procedures: (1) Successful completion of a training session conducted by the ICES, (2) passage of a written examination,

or (3) special training/oral interview for private applicators unable to read.

1. Successful completion of an ICES training session. An applicant may participate in a training program conducted by County Extension Advisers throughout Illinois. The Illinois Pesticide Applicator Study Guide, and supportive reference material on current pest control methods for specific use situations, will be utilized. During the training session, a representative of the IDA will be present to discuss applicable pesticide laws and regulations, and provide information concerning supervisory requirements of private applicators. Completion of training will be determined on the basis of successful completion of a pre-training and post-training evaluation form administered by an IDA representative. Additionally, each applicant will complete an application for certification, attached to the evaluation form, which assures the IDA that pesticides will be used in a competent, safe manner, in accordance with existing laws and regulations. Evaluation forms and applications for certification will be processed by the IDA.

2. Passage of a written examination. An applicant may take a written examination covering the competency standards listed in 40 CFR 171.5 and 171.6. These examinations will consist of 100 multiple choice questions and will be offered on a walk-in basis at local county adviser offices and local IDA offices. The examination may be completed at the applicant's residence as well; however, in this situation, the applicant will be required to attest that the examination was completed without unauthorized assistance. All examinations will be returned to the lead agency in Springfield for grading. A minimum passing grade of 70 percent is required before a private applicator certification is issued.

3. Nonreader certification. For private applicators unable to read, the lead agency intends to establish a certification system which allows competent applicators to use specific pesticide products. An applicator who can not read may attend the same training courses available to other applicators. However, the nonreader will be tested orally on the training course material and specific pesticide product labels by an IDA representative. Certification will be limited to those products in which the nonreader has demonstrated competency and the credentials will identify those products covered by the applicator's certification.

To renew a certificate, all private applicators will be required to complete one of the original certification procedures described above at five year intervals.

Examinations for new categories and subcategories of commercial applicators, the private applicator examination, and existing commercial applicator licensing examinations are attached to the plan. In view of the need to preserve confidentiality of the examinations, they have been removed from the public inspection copies of the plan.

The Illinois State Plan indicates that within sixty (60) days of the approval

of the Government Agency Plan (GAP) by EPA, Illinois will submit a statement in accordance with 40 CFR 171.7(e) (4) (1). Illinois has no Indian Governing Body subject to jurisdiction of the United States.

The IDA and IDPH have authority to consider reciprocity with other states and copies of such agreements will be furnished EPA. No recognized formal agreement on reciprocity with other states involving pesticide applicator certification is indicated in the plan.

Other regulatory authorities useful to implementation of the plan include further restriction or limitation on pesticide uses, requirement that pesticide dealers keep and maintain sales records of restricted use pesticides for a period of two years, licensing of commercial and public operators (persons working under the direct supervision of commercial applicators and public applicators, respectively), monitoring, inspection, and sampling activities.

PUBLIC COMMENTS

Interested persons are invited to submit written comments on the proposed State Plan for the State of Illinois to the Regional Administrator, Region V, Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604. The comments must be received within 30 days of date of publication of this notice, and should bear the identifying notation (OPP-42050). All written comments filed pursuant to this notice will be available for public inspection at the above mentioned locations from 8:30 a.m. to 3:30 p.m. Monday through Friday.

Dated: September 20, 1977.

GEORGE R. ALEXANDER, JR.,
Regional Administrator,
Region V.

NATIONAL DRINKING WATER ADVISORY COUNCIL Open Meeting

Under Section 10(a) (2) of Public Law 92-423, "The Federal Advisory Committee Act", notice is hereby given that a meeting of the National Drinking Water Advisory Council established under Public Law 93-523, the "Safe Drinking Water Act", will be held at 9 a.m. on October 20, 1977, and at 8:30 a.m., October 21, 1977, in Conference Room 2117, Mall Area, Waterside Mall, 401 M Street, SW., Washington D.C. 20460.

The purpose of this meeting will be to discuss the health aspects of constituents found in drinking water, the rationale for standard setting, EPA's programs for protecting underground drinking water sources and plans for regulating underground injection practices.

Both days of the meeting will be open to the public. The Council encourages

the hearing of outside statements and allocates a portion of time for public participation. Any outside parties interested in presenting an oral statement should petition the Council in writing. The petition should include the general topic of the proposed statement and the petitioner's telephone number.

Any person who wishes to file a written statement can do so before or after a Council meeting. Accepted written statements will be recognized at Council meetings.

Any members of the public wishing to attend the Council meeting, present an oral statement, or submit a written statement should contact Patrick Tobin, Executive Secretary for the National Drinking Water Advisory Council, Office of Water Supply (WH-550), Environmental Protection Agency, 401 M Street, SW., Washington D.C. 20460.

The telephone number is: Area Code 202-426-8877.

THOMAS C. JORLING,
Assistant Administrator for
Water and Hazardous Materials.

ENVIRONMENTAL HEALTH ADVISORY COMMITTEE; SCIENCE ADVISORY BOARD Meeting

Under Public Law 92-463, notice is hereby given that a meeting of the Environmental Health Advisory Committee of the Science Advisory Board will be held at 9 a.m. on October 19, 1977 in Conference Room A (Room 1112), Crystal Mall Building No. 2, 1921 Jefferson Davis Highway, Arlington, Va.

The purpose of the meeting will be (1) to consider a draft document entitled, "Criteria for Evaluating the Mutagenicity of Chemicals", dated September 9, 1977, prepared by EPA's Office of Pesticide Programs, which discusses Agency approaches to the evaluation of test data relating to mutagenicity in the context of section 3, Registration of Pesticides, of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended; (2) to consider a report entitled, "Critique of the Biological and Climate Effects Research (BACER)—Effects of Stratospheric Modification", prepared by an Ad Hoc Study Group of the Science Advisory Board's Ecology Committee and the Environmental Health Advisory Committee, which evaluates certain aspects of a Federal interagency research program on the biological and climatic effects of stratospheric ozone reduction; and (3) to hear and discuss a report of the Committee's Study Group on Pentachlorophenol Contaminants which, i.e. is examining the potential hazard to humans attributable to registered uses of pentachlorophenol. The Agenda will also include (4) brief reports and informational items of current interest to the members.

The meeting will be open to the public. Any member of the public wishing to attend or submit a paper should contact the Secretariat, Science Advisory Board (A-101), U.S. Environmental Protection Agency, Washington, D.C. 20460, by c.o.b. October 13, 1977. Please call Ms. Barbara Robinson on (703) 557-7720.

RICHARD M. DOWD,
Staff Director,
Science Advisory Board.

PESTICIDE PROGRAMS

Withdrawal of Denial of Application to Register Pesticide Product Containing Heptachlor

On November 26, 1974, notice of intent to cancel certain uses of heptachlor and chlordane was published in the *FEDERAL REGISTER* (39 FR 41298) in accordance with section 6 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (7 U.S.C. 136 et seq.). On April 14, 1977, the Environmental Protection Agency (EPA) denied an application received from the Florida Department of Agriculture and Consumer Services to register the pesticide product HEPTACHLOR 5-G (EPA) File Symbol 40185-R) for use in controlling the West Indian sugarcane rootstalk borer weevil larvae, *Diagrepes abbreviatus*. The notice of denial was published April 22, 1977 (42 FR 20850).

This notice of denial was withdrawn by a letter dated May 13, 1977, to the applicant, because the stated basis for issuing that notice was in error; the use of heptachlor for which the application was made was not subject to the provisions of the November 26 *FEDERAL REGISTER* notice.

The applicant has been advised that certain additional hazard data which were omitted from the application can be submitted, and thereafter the application will be processed and reviewed in accordance with the criteria for determinations of unreasonable adverse effects specified in 40 CFR 162.11 of the EPA registration regulations.

Dated September 27, 1977.

JAMES M. CONLON,
Deputy Assistant Administrator
for Pesticide Programs

PESTICIDE PROGRAMS

Public Hearings on Toxicology Data Auditing Program

The Office of Pesticide Programs (OPP), Environmental Protection Agency

(EPA), has initiated a Toxicology Data Auditing Program (TDAP), which provides for audits of laboratory records and raw data associated with studies and test reports submitted to the Agency in support of applications for pesticide registrations, petitions for the establishment of tolerances for pesticide residues, and experimental use permits.

While some pesticide companies have their own laboratories and testing facilities, many companies contract with independent testing laboratories to conduct these tests on their behalf. The reports ultimately submitted to EPA by applicants and petitioners are usually prepared by the independent laboratories, which often retain the raw data and laboratory records underlying these reports in their own archives.

EPA does not currently have jurisdiction to enter independent testing laboratories to inspect these records without the consent of the laboratory. However, because EPA as well as private industry has become aware of the fact that the data currently supporting pesticide registrations and tolerances may be inaccurate, incomplete, or otherwise inadequate to support a regulatory decision as to a pesticide's safety, a cooperative effort with applicants and registrants is being initiated with regard to the audit of research records maintained at independent laboratories.

These audits will be designed to: (1) Determine whether the raw data is internally consistent as well as consistent with test reports submitted to EPA by the applicant or registrant; (2) obtain information that may not have been provided in test reports; and (3) identify whether test protocols were followed, whether errors were made or practices employed which may have materially affected the validity of the test results, and whether test reports fully and accurately disclosed all material facts regarding the actual test procedures and results. The scope of such audits will be limited to review of the records pertaining to particular studies and will not extend to overall "good laboratory practice" inspections of the laboratories themselves. The success and effectiveness of this cooperative effort will determine whether legislative changes to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) are needed to authorize EPA to enter independent laboratories for the purpose of conducting such audits.

This assessment of the validity and quality of data produced by pesticide-testing institutions for currently registered pesticide products will eventually be coordinated with the reregistration effort. Data audits will be triggered by data deficiencies identified during the review and validation of the data bases for human hazard assessment. It is also expected that after the reregistration effort is complete, the auditing program will concern itself more with recent or on-going studies sponsored by registrants or applicants to assure the continued quality of data.

Responsibility for managing TDAP rests with the Office of Special Pesticide Reviews, which is scheduled to audit records held at 60 laboratories in fiscal year 1978. Hearings are being held at this time to provide an open forum for the presentation of views concerning the merit of conducting such audits as part of a cooperative effort with applicants, registrants, and independent testing laboratories. The hearings will provide an opportunity to discuss such subjects as: (1) The necessity and appropriateness of the cooperative effort as a means of assuring the quality and integrity of data submitted to the Federal government, (2) the elements of the monitoring/surveillance mode, (3) interagency coordination of audits, (4) international implications of TDAP and (5) record retention.

Both written and oral remarks are solicited. Oral presentations will be limited to thirty (30) minutes. Any person who desires to make an oral presentation at any of the hearings must provide a written copy of remarks for inclusion in the record. Those who wish to attend the hearings and/or participate in the proceedings are requested to make a reservation in advance of the scheduled hearing. Hearing coordinators, locations, and dates are as follows:

Location: Travel Lodge at the Wharf, 250 Beach Street, The Golden Gate Room, San Francisco, Calif. 94133.

Date: November 2, 1977, 9 a.m.-5 p.m.
Hearing Coordinator: Nancy Frost, phone 415-556-3352.

Location: Midland Hotel, 172 West Adams, Chicago, Ill. 60603.

Date: November 4, 1977, 9 a.m.-5 p.m.
Hearing Coordinator: Bernadette Hughes, phone 312-353-2193.

Location: Environmental Protection Agency, 401 N Street SW., Room 3305-3307 of the Mall, Washington, D.C. 20460.

Date: November 9 and 10, 1977, 9:00 a.m.-5 p.m.
Hearing Coordinator: Jan B. Wine, phone 202-755-5637.

Written comments should not be submitted to hearing coordinators. Such comments should be addressed to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Rm. 491, East Tower, 401 M Street SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. The comments must be received on or before November 30, 1977, and must bear a notation indicating both the subject matter and the document control number "OPP-210010". All written comments filed in response to this notice and hearing records will be available for public inspection in the office of the Federal Register Section from 2:30 a.m. to 4 p.m. Monday through Friday.

Dated: September 27, 1977.

JAMES M. CONLON,
Acting Deputy Assistant Administrator for Pesticide Programs.

[FRL 800-6]

LOUISIANA-PACIFIC CORP. AND CROWN SIMPSON PULP CO.

Requests for Variances From BPCTCA—Final Decision of the Administrator

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision of Administrator.

SUMMARY: On March 17, 1977 the California State Water Resources Control Board adopted orders finding that variances from EPA's BPCTCA effluent limitations guidelines for the Pulp, Paper and Paperboard Point Source Category (40 CFR Part 430) would be appropriate for the Louisiana-Pacific Corporation (NPDES NO. CA 0005894) and the Crown Simpson Pulp Company (NPDES NO. CA 0005882). In essence, the State Board found that the two pulp and paper mills in question discharge their wastes to the Pacific Ocean and that treatment of these discharges to the degree required by applicable EPA regulations would result in little (if any) water quality improvement while at the same time creating non-water quality environmental impacts. The EPA regulations in question are national standards which are to be met by all point sources of pollution within the bleached kraft sector of the pulp, paper and paperboard category by July 1, 1977 pursuant to sections 301(b)(1)(A) and 304(b)(1) of the Federal Water Pollution Control Act, as amended (Pub. L. 92-500). Each of these regulations, known as best practicable control technology currently available (BPCTCA) effluent limitation guidelines, contain a variance provision which provides that upon a finding that one or more factors pertaining to a particular discharger are fundamentally different from the factors considered by EPA in establishing the BPCTCA regulations, alternative requirements may be established for that discharger. The Administrator must approve any such variance.

On March 29, 1977 the State Board forwarded its orders to EPA and requested the Administrator's approval of variances for the two mills. The State Board orders also adopted discharge requirements for the two mills which would be applied if the variance requests are approved. These requirements are substantially less stringent than the requirements based upon the national standards.

On June 2, 1977 notice was given in the *FEDERAL REGISTER* that the General Counsel had issued a Recommended Decision of the Administrator which recommended denial of the variance requests. 42 FR 28167-72. The notice provided opportunity for public comment on the Recommended Decision, which was published as an Appendix. Comments were received from Crown Simpson Pulp Co. and Louisiana-Pacific Corp. (joint submission), the law firm of Hunton & Williams (on behalf of the Utilities Water Act Group and other petitioners

in *Appalachian Power Co. v. Train*), Southern California Edison Co., East Bay Utility District, and the National Wildlife Federation. All comments were carefully considered prior to issuance of the Administrator's Decision and responses to major comments are included in the decision.

The Decision of the Administrator denies the variances requests. The Federal Water Pollution Control Act forbids consideration of the nature or quality of particular receiving waters in adopting BPCTCA effluent limitations guidelines and in applying them to individual point sources. Under the Act water quality standards may require a discharger to meet more stringent requirements than BPCTCA, but water quality considerations may not be the basis for less stringent requirements. BPCTCA effluent limitations are nationally uniform technology based regulations which are to be imposed "regardless of (the) location (of point sources) or the nature of the water into which the discharge is made . . ." Conference Report at 126, A Legislative History of the Water Pollution Control Act Amendments of 1972 at 309.

Copies of the Administrator's Decision are available from the Office of General Counsel, Water Quality Division.

ADDRESS: Copies of the Final Decision of the Administrator may be obtained by writing to: Environmental Protection Agency, Office of General Counsel, Water Quality Division (A-131), 401 M St. SW., Washington, D.C. 20460. ATTN: Bruce Diamond.

FOR FURTHER INFORMATION CONTACT:

Bruce Diamond, 202-755-0760.

Dated: September 28, 1977.

JOAN Z. BERNSTEIN,
Acting General Counsel.

FEDERAL COMMUNICATIONS COMMISSION

PUBLIC TELEPHONE NETWORK

Use of Automated Dialing Devices to Present Unsolicited Recorded Messages; Order Extending Time for Filing Replies to Petition for Issuance of Notice of Inquiry and Notice of Proposed Rulemaking

Adopted: September 27, 1977.

Released: September 28, 1977.

In the matter of the use of automated dialing devices to present unsolicited recorded messages over the public telephone network, RM-2955.

1. A Public Notice released September 13, 1977 (Report No. 1074), listed a petition for rulemaking filed by Walter Baer and the Citizens Communications

¹NOTE.—This notice was not published in the *FEDERAL REGISTER*.

Center, in which the Commission was requested to issue a Notice of Inquiry and Notice of Proposed Rulemaking "to consider protecting telephone subscribers from nuisance, annoyance, and invasion of privacy resulting from the use of automated dialing devices to present unsolicited recorded messages over the public telephone network."

2. The petition suggested that the rulemaking:

(a) Consider restrictions on the use of automated dialing devices for presenting unsolicited recorded messages to telephone subscribers;

(b) Designate means by which telephone subscribers can indicate that they do not wish to receive unsolicited advertising messages, and specify penalties to advertisers who violate such subscribers' desires for privacy;

(c) Designate special tariffs for telephone sales campaigns to fully reflect their cost of service; and

(d) Require users of automated dialing devices to precede each recorded message with an announcement identifying it as coming from an automated dialing device.

3. In consideration of the fact that the wording of the Public Notice might be misconstrued as to the nature of the Petition, and in further consideration of interest already shown in this matter, it is ordered, That the time for filing responses to the petition for rulemaking, RM-2955, is extended to and including November 14, 1977.

4. This action is taken pursuant to authority delegated in §§ 0.291 and 0.303 of the Commission's Rules.

FEDERAL COMMUNICATIONS
COMMISSION,
WALTER R. HENCHMAN,
Chief, Common
Carrier Bureau.

[6730-01]

FEDERAL MARITIME COMMISSION

[Docket No. 77-47]

Order to Show Cause

FAR EAST CONFERENCE AMENDED TARIFF RULE REGARDING THE ASSESSMENT OF WHARFAGE AND OTHER ACCESSORIAL CHARGES

The Far East Conference (FEC), operating under Agreement No. 17, as amended, is a conference of common carriers providing liner service from the United States Atlantic and Gulf ports to ports in the Far East.

On May 24, 1977, the FEC filed an amendment (Rule 1(a)(1) to its Tariff FMC No. 10) modifying its tariff rules to provide that wharfage and other charges which are assessed by the terminal operators against the vessel will be rebilled by the carrier for the account of the cargo. This tariff amendment, originally scheduled to become effective on August 23, 1977, was subsequently postponed until October 1, 1977.

Wharfage charges are assessed against the vessel at the majority of the North and South Atlantic ports. The carriers presently absorb the costs of wharfage at these ports except at New York where wharfage is included in the stevedoring contracts. FEC's revised tariff will reverse that practice except at New York where no charge called "wharfage" exists. The basic freight rates charged by the conference carriers are the same at all the involved ports.

The assessment of different warpage charges at each port (except New York), and the absence of any such charge at New York results in the assessment of different rates to shippers at these ports. Section 205, Merchant Marine Act of 1936, provides that it shall be unlawful for:

• • • any common carrier by water, either directly or indirectly, through the medium of an agreement, conference, association, understanding, or otherwise, to prevent or attempt to prevent any other such carrier from serving any port designed for the accommodation of ocean-going vessels located on any improvement project authorized by the Congress or through it by any other agency of the Federal Government, lying within the continental limits of the United States, at the same rates which it charges at the nearest port already regularly served by it.

Conference tariff modifications which in effect result in varying costs at ports in the U.S. Atlantic and Gulf range have been found to contravene section 205 of the Merchant Marine Act, 1936. *Associated Latin American Freight Conferences and the Association of West Coast Steamship Companies, Amended Tariff Rules Regarding Wharfage and Handling Charges*, 15 F.M.C. 151 (1972). In that proceeding, the Commission concluded that section 205 removes from the Commission's jurisdiction all authority to approve under section 15 of the Shipping Act, 1916 any activity proscribed by section 205 and requires the Commission to disapprove such activity.

The members of FEC have treated the assessment of wharfage differently at the ports on the U.S. Atlantic and Gulf range in the past and the proposed tariff modifications represent a drastic change affecting numerous parties in the shipping community. By assessing varying rates and charges among federally improved continental U.S. ports, the FEC's actions appear to contravene section 205 of the Merchant Marine Act, 1936, and to be contrary to the public interest in violation of section 15, Shipping Act, 1916.

In addition, it is possible that FEC's proposed rule would give an undue preference or advantage to certain ports and persons shipping through such ports while subjecting other ports and persons to undue or unreasonable prejudice or disadvantage in violation of section 16, First, and that the collection of charges by FEC under its proposed rule would also result in unjust discrimination and constitute an unreasonable practice or regulation in violation of section 17, Shipping Act, 1916.

It appears that a proceeding is necessary to permit FEC to show cause why its proposed tariff rule relating to the assessment of wharfage and other charges prescribed by its tariff rule herein at issue should not be cancelled and stricken from its tariff as being in violation of the aforementioned statutes.

Now, therefore, it is ordered, That pursuant to sections 15, 16, First, 17 and 22 of the Shipping Act, 1916, the Far East Conference and its member lines as listed in Appendix "A" be named respondents in this proceeding and that such respondents be ordered to show cause why the Commission should not find the provisions of its proposed tariff rule relating to the assessment of wharfage to be contrary to the public interest in violation of section 15; to result in the giving of an undue or unreasonable preference or advantage to certain ports and persons shipping through such ports while subjecting other ports and persons to unreasonable prejudice or disadvantage in violation of section 16, First; to result in the assessment of varying rates and charges which are unjustly discriminatory and constitute an unreasonable practice or regulation in violation of section 17; and to be in contravention of section 205, Merchant Marine Act, 1936; and, accordingly, why the Far East Conference should not be ordered to modify its tariff rules to correct such violations.

It is further ordered, That this proceeding be limited to submission of affidavits of fact and memoranda of law, and replies thereto. Should any party feel that an evidentiary hearing is required, that party must accompany any request for such hearing with a statement setting forth in detail the facts to be proven, their relevance to the issues in this proceeding, a description of the evidence which would be adduced to prove these facts, and why such proof cannot be submitted through affidavit. Requests for hearing shall be filed on or before November 25, 1977. Affidavits of fact and memoranda of law shall be filed by respondents and served upon all parties no later than the close of business October 28, 1977. Reply affidavits and memoranda shall be filed by the Commission's Bureau of Hearing Counsel and intervenors, if any, no later than close of business November 18, 1977.

It is further ordered, That a notice of this order be published in the FEDERAL REGISTER and that a copy thereof be served upon the respondents.

It is further ordered, That persons other than those already party to this proceeding who desire to become parties and participate herein shall file a petition to intervene pursuant to Rule 72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72) no later than close of business October 14, 1977.

It is further ordered, That all documents submitted by any party of record in this proceeding shall be directed to the Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573, in an original and 15 copies,

as well as being mailed directly to all parties of record.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

INDIANA PORT COMMISSION AND MID-CONTINENT COAL AND COKE CO.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., and Old San Juan, P.R. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 24, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Mr. William E. Dally, Assistant Attorney General, State of Indiana, 219 State House, Indianapolis, Ind. 46204.

Agreement No. T-3511, between Indiana Port Commission and Mid-Continent Coal & Coke Co. (Mid-Continent), provides for the renewable five-year lease of approximately 7.7 acres of land. The premises will be used in the installation and operation of a coke screening and processing facility and the transportation of the material. As compensation, Mid-Continent will pay, as ground rental, \$3.154 per acre per annum plus annual administrative and maintenance fees of \$3.360. Mid-Continent will pay tariff charges and guarantee a minimum annual charge as set forth in the agreement.

By order of the Federal Maritime Commission.

Dated: September 28, 1977.

FRANCIS C. HURNEY,
Secretary.

Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 24, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Mr. Stuart R. Bredbart, Corporate Counsel, United States Lines, Inc., One Broadway, New York, N.Y. 10004.

Agreement No. T-3515, between the Port Authority of Guam (Port) and United States Lines, Inc. (USL), provides

for the nonexclusive preferential assignment of one berth and one container gantry crane for each mainland liner service vessel owned or under the control of USL, upon its arrival at the Port of Guam, Apra Harbor, Agaña, Guam, for purposes of discharging or loading containers. In addition, the Port grants to USL as a secondary right of assignment, one additional container gantry crane as available during such periods. These assignments shall be for one USL vessel at any one time.

As compensation, the Port is to receive all tariff charges applicable to the use of the berth and cranes. In addition, USL shall continue to assist the Port in technical and administrative matters related to the second gantry crane, and shall continue to make certain reasonable representations and guarantees to lending institutions to assist and insure that the Port obtains the necessary financing to enable it to purchase said crane.

By Order of the Federal Maritime Commission.

Dated: September 27, 1977.

FRANCIS C. HURNEY,
Secretary.

[6740-02]

FEDERAL POWER COMMISSION

[Docket No. ER 77-521]

ARIZONA PUBLIC SERVICE CO.

Order Denying in Part and Granting in Part Motions for Reconsideration and Establishing Procedures

SEPTEMBER 26, 1977.

On July 21, 1977, Arizona Public Service Co. (Company) submitted for filing proposed increased rates and charges for jurisdictional sales to seven of its customers.¹ By order issued August 1, 1977, the Commission accepted the filing and suspended the effectiveness of the proposed rates and charges for 5 months, after which they are to become effective subject to refund.

On August 2, 1977, Maricopa County Municipal Water Conservation District No. 1 (Maricopa) filed a petition to intervene in the proceeding. Notice Granting Intervention to Maricopa was issued on August 19, 1977. On August 17, 1977, Maricopa filed a Protest and Motion for Reconstruction of the August 1 order.

The Company filed an Answer to Maricopa's Motion for Reconsideration on September 2, 1977. The other six jurisdictional customers (6 customers) subject to the Company's filing tendered for filing a Protest and Motion for Reconsideration of the August 1 order on August 30, 1977. The Company filed an Answer

¹ Maricopa County Municipal Water Conservation District No. 1, Electrical District No. 1, Electrical District No. 3, Electrical District No. 6, Electrical District No. 7, Roosevelt Irrigation District and Buckeye Water Conservation and Drainage District.

² The six customers were granted intervention by Notice issued August 24, 1977.

swer to the Motion of the 6 customers on September 12, 1977.

Maricopa's motion requests rejection of the Company's filing on essentially grounds. First, Maricopa notes that the Company submitted Period I data for the twelve month period ending December 31, 1976, the same time period as the Company's Period II Test Period in Docket No. ER76-530.³ Maricopa complains that the company used actual data for its Period I, which increases the cost of service figures, even though it utilized estimated figures for its Period II data in the ER76-530 docket. There is nothing improper in this approach. In fact, the Commission's Regulations⁴ require actual data to be used in compiling Period I figures⁵ (and estimated data for Period II).

Maricopa's other argument concerns a cost of service issue: the contention that the proposed rates are discriminatory because only a portion of the total jurisdictional sales is involved in this filing and the Company has grouped the other jurisdictional customers with its retail customers into a single category for cost of service purposes. Whatever the merit of this contention, it is appropriate that it be handled as an issue in the public hearing called for in the August 1 order. The initial conference date shall be set in an ordering paragraph below.

In its Motion, Maricopa complains that our August 1 order in this docket was issued prior to the issuance of notice of the filing, thereby preventing Maricopa from presenting arguments opposing the filing prior to the issuance of the suspension order. In its answer to Maricopa's Motion, the Company points out that Maricopa lost no substantive right in having its arguments considered on reconsideration rather than prior to the issuance of the August 1 order. The Commission agrees. We have fully reviewed Maricopa's pleading in preparation of this order and have discovered no viable argument raised therein which requires changing the August 1 order.

The Motion for Reconsideration of the 6 customers points out that the August 1 order neglected to mention that the rates to four of the customers, Electrical District No. 3, Electrical District No. 6, Roosevelt Irrigation District and Maricopa cannot become effective pending final Commission determination of the just and reasonable rate level in accordance with the order issued March 31, 1976 in Docket No. ER76-530. The March 31 order held that the agreements with these 4 customers provided only for a prospective application of the rates. The Commission agrees with the position taken in the Motion of the 6 customers.

³ An earlier docket involving the jurisdictional customers in the above-captioned docket. The decision in the Docket No. ER 76-530 rate case is still pending.

⁴ See Section 35.13(b)(4)(iii).

⁵ The Company did not provide Period II figures. Since the Company's proposed increase was less than \$1 million, Period II figures were not mandatory.

The Motion of the 6 customers also asserts that the contract between the Company and Buckeye Water Conservation and Drainage District (Buckeye) contains the same clause which caused the Commission to require prospective application only of rates to the four customers in Docket No. ER76-530. A review by the Commission of all the contracts reveals that the contracts between the Company and Buckeye, and between the Company and Electrical District No. 7 contain, in the pertinent contract section, language which is substantially the same as that of the four customers. Therefore, we shall revise our August 1 order to eliminate the suspension period for all customers except for Electrical District No. 1 and to prohibit the effectiveness of their proposed rates until just and reasonable rates are approved by the Commission after investigation under Section 206 of the Federal Power Act.⁶

The Motion of the 6 customers additionally states that it incorporates by reference the Protest and Motion for Reconsideration of Maricopa. To the extent that the Maricopa Motion and arguments raised therein are part of the Motion of the 6 customers, the Motion for reconsideration is denied.

The Commission finds: (1) Good cause does not exist to grant Maricopa's Motion for Reconsideration of the August 1, 1977 order.

(2) Good cause exists to grant in part and to deny in part the Motion for Reconsideration of Electrical District No. 1, Electrical District No. 3, Electrical District No. 6, Electrical District No. 7, Roosevelt Irrigation District and Buckeye Water Conservation and Drainage District.

(3) Good cause exists to set an initial conference date in this docket.

The Commission orders: (A) The Motion for Reconsideration of Maricopa is hereby denied.

(B) The Motion for Reconsideration of Electrical District No. 1, Electrical District No. 3, Electrical District No. 6, Electrical District No. 7, Roosevelt Irrigation District, and Buckeye Water Conservation and Drainage District is hereby granted in part and denied in part.

(C) The February 1, 1978 effective date as set forth in the August 1, 1977, order in this docket is hereby withdrawn as to all customers except Electrical District No. 1. The rates proposed by the Company shall not become effective pending final Commission determination of the just and reasonable rate level, with the exception of those rates applicable to Electrical District No. 1, which shall become effective February 1, 1978, subject to refund.

⁶ The Company's Answer to the Motion of the 6 customers points out that the Commission, in Docket No. ER76-530, held that the Company's contract with Electrical District No. 1 did not preclude a Section 205 filing. This determination is on appeal to the District of Columbia Circuit Court of Appeals.

(D) The Staff shall prepare and serve top sheets on all parties for settlement purposes on or before November 22, 1977.

(E) A Presiding Administrative Law Judge to be determined by the Chief Administrative Law Judge for that purpose shall preside at a prehearing conference in this proceeding to be held on December 2, 1977, at 10 a.m. (ET) in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The Law Judge is authorized to establish all procedural dates and to rule upon all motions (except petitions to intervene, motions to consolidate and sever, and motions to dismiss), as provided for in the Commission's Rules of Practice and Procedure.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket Nos. CS71-697, 49 and 455]

BURK ROYALTY CO. ET AL.

Notice of Petition for Declaratory Order

SEPTEMBER 26, 1977.

Take notice that on July 29, 1977, Burk Royalty Co., Tom Darling, Jon H. Bear, and Oleum, Inc. (Petitioners) filed a petition for a declaratory order pursuant to Section 1.7(c) of the Commission's Rules of Practice and Procedure.

Petitioners are small producers and were granted small producer certificates in the above-captioned dockets. On January 1, 1973, Petitioners acquired the Shaw "A" Lease located in Iberia Parish, La. on which two wells had been drilled, the Shaw No. 1 and the Shaw No. 2 Wells. The No. 1 Well was completed as a gas well at a depth of 9915-9919 feet in the Lower Siphonion Davis "B" Sand. The No. 2 Well was completed as a gas well at a depth of 10,104-10,110 feet in the Lower Siphonion Davis "B" Sand. The subject lease has never produced from any reservoir except the Lower Siphonion Davis "B" Sand. The interests of Burk Royalty, Darling, and Bear were acquired from Cities Service Oil Co. (Cities Service), a large producer. The interest of Oleum was acquired from Falcon Seaboard, Inc., a small producer.

In March, 1973, production ceased and between May 15, 1973, and January 1, 1974, Petitioners performed extensive workover and remedial operations on the No. 1 and No. 2 Wells attempting to obtain commercial gas production in the previously produced reservoir and in seeking gas production in a new and different reservoir, being the Upper Siphonion Davis "B" Sand, which had never produced or been developed on Petitioners' Shaw "A" Lease. These operations were not successful on the No. 2 Well.

In the No. 1 Well, when production could not be restored in the previously

produced formation, Petitioners set a bridge plug at 9890 feet and reperforated the well from 9845 feet to 9872 feet, being in the Upper Siphonion Davis "B" Sand. Although problems developed and the well has not yet been recompleted, Petitioners believe that with additional work and expenditures, commercial gas production can be obtained from said new perforations in said No. 1 Well. Accordingly, Petitioners desire to re-enter the No. 1 Well and attempt to complete same as a producer of gas from the new perforations in the Upper Siphonion Davis "B" Sand.

Production from the Shaw "A" lease is dedicated to a December 9, 1959 gas purchase contract between Cities Service and Southern Natural Gas Company (Southern Natural) which provides for a price of approximately 30.09 cents per Mcf. By letter agreement dated December 2, 1976, Southern Natural has agreed to pay Petitioners whatever rate this Commission finds to be just and reasonable.

Petitioners are of the opinion that they are entitled, pursuant to the provisions of Opinion No. 770-A, to a rate of 130% of 52 cents per Mcf, exclusive of production, severance or similar taxes, and subject to the adjustments and escalations provided in that opinion. Therefore, Petitioners request that the Commission issue a declaratory order stating that the gas reserves produced from the Upper Siphonion Davis "B" Sand in the Shaw "A" No. 1 Well (a) were not acquired by the purchase of developed reserves in place from a large producer, (b) are the result of a completion operation into a different formerly nonproductive reservoir commenced after January 1, 1973, and (c) are small producer reserves developed by a natural gas company while in the status of a small producer.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 12, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ES77-58]

CENTRAL TELEPHONE & UTILITIES
CORP.

Notice of Application for Authority To Issue
Securities

SEPTEMBER 23, 1977.

Take notice that on September 13, 1977, Central Telephone & Utilities Corp. (Applicant) filed an application pursuant to Section 204 of the Federal Power Act seeking authority to extend to not later than December 31, 1980, the final maturity date of short-term unsecured promissory notes to be authorized to be issued not later than December 31, 1978, in an aggregate principal amount at any one time outstanding of \$85,000,000.

Applicant is incorporated under the laws of the State of Kansas, with its principal business office in Chicago, Ill. It is engaged in electric utility operations in the southeastern part of Colorado and the central and western portions of the State of Kansas.

The proceeds from the issuance of short-term notes are to provide temporary funds for the construction, completion, extension or improvement of facilities of Applicant and for advances to and investment in subsidiaries of Applicant to be used for the construction and improvement of facilities of such subsidiaries pending permanent financing. The estimated construction programs for the above purposes for 1978, 1979, and 1980 are \$175,000,000, \$187,000,000, and \$179,000,000, respectively.

Any person desiring to be heard or to make any protest with reference to said application should, on or before October 4, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to a proceeding. Any person wishing to become a party must file a petition to intervene. The Application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER77-589]

DUKE POWER CO.

Notice of Supplement to Electric Power
Contract

SEPTEMBER 26, 1977.

Take notice that Duke Power Co. (Duke Power) tendered for filing on September 19, 1977, a supplement to the Company's Electric Power Contract with Blue Ridge Electric Membership Corp. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Co. Rate Schedule FPC No. 131.

Duke Power further states that the Company's contract supplement, made at the request of the customer, provides for increases in the designated KW at Delivery Points Nos. 2, 3 and 4. Duke Power indicates that these increases are from 8,500 to 12,000, from 11,000 to 15,000 and from 90,000 to 110,000 kilowatts, respectively. Duke Power further indicates that the supplement also includes an estimate of sales and revenue for the twelve months immediately preceding and for the twelve months immediately succeeding the effective date. Duke Power proposes an effective date of October 19, 1977.

Duke Power indicates that a copy of this filing was mailed to Blue Ridge Electric Membership Corp. and the North Carolina Utilities Commission.

Any person desiring to be heard or to protect said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 3, 1977. Protests will be considered by the Commissioner in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP77-17]

EASTERN SHORE NATURAL GAS CO.

Notice of Filing of Revised Tariff Sheets

SEPTEMBER 23, 1977.

Take notice that on September 15, 1977, Eastern Shore Natural Gas Co.

(Eastern Shore) tendered for filing revised tariff sheets which Eastern Shore states will provide: (1) for crediting the jurisdictional portion of demand-charge credits in accordance with a settlement agreement in its rate case in Docket No. RP77-17, and (2) for the addition of an unrecovered purchased gas cost account to the purchased gas cost adjustment clause of its FPC Gas Tariff.

Eastern Shore states that copies of these tariff sheets have been mailed to its jurisdictional customers and interested state commissions.

Any party desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 C.F.R. 1.8, 1.10). All such petitions or protests should be filed on or before October 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Project No. 2640]

FLAMBEAU PAPER CO. AND CAPITOL CITIES MEDIA, INC.

Notice of Application for Transfer of License

SEPTEMBER 23, 1977.

Public notice is hereby given that an application was filed on July 25, 1977, under the Federal Power Act, 16 U.S.C. §§ 791a-825r by the Flambeau Paper Co. and Capitol Cities Media, Inc. (Correspondence to: Norman C. Hoefferle, President, Flambeau Paper Co., Park Falls, Wis. 54552; and Danny R. Carpenter, Esq., Watson, Ess, Marshall & Enggas, 1500 Home Savings Building, 1006 Grand Avenue, Kansas City, Mo. 64106) for transfer of license for the Upper Hydro-Electric Project No. 2640 located on the North Fork of the Flambeau River in the City of Park Falls, Price County, Wis. The Flambeau Paper Co. merged into Capitol Cities Media, Inc. which is the surviving entity. The Flambeau Paper Co. proposes to transfer its license for Project No. 2640 to Capitol Cities Media, Inc.

The Upper Hydro-Electric Project consists of:

(1) A reinforced concrete gravity dam approximately 100 feet long and 15 feet high; (2) four steel tainter gates, each 20.5 feet long; (3) a needle dam approximately 44 feet long; (4) a reservoir with a maximum operating head of 19.3 feet at elevation 1487.4 feet (U.S. G.S.); (5)

a 1,300-foot long power canal; (6) three short, open reinforced concrete flumes with steel headgates; (7) a powerhouse containing three 650 horsepower turbines and two 450 kW generators (one turbine is not in use); and (8) appurtenant facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before November 7, 1977, file with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 C.F.R. § 1.8 or § 1.10 (1977). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER77-531]

ILLINOIS POWER CO.

Order Accepting for Filing and Suspending Proposed Increased Rates, Providing for Hearing and Establishing Procedures

SEPTEMBER 23, 1977.

On July 29, 1977, Illinois Power Co. (Illinois) tendered for filing a proposed rate increase of \$176,479 (32%) for a 12 month test period ending on September 30, 1978. The proposed increase is applicable to the Village of Ladd, the City of Oglesby and Cedar Point Light and Water Co. (Municipalities), all located in Illinois. The designation of the rate schedules is set forth in the Appendix to this order. Illinois requests an effective date of September 26, 1977, which is 5 days before the beginning date of the Period II future test year study submitted.

In support of its filing, Illinois states that expanded construction and capital costs, and operating expenses incurred since its last effective rate increase¹ have necessitated the proposed increase.

Public notice of the filing was issued on August 5, 1977, with comments, protests or petitions to intervene due on or before August 19, 1977.

On August 19, 1977, the Municipalities filed a joint petition for an extension of time within which to file a petition to intervene. On September 2, 1977, the Commission's Secretary issued a notice extending the time to file petitions to intervene to September 9, 1977.

¹ 18 CFR § 35.13(b) (4) (III) (1977).

² Illinois' previous rate increase was allowed to become effective, subject to refund, on January 1, 1976, in Docket No. E-9520. On August 1, 1977, the Commission issued its Opinion No. 816 in Docket No. E-9520.

On September 9, 1977, the Municipalities filed a joint document, moving to reject, summarily dispose and protesting Illinois' filing, and requesting leave to intervene. Since the Municipalities have substantial interests which may be affected by the subject matter of this proceeding, the Commission will permit intervention.

In support of its combined motions, the Municipalities argue that:

1. Illinois' unilateral rate increase to the Village of Ladd is precluded by the contract provisions falling within the *Sierra-Mobile* doctrine.³

2. Illinois' demand allocation method, rate of return and assignment of 69 kV lines should be summarily rejected based on the Commission's August 1, 1977, Opinion No. 816, in Docket No. E-9520.

3. The rate increase to the City of Oglesby and Cedar Point Light and Water Co. would be discriminatory since these two customers will be served at higher rates than other customers of the same class.

4. The allocation of rate case expense is improper.

5. The filing should be summarily rejected since the terms and conditions of service are anti-competitive.

The argument that the Village of Ladd's contract with Illinois protects it from the company's unilateral rate filing, is unpersuasive. The Commission decided by order issued May 7, 1976, in Docket No. E-9520,⁴ that the contract with Ladd is not of the *Sierra-Mobile* fixed rate variety. The Village of Ladd has not presented any arguments that require amendment of that prior determination.

The Municipalities request the Commission to require Illinois to amend its filing to conform to the Commission's determination on three issues in its Opinion No. 816, i.e., demand allocation, rate of return and assignment of 69 kV lines. Our decision in Opinion No. 816 was issued on August 1, 1977, and was based on a 1974 test period. Petitions for rehearing of that Opinion have been filed and are presently pending Commission action. The instant filing was tendered July 29, 1977, three days before the issuance of Opinion No. 816 and was based on a test period ending September 30, 1978. Thus, since the facts underlying the three issues may differ sufficiently to warrant different determinations, we are precluded from summarily disposing of those three issues in the instant proceeding. However, since the merits of those issues have recently been litigated and decided by us in Opinion No. 816, we shall consider our opinion there controlling on these issues and, if Illinois elects to pursue its position on those issues, it shall have the burden of showing significant new facts or changed circumstances that warrant modification of those decisions. Illinois may, however, determine that the facts and circumstances do not warrant

³ *United Gas Co. v. Mobile Gas Corp.*, 350 U.S. 332 (1956); *F.P.C. v. Sierra Pacific Power Co.*, 350 U.S. 348 (1956).

⁴ The Village of Ladd has sought review of this order in *City of Oglesby, et al. v. F.P.C.*, CADC No. 76-1585.

relitigation of the three issues. In that event, Illinois is encouraged to refile its rate increase proposal to reflect our determination of the three issues in Opinion No. 816.⁵

The other issues raised by the Municipalities, whether the rates proposed are discriminatory or anti-competitive and whether rate case expenses have been properly allocated, present factual questions which should be resolved through the Commission's hearing procedure.⁶

Illinois requests an effective date of September 26, 1977 for its proposed rates. In essence, Illinois is requesting waiver of our Regulation that requires the utility's Period II future test year study to begin no later than the proposed effective date⁷ since Illinois' Period II begins on October 1, 1977. However, Illinois has not shown any justification for waiver. Thus, we will deny its request for a September 26, 1977, effective date and will accept the tender for filing, effective October 1, 1977, pursuant to Illinois' Period II test year study.

Our review of Illinois' filing indicates that the proposed increase in rates and charges have not been shown to be just and reasonable, and may be unjust, unreasonable, unduly discriminatory, preferential or otherwise unlawful. Based on this review of the filing, we will accept the proposed rates for filing, suspend their effectiveness for 5 months from October 1, 1977, and establish hearing procedures.

The Commission finds: (1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Federal Power Act that the Commission enter upon a hearing concerning the lawfulness of the proposed increased rates and charges tendered by Illinois Power Co. on July 29, 1977, establishing procedures for the hearing, and that the proposed increased rates and charges be accepted for filing, suspended, and the use thereof deferred, all as hereinafter ordered.

(2) Participation of the Village of Ladd, the City of Oglesby and Cedar Point Light and Water Co. in this proceeding may be in the public interest.

The Commission orders: (A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by the Federal Power Act, particularly Sections 205, 206, 301, 307, 308 and 309 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the Regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and rea-

⁶ *Municipal Light Boards v. F.P.C.*, 450 F.2d 1341 (D.C. Cir. 1971).

⁷ 18 CFR § 35.13(b) (4) (III) (1977).

sonableness of the rates proposed by Illinois Power Co. in this proceeding.

(B) Pending such hearing and decision thereon, the proposed increased rates and charges filed by Illinois Power Co. on July 29, 1977, and identified in the Appendix to this order are hereby accepted for filing as of October 1, 1977, suspended and the use thereof deferred until March 1, 1978, when they shall become effective, subject to refund.

(C) The Staff shall prepare and serve top sheets on all parties for settlement purposes on or before January 6, 1978. (See, Administrative Order No. 157.)

(D) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See, Delegation of Authority, 18 CFR § 3.5(d)), shall preside at an initial conference in this proceeding to be held on a date certain within 10 days after the service of top sheets by the Staff, in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. Said Presiding Administrative Law Judge is hereby authorized to establish all procedural dates and to rule upon all motions (with the exceptions of petitions to intervene, motions to consolidate and sever, and motions to dismiss), as provided for in the Commission's Rules of Practice and Procedure.

(E) Nothing contained herein shall be construed as limiting the rights of parties to this proceeding regarding the convening of conferences or offers of settlement pursuant to Section 1.18 of the Commission's Rules of Practice and Procedure.

(F) Petitioners are hereby permitted to intervene in this proceeding subject to the Rules and Regulations of the Commission; *Provided, however*, That participation of such intervenors shall be limited to the matters affecting asserted rights and interests specifically set forth in the petition to intervene; and *Provided, further*, That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved by any orders entered in this proceeding.

(G) Within 60 days Illinois may file substitute rate schedules consistent with Opinion No. 816 as to the determination of the issues of demand allocation, rate of return, and assignment of 69 kV lines.

(H) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. ER77-411, 412, 413, 414, 415, 416, and ER77-23, 24, 25, 26, 28, 29]

ILLINOIS POWER CO.

Order Denying Reconsideration Rejecting Filing, Accepting for Filing Under § 206, Refunding Monies Collected Under New Rates, Denying Request for Declaratory Order, and Consolidating Proceedings.

SEPTEMBER 23, 1977.

On October 20, 1976, the Illinois Power Co. (Company) tendered for filing proposed Modification No. 2 to its Interconnection Agreements with the city of Mascoutah (ER77-23), the cities of Breese and Carlyle (ER77-24), the village of Freeburg (ER77-25), and the city of Highland (ER77-26). The Company filed identical proposed amendments to the Interconnection Agreements with the city of Peru (ER77-28) and the city of Princeton (ER77-29) on October 22, 1976. The proposed Modification No. 2 provided for an increase in the demand charges for short-term firm and maintenance power transactions. The Company requested an effective date of November 20, 1976 for all six dockets.

Public notice of each of Illinois Power's filings was issued on November 1, 1976, with all protests and petitions to intervene due on or before November 15, 1976. On November 11, 1976, the municipalities of Mascoutah, Breese, Carlyle, Freeburg, Highland, Waterloo, Peru, and Princeton (Cities) filed in one pleading, a petition to intervene, motion for consolidation, and motion to reject. In support of the motion to reject, municipalities alleged that Illinois' filing did not comply with the Federal Power Commission's regulations under section 35.13(b) (4) (I) and (b) (5) (I).

By order issued November 19, 1976, we accepted the proposed Modification, suspended it for one day, and established procedures. We denied the Cities' motion to reject the filing.

On June 30, 1977, the Company tendered for filing proposed increases in its demand charges for short-term firm capacity and for Maintenance Power

Capacity for service to the same seven municipalities.¹ The filing was initially submitted on May 31, 1977, but was found to be deficient in its omission to notify its State commission. This deficiency was corrected on June 30, 1977. This filing would increase the Company's revenues for this service by \$151,148 or 16.67 percent based on the 12-month period ending April 30, 1977.

Public notice of Illinois' filings was given with all protests and petitions to intervene due on or before August 1, 1977. By order issued July 26, 1977, we accepted the filing, waived the notice requirements, and suspended it for one day. The increase became effective July 2, 1977, subject to refund.

On August 1, 1977, the Illinois Municipalities of Highland Mascoutah, Freeburg, Princeton, Peru, Breese, and Carlyle tendered for filing a Petition for Reconsideration of Rehearing, Motion to Reject, Motion to Intervene, Complaint, and Motion to Consolidate.² The Cities state that they are customers of the Company and are served under the Interconnection Agreements that are the subject of these proceedings. They allege that they have a direct interest in these proceedings which cannot adequately be protected by any other party.

On August 18, 1977, Illinois Power filed an answer to the Cities' filing. The Company states that it does not oppose consolidation, but the filing argues against Cities' Motion to Reject and answers Cities' Complaint.

The Cities replied to the Company's Answer on August 29, 1977. In their reply, the Cities reiterate their argument and respond to certain statements made by the Company in its answer.

By order issued August 31, 1977, we granted the Cities' motions for intervention and reconsideration. Reconsideration granted was for the limited purpose of further consideration in light of the complex arguments raised by the parties' pleadings. We address these arguments now.

The Cities request that we reconsider our Order waiving notice requirements and allowing the increased rates to become effective subject to refund on July 2, 1977. They base their request upon the Company's failure to submit cost of service data. We waive the case-in-chief filing requirement in that the proposed rates have been previously accepted for filing for other Illinois Power customers receiving similar service³ and the cost support filed by Illinois Power was sufficient for the Commission's initial determination as to whether the filing should be accepted or suspended. Of course, Illi-

nois Power will have the burden of proof in the hearing to justify its proposed increase and will be required to submit the case-in-chief upon which it is going to rely to support the increase. Cities' motion for reconsideration of the suspension order of July 26, 1977, presents no new facts or principles of law that were not considered by the Commission when it issued that order or, now having been considered, warrant any change or modification of said order.

Cities further argues that the Company's filing must be rejected as violative of the *Mobile-Sierra*⁴ doctrine. The salient contract provision relied on by Cities reads as follows:

The rates and charges provided for by this Agreement shall be reviewed at least annually by the parties and shall be revised if such review reveals that rates, charges, or conditions are not consistent with the then prevailing costs, practices, or other pertinent conditions or do not adequately reflect the net benefits derived from or the costs associated with the transactions under this Agreement or do not adequately take into account the respective generation and transmission investments of the parties. Either party may unilaterally take action to implement the results of such review, or if a party shall "fall in good faith to participate in such review" the other party may unilaterally take action with respect to any of such matters before any regulatory authority having jurisdiction with respect thereto. In such event the rates, charges and conditions shall be those provided for in this Agreement as modified or otherwise authorized by such regulatory authority. (Article XIII, Section 4.)

Upon careful reconsideration of the relevant contractual language and the arguments of the parties, we conclude that section 205 rate increase filings were not contemplated by the parties and, so, are impermissible. We are aware that the Commission has in the past permitted section 205 filings by the Company, but in those instances the contract interpretation issue was not clearly raised. Upon reflection we are now persuaded that the correct result—the one required by the intentions of the parties—is to preclude any rate increase until after a section 206 proceeding.

This result is compelled by an analysis of the last sentence of section 4. When it is read in conjunction with the other language, its proper interpretation becomes evident. Moreover, the language "as modified or otherwise authorized by such regulatory authority" is comparable to the language recently interpreted by the Commission in *Kansas Power & Light Company*, Docket No. ER76-39. In that case, as Cities point out, the Commission interpreted similar language to preclude a section 205 filing.

Section 4 as a whole reveals the parties' intention that rate changes should ideally be the product of mutual discussion and agreement. However, in the event that their discussions do not result in agreement, the contract permits

either party to place the entire rate change issue before the Commission for resolution. In speaking of "such event", in the last sentence of section 4, the parties are referring to the possibility that their discussions would not result in agreement. In that event, they intended that any new rate, charge or condition could only be that which the Commission specifically "authorized" following its consideration of the issues. The language of the last sentence of section 4 is in our view unmistakably prospective. It assures the parties, in the event agreement has not been reached, that there will be no change until after they have had an opportunity to express their differing views to the Commission and the Commission has made its final determination in the matter.

This interpretation fully comports with our interpretation of similar "authorizing" language in other contracts. We are, of course, fully aware that language referring to "unilateral" action in other instances has been interpreted by the Commission as permitting section 205 rate filings. This case, therefore, is difficult because of the parties' use of contradictory language. In such instances it becomes necessary to consider all the relevant contractual language and to interpret the contradictory terms in the most reasonable manner. We believe we have done that here in determining that the parties' intentions preclude unilateral rate change by the Company. The Company's filing under section 205 of the Act must, therefore, be rejected. The type of Commission proceeding intended by the parties is that provided for by section 206.⁵

We shall accept the Company's filings in Docket Nos. ER77-411-416 under § 206 of the Federal Power Act and Institute a section 206(a) proceeding to determine the just and reasonable rate for the Company's service to the Cities, all changes prospective in application. The Company shall be required to refund all monies collected under the increased rates.

Cities also filed a complaint for investigation and a request for a declaratory order to determine if the Company has overcharged the Cities for short-term firm energy under the interconnection agreements during the past two years. The Cities allege that the Company has been overcharging them for firm energy deliveries during the past two years.

Cities contend that the overcharge is a result of the Company's method of calculating the energy charge. Cities read the contract to require that the Company must calculate the firm energy charge based on the cost of the entire mix of the company's generation utilized in scheduling the firm power deliveries to the Cities. The pertinent contract provision

⁵ See *Appalachian Power Company*, Docket Nos. ER76-799, 800, order issued November 8, 1976, rehearing denied February 25, 1977, appeal pending, *sub nom. Appalachian Power Co. v. FPC*, D.C. Cir. No. 77-1232.

⁴ *United Gas Pipeline v. Mobile Gas Service Corp.*, 350 U.S. 332 (1956) and *F.P.C. v. Sierra Pacific Power Co.*, 350 U.S. 346 (1956).

¹ Docket Nos. ER77-411, ER77-412, ER77-413, ER77-414, ER77-415, and ER77-416.

² The Cities' petition is in part styled for "reconsideration or rehearing". Since our order of July 26, 1977, is interlocutory no application for rehearing is permitted (18 CFR § 1.134). However, the Commission treated the Application as a Motion for Reconsideration.

³ Illinois Power Co., FPC Rate Schedule Nos. 9 11 48 50, 63 and 64.

is section 3. The energy charge provision provides that the charge per Kwh delivered shall be the supplying party's out-of-pocket costs, plus 10 per cent of such costs. It further states that "out-of-pocket costs shall be based on the costs of fuel, labor, maintenance and operating supplies (including startup costs if any), purchased energy and losses in transmission and transformation, including all other factors that are a part of incremental costs."

The Company contends in its answer that this provision provides that the basis for the energy charge is the incremental cost to the supplier at the time the energy is furnished.

Cities further allege that the short-term energy cost billed to them has been higher than the energy cost billed to wholesale customers under Illinois Power's Wholesale Service Classification 40. The Cities also claim that because they elected not to purchase short-term energy on certain occasions, the reservation charges paid by them to the Company on those occasions should be refunded to them. The Company in its answer disagrees with each of these allegations.

The Company requests that the Complaint for investigation and declaratory order to determine alleged overcharges for short-term energy under interconnection agreements either be dismissed or, alternatively, assigned a separate docket number and considered in a separate proceeding.

The issues raised by Cities' Complaint should be addressed during the course of the hearing in this proceeding. We are setting those issues for review under sections 205 and 206 of the Federal Power Act. Cities' request for a separate investigation and declaratory order is denied.

Finally, since there are similar questions of law and fact in all of the captioned dockets, public interest requires that these dockets be consolidated for purposes of hearing but not for the purpose of decision.

(1) Good cause does not exist to grant the Cities' Motion for reconsideration.

(2) Good cause exists to reject the Company's filing under section 205 of the Federal Power Act and to terminate the proceeding heretofore initiated under that section of the Act, as hereinafter ordered.

(3) Good cause has been shown to accept the Company's filing of June 30, 1977 under section 206 of the Federal Power Act.

(4) Good cause exists to institute an investigation under section 206 of the Act to determine just and reasonable rates to be charged to the Cities.

(5) Good cause does exist to address during the hearing those issues raised in the Cities' Complaint pursuant to sections 205 and 206 of the Federal Power Act.

(6) Good cause does not exist to grant the Cities' request for a separate investigation and declaratory order.

(7) Good cause exists to consolidate the above captioned dockets for purposes of hearing only.

The Commission orders: (A) The Cities' Motion for Reconsideration is hereby denied.

(B) The Company's rate filing pursuant to section 205 of the Federal Power Act is hereby rejected.

(C) Ordering paragraph (C) of our order issued July 26, 1977 is hereby stricken and ordering paragraph (B) of that order is hereby amended to replace the words "particularly sections 205 and 206 thereof" with the words "particularly section 206."

(D) The proposed increased rates and charges tendered by the Company on June 30, 1977, are hereby accepted for filing under section 206 of the Federal Power Act.

(E) Pursuant to the authority of the Federal Power Act, particularly section 206 thereof, and the Commission's rules and regulations, and the regulations under the Federal Power Act, an investigation is ordered to determine the just and reasonable rates to be charged to the Cities.

(F) All rate increases to the Cities which we may approve shall be effective only from the date of such approval. All amounts collected, subject to refund, related to the proposed increases to the Cities since July 2, 1977, shall be refunded forthwith.

(G) The Cities' request for separate investigation and declaratory order is hereby denied.

(H) The issues relating to short term firm energy are hereby set for hearing pursuant to sections 205 and 206 of the Federal Power Act.

(I) The proceedings in the above-captioned dockets are hereby consolidated for purposes of hearing.

(J) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission,

KENNETH F. PLUME,
Secretary.

[Docket No. ER77-606]

NORTHERN STATES POWER CO.

Notice of Interconnection and
Interchange Agreement

SEPTEMBER 26, 1977.

Take notice that Northern States Power Company (NSPC), on September 21, 1977, tendered for filing an Interchange Agreement, dated September 16, 1977, with the City of New Ulm, Minn.

NSPC indicates that the Interconnection and Interchange Agreement includes service schedules, which provide for transactions between the parties, similar to the service schedules contained in the Mid-Continent Area Power Pool Agreement.

NSPC requests waiver of the Commission's notice requirements to allow for an effective date of October 21, 1977.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the

Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions and protests should be filed on or before October 11, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUME,
Secretary.

[Docket No. ER77-606]

NORTHERN STATES POWER CO.

Notice of Interconnection and
Interchange Agreement

SEPTEMBER 26, 1977.

Take notice that Northern States Power Company (NSPC), on September 21, 1977, tendered for filing an Interconnection and Interchange Agreement, dated September 16, 1977, with the City of Medelia, Minn.

NSPC indicates that the Interconnection and Interchange Agreement includes service schedules which provide for transactions between the parties, similar to the service schedules contained in the Mid-Continent Area Power Pool Agreement.

NSPC requests waiver of the Commission's notice requirements to allow for an effective date of October 21, 1977.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol St., NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions and protests should be filed on or before October 11, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. ER77-606]

PACIFIC GAS AND ELECTRIC CO.

Notice of Further Extension of Time

SEPTEMBER 26, 1977.

On August 19, 1977, the Secretary of the Interior filed a motion for reached-

uling of the procedural dates in the above captioned proceeding. The filing and hearing dates were previously extended by notices issued February 28, 1977, June 2, 1977, August 23, 1977, and August 26, 1977.

The instant motion states that the Commission is still considering the Motion for Approval of Settlement Agreement, filed January 31, 1977, by Pacific Gas and Electric Company (PG&E), and that further filings and a hearing on the issues in this proceeding will be necessary only if PG&E's Motion is denied. The motion states that all parties to the proceeding and Staff Counsel do not object to the requested relief.

Upon consideration, notice is hereby given that the procedural dates in the above designated matter are extended as follows in order to allow the Commission to complete consideration of PG&E's Motion for Approval of Settlement Agreement:

Filing of evidence in answer to PG&E's case-in-chief, November 2, 1977.

Filing of trial briefs by parties answering evidence, November 16, 1977.

Filing of PG&E's rebuttal evidence, November 30, 1977.

Filing of PG&E's trial brief, December 14, 1977.

Hearings: January 24, 1978.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RP71-119]

PANHANDLE EASTERN PIPELINE CO. Notice of Petition for Relief

SEPTEMBER 23, 1977.

Take Notice that on September 2, 1977, Quanex Corporation (Petitioner), formerly known in this proceeding as Michigan Seamless Tube Company, filed a petition for relief from the Commission's order of August 31, 1976, dismissing its petition for extraordinary relief and ordering payback. It seeks a reversal of the payback order, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

Petitioner indicates that it uses natural gas in the manufacture of cold-drawn seamless steel tubing at its Michigan Seamless Tube Division. According to Petitioner, policy guidelines issued by the Commission on March 2, 1973, in Commission Order 467-B, Docket No. R-469 (49 FPC 583) would have subjected Petitioner to 100 percent curtailment of natural gas on or about October 31, 1973. In order to prevent this, Petitioner filed with the Commission a petition for extraordinary relief on August 24, 1973, requesting permission to obtain a minimum of 1,061 Mcf per day of natural gas from Panhandle Eastern Pipeline Company (Panhandle) from October 1, 1973, to August 1, 1974, and 679 Mcf per day thereafter. In addition, Petitioner filed request for temporary emergency relief on December 28, 1973.

By its order of January 14, 1974, in Docket No. RP71-119 (51 FPC 230), the Commission granted Petitioner's request for temporary relief pending a decision on the merits of the petition for extraordinary relief. On August 31, 1976, the Commission issued an order dismissing the petition for extraordinary relief as moot and ordering Petitioner to pay back temporary relief volumes. Petitioner asserts that the petition for extraordinary relief was dismissed as moot, because the interruptible nature of Petitioner's supply contract was afforded a higher priority by Opinion No. 754, issued on February 27, 1976. Opinion No. 754 abolished the distinction between firm and interruptible contracts in assigning service priorities on the Panhandle system.

In support of its request for relief with respect to payback, Petitioner cites the Opinion of the United States Court of Appeals for the Third Circuit in *Hercules, Inc. v. FPC*, 552 F.2d 74 (3rd Cir. 1977). In that case, says Petitioner, the court set aside the payback requirement that had been imposed on Hercules, Inc. by the Commission. The requirement was set aside because it was based on the distinction between firm and interruptible contracts and this distinction had been eliminated by Opinion No. 754. Petitioner also cites two Commission orders issued on March 8, 1974. In an order on that date granting a rehearing to Hercules, Inc. in Docket Nos. RP71-119 and RP74-31-22, says Petitioner, the Commission declared that petitioners who received extraordinary relief under the plan of Order No. 467-B would not be required to pay back gas. Moreover, in another order on that date in Docket Nos. RP71-119, et al., the Commission, according to Petitioner, relieved other petitioners of their payback obligations for any emergency gas received while the plan of Order No. 467-B was in effect.

Petitioner asserts that it received extraordinary relief from the curtailment plan of Order 467-B in the same manner as petitioners subject to the Commission orders of March 8, 1977, and that these orders should therefore relieve Petitioner of its payback obligations. Accordingly, Petitioner requests that the Commission: (1) Order that Petitioner's payback obligations be suspended and direct Panhandle to increase deliveries to Petitioner in an amount sufficient to compensate for those volumes subjected to the improper payback order; (2) order that Petitioner receive the amount of natural gas from Panhandle as is in Petitioner's contract with Panhandle, "subject to the provisions of the revised 754 interim curtailment plan," without reduction; and (3) grant such other relief as is appropriate.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and

Procedure (18 CFR 1.8 or 1.10). The notice and petitions for intervention previously filed in Docket No. RP71-119 will not operate to make those parties interveners or protestants with respect to the instant petitions. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER76-739]

PUBLIC SERVICE COMPANY OF INDIANA

Notice on Motion

SEPTEMBER 23, 1977.

On August 23, 1977, Public Service Company of Indiana (PSI) filed a motion to correct an order issued August 1, 1977, in Docket No. ER76-739.¹ In its motion, PSI requests that the order be amended to show that Chairman Dunham dissented from the adoption of the order insofar as it instituted an investigation pursuant to Sections 202, 206, 307 and 311 of the Federal Power Act of the circumstances surrounding the termination of the joint planning function of the Kentucky-Indiana Pool Planning and Operating (KIP) Agreement.

On August 5, 1977, Chairman Dunham rescinded his approval of the order issued August 1, 1977 in this proceeding, and directed the Secretary of the Commission to include in the Commission minutes a statement that he had originally voted for the order inadvertently. A majority of the Commission had, however, voted for the order; accordingly, Chairman Dunham's action did not affect adoption of the order, and the order remains in effect.

To reflect the above described occurrence, the Secretary was directed by Chairman Dunham to include in the Commission minutes the following statement:

On August 5, 1977, Chairman Dunham advised the Secretary that he had voted for the order issued August 1, 1977, inadvertently and wanted the minutes to so show.

As directed, that language was placed in the official minutes of the subject meeting. That action does not effect, in any manner, the validity of the order issued herein on August 1, 1977. PSI's

¹ Order Accepting Notice of Termination of Pooling Agreement for Filing, Granting Waiver of Notice Requirements, Instituting Investigation, Denying Motion to Suspend or to Reject and Granting Intervention.

motion filed August 23, 1977, is hereby denied.

By Direction of the Commissioner.

KENNETH F. PLUMB,
Secretary.

[ER Doc 77-28964 Filed 9-30-77; 8:45 am]

[6740-02]

[Docket No. ER77-524]

PUGET SOUND POWER AND LIGHT CO.

Order Granting in Part Motion for Reconsideration

SEPTEMBER 26, 1977.

On August 1, 1977, the Commission issued an order in this docket which accepted for filing the application of Puget Sound Power and Light Company (PSPL) for rate increases to eleven of its wholesale customers.¹ In that order, we suspend the proposed rate increases until March 1, 1978, when they are to become effective subject to refund.

On August 31, 1977, PSPL filed an "Application for Rehearing" of the August 1, 1977 order. Since the order is interlocutory, no application for rehearing is permitted.² However, the Commission will treat the application as a Motion For Reconsideration of the order.

Applicant requests that we reduce the five month suspension imposed in this docket, asserting that the order of August 1, 1977 is unlawful, discriminatory, arbitrary and an abuse of discretion. It is PSPL's contention that the maximum suspension period has been imposed "only when large amounts were involved, where a problem is apparent from the face of the application or where the application is consolidated with an application for a large rate increase."

In its July 22, 1977, filing, PSPL proposed to raise its rates, increasing revenues by \$391,045, or 64 percent, based on the 12-month period ending October 1, 1978. Our preliminary review indicated that the proposed increase in rates was not shown to be justified, and we suspended accordingly.

It is well established that decisions regarding the necessity and length of rate increase suspensions lie within the sound discretion of the Federal Power Commission. *Municipal Light Boards v. FPC*, 450 F.2d 1349-1352 (D.C. Cir. 1971), cert. denied, 405 U.S. 989 (1972). The Commission's discretionary decision to suspend is based on a number of factors, including, inter alia, the possibly excessive nature of the proposed rate increase, the financial condition of the utility, the financial impact on the wholesale customers and the percentage of a utility's overall revenues derived from wholesale customer accounts. These same factors

Protests to the proposed rate increase were filed by the Port of Bremerton on August 8, 1977, and by the City of Dupont on August 29, 1977.

² See Section 1.34 of the Commission's Rules of Practice and Procedure, which requires a final decision or order before an application for rehearing can lie.

are appropriate considerations in determining the length of any suspension as well.

These factors were taken into account by the Commission prior to the issuance of its August 1, 1977 order. PSPL's assertion that we have departed from past Commission policy on suspensions under Section 205 of the Federal Power Act is unfounded. We have, however, reconsidered the appropriate length of suspension in this docket and have found that a reduction in the suspension period from five months to one month is warranted.

The Commission finds: PSPL's Motion for Reconsideration of August 31, 1977, should be granted in part.

The Commission orders: (A) PSPL's Motion for Reconsideration is hereby granted, in part.

(B) PSPL's proposed rate increases are hereby suspended for one month, or until November 1, 1977, when they are to become effective subject to refund.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket Nos. AR67-2 and AR69-1, et al.]

AREA RATE PROCEEDING, ET AL., (SOUTHERN LOUISIANA AREA)

Order Directing Disbursement and Flow-Through of Refunds

SEPTEMBER 23, 1977.

On July 16, 1977, the Commission issued its Opinion No. 598 and order establishing just and reasonable rates for jurisdictional sales of natural gas produced in the Southern Louisiana Area. Pursuant to Ordering Paragraph (G) of Opinion No. 598, each producer was given the alternative of discharging its refund obligation through credits for dedication of new gas reserves for sale to interstate pipelines, after August 1, 1971, and prior to October 1, 1977, in addition to those new gas reserves already dedicated to interstate commerce as of October 1, 1970. The producers electing this option were required to refund in cash plus 7 percent interest effective from August 1, 1971, the outstanding refund obligation remaining as of October 1, 1977.

We now require those producers who elected to discharge their refund obligations through credits and who have an outstanding refund obligation remaining to disburse their refund monies on or before October 31, 1977.¹ The producers shall pay interest at the rate of 7 percent per annum from and after August 1, 1971, the effective date of Opinion No. 598, to the first day of the month in which payment is made.

¹ The producers are also required to file their reserve dedication reports on or before October 1, 1977.

In order to insure the orderly administration and review of the refunds to be made pursuant to this order, we shall require that all refunds made by working interest owners whose gas was sold under the rate schedule of another producer be coordinated with and reported by the producer under whose rate schedule the sale was made.

Once the refunds have been allocated to the respective purchasers, the purchasers shall flow the refund through to their jurisdictional customers. Provided, however, that purchasers shall not be required to flow-through the refunds, if any, as to which they may assert a claim of entitlement under terms of prior rate settlement agreements approved by the Commission.

The Commission finds: It is proper and proper in the public interest and carrying out the provisions of the Natural Gas Act that the refund due to this order be disbursed and flow-through as hereinafter ordered.

The Commission orders: (A) On or before October 31, 1977, each producer who elected to discharge its refund obligations under Commission Opinion No. 598 through credits to be reserved for the dedication of new reserves and who has an outstanding refund obligation remaining on October 1, 1977, shall file three copies of a final refund report showing for each rate schedule and each docket separately the amounts required to be refunded under Ordering Paragraph (E) of Opinion No. 598, as amended, and the 7 percent interest thereon from August 1, 1971, to the first day of the month in which payment is made. (2) disburse all of the refunds to the purchaser; and (3) file three copies of a release from the purchaser. In the alternative, a producer may advise the Commission and the purchaser on or before October 31, 1977, that it will exercise the option or options provided in sections 8.2.5 and or 8.2.6 of the UDC settlement proposal approved in Opinion No. 598.

(B) All refunds and reports made pursuant to Ordering Paragraph (A) above shall be coordinated with and reported by the producer under whose rate schedule the sale was made.

(C) On or before November 1, 1977, each purchaser shall submit to the Commission a plan for the flow-through of the funds ordered to be disbursed by the Southern Louisiana producers and producers being retained by the purchaser, applicable to jurisdictional sales, indicating the amount payable to each jurisdictional customer, the basis used to compute the amount payable, the parties involved, and the applicable docket numbers. Copies of the flow-through plans shall be served on each of the purchaser's jurisdictional customers and upon interested state regulatory commissions.

(D) Upon notification by the Secretary, and to the extent directed thereby, purchasers shall proceed with the distribution of refunds to their jurisdictional customers.

(E) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. R177-13 et al.]

MESA OFFSHORE CO., ET AL.

Amended Petition for Special Relief

SEPTEMBER 26, 1977

Take notice that on September 12, and 22, 1977, Mesa Offshore Co. (Mesa), Amarillo, Tex., filed in the captioned docket, an amended petition for special relief pursuant to section 2.56a(g) of the Commission's General Policy and Interpretations (18 CFR § 2.56a(g)). Mesa in its original petition, filed November 22, 1976, noticed March 29, 1977, requested a special relief rate of \$3.07 Mcf for sales of its gas interests from Vermilion 228 and Eugene Island 256, offshore Louisiana to Sea Robin Pipeline Co. (Sea Robin).

In its present petition, Mesa asks an initial rate of \$3.8869 Mcf for the sale of its gas. Mesa states that production experience since the date of its November 1976 filing has necessitated the revision of certain of the cost estimates under its petition.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 14, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-588]

THE WASHINGTON WATER POWER CO.

Proposed Tariff Change

SEPTEMBER 26, 1977

Take notice that the Washington Power Co. of Spokane, Wash. (Water Power), on September 19, 1977, pursuant to section 205 of the Federal Power Act and Part 35 of the Commission's Regulations thereunder, tenders for filing a change in electric rates applicable to service being rendered to its wholesale

customers under electric tariff Schedule 61. Water Power states that the proposed rate change is submitted for the purpose of compensating Water Power for increases in its cost of capital, labor, materials and supplies, and taxes.

Water Power further states that its current wholesale contract rates are deficient by some \$514,000 annually based on sales volumes set forth in the statements accompanying its notice of change in rates. Water Power proposes an effective date of November 18, 1977.

Water Power indicates that copies of the filing have been served upon the five Water Power wholesale customers affected by the filing.

Any person desiring to be heard or to protest said notice should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protest should be filed on or before October 3, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Water Power's proposed tariff and rate filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-548]

SOUTHERN CALIFORNIA EDISON CO.

Order Permitting Late Intervention

SEPTEMBER 27, 1977

On August 10, 1977, Southern California Edison Co. (Edison) tendered for filing a Transmission Service Agreement with Pacific Gas & Electric Co. (PG&E) providing for the transmission by Edison on an interruptible basis of power purchased by PG&E from the Department of Water and Power of the City of Los Angeles. Notice of this filing was issued on August 17, 1977, with responses due on or before August 31, 1977.

On September 1, 1977, the People of the State of California and Public Utilities Commission of the State of California (California) filed a Notice of Intervention in support of the application in the docket herein.

The Commission finds: Since participation by California will not delay the instant proceedings, good cause exists for accepting its late request to intervene as hereinafter ordered and conditioned.

On August 24, 1977, PG&E filed a statement in support of application and conditional petition for leave to intervene.

The Commission orders: (A) California is hereby permitted to intervene in these proceedings subject to the rules and regulations of the Commission: *Provided, however*, That participation of such intervenor shall be limited to the matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further*, That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The late intervention granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious disposition of these proceedings.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER76-543]

SOUTHWESTERN PUBLIC SERVICE CO.

Order Granting Intervention

SEPTEMBER 27, 1977

The New Mexico Electric Service Co. of Hobbs, N. Mex., filed on August 29, 1977, a Petition to Intervene in the above-docketed proceeding now set for formal hearing.

Public notices of the original filing and its amendment in this proceeding were issued on March 8, 1976, and on March 23, 1977, respectively. New Mexico Electric's Petition to Intervene was filed decidedly out of time.

New Mexico Electric supports its Petition by stating that it is a party to the interconnection agreement entered into between Southwestern Public Service and itself. The filing here pertains to firm capacity sales made by Southwestern Public Service to New Mexico Electric, and unit capacity sales from New Mexico back to Southwestern.

Our order of July 25, 1977, in this docket accepted for filing and suspended for one day Southwestern's filing. A formal hearing was ordered with an initial conference to convene before a Presiding Administrative Law Judge on September 13, 1977, for further disposition of the case.

Since New Mexico Electric Service Co. is involved in the proceeding before us and is vitally concerned with its outcome, we believe it to be in the public interest to allow intervention notwithstanding that the Petition to Intervene was filed after the prescribed time.

The Commission finds: The participation by the New Mexico Electric Service

Co. in this proceeding may be in the public interest.

The Commission orders: (A) The New Mexico Electric Service Co. is hereby permitted to intervene in these proceedings subject to the Rules and Regulations of the Commission: *Provided, however*, That participation by New Mexico Electric shall be limited to matters affecting certain rights and interests concerning the interconnection agreement which is involved in this above-docketed proceeding; and *Provided, further*, That the admission of New Mexico Electric shall not be construed as recognition by the Commission that the intervenor might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The late intervention granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious disposition of these proceedings.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-28977 Filed 9-30-77; 8:45 am]

[6740-02]

[Docket No. CP76-138]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Petition To Amend

SEPTEMBER 27, 1977

Take notice that on September 19, 1977, Transcontinental Gas Pipe Line Corp. (Petitioner), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP 76-138, a petition to amend the Commission's order of December 22, 1975 (54 FPC —), as amended February 7, 1977 (57 FPC —) issued in the instant docket pursuant to Section 7(c) of the Natural Gas Act and Section 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79), so as to provide for the transportation of natural gas for Cannon Mills Co. (Cannon) for an extended 2-year period, or through December 31, 1979, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the Commission's order of December 22, 1975, in this proceeding, Petitioner was authorized to transport, on an interruptible basis, for 2 years, up to 1,500 Mcf of natural gas per day at 15.025 psia to Public Service Company of North Carolina, Inc. (Public Service) for the account of Cannon Mills Co. (Cannon) for redelivery by Public Service for use by Cannon in its textile plants located at Kannapolis and Concord, N.C. It is stated that Cannon had arranged to purchase the gas to be transported from Franks Petroleum, Inc. (Franks) which would be produced in the

Midland Field, Acadia Parish, La., and delivered to Petitioner at the tailgate of Continental Oil Co.'s Acadia Gas Processing Plant in Acadia Parish, La. It is indicated that pursuant to the Commission's order of February 7, 1977, in the instant docket, the order of December 22, 1975, was amended by authorizing Petitioner to add deliveries to an additional facility located in Maiden, N.C., which plant is owned by a subsidiary of Cannon, Maiden Knitting Mills, Inc., and is served from the total 1,500 Mcf per day previously authorized. It is stated that Petitioner was authorized to deliver 73 Mcf of natural gas per average day and 135 Mcf of natural gas per peak day to Piedmont Natural Gas Company (Piedmont) for redelivery to Cannon's Maiden facility.

Petitioner states that the transportation service for Cannon has been rendered pursuant to Rate Schedule X-81, on file with the Commission in Petitioner's FPC Gas Tariff, Original Volume No. 2, and that the transportation service is currently rendered at a rate of 29.8 cents per dekatherm. Petitioner also retains 3.8 percent of the volume transported for fuel and line loss, it is said.

Petitioner indicates that present authorization to transport gas for Cannon's account would expire December 31, 1977, and that Cannon's requirements for continuing deliveries of the transportation gas for Priority 2 process uses in its three plants would continue beyond the expiration date of the existing authorization. Petitioner further indicates that Cannon projects reduced level of service from its local supplier, Public Service and Piedmont for its three plants, and that this would result in economic hardships on employees and the communities in which the plants are located if there are layoffs and plant shutdowns because of curtailed gas service.

Cannon has continued assurance of a gas supply for its transportation service from the same supplier, Franks, which has been providing the gas for the presently authorized service, it is said. It is stated that the primary term of Cannon's gas purchase contract extends until December 31, 1977, with an additional year to take make-up gas.

Accordingly, Petitioner requests its authorization to transport gas for Cannon's account to be extended 2 years, or through December 31, 1979. No change in the quantity of transportation gas to be delivered, the end uses of such gas or delivery points is proposed, it is indicated.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before October 11, 1977 file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the

protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing there in must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket Nos. ER76-303 and ER76-304]

WISCONSIN ELECTRIC POWER CO. AND WISCONSIN MICHIGAN POWER CO.

Order Granting in Part and Denying in Part Application for Rehearing and Granting Stay

SEPTEMBER 26, 1977

On July 26, 1977, the Commission issued an Order Denying in Part and Granting in Part Petitions for Rehearing. In our order we affirmed our April 29, 1977 Order on Reconsideration, in this proceeding, which determined that Wisconsin Michigan Power Co. (the Company's) service contracts with the Town of Florence, the City of New London and the City of Shawano (the Cities), all of Wisconsin, permit the Company to file unilateral rate increases, but that such increases may not surpass the rate level of the Company's large user (industrial) retail rate. The July 26 Order did however modify the ordering paragraph directing refunds, and on August 25, 1977, the Company filed an application for rehearing of the modification, together with a motion for stay of its refund obligation pending action thereon.

The rates at issue were filed by Wisconsin Michigan on November 28, 1975 in Docket No. ER76-303 and became effective March 1, 1976. Our April 29, 1977 Order on Reconsideration (April 29 Order) required the Company to refund (with interest) any amounts collected after March 1, 1976, which were above the level of the Company's "most recently approved large industrial retail rate on file with the Public Service Commission of Wisconsin" (mimeo p. 19).

In their application for rehearing of the April 29 Order, the Cities pointed out that the refund order was ambiguous as to which retail rate level was meant: That in effect when the wholesale rates were filed or that in effect as of the April 29 Order. The effective large user retail rate as of April 29, 1977 was one which had been approved by the Wisconsin Commission on August 16, 1976. This superseded the previous rate which had been in effect since November 25, 1975. In our rehearing order of July 26, 1977 (July 26 Order), we stated (mimeo p. 12):

The application in Docket No. ER76-303, filed December 29, 1975, proposed revised rates for service to the Cities of Kaukauna and Menasha, Wis. The proceeding in Docket No. ER76-303 was consolidated with that in Docket No. ER76-303 by Commission order issued March 22, 1976.

As we held in our previous order, state approval of Wisconsin Michigan's industrial retail rate is the triggering event for the filing of a corresponding wholesale rate. We shall therefore amend finding paragraph (2) and ordering paragraph (B) of our Order on Reconsideration, issued April 29, 1977, to direct Wisconsin Michigan to file revised tariff sheets reflecting rates reduced to the level of the Company's industrial retail rate in effect as of November 28, 1975, and to make appropriate refunds (at 9 per cent per annum interest) of any amounts in excess thereof collected after March 1, 1976.

In its current application the Company argues that, assuming the large user retail rate does impose a ceiling on the wholesale rate (a holding which the Company disputes), then, by the terms of the Cities' contracts, whenever an increased large industrial rate goes into effect, the wholesale customers' "automatic acceptance" of the higher industrial retail rate is triggered. The Company accordingly submits that it should be allowed to "apply both the industrial rate and the large industrial rate, as it is modified from time to time, to the Cities' billing determinants and to charge whichever produces the lesser amount" (Application, mimeo p. 5). In other words, Wisconsin Michigan wants the ceiling on its wholesale rates collected from the Cities after August 16, 1976, to be automatically raised to the level established by the industrial retail rate which went into effect on August 16, 1976.

The Company's request ignores entirely the exhaustive discussions underlying our findings in the April 29 and July 26 Orders.³ In these Orders we clearly showed that, regardless of the contract language providing for "automatic acceptance" by the wholesale customers of increased large user retail rates, Wisconsin Michigan is required to file the proposed rates with this Commission for approval of such increase. We shall therefore deny the Company's request

³The contracts for the three Cities vary somewhat but effectuate the same result. Article III, Section 2 of the contract between the Company and New London, signed on June 21, 1949, states: "It is hereby agreed and understood that should there be any revision and or change in said Rate VII approved by the Wisconsin Public Service Commission, at any time during the life of this contract, then the Distributor shall under this contract automatically receive and accept such revised rates." The comparable sections of the contracts with Florence and Shawano are set forth in the Order on Reconsideration, issued April 29, 1977, mimeo page 7.

⁴See mimeo pp. 8-10, 13-15 of our April 29 Order, wherein we stated, *inter alia* (mimeo p. 9): "The Examiner (and ultimately the Commission in Opinion No. 432, 31 FPC 1449) thus concluded that, under the terms of the subject contracts, state approval of the Company's large retail user rate is the triggering event for the filing of a corresponding wholesale rate. But although such wholesale filing obtains the automatic contractual acceptance of the customer, the filed wholesale rate must be found to be just and reasonable by the Federal Power Commission." See also mimeo pp. 2-5 of our July 26 Order.

for an automatic adjustment of its wholesale rates to track changes in its large user retail trade.

Wisconsin Michigan objects to the refund provision of our July 26 order whereby a retail rate level which was superseded as of August 16, 1976, was imposed as the ceiling on the Company's wholesale rates collected not only between March 1 and August 16, 1976, but also after August 16, 1976. The Company points out that the Cities did not correctly press their contract rights until some seven months after the rates in Docket No. ER76-303 had been filed. The Commission ruling on the Cities' claims was moreover not forthcoming until April 1977. The Company argues that it could not know that it was foregoing just and reasonable wholesale revenues by failing to file a wholesale rate increase triggered by the Wisconsin Commission's subsequent retail rate order. Wisconsin Michigan believes the Commission should consider these facts in fashioning an equitable refund order and should not permit the Cities to reap greater refunds through tardy prosecution of their case.

We are persuaded that the Company's argument on rehearing has merit. Although it is true that all future wholesale rate increases must be preceded by a State-approved retail industrial rate as well as by a filing with this Commission, we believe it equitable to waive the latter requirement in this single instance. In view of the Cities' tardy prosecution of their contract rights, we shall not require Wisconsin Michigan to have made a second wholesale filing to track the August 16, 1976, increase in the industrial rate, which increase the filing in Docket No. ER76303 already covers.⁴ An order granting refunds to bring the rate down to the effective parity rate will give the Cities all they bargained for under the contract.

For the above reasons, we shall grant that part of Wisconsin Michigan's application for rehearing of our July 26 Order which requests modification of the refund order. We shall amend the order to require the Company to refund that portion of its rates collected from New London and Shawano in Docket No. ER76-303 between March 1, 1976 and August 18, 1976, which is above the level of the Company's approved large user retail rate in effect on November 28, 1975, together with that portion of its rates collected after August 18, 1976, which is above the level of the Company's approved large user retail rate in effect as of August 16, 1976. We shall also grant the Company's motion for a stay of its refiling and refund obligation, but the

⁴On May 25, 1977, we issued an order approving the settlement of Docket Nos. ER76-303 and ER76-399. The agreement did not resolve the contract interpretation issues, but rather reserved them for decision by the Commission and the courts. The settlement rates for New London and Shawano are above the rate levels, both before and after August 16, 1976, ordered herein.

period for refiling and making refunds will only be extended until 30 days from the date of issuance of this order.

The Commission finds: (1) Good cause exists to deny that part of Wisconsin Michigan Power Co.'s application for rehearing, filed August 25, 1977, which requests the ceiling on wholesale rates to track changes in the effective large industrial retail rate without filing the change with this Commission.

(2) Good cause exists to grant that part of Wisconsin Michigan Power Co.'s application for rehearing, filed August 25, 1977, which requests modification of the refund provision in our Order issued July 26, 1977, in this proceeding. Finding Paragraph (3) of the Order issued July 26, 1977, should be amended to read:

(3) It is proper and appropriate in the public interest that Wisconsin Michigan Power Co. be directed to: (1) eliminate from the rates which were collected from March 1, 1976 to August 18, 1976, in Docket No. ER76-303, with respect to the Cities of New London and Shawano, that portion which is above the level of Wisconsin Michigan's approved industrial retail rate on file with the Public Service Commission of Wisconsin which was in effect on November 28, 1975; and to (2) eliminate from the rates which were collected after August 18, 1976, in Docket No. ER76-303, with respect to the Cities of New London and Shawano, that portion which is above the level of Wisconsin Michigan's approved industrial retail rate on file with the Public Service Commission of Wisconsin which was in effect as of August 16, 1976.

(3) Good cause exists to grant Wisconsin Michigan Power Co.'s motion for stay pending action on its application for rehearing, but only for 30 days beyond the issuance of this order.

The Commission orders: (A) That part of Wisconsin Michigan Power Co.'s application for rehearing which is described in Finding Paragraph (1), supra, is hereby denied.

(B) That part of Wisconsin Michigan Power Co.'s application for rehearing which requests modification of the refund provision is hereby granted, and Finding Paragraph (3) of the Order issued July 26, 1977, in this proceeding is hereby amended as set forth in Finding Paragraph (2), supra.

(C) Within 30 days of the date of issuance of this order, Wisconsin Michigan Power Co. shall file revised tariff sheets reflecting reduced rates to the Cities of New London and Shawano consistent with our findings herein and shall make appropriate refunds at 9 percent per annum interest of: (1) any amounts collected from March 1, 1976, to August 18, 1976, which are above the level of Wisconsin Michigan's approved industrial retail rate on file with the Public Service Commission of Wisconsin which was in effect on November 28, 1975; and (2) any amounts collected after August 18, 1976, which are above the level of Wisconsin Michigan's approved industrial retail rate on file with the Public Service Commission of Wisconsin which was in effect as of August 16, 1976.

(D) Wisconsin Michigan Power Co. shall file a report with this Commission

attesting to its compliance with the refund obligations imposed in Ordering Paragraph (C), supra, within 15 days of such compliance. A copy of such report shall also be furnished to each state commission within whose jurisdiction the wholesale customer distributes and sells electric energy at retail.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

304 CORPORATION

Request for Determination and Notice Providing Opportunity for Hearing

Notice is hereby given that a request has been made to the Board of Governors of the Federal Reserve System, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)) ("the Act"), by 304 Corp., Omaha, Nebr. ("304"), which has transferred 100 per cent of the outstanding voting shares of Industrial Loan & Investment Co., Omaha, Nebr., to Industrial Loan Co., Omaha, Nebr. ("Industrial"), for a determination that 304 is not nor will be in fact capable of controlling Industrial or its president, Frank C. Mayo, notwithstanding the fact that both Industrial and Mr. Mayo are indebted to 304, which indebtedness resulted from the financing of the purchase of said shares.

Section 2(g)(3) of the Act provides that shares transferred after January 1, 1966, by any bank holding company (or any company which but for such transfer, would be a bank holding company) directly or indirectly to any transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, shall be deemed to be indirectly owned or controlled by the transferor, unless the Board, after opportunity for hearing, determines that the transferor is not, in fact, capable of controlling the transferee.

Notice is hereby given, that, pursuant to section 2(g)(3) of the Act, an opportunity is provided for filing a request for oral hearing. Any such request or written comments on the application should be submitted in writing (in duplicate) to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than October 17, 1977. If a request for oral hearing is filed, each request should contain a statement of the nature of the requesting person's interest in the matter, his reasons for wishing to appear at an oral hearing, and a summary of the matters concerning which such person wishes to give testimony. The Board subsequently will designate a time and place

for any hearing it orders, and will give notice of such hearing to the transferor, the transferee, and all persons that have requested an oral hearing. In the absence of a request for an oral hearing, the Board will consider the requested determination on the basis of documentary evidence filed in connection with the application.

Board of Governors of the Federal Reserve System, September 29, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

COST OF TRAVEL AND OPERATION OF PRIVATELY OWNED VEHICLES

Report; Correction

In FR Doc. 77-26942 appearing at page 46087 in the issue of Wednesday, September 14, 1977, the first sentence of paragraph 1 under the heading Addendum to the Report on the Cost of Travel and the Operation of Privately Owned Vehicles is corrected in the third line of that paragraph by replacing the word "beginning" with the word "performed." The revised sentence reads as follows:

The changes to mileage and travel allowances reflected in the preceding report are effective for travel performed on or after September 18, 1977.

Dated: September 28, 1977.

JOEL W. SOLOMON,
Administrator of General Services.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration

SCHEDULE OF LIMITS UNDER THE HEALTH INSURANCE PROGRAM FOR COST-REPORTING PERIODS BEGIN- NING ON OR AFTER OCTOBER 1, 1977

On August 12, 1977, the Department published in the FEDERAL REGISTER (42 FR 40948) a Notice of Proposed Schedule of Limits on Hospital Inpatient General Routine Service Costs for Hospitals with Cost Reporting Periods Beginning on or After October 1, 1977. Section 1861(v)(1) of the Social Security Act, as amended, 42 U.S.C. 1395x(v)(1) authorizes the Secretary of Health, Education, and Welfare to set prospective limits on costs recognized as reasonable and applied to direct or indirect overall incurred costs of specific items or services or groups of items or services furnished by a provider. Such limits are based on estimates of the costs necessary in the efficient delivery of needed health services. This Schedule of Limits, initially proposed by publication in the FEDERAL REGISTER on August 12, 1977 (42 FR 40948), provides a new Schedule of

Limits on Hospital Inpatient General Routine Service Costs to succeed the Schedule in effect for cost reporting periods beginning on or after July 1, 1977, as published in the FEDERAL REGISTER of July 8, 1977 (42 FR 35496) and is applicable to cost reporting periods beginning on or after October 1, 1977, until such Schedule is revised.

The Schedule applies to the total of the cost of hospital inpatient general routine service costs. These limits do not apply to the cost of special care or ancillary services.

The Secretary of Health, Education, and Welfare is strongly committed to a national policy of containing the rapidly escalating health care costs. Therefore, the Secretary hereby serves notice of his intention to review these limits from time to time and make such changes in the limits as circumstances may warrant to assure that costs which are reimbursed are reasonable. Any such changes will be prospective in nature and will apply to all hospital inpatient general routine service costs incurred after the effective date of the changes. In addition, the limits contained in this schedule will be revised to conform with any Federal cost containment legislation enacted subsequent to the effective date of this schedule.

The initial classification system, which is described in the FEDERAL REGISTER of FR 20168) published June 6, 1974, was developed to provide for comparison of hospitals of similar size and in similar economic environments. Several refinements of the initial classification system were made effective July 1, 1975, and are described in the FEDERAL REGISTER of FR 23622) published May 30, 1975.

An additional refinement was made to the revised schedule of limits effective July 1, 1976. The refinement was the result of changes in the size of units of economic environment, and is described in the FEDERAL REGISTER (41 FR 26992) published June 30, 1976.

A refinement was made in the revised schedule of limits published in the FEDERAL REGISTER (42 FR 35496) on July 1, 1977. This limited refinement arose from the definition of metropolitan environments in the New England area. Under the Office of Management and Budget (OMB) definition, which has been used to distinguish between metropolitan and nonmetropolitan areas, Standard Metropolitan Statistical Areas (SMSA's) and Standard Consolidated Statistical Areas (SCSA's) in New England are based on cities and towns rather than on counties as is the case in the rest of the United States. Because towns and cities are used to delineate SMSA's and SCSA's in New England, a county may be part of more than one SMSA or only a part of a county may be in an SMSA. However, income data supplied by the Department of Commerce, Bureau of Economic Analysis (BEA), which are used to group various areas according to economic environment, are available only on a county basis. In order to use the available data, BEA has slightly changed SMSA defini-

tions in New England so that the SMSA's follow county lines.

Therefore, a hospital located in the part of the county not included by OMB in the SMSA/SCSA would be subject to a nonmetropolitan limit even though the per capita income of the hospital's location had been used for SMSA/SCSA classification grouping purposes. This situation is limited to New England and is inconsistent with the classification grouping for the rest of the United States where the OMB and BEA definitions of SMSA's consistently follow county lines.

In order to rectify this inconsistency, there is a change in the description of metropolitan environment used in the classification system. The change would alter the requirements for metropolitan status and would deem an entire county to be within an SMSA/SCSA if any part of such county was included by OMB in the SMSA/SCSA. Where a county contains the major city of an SMSA and is considered by OMB to be part of two or more SMSA's, the entire county would be deemed to be part of the SMSA whose major city it encompasses. Where a county is considered by OMB to be part of two or more SMSA's and does not contain the major city of any SMSA, the county would be included in the SMSA having the highest per capita income. An SMSA's major city is defined as the city from which the SMSA takes its name. Where the application of this provision results in a provider being placed in a group with a limit lower than the limit to which it would have been subject without the change, the higher limit may be applied in the cost reporting period to which this schedule applies.

An additional refinement made in the revised schedule of limits effective July 1, 1977, for nonmetropolitan areas is incorporated in the revised schedule set forth below.

In nonmetropolitan areas, which are frequently single industry areas, per capita income levels are extremely sensitive to changes in economic conditions from one year to the next. This is especially true where the primary source of income is from agriculture. In these cases, hospital costs usually reflect the trend of the area's economy rather than year to year fluctuations. In order to provide more equitable treatment to nonmetropolitan areas, a change has been made that would base the classification of State nonmetropolitan areas on a 5-year per capita average income instead of a one year base period. In these areas the longer base would be more reflective of the economic environment than a single year's income.

The same change was considered for the metropolitan (SMSA/SCSA) areas. However, these areas do not exhibit the same volatility of per capita income from one year to the next as do the non-SMSA areas. This may be attributed to diversity in economic activity in the SMSA areas plus the additional benefits, such as supplemental unemployment compensation, which are available to the mostly union-

ized workers in these areas. Therefore no change was made in the classification system for SMSA/SCSA areas.

The revised Schedule of Limits retains the provision to protect metropolitan area providers for the period in which this schedule is in effect from the effects of lower limits that might result from circumstances that result in a lower per capita income for the provider's area. Thus if a metropolitan area's per capita income in a year or a change in SMSA/SCSA designation during the year, places the area in a group lower than in the previous year, the limit to be applied for that year will be the higher of the current period group or the immediately preceding year group. This provision will lessen the effect of unusual short-term fluctuations in area per capita income on reimbursement to individual providers.

For the period in which this schedule is in effect the same provision will be applied to nonmetropolitan providers which have been placed in a lower group as a result of the new classification methodology. SMSA and non-SMSA areas that are affected by this provision are indicated in the list of groups by a footnote after the area name.

Example. Hospital A, Bed size: 150. Per capita income in the providers' SMSA during the period on which the classification is based was reduced because of the effects of a natural disaster. Provider A had been classified in Group II effective October 1, 1976, and is now classified in Group III beginning October 1, 1977. The limit to be applied to Provider A beginning October 1, 1977, is the higher of the Group II limit or the Group III limit.

Interested parties were given 30 days from the date of publication of the proposed schedule of limits within which to submit data, views, and arguments. Comments and suggestions received with regard to that notice of proposed Schedule of Limits, responses thereto, and changes made in the proposed schedule of limits are summarized below.

5-YEAR PER CAPITA INCOME AVERAGING

1. Some comments questioned the use of a 5-year per capita average income for nonmetropolitan areas only. In nonmetropolitan areas, which are frequently single industry areas, per capita income levels are extremely sensitive to changes in economic conditions from 1 year to the next. This is especially true where the primary source of income is from agriculture. In these cases, hospital costs usually reflect the trend of the area's economy rather than year to year fluctuations. Therefore, in order to provide a more equitable treatment to nonmetropolitan areas, the classification of State nonmetropolitan areas is based on a 5-year per capita average income instead of a 1 year base period. The same concept was considered for metropolitan areas. However, SMSA per capita income does not exhibit the same relative fluctuations as non-SMSA income. Therefore, it was not necessary to make the same changes for metropolitan areas.

COUNTY BASIS FOR CLASSIFYING NEW ENGLAND AREA HOSPITALS

2. Several comments centered upon the use of counties rather than SMSA/SCSAs in the New England area and why the provision was not made retroactive. Careful consideration was given to the impact of such a provision prior to its inclusion in the proposed schedule. Because the SMSA/SCSA definition did not match each hospital's location in the New England area with the income data used to classify areas, the county basis was chosen for classifying hospitals in the New England area as county location coincides with income data. We carefully considered the possibility of retroactive application of this refinement and have determined that such retroactive application would be inappropriate since some providers could be adversely affected by this change.

SOURCE OF PER CAPITA INCOME DATA

3. In response to comments concerning the source of per capita income data, used to group SMSA/SCSAs and Non-SMSA, SCSAs, the data utilized are from Local Area Personal Income 1969-1974, June 1976, Volume 1, Summary, Published by the United States Department of Commerce, Bureau of Economic Analysis.

SOURCE OF SMSA/SCSA AREAS

4. Inquiry was made about the source of the definitions of Standard Metropolitan Statistical Areas and Standard Consolidated Statistical Areas. Except as modified by this notice for the New England area, the SMSA/SCSA titles conform to the definitions used by the Office of Management and Budget in its publication Standard Metropolitan Statistical Areas 1975, revised edition.

DUPLICATIVE COMMENTS

5. A number of comments which were received duplicated comments made prior to publication of the previous sets of limits. A discussion of these items can be found in the FEDERAL REGISTER (41 FR 26992) published June 30, 1976, the FEDERAL REGISTER (40 FR 23622) published May 30, 1975, and the FEDERAL REGISTER (39 FR 20168) published June 6, 1974.

6. Various editorial changes have been made in the interest of clarity. All SMSA's and SCSA's have been divided into the following five groups based on per capita income. Counties, rather than SMSA/SCSA areas, are listed for New England States.

SMSA/SCSA GROUP I

ALASKA
Anchorage.

CALIFORNIA
Los Angeles-Long Beach-Anaheim (SCSA).
Los Angeles-Long Beach, Anaheim-Santa Ana-Garden Grove, Oxnard-Simi Valley-Ventura, Riverside-San Bernardino-Ontario, Salinas-Seaside-Monterey.

¹Hospitals in areas (SCSA or SMSA) identified by a figure one will receive the higher of the limit published herein for the group in which the hospital is actually classified or the limit published herein for the group in which the hospital was classified in the immediately preceding cost reporting period.

GROUP III		GROUP IV	
Colorado	New York	North Carolina	
Florida	Ohio	Oklahoma ²	
Idaho	Oregon	Texas	
Michigan	Pennsylvania		
Minnesota ¹	South Dakota ¹		
Montana	Vermont		
New Hampshire	Wisconsin		
GROUP V		GROUP VI	
Alabama	Puerto Rico		
Arkansas ¹	South Carolina		
Georgia	Tennessee		
Kentucky	Utah		
Louisiana	Virginia ²		
Mississippi	Virgin Islands		
New Mexico	West Virginia		

With respect to the Standard Consolidated Statistical Area/Standard Metropolitan Statistical Area groupings, the groupings were developed by combining those SCSA/SMSA's which reflect a similar economic environment as expressed by per capita income data. The SCSA/SMSA's were arrayed in order of the size of their per capita income and groupings were established. The same procedure was followed for grouping the non-SCSA/SMSA areas to arrive at State groups.

The following bed-size categories are used to classify hospitals:

STANDARD METROPOLITAN STATISTICAL AREAS	
GROUPS I AND II	
Less than 100.	
100-404.	
405-684.	
685 and above.	
GROUPS III, IV, AND V	
Less than 100.	
100-404.	
405 and above.	
NON-STANDARD METROPOLITAN STATISTICAL AREAS	
Less than 100.	
100-169.	
170 and above.	

The limits were developed in the following manner:

1. Inpatient general routine service cost data for each participating hospital were obtained from the fiscal intermediaries.
2. The data for hospitals in each class were arrayed in descending order of inpatient general routine service cost.
3. The 80th percentile and the median were computed for each class.
4. For each class, an amount equal to 10 percent of the median was added to the 80th percentile amount.
5. This sum was adjusted to reflect the 14 percent annual rate of estimated cost increases in per diem routine service costs following the date of data collection.
6. The amounts calculated in step 5 are rounded to the next highest dollar.

²Hospitals in States identified by a figure two will receive the higher of the limit published herein for the group in which the hospital is actually classified or the limit published herein for the group in which the hospital was classified in the immediately preceding cost reporting period.

NOTICES

which establishes the limit for each class, subject to adjustment for hospitals reporting on other than a reporting period beginning July 1, 1977.

Under the authority of section 1861(v) of the Social Security Act, the following cost limitations apply to the total of the hospital inpatient general routine service costs (excluding costs incurred for special care units and ancillary services), adjusted upward as provided for below. The limits are applicable to cost reporting periods beginning on or after October 1, 1977, and will remain in effect until the effective date of a revised schedule.

The limits are applicable to any hospital with a cost reporting period beginning on or after October 1, 1977. Where a hospital has a cost reporting period beginning after July 1, 1977, the published limit will be adjusted upward by a factor of 1.17 percent for each elapsed month between July 1, 1977, and the month in which the hospital's reporting period begins. The result of this calculation is not rounded and is to be given in dollars and cents.

Example.—Hospital A's cost reporting period starting in 1977 begins October 1, 1977, and ends September 30, 1978. The cost factor for Hospital A's group from the table below is \$100.

COMPUTATION OF ADJUSTED COST LIMIT	
Cost factor	100
Plus: Adjustment for 3-month period (July 1, 1977, to Sept. 30, 1977), 3 months × 1.17 pct.	3.51 pct; 3.52 pct. X cost factor
Adjusted cost limit applicable to Hospital A for the Oct. 1, 1977, to Sept. 30, 1978, reporting period	\$103.52

SCHEDULE OF LIMITS ON HOSPITAL INPATIENT GENERAL ROUTINE SERVICE COSTS FOR HOSPITALS WITH COST-REPORTING PERIODS BEGINNING ON OR AFTER JULY 1, 1977 (A)

(A) The schedule of limits and adjustment factor are only for a 12-month cost reporting period. For providers with other than 12-month cost reporting periods, intermediaries must contact the Health Care Financing Administration for adjustment factor.

Hospitals located within SMSA's (nonmetropolitan) bed size					
SMSA group	Less than 100	100 to 169	170 to 404	405 to 684	685 and above
I	\$129	\$141	\$160	\$211	
II	131	143	162	213	
III	133	145	164	215	
IV	135	147	166	217	
V	137	149	168	219	

¹Limits apply to all SMSA's except Anchorage, Alaska, and Honolulu, Hawaii, where cost-of-living adjustment (25 pct. Anchorage, Alaska; 17.5 pct. Honolulu, Hawaii) was made. The limits for these areas are as follows:

	Less than 100	100 to 404	405 to 684	685 and above
Anchorage.....	\$174	\$180	\$200	\$264
Honolulu.....	164	170	188	248

Hospitals located within SMSA's (nonmetropolitan) bed size

SMSA group	Less than 100	100 to 169	170 to 404	405 to 684	685 and above
I	\$129	\$141	\$160	\$211	
II	131	143	162	213	
III	133	145	164	215	
IV	135	147	166	217	
V	137	149	168	219	

FOR FURTHER INFORMATION, CONTACT:

SECURITIES AND EXCHANGE COMMISSION

Release No. 20187; 70-4537]

Public Utility Holding Company Act of 1935
NORTHEAST UTILITIES, ET AL.

Post-Effective Amendment Requesting Extension of Time for the Issuance and Sale of Notes to Holding Company

SEPTEMBER 23, 1977.

Notice is hereby given that Northeast Utilities ("Northeast"), a registered

holding company, the Rocky River Realty Co. ("Rocky River"), its nonutility subsidiary, and the Connecticut Light & Power Co., an electric utility subsidiary company of Northeast, have filed with this Commission a fourth post-effective amendment to the application-declaration in this proceeding pursuant to sections 6(a), 7, 9(a), and 10 of the Public Utility Holding Company Act of 1935 ("Act") regarding the following proposed transaction: All interested persons are referred to said post-effective amendment, which is summarized below in a complete statement of the proposed transactions.

By order in the pre-reading dated October 24, 1967, 44 FR 15,001, the Rocky River was authorized to engage in the business of acquiring, maintaining, and disposing of real property in connection with the utility operations of the Northeast holding-company system. Said order of October 24, 1967, as amended by supplemental orders of the Commission dated December 21, 1970, and October 27, 1972, HCAR Nos. 16941 and 17740, also authorized Rocky River to issue and sell to Northeast until October 24, 1977, and Northeast was authorized to acquire up to \$10,000,000 aggregate principal amount of Rocky River's long-term unsecured notes ("Notes") to finance such real estate activities. It was provided that, since Rocky River's capital requirements vary from time to time, Rocky River could in its discretion pay out of capital Notes theretofore issued and thereafter issue and sell to Northeast, and Northeast could acquire, additional Notes in adjusting the amount of Notes outstanding to Rocky River's capital requirements.

By post-effective amendment, it is now proposed that the authorization regarding said Notes be extended for a five-year period expiring October 24, 1982.

The fees and expenses to be incurred in connection with the proposed extension are estimated to be \$2,500. It is stated that no State or Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than October 20, 1977, request in writing that a hearing be held with respect to the post-effective amendment to the application-declaration, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said post-effective amendment which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as now amended or as it may be further

amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary

DEPARTMENT OF THE INTERIOR
Bureau of Land Management
Bureau Order No. 701, Amdt. No. 26
LAND AND RESOURCES
Redelegation of Authority

Bureau Order No. 701 dated July 23, 1964, is further amended as follows:

PART I—REDELEGATIONS OF AUTHORITY TO
STATE DIRECTORS

1. Section 1.7(f) is amended to read:
Section 1.7 Range Management.

(f) Protection of wild free-roaming horses and burros.

Take all actions under the Act of December 15, 1971 (65 Stat. 649; 16 U.S.C. 1331-1340) as amended by the Federal Land Policy and Management Act of 1976 except (1) the designation and maintenance of specific ranges on public lands as provided in section 3(a), and (2) the arrest provisions in section 8(b).

2. A new subparagraph (8) is added to section 1.9(t) as follows:

Section 1.9 Land Use.

(8) Matters pertaining to Alaska

(8) National Petroleum Reserve in Alaska. Take all actions under the Naval Petroleum Reserve Protection Act of 1976 (90 Stat. 303; 43 U.S.C. 6501) involving surface management of the National Petroleum Reserve in Alaska, including the protection of surface values from environmental degradation, except (1) submission of plans to the Committees on Interior and Insular Affairs of the Senate and House of Representatives or annual reports required by section 104(d) of the Act, (2) establishment of a task force or the submission of a report pursuant to section 105(c) of the Act, and (3) enforcement of regulations and stipulations which relate to the exploration of petroleum resources.

GEORGE L. TURCOTT,
Acting Director.

Fish and Wildlife Service
THREATENED SPECIES PERMIT
Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under Section 4(d), 16 U.S.C. 1533(d), of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant: Arlan R. Vaughn, 375 Midnight, Pueblo, Colo. 81005

 DEPARTMENT OF THE INTERIOR U.S. FISH AND WILDLIFE SERVICE FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION		DVB NO. 42-1615 <input type="checkbox"/> IMPORT OR EXPORT LICENSE <input checked="" type="checkbox"/> PERMIT	
3. APPLICANT (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested) Arlan R. Vaughn 375 Midnight Pueblo, Colorado 81005 303-561-1569		2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED To ship and receive CSSP pheasants in interstate commerce in the course of a commercial activity for propagation purposes to enhance the survival of these species.	
4. IF APPLICANT IS AN INDIVIDUAL, COMPLETE THE FOLLOWING: NAME: [X] MR. [] MRS. [] MISS [] MS. [] DATE OF BIRTH: 7-1-38 COLOR HAIR: Blond COLOR EYES: Brown PHONE NUMBER WHERE EMPLOYED: 544-5147 SOCIAL SECURITY NUMBER: 521-48-7703 OCCUPATION: Railroad Trainman		5. IF APPLICANT IS A BUSINESS CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING: NAME: [] TYPE OF BUSINESS, AGENCY, OR INSTITUTION: [] NOT APPLICABLE	
6. LOCATION WHERE ACTIVITY WILL BE CONDUCTED Interstate shipments to and from 375 Midnight, Pueblo, Colorado 81005		7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? YES [] NO [X]	
8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? YES [] NO [X]		9. CERTIFIED CHECK OR MONEY ORDER (If applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF \$ []	
10. DESIRED EFFECTIVE DATE: 10-1-77		11. DURATION NEEDED: 2 years	
12. ATTACHMENTS: THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 12.12) MUST BE ATTACHED. IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST ATTACHMENTS OF 50 OR MORE ATTACHMENTS ARE PROVIDED: 50 CFR 17.53			
CERTIFICATION I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001. SIGNATURE (In ink): [Signature] DATE: 9-24-77			

1. Pheasant: Brown-eared, *Crossoptilon* has a thermostat controlled wall heater. The perimeter is fenced with a 6' high solid wood fence buried at least 1' for greater protection. See enclosed pictures of pens and shelters.
2. All pens are at least 8' x 24' long and 7' high. All have shelters at least 8' x 8' constructed of galvanized iron and bottoms of runs also with galvanized iron buried 8 to 9 inches. Wire is 1" poultry netting. Each pen is equipped with good perches, hanging self-feeders and water dishes. Tropical species are housed in pens of the same above dimensions and have an insulated shelter with two windows and a door of which each shelter.

3. Arlan R. Vaughn and Loretta J. Vaughn have both successfully propagated and raised over 25 species of pheasants in the past 9 years, including all of the CSSP species listed under attachment No. 1.
4. I am willing to participate in a co-operative breeding program and maintain or contribute data on a stud book.
5. Boxes are constructed of light weight panelling approximately 5' wide by 15" high by 20" long. Each box top is padded with foam rubber and contains a bed of alfalfa leaves with grain, fruit and lettuce leaves. Tied into place in a corner is a can which contains water. Each box has sufficient air holes on all sides. Each box is constructed

for each bird so size can vary depending on the size of the bird to be shipped.

6. No Mortalities in the last 5 years.

7. This applicant should be justified because: (1) To help Establish & Preserve these species in Captivity, and in Their Pure Forms. For proper propagation methods new birds are needed from time to time so as not to become inbred.

(1) Excess stock will be sold to other established breeders and zoos that meet the requirements for their propagation. Termination of this activity is not planned at any time but birds to be disposed of would go only to established breeders of zoos for propagation thereof.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street, NW., Washington, D.C.

ATTACHMENTS FOR QUESTION 12 ON
FORM 3-200

1. Species—Brown Eared *Crossoptilon* Mantchuricum, Elliotts *Symmeticus ellioti*, Humes Bar tailed *Symmeticus humi*, mid-humiae, Mikado *Symmeticus mikado*, Swinhoe *Lophura swinhoe*.

Be able to sell or buy the above breeds within the United States.

2. Pens consist of welded wire 16 ft. wide 10 ft. long 6 ft. high with plenty of shade trees.

3. I have raised pheasants for the past 12 years and do most of the caring myself, but when leave for certain reasons a college graduate cares for them.
4. I as applicant will keep and maintain a breeding program and stud book.
5. Transportation and temporary storage are boxes made from orange crates (wood) 308 in. long, 12 in. high, two plastic cups put in crates when birds are shipped one in each corner for water feed.
6. Mortalities are very low, in past five years, two birds, Brown eared pheasant with hardware disease and Elliott died when flew into fence and broke neck. Use best medicine on the market for prevention.

7. (1) The activities sought by the applicant is to enhance the survival of the endangered or threatened species and that these species always are available.
(2) Disposition, at present have no plans for disposing, but upon demand would dispose birds to other breeders with permit, so that their survival will be continued

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-1093-25; please refer to this number when submitting comments. All relevant comments received on or before November 2, 1977 will be considered.

Dated: September 27, 1977.

LARRY LA ROCHELLE,

[4310-70]
National Park Service
CLARIFICATION OF APPEALS
PROCEDURES
In a recent rulemaking notice (42 FR 30501, June 15, 1977), the National Park

Service briefly discussed appeal procedures for administrative decisions made by its officials. This rulemaking dealt with permit requirements for the sale or distribution of printed matter in park areas. One commenter had, in response to the proposed regulation, requested that an appeals procedure be included in the regulation. In response to this comment, the National Park Service stated that appeals from all administrative decisions of park Superintendents could be made to the Regional Director, the Director, and the Secretary of the Interior, successively.

Upon a review of this discussion, the National Park Service has determined that the information which was given is misleading and partially incorrect. It is the purpose of this notice, therefore, to clarify the general appeals procedures of the National Park Service.

The discussion mentioned above confused complaint procedures, wherein a person or other entity who is concerned with a governmental action will normally contact successively higher levels of an agency, with formal appeals procedures established to deal with specific processes. Except for those matters in which a right of appeal is stated in a regulation or law, there is no general right of appeal from decisions which a National Park Service official has been granted discretionary authority to make. This position is compatible with Department of the Interior regulations on appeals procedures, which specifically exempt from Departmental appeal those situations when:

"... the action of the Departmental official was based solely upon administrative or discretionary authority of such official." (43 CFR § 4.700).

Notwithstanding this limitation on formal appeals, decisions made by park Superintendents may be reviewed by appropriate Regional Directors, just as the Director may review the decisions of Regional Directors. Such reviews are discretionary with the reviewing officials and are not mandatory. Any decision made by the Director is final and may not be appealed, except as specifically provided by law or regulation.

IRA J. HUTCHISON,
Deputy Director,
National Park Service.

Office of the Secretary TRANS-ALASKA PIPELINE LIABILITY FUND

Notification of Oil Discharge Incidents

1. Purpose. To provide instructions for the reporting of oil discharge incidents by persons in charge of vessels engaged in transporting Trans-Alaska Pipeline Oil.

2. Information. The Secretary of the Interior is responsible for certain func-

tions related to the Trans-Alaska Pipeline Liability Fund, established by Congress under the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1653 (c)). The purpose of the Fund is to provide compensation for certain damages resulting from oil spills from vessels transporting Trans-Alaska Pipeline Oil from the Pipeline Terminal, Valdez, Alaska, to ports of United States jurisdiction.

Section 29.8(a) of the Trans-Alaska Pipeline Liability Fund Regulation (42 FR 31792) requires the person in charge of a vessel transporting Trans-Alaska Pipeline Oil to immediately notify the Fund if an oil discharge incident occurs between the Terminal in Valdez, Alaska and a termination port of United States jurisdiction.

3. Notification Instructions. Notification of an oil discharge incident, under the provisions of § 29.8(a) of the Trans-Alaska Pipeline Liability Fund Regulation, shall be reported to the Fund through the Duty Desk, National Response Center, U.S. Coast Guard, by calling (800-426-8802). The Duty Desk is continuously manned 24 hours a day. The person notifying the Duty Desk at the National Response Center, U.S. Coast Guard, pursuant to this notice, should indicate that the oil discharge incident involves a vessel carrying oil which has been transported through the Trans-Alaska Pipeline System.

Signed at Washington, D.C., this 23rd day of September, 1977.

LARRY E. MEIEROTTO,
Deputy Assistant Secretary of
the Interior and Secretary to
the Board of Trustees.

SEPTEMBER 23, 1977.

[Order No. 3010]

ESTABLISHMENT OF ASSISTANT SECRETARY—INDIAN AFFAIRS

SEPTEMBER 26, 1977.

Sec. 1 Purpose. This order provides for the establishment of the position of Assistant Secretary—Indian Affairs in the Secretariat of the Department of the Interior. This action is being taken in accordance with the authority provided by 43 U.S.C. 1453 and 1454, and Section 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262).

Sec. 2 Establishment of Position. An Assistant Secretary—Indian Affairs is hereby established to administer the laws, functions, responsibilities, and authorities related in Indian affairs matters. In addition to serving as an Assistant Secretary of the Department, the Assistant Secretary—Indian Affairs will assume all the authorities and responsibilities of the Commissioner of Indian Affairs pending subsequent organization and position realignments.

Sec. 3 Authority. (a) The Assistant Secretary—Indian Affairs will have the authority of Assistant Secretaries of the Interior as described in 210 DM 1.2.

(b) The Assistant Secretary—Indian Affairs may redelegate the authority delegated in 210 DM 1.2A, except where prohibited by statute, Executive Order, or limitations established by other competent authority. Such delegations will be restricted to authorities currently published in Parts 205 and 230 of the Departmental Manual and to any authorities which were delegated to the Commissioner of Indian Affairs or the Bureau of Indian Affairs prior to the effective date of Reorganization Plan 3 of 1950 and which are not now specifically delegated to some other official.

(c) All authority delegated to the Commissioner of Indian Affairs is hereby revoked. Redelegations of authority within the Bureau of Indian Affairs which are based on 205 DM, 230 DM, and any authorities that were delegated to the Commissioner of Indian Affairs or the Bureau of Indian Affairs prior to the effective date of Reorganization Plan No. 3 of 1950, are hereby temporarily reinstated pending a general review of the activities of the bureau. Such reinstated authority will be subject to amendment and/or revocation by the Assistant Secretary—Indian Affairs.

Sec. 4 Effective Date. This order will become effective on the day the Assistant Secretary—Indian Affairs assumes office. It will remain in effect until its provisions are incorporated in the Departmental Manual, or until it is superseded or revoked. In the absence of the foregoing actions, this order will be considered obsolete one year after date of signature.

Dated: September 26, 1977.

CECIL D. ANDRUS,
Secretary of the Interior.

[4410-01]

DEPARTMENT OF JUSTICE

Drug Enforcement Administration CONTROLLED SUBSTANCES IN SCHEDULE II

Proposed 1977 Revised Aggregate Production Quota—Mixed Alkaloids of Opium

Section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration pursuant to § 0.100 of Title 28 of the Code of Federal Regulations.

On June 27, 1977, a notice of the final revised aggregate production quota for Mixed Alkaloids of Opium was published in the FEDERAL REGISTER (42 FR 32590-32591). Since the finalization of this quota, DEA has been made aware of increased export demands placed on the domestic manufacturer of dosage forms containing this substance.

One of the factors which the Administrator of the Drug Enforcement Ad-

ministration is required to consider, pursuant to § 1303.11 of Title 21 Code of Federal Regulations, when establishing quotas, is export requirements. Considering this factor as well as the other factors listed in § 1303.11 of Title 21 Code of Federal Regulations, the Administrator has deemed that it is necessary to allow the production during 1977 of additional amounts of Mixed Alkaloids of Opium. Therefore, the Administrator of the Drug Enforcement Administration, under the authority vested in the Attorney General by Section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826) and delegated to the Administrator by § 0.100 of Title 28 of the Code of Federal Regulations does hereby propose the following change of the aggregate production quota for 1977 for Mixed Alkaloids of Opium expressed in grams in terms of anhydrous base:

Base Quota	Aggregate production quota	
	Previously authorized	Proposed revised
Mixed Alkaloids of opium	0.000	30,000

All interested persons are invited to submit their comments and objections in writing regarding this proposal. The comments or objections should state with particularity the issues concerning which the person desires to be heard. Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative, and must be received by October 26, 1977. If a person believes that one or more issues raised by him warrant a full adversary-type hearing, he should so state and summarize the reasons for his belief.

In the event that comments or objections to this proposal raise one or more issues which the Administrator finds, in his sole discretion, warrants a full adversary-type hearing, the Administrator shall order a public hearing in the FEDERAL REGISTER summarizing the issues to be heard and setting the time for the hearing.

Dated: September 27, 1977.

PETER B. BENSINGER,
Administrator.

[FR Doc.77-28909 Filed 9-30-77;8:45 am]

NATIONAL SCIENCE FOUNDATION RESOURCE CENTER FOR SCIENCE AND ENGINEERING PROGRAM

Draft Guidelines

The National Science Foundation plans to publish guidelines for the preparation of proposals for the Resource Center for Science and Engineering Program for FY 1978 on or about December 1, 1977. Draft guidelines for the Program follows.

Persons wishing to comment on these guidelines should write:

Dr. Shirley McBay, Resource Center for Science and Engineering Program, Division of Science Education Resource Improvement, National Science Foundation, Washington, D.C. 20550.

All comments must be received by October 12, 1977. Final guidelines will be published in the FEDERAL REGISTER on or about December 1, 1977.

WALTER L. GILLESPIE,

Division Director, Science Education Resource Improvement.

INSIDE FRONT COVER

1. EXCERPT FROM FY 1978 NSF AUTHORIZATION LAW

The FY 1978 Budget for the Resource Center for Science and Engineering Program is approximately \$2.6 million.

The following is an excerpt from the FY 1978 NSF Authorization Law (Pub. L. 95-99) regarding the Resource Center for Science and Engineering Program, Section 6(a), (b): "Sec. 6(a) The National Science Foundation shall establish a Resource Center for Science and Engineering to be located at an educational institution which—

(1) Enrolls substantial numbers of minority students, students from low-income families, or both;

(2) Is geographically located near one or more population centers of low-income families or minority groups;

(3) Demonstrates a commitment to encouraging and assisting minority students or students from low-income families or both; and

(4) Has an existing or developing capacity to offer doctoral programs in science and engineering.

(b) The Center established under this section shall—

(1) Support basic research and acquisition of necessary research facilities and equipment;

(2) Serve as a regional resource in science and engineering for the community which the Center serves; and

(3) Develop joint educational programs with nearby pre-college and undergraduate institutions which enroll a substantial number of minority students or students from low-income families."

JUNE 5-14	SITE VISITS TO TOP 2 RANKING INSTITUTIONS

STAGE THREE

EARLY SEPTEMBER ANNOUNCEMENT OF SELECTION OF RESOURCE CENTER
--

III. PROGRAM DESCRIPTION

Introduction

The Resource Center for Science and Engineering (RCSE) Program is a successor to the Fiscal Year 1977 Minority Centers for Graduate Education in Science and Engineering Program. In Fiscal Year 1978, the Foundation is authorized and directed to support the establishment in one Resource Center as characterized in the legislative excerpt on the Inside Front Cover of this Guide. Subject to the availability of funds, it is the Foundation's intent to establish additional centers over a period of time.

General Purpose and Objectives

The Resource Center for Science and Engineering Program is designed to promote increased participation in science and engineering by minorities* and persons from low-income families*.

*Segments omitted in this FEDERAL REGISTER Draft are substantially similar to standard NSF descriptions.

*See page 3 for definitions.

The Program seeks to expand the options in science and engineering of minority students and students from low-income families by assisting eligible institutions in their efforts.

To increase the application of such students.

To increase the number of doctorates in science received by these students.

To provide such students with role models in science and research opportunities with established scientists.

To provide faculty associated with the Resource Center with academic research career options and to increase their scholarly productivity.

In Fiscal Year 1978 support will be provided for the establishment of a single center geographically located near one or more population centers of minority groups or low-income families which will (1) support basic research, (2) serve as a regional resource in science and engineering, and (3) develop joint educational programs with nearby pre-college and under graduate institutions enrolling substantial numbers of minority students or students from low-income families.

Science as defined for the purposes of this Program includes the biological, engineering, mathematical, physical, and social sciences, the history and philosophy of science, and interdisciplinary fields which are comprised of overlapping areas among two or more sciences (e.g., biophysics, geochemistry, biochemistry).

Description of the Center Concept

Applicant institutions are expected to develop proposals based upon this Guide for the establishment of a Resource Center that is regional in function with activities appropriate to the institutional and community context in which the Center would exist.

A Resource Center must serve a variety of functions for the various constituents of the region in which it is located. For the minority student or the student from a low-income family, a Resource Center should:

Provide access to established scientists on its faculty.

Offer a variety of quality science programs.

Have faculty and programs reflecting sensitivity to the needs of ethnic minority students or students from low-income families.

Have demonstrated strength in the performance of basic research.

Possess a demonstrable history for the admission and retention through graduation of minority students or students from low-income families.

Have visible and functional faculty to serve as role models for these students.

Possess substantial support programs including counseling, guidance, financial and tutorial assistance.

Provide a favorable student atmosphere for developing self interests and for learning.

For the minority faculty member at the grantee institution, a Resource Center should:

Have a demonstrated commitment to minority faculty as evidenced by its past, present and projected future record with respect to their hiring, promotion, and tenure.

Provide optimum conditions for research by and the professional development of its faculty.

For the academic community at the grantee institution, a Resource Center should:

Facilitate information exchange between its various science departments.

Coordinate activities among its departments and university administration as they relate to the specific needs and benefit of minority students or students from low-income families.

For the nearby community, a Resource Center should:

Enhance information exchange between academia and the lay community.

Function as a forum through which local scientific needs and interests can be expressed.

Serve as a medium for on-going, long-term inquiry and monitoring of research activities relevant to the scientific needs and priorities of the community.

Encourage the most talented students in the local community to consider choosing careers in science and engineering.

Types of Support

In general, support may be provided in this Program for a variety of activities in science research or science education, not excluded elsewhere in this Guide, which will aid the grantee in developing its capacity to function as a Resource Center as described in previous sections.

Supportable activities may include, but are not limited to, the purchase of scientific instructional or research equipment and supplies, research assistantships for students, library additions; strengthening of existing curricula; addition of graduate level science faculty; visiting scientists; student attendance at professional meetings; minor renovation of physical facilities; efforts to increase communication and facilitate scientific interchange between the Resource Center and neighboring undergraduate institutions with substantial enrollments of minority students or students from low-income families; development of outreach and educational programs for the community(ies) which it serves and for nearby pre-college institutions which enroll a substantial number of minority students or students from low-income families; and the use of consultants in planning and evaluation efforts.

Activities may also include cooperative programs with industry, faculty and student exchange programs, workshops, institutes, and programs to increase the awareness by students, their parents and teachers concerning the diversity of science careers. These examples should be considered as illustrative and not as limiting or required components of projects.

Eligibility and Limitations

Institutions eligible to submit proposals in Fiscal Year 1978 to the Resource Center Program are graduate degree granting institutions, or groups of institutions of higher education involving at least one graduate degree granting institution, which meet all of the criteria listed below:

Enroll substantial numbers of minority students, students from low-income families, or both.

Are geographically located in or near one or more population centers of low-income families or minority groups.

Substantial—at least 800 full-time minority students and/or students from low-income families, including undergraduate, and graduate, at least 50 of which must be enrolled beyond the junior level in the natural or physical sciences or engineering and at least 50 of which must be enrolled beyond the junior level in the social sciences.

Minority—includes Alaskan Natives, American Indians, Blacks, Mexican-Americans, Puerto Ricans and/or other disadvantaged ethnic minorities who are under-represented in science and engineering. A proposing institution's minority enrollment may be predominantly a single minority group or a combination of the minority groups described above.

For the nearby community, a Resource Center should:

Enhance information exchange between academia and the lay community.

Function as a forum through which local scientific needs and interests can be expressed.

Serve as a medium for on-going, long-term inquiry and monitoring of research activities relevant to the scientific needs and priorities of the community.

Encourage the most talented students in the local community to consider choosing careers in science and engineering.

Types of Support

In general, support may be provided in this Program for a variety of activities in science research or science education, not excluded elsewhere in this Guide, which will aid the grantee in developing its capacity to function as a Resource Center as described in previous sections.

Supportable activities may include, but are not limited to, the purchase of scientific instructional or research equipment and supplies, research assistantships for students, library additions; strengthening of existing curricula; addition of graduate level science faculty; visiting scientists; student attendance at professional meetings; minor renovation of physical facilities; efforts to increase communication and facilitate scientific interchange between the Resource Center and neighboring undergraduate institutions with substantial enrollments of minority students or students from low-income families; development of outreach and educational programs for the community(ies) which it serves and for nearby pre-college institutions which enroll a substantial number of minority students or students from low-income families; and the use of consultants in planning and evaluation efforts.

Activities may also include cooperative programs with industry, faculty and student exchange programs, workshops, institutes, and programs to increase the awareness by students, their parents and teachers concerning the diversity of science careers. These examples should be considered as illustrative and not as limiting or required components of projects.

Eligibility and Limitations

Institutions eligible to submit proposals in Fiscal Year 1978 to the Resource Center Program are graduate degree granting institutions, or groups of institutions of higher education involving at least one graduate degree granting institution, which meet all of the criteria listed below:

Enroll substantial numbers of minority students, students from low-income families, or both.

Are geographically located in or near one or more population centers of low-income families or minority groups.

Substantial—at least 800 full-time minority students and/or students from low-income families, including undergraduate, and graduate, at least 50 of which must be enrolled beyond the junior level in the natural or physical sciences or engineering and at least 50 of which must be enrolled beyond the junior level in the social sciences.

Minority—includes Alaskan Natives, American Indians, Blacks, Mexican-Americans, Puerto Ricans and/or other disadvantaged ethnic minorities who are under-represented in science and engineering. A proposing institution's minority enrollment may be predominantly a single minority group or a combination of the minority groups described above.

For the nearby community, a Resource Center should:

Enhance information exchange between academia and the lay community.

Function as a forum through which local scientific needs and interests can be expressed.

Serve as a medium for on-going, long-term inquiry and monitoring of research activities relevant to the scientific needs and priorities of the community.

Encourage the most talented students in the local community to consider choosing careers in science and engineering.

Low-Income Family—A family whose adjusted family income is less than \$7,500.

Have a demonstrated commitment to encouraging and assisting minority students or students from low-income families, or both;

Have an existing or developing capacity to offer doctoral programs in science and engineering and currently offer at least the master's degree in three or more areas of science.

Are willing to support basic research and the acquisition of necessary research facilities and equipment.

Are willing to serve as a regional resource in science and engineering for the nearby community of minority groups or low-income families.

Are willing to develop joint educational programs with nearby pre-college and undergraduate institutions which enroll a substantial number of minority students or students from low-income families.

A group of institutions submitting a cooperative or consortium proposal to the program must, when considered as a single entity, satisfy the criteria listed above.

A proposal for the establishment of the Center is expected to involve several science disciplines as opposed, for example, to only involving mathematics or only involving engineering.

The grant request should be for approximately \$2.6 million to be expended over a three to five year period.

Assurance of renewal support of the Center to be established in this Program is not possible. Therefore, any proposed achievements primarily dependent upon Foundation support should be attainable within the grant period. This does not exclude, of course, the inclusion of proposed achievements dependent upon institutional or other external support which may be attainable during or following the grant period. Proposals should describe long range plans for the Resource Center, including how the institution proposes to maintain the Center after NSF funding ceases.

A proposal must address the needs of the principal minority or low-income groups in the region that the Center would be serving, for it is unlikely that, within the foreseeable future, more than one Center will be established within a given region.

An institution, whether submitting a proposal on its own behalf or as a part of a group of institutions, is eligible to submit or participate in only one proposal. Participation in the Resource Center Program does not in any way affect an institution's eligibility to submit proposals or receive support from other Foundation programs.

Types of Proposals

Proposals may be submitted by any eligible institution or eligible group of institutions in Stage One of the Resource Center selection process. Final proposals will be accepted in Stage Two from institutions represented in the six ranking proposals of Stage One. These proposals are expected to contain revisions of the original proposals, based upon reviewer and staff comments. Only proposals from these six institutions will be reviewed in Stage Two.

Final proposals are generally expected to differ in content from initial proposals in the following ways:

Extent of Narrative and Budget details;

Extent of supportive documents;

Curriculum Vitae for consultants;

Information on other areas identified in reviewer and staff comments;

Information on Current and Proposed Projects and on Previous NSF Awards.

The preparation and submission of each type of proposal is discussed in subsequent sections of this Guide.

Types of Proposals

Proposals may be submitted by any eligible institution or eligible group of institutions in Stage One of the Resource Center selection process. Final proposals will be accepted in Stage Two from institutions represented in the six ranking proposals of Stage One. These proposals are expected to contain revisions of the original proposals, based upon reviewer and staff comments. Only proposals from these six institutions will be reviewed in Stage Two.

Final proposals are generally expected to differ in content from initial proposals in the following ways:

These proposals are expected to contain revisions of the original proposals, based upon reviewer and staff comments. Only proposals from these six institutions will be reviewed in Stage Two.

Final proposals are generally expected to differ in content from initial proposals in the following ways:

Institutions planning to submit Stage One proposals should complete and mail the Intent to Submit Card found on the Back Cover of this Guide by January 6, 1978.

IV. PREPARATION AND SUBMISSION OF INITIAL PROPOSALS—STAGE ONE

Proposal Format and Content

Proposals must contain the following in the order listed:

Cover Sheet;

Estimated Budget Sheet;

Institutional Data Sheet;

Narrative;

Curriculum Vitae of Key Project Personnel;

Local Review Statement.

Forms for the Cover Sheet, Estimated Budget Sheet, and the Institutional Data Sheet are exhibited in the Appendix. These forms should be reproduced and used in the preparation of proposals.

Budget

Estimated budget figures are permissible in Stage One. Budget guidelines and exclusions are discussed under General Fiscal Information on page 13.

Narrative

The Narrative should not exceed twenty (20) double spaced pages, typed on one side only. It should set forth the proposed plan for the establishment of a Resource Center designed to accomplish Program objectives as reflected in this Guide and in the Program's authorizing legislation which is reproduced on the Inside Front Cover.

Specific topics which should be discussed in the Narrative include the following:

Appropriateness/Eligibility of Institution as a Resource Center. Describe how applicant meets each of the eligibility criteria outlined on page 3. Summarize evidence of past, present, and future commitment to encouraging minority students and/or students from low-income families. Give a brief description of how the proposed plan was developed. Provide justification for this institution as the appropriate site for the Center.

Project Objectives, Strategy, and Activities. Describe project objectives, their relevance to stated Program objectives, and the proposed strategy for accomplishing them. Discuss the activities which collectively comprise the project plan. For each activity, indicate (a) the appropriateness for undertaking it, (b) how it contributes to attaining project objectives, and (c) how it complements other components of the plan.

Organization/Management and Work/Monitoring/Evaluation Plan. Describe briefly how the project will be organized and managed including a summary description of relevant skills of key personnel involved in the project. Present a timetable giving major milestones envisioned for the project as well as a procedure for monitoring project progress. Outline an evaluation plan for determining whether project objectives are being accomplished.

Expected Outcomes. Describe the overall expected outcomes of the project and its potential impact upon the institution, the student groups to be served, and the nearby community.

Plan for Continuation. Discuss a general plan for integrating project activities of a continuing nature into the institution(s)' educational program and budget after Foundation support ceases.

Curriculum Vitae for Key Project Personnel should be appended to the Narrative.

V. LOCAL REVIEW STATEMENT

A local review statement signed by the chief executive officer of the institution

must be appended to the proposal. This statement should indicate how the proposed project relates to overall institutional goals, the institution's general support for the proposed effort and its willingness to provide the necessary institutional resources for successful project implementation. This statement must clearly indicate the institution's willingness to cooperate in special monitoring requirements necessary in a project from which regular feedback must be obtained for future program planning. See page 13 for discussion of NSF monitoring and evaluation of the project.

In the case of a proposal submitted by a group of institutions, a local review statement must be included from each of the participating institutions.

Materials Required

Fifteen (15) copies of the proposal (including the Signature Copy) along with three (3) copies of the catalog of the graduate institution(s) involved in the proposal are required.

Proposals and catalogs should be mailed in a single package to:

Central Processing Section for Resource Center in Science and Engineering Program, Division of Science Education Resources Improvement, National Science Foundation, Washington, D.C. 20550.

Each copy of a proposal should be on standard (8½" by 11") paper, printed on one side only, and stapled only in the upper left hand corner with no covering or binding material.

To facilitate prompt acknowledgment of the arrival of the package at its destination, the proposer should cut out the two postcards for Stage One initial proposals from the Back Cover of this Guide, fill them in to identify the proposal, address one card to the project director and the other to the official authorized to sign the Cover Sheet, and attach them firmly to the Signature Copy of the Cover Sheet.

Receipt Date and Projected Notification Date

All proposals must be received in the Foundation by close of business on February 17, 1978. No exceptions will be made to this requirement. Proposers will be notified of the outcome of the proposal review process about mid-March, 1978. Prior to this notification, no information can be given on the probable outcome of any proposal.

V. PREPARATION AND SUBMISSION OF FINAL PROPOSALS—STAGE TWO

Final proposals will be accepted from the institutions submitting the six ranking proposals in Stage One. They are expected to be revisions of the proposals originally submitted, based upon reviewer and staff comments. General differences between initial proposals and final proposals are discussed on page 5.

While final proposals are revisions, they must be self-contained since they will be the subjects of a separate review.

Proposal Format and Content

Final proposals must contain the following in the order listed:

Cover Sheet for Final Proposals;

Proposal Budget Sheet, NSF Form 1030;

Budget Details and Justification;

Institutional Data Sheet;

Information on Current or Proposed Projects;

Summary Information on Previous NSF Awards;

Abstract;

Narrative;

Curriculum Vitae of Key Project Personnel and Consultants;

Local Review Statement.

Forms for the Cover Sheet, Proposal Budget Sheet (NSF Form 1030) and the Institutional Data Sheet are exhibited in the Appendix. These forms should be reproduced and used in the preparation of final proposals.

Budget Details and Justification

Immediately following the Budget Sheet, details and justification must be provided for each major budget category.

Information on Current or Proposed Projects

Each proposal must list all current projects, in addition to the proposed project to which the senior personnel have committed a portion of their time, whether or not salary for the person involved is included in the budgets of the various projects. This information should include the titles and dates of current grants or contracts, the source of funds, annual budget levels, and the person-months devoted to each project by each of the senior personnel.

The proposal must also provide analogous information for all other proposed projects which are being considered by, or which will be submitted in the near future to, other possible sponsors including other Foundation programs. Concurrent submission of a proposal to other organizations will not prejudice its review by the Foundation.

Summary Information on Previous NSF Awards

An institution, whether submitting an individual proposal or participating in a proposal submitted by a group of institutions, that has received any previous grant of more than \$100,000 from the National Science Foundation within the last three years must prepare a brief summary statement containing the following information for each such grant:

A. Grant number, title, date, and amount.

B. Summary of objectives and activities.

If any of these awards relate specifically to minority students or students from low-income families, then evidence of success in attaining the objectives of each such award should be given.

Abstract

The Abstract, of no more than two pages in length, should present a synopsis of the proposed plan for the establishment of the Resource Center. If the proposed project is funded, the Abstract will be available to the public. The Abstract should therefore be written in language which can be understood by the general public.

Narrative

The Narrative should be no more than 50 pages in length. Specifically, each of the topics discussed in the Narrative of initial proposals from Stage One and described on page 5 should be addressed in detail. Major questions or deficiencies of the initial proposal which were identified in the review process should be addressed under the appropriate Narrative topic.

Summary Information on Previous NSF Awards

Abstract;

Narrative;

Information on Current or Proposed Projects;

Summary Information on Previous NSF Awards;

Information on Current or Proposed Projects;

Summary Information on Previous NSF Awards;

Abstract;

Narrative;

Curriculum Vitae

Curriculum Vitae of Key Personnel and Consultants should be appended to the Narrative.

Local Review Statement

A Local Review Statement is described on page 6 and must be included in the final proposal.

Material Required

Fifteen (15) copies of the final proposal (including the Signature Copy) are required. Proposals should be mailed in a single package.

General Processing Section of Resource Center for Science and Education Program, Division of Science Education Resources Improvement, National Science Foundation, Washington, D.C. 20550.

Each copy of a proposal should be on standard (8 1/2 by 11 1/2) paper printed on one side only, and stapled only in the upper left hand corner with no gluing or binding material.

To facilitate prompt processing of the arrival of the package at its destination, the proposer should cut out the two postcards for Stage Two final proposal, from the Back Cover of this Guide, fill them in to identify the proposal, address one card to the project director and the other to the official authorized to sign the Cover Sheet, and attach them firmly to the Cover Sheet of the Signature Copy. When the packages arrives, the date of receipt and an assigned proposal number will be stamped on the card before it is returned so that thereafter the proposer and the Foundation may refer to this proposal number in correspondence about the proposal.

Receipt Date and Project Award Date

All final proposals must be received in the Foundation by close of business on May 19, 1978. No exceptions will be made to this requirement. The projected Award Date will be in early September, 1978.

Proposers should submit written notification of any developments, following submission of the proposal, that might significantly affect the proposed plan. The Program staff will contact proposers if additional information is required. All final decisions will be announced by written notification to the project director and to officials of the proposing institution. Prior to this notification, no information can be given on the probability of support for any proposal.

VI. EVALUATION CRITERIA AND PROCEDURE

The excellence of Foundation supported activities is heavily dependent upon advice received from the scientific and educational communities. Proposals will be reviewed competitively at each stage by panels which include representation of minority scientists and educators and other persons knowledgeable of minority or low-income communities to be served as well as by Foundation Staff. All proposals will be examined to determine the applicant's eligibility for participation in the Program on the basis of the criteria listed on Page 3.

At each stage, proposals will be evaluated according to the following criteria:

Congruence with Program Goals: How relevant are the objectives of the proposed project to stated program goals?

Demonstrated Commitment to Encouraging and Assisting Minority Students of Students from Low-Income Families, or Both: What is the institution's past record (recruitment, retention, number of graduates) regarding such students? Provision of role models as reflected in past record (hiring, retention, promotion, tenure, with respect to minority faculty? Support facilities (counseling, financial aid, tutorial assistance)? Funding of institutional funding vs. external funding of programs for minority students from low-income families? What are its future plans with respect to all of the above?

Institution's Potential as the Center Location: Has the proposing institution identified significant ways in which it would be able to serve as a resource in science and engineering to nearby population centers of minority groups or low-income families and to nearby pre-college and undergraduate institutions with substantial enrollments of students from minority groups of low-income families? Has the institution made a compelling case for why it would be best suited to serve as the Center site? Is there a significant indication of institutional commitment for the proposed plan?

Appropriateness and Adequacy of the Plan for the Proposed Objectives: How appropriate are the proposed activities to the proposed objectives? Is the proposed plan likely to achieve the stated objectives?

Adequacy of Organization Management and Work Monitoring/Evaluation Plan: Are the skills and experience of key project personnel appropriate for the implementation of the proposed project? Do the teaching and administrative arrangements made for project personnel provide them with adequate time to devote to the project? Is the time schedule described in the proposal appropriate? Are the milestones listed realistic? Is the described monitoring/evaluation plan acceptable?

Impact Potential of Project on the Institution or Nearby Minority and/or Low-Income Community: Is the likely gain by the institution and the nearby minority community or community of low-income families from the implementation of the proposed project substantial?

Overall Scientific and Educational Value of the Project: Do the techniques and approaches proposed reasonably reflect what is known to be effective in science education? Are the approaches proposed appropriate to the needs of the student populations to be served? Is there potential transferability of the various aspects of the project to other institutions? Are the proposed activities in basic research reasonable and appropriate to the institutional setting?

Panelists will be instructed to place greater emphasis upon the following:

The Proposed Objectives and Activities of the Plan.

Demonstrated Commitment (past, present, and projected) to Encouraging and Assisting Minority Students or Students From Low-Income Families, or Both.

Institution's Potential as the Resource Center Location.

Impact Potential of Project on the Institution and the Nearby Minority and/or Low-Income Community:

Six applicants will be invited to submit revised proposals for review in the second stage of the Resource Center selection process. In determining which proposers will participate in the second stage, selection will be made in merit order. In cases of proposals with substantially equal merit, as determined by the merit review process, use may be made of other criteria such as geographical or disciplinary distribution of funds, distribution of awards among appropriate types of institutions, or other criteria determined to be consistent with Foundation policy and legislative intent.

Pre-Award Site Visits

It is expected that a five member team composed of recognized scientists and educators and others knowledgeable of institutional planning/budgeting, and Foundation Staff will make two-day site visits to each of the three top applicants resulting from the Stage Two review process. These visits will be primarily for the purpose of consulting with proposed key project personnel, institutional officials, faculty, and other appropriate persons to resolve, to the extent possible, any major questions regarding the applicant's proposed plan and its appropriateness as the site of the Resource Center.

Applicants will receive written notification of the status of their proposals at the various stages.

FROM SECTION VII**General Fiscal Information—Budget Guidelines**

See page 4 for limitations on grant duration and size. Proposals are expected to involve a diversity of activities, as opposed to being one-dimensional, therefore no single budgetary request (e.g., equipment, faculty and staff salaries, renovation, etc.) should comprise more than 35 percent of the total support requested.

Specific exclusions exist for requesting Foundation support. NSF funds will not be provided for:

Student scholarships or fellowships (but student wages for special activities in the project are permitted as are student research assistantships).

Augmenting the salary rate for faculty members pursuing regularly assigned duties, or to support any other ongoing regular activity at the institution; or

The construction of major new buildings. This does not preclude Foundation support for such remodeling or renovation of existing facilities as may be required to carry out activities which are a part of the proposed Resource Center.

NSF Monitoring and Evaluation of Resource Center Award

Proposers should be aware that the Foundation shall monitor and evaluate the Resource Center project. Thus proposers should be prepared to cooperate with evaluators eventually retained by the Foundation as well as to cooperate in any special monitoring requirements which might be established.

INSTITUTIONAL DATA (Required of Initial and Final Proposals)

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-314]

ARKANSAS POWER AND LIGHT CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 38 to Facility Operating License No. DPR-51, issued to Arkansas Power and Light Co. (the licensee), which revised the Technical Specifications for operation of Arkansas Nuclear One—Unit No. 1 (the facility) located in Pope County, Ark. The amendment is effective as of its date of issuance.

The amendment modified the Technical Specification pressure-temperature limit curves for hydrostatic test, normal heatup, and normal cooldown, as required by Technical Specification 3.1.2.7 and as based upon analysis of surveillance capsule ANI-E, which was withdrawn from the Arkansas Nuclear One—Unit 1 reactor vessel in Spring 1976.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 8, 1977, (2) Amendment No. 28 to Facility Operating License No. DPR-51, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Arkansas 72801. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 14th day of September, 1977.

For the Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[7590-01]

[Docket No. 70-1308]

GENERAL ELECTRIC CO.

Establishment of Atomic Safety and Licensing Board To Rule on Petitions

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and Sections 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established to rule on petitions and/or requests for leave to intervene in the following proceeding:

GENERAL ELECTRIC CO.

(GE MORRIS OPERATION)

[Material License No. SNM-1265]

This action is in reference to a notice published by the Commission on August 18, 1977, in the FEDERAL REGISTER (42 FR 41675) entitled "Consideration of Proposed Modification to GE Morris Operation Fuel Storage Facility".

The members of the Board and their addresses are as follows:

Andrew C. Goodhope, Esq., Chairman, 3320 Estelle Terrace, Wheaton, Md. 20906.
Dr. Linda W. Little, Member, Research Triangle Institute, P.O. Box 12194, Research Triangle Park, N.C. 27709.
Dr. Forrest J. Remick, Member, 305 E. Hamilton Avenue, State College, Pa. 16801.

Dated at Bethesda, Md., this 26th day of September 1977.

JAMES R. YORE,
Chairman, Atomic Safety and Licensing Board Panel.

[FR Doc 77-28792 Filed 9-30-77; 8:45 am]

[7590-01]

[Docket No. 50-298]

NEBRASKA PUBLIC POWER DISTRICT

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 38 to Operating License No. DPR-46, issued to the Nebraska Public Power District (the licensee), which revised Technical Specifications for operation of the Cooper Nuclear Station (the facility) located in Nemaha County, Nebr. The amendment is effective as of its date of issuance.

The amendment consists of Technical Specification changes to incorporate approved exemptions from certain requirements of 10 CFR Part 50 Appendix J regarding main steam isolation valve leak rate testing, main steam line and feedwater line bellows leak rate testing, and extension of the test interval for Type C leak rate testing for the Cooper Nuclear Station.

The applications for amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings

as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the requests for exemption dated September 10, 1975 and January 4, 1977, as supplemented by letter dated April 4, 1977, (2) Amendment No. 38 to License No. DPR-46, and (3) the Commission's concurrently issued Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305. A single copy of items (2) and (3) may be obtained upon request addressed to the United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 16th day of September, 1977.

For the Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc 77-28788 Filed 9-30-77; 8:45 am]

[7590-01]

[Docket No. 50-285]

OMAHA PUBLIC POWER DISTRICT

Issuance of Amendment to Facility Operating License and Negative Declaration

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 30 to Facility Operating License No. DPR-40, issued to Omaha Public Power District, which revised Technical Specifications for operation of the Fort Calhoun Station, Unit No. 1 located in Washington County, Nebr. The amendment is effective as of its date of issuance.

The amendment amends section 1-1 of the Environmental Technical Specifications to allow: (1) an increase in the allowable condenser cooling water temperature rise during winter months and (2) the limits on condenser cooling water temperature rise to be exceeded for brief periods when required by facility operation.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Com-

mission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has prepared an environmental impact appraisal for the revised Technical Specifications and has concluded that an environmental impact statement for this particular action is not warranted because there will be no environmental impact attributable to the action other than that which has already been predicted and described in the Commission's Final Environmental Statement for the facility dated August 1972.

For further details with respect to this action, see (1) the application for amendment dated August 13, 1976, as superseded in its entirety by letter dated March 14, 1977, (2) Amendment No. 30 to License No. DPR-40, and (3) the Commission's related Safety Evaluation and Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Blair Public Library, 1665 Lincoln Street, Blair, Nebr. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 23rd day of September 23, 1977.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[Docket Nos. 50-275 OL; 50-323 OL]

PACIFIC GAS & ELECTRIC CO.; (DIABLO CANYON NUCLEAR POWER PLANT, UNITS 1 & 2)

Order Relative to an Evidentiary Hearing on Nonseismic Issues

The evidentiary hearing on the adequacy of the Emergency Plan will begin at 10:00 a.m. (local time) on October 18, 1977 in the Cavalier Room, San Luis Bay Inn, Marre Ranch, Avila Beach, Calif. The Board will also expect the NRC Staff to furnish a witness to sponsor the Revised Table S-3 values on the Diablo Canyon cost/benefit balance.

The public is invited to attend. Limited appearance statements will be invited at this proceeding from those persons who have not previously given a statement. Oral statements will be limited to five (5) minutes but written statements without limitation on length may be submitted.

Be it so ordered.

Issued at Bethesda, Md., this 23rd of September, 1977.

For the Atomic Safety and Licensing Board.

ELIZABETH S. BOWERS,
Chairman.

[FR Doc 77-28787 Filed 9-30-77; 8:45 am]

[7590-01]

[Docket No. 50-333]

POWER AUTHORITY OF THE STATE OF NEW YORK

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 29 to Facility Operating License No. DPR-59, issued to the Power Authority of the State of New York (the licensee), which revised Technical Specifications for operation of the James A. Fitzpatrick Nuclear Power Plant (the facility) located in Oswego County, N.Y. The amendment is effective as of its date of issuance.

The amendment revises the Technical Specification provisions with respect to the schedule for installation and removal of a neutron flux monitor.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment submitted by letter dated August 31, 1977, (2) Amendment No. 29 to License No. DPR-59, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Oswego County Office Building, 46 E. Bridge Street, Oswego, N.Y. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 16th day of September 1977.

For the Nuclear Regulatory Commission.

GERALD B. ZWETZIG,
Acting Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[Docket No. 50-343]

POWER AUTHORITY OF THE STATE OF NEW YORK

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 30 to Facility Operating License No. DPR-59, issued to Power Authority of the State of New York (the licensee), which revised Technical Specifications for operation of the James A. Fitzpatrick Nuclear Power Plant (the facility) located in Oswego County, N.Y. The amendment is effective as of its date of issuance.

The amendment authorizes operation of the facility with: (1) 8 x 8 reload fuel bundles with 100 mil channels, (2) holes drilled in the lower tie plate of all reload fuel bundles and all first cycle fuel remaining in the core after refueling, (3) independent power supplies for the Low Pressure Coolant Injection System Motor Operated Valves, (4) the valve of the control rod drive hydraulic return line placed in the closed position, and (5) limiting Maximum Average Planar Linear Heat Generation Rates as determined by a reevaluation of the Emergency Core Cooling System (ECCS) cooling performance. Effective upon issuance of this amendment, the Commission's Order for Modification of License dated March 11, 1977, relative to Facility Operating License No. DPR-59, is terminated.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with Items 1 and 2 of this action was published in the FEDERAL REGISTER on June 23, 1977 (42 FR 31847). A similar Notice in connection with Item 5 of this action was published in the FEDERAL REGISTER on July 22, 1977 (42 FR 37608). No requests for a hearing or petition for leave to intervene were filed following these notices of the proposed action. Prior public notice of Items 3 and 4 was not required since they do not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment submitted by letters dated May 16 and July 23, 1977, as supplemented, (2) the licensee's request dated July 7, 1977, as revised July 29, 1977, and supplemented, (3) Amendment No. 30 to License No. DPR-59, and (4) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Oswego County Office Building, 46 East Bridge Street, Oswego, N.Y.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 16th day of September 1977.

For the Nuclear Regulatory Commission.

GERALD B. ZWETENI,
Acting Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[Docket No. 50-3-3, 70-304]

TENNESSEE VALLEY AUTHORITY; (PHIPPS BEND NUCLEAR PLANT, UNITS 1 AND 2)

Oral Argument

Notice is hereby given that, in accordance with the Appeal Board's order of September 22, 1977, oral argument on the ruling referred by the Licensing Board's order of April 20, 1977, is calendared for 10 a.m., Wednesday, October 26, 1977, in the Nuclear Regulatory Commission's Public Hearing Room, 5th floor, East-West Towers, 4350 East West Highway, Bethesda, Md.

Dated: September 23, 1977.

For the Atomic Safety and Licensing Appeal Board.

ROMAYNE M. SMITH,
Secretary to the Appeal Board.

[FR Doc. 77-28730 Filed 9-30-77; 8:45 am]

[7590-01]

[Docket No. 50-247]

CONSOLIDATED EDISON CO. OF NEW YORK, INC.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 33 to Facility Operating

License No. DPR-26, issued to Consolidated Edison Co. of New York, Inc., which revised the license for operation of the Indian Point Nuclear Generating Station, Unit No. 2 located in Westchester County, N.Y. The amendment is effective as of its date of issuance.

The amendment revises the provisions of the license to conform to the decision of the Atomic Safety and Licensing Appeal Board dated May 20, 1977 (ALAB-205 NRC 1156). The license now states that environmental approvals required to proceed with construction of the closed cycle cooling system have not been received, pending further proceedings with respect to the Village of Buchanan Zoning Ordinance.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that since the issuance of this amendment reflects the legal status of governmental approvals, it does not require an analysis of environmental impacts. Pursuant to 10 CFR § 51.5(d)(4), an environmental impact statement, negative declaration or environmental impact appraisal need not, therefore, be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated August 23, 1977, and (2) Amendment No. 33 to License No. DPR-26. Both of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the White Plains Public Library, 100 Maritime Avenue, White Plains, N.Y. 10601.

A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 26th day of September 1977.

For the Nuclear Regulatory Commission.

MORTON B. FAIRFAX,
Acting Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[7590-01]

[Docket No. 50-10]

COMMONWEALTH EDISON CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued

Amendment No. 21 to Facility Operating License No. DPR-2, issued to the Commonwealth Edison Co. (the licensee), which revised Technical Specifications for operation of Unit 1 of Dresden Nuclear Power Station (the facility) located in Grundy County, Ill. The license amendment is effective as of its date of issuance.

The amendment (1) authorized operation of the facility with additional 6 x 6 fuel assemblies as replacement for some of the existing fuel assemblies, (2) incorporated revised Minimum Critical Heat Flux Ratio limits that assure conservative operation with respect to thermal hydraulics during Cycle 11, and (3) incorporated new Maximum Average Planar Linear Heat Generation Rate limits to assure that the reactor is operated so as to continue to meet the emergency core cooling system performance criteria.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with this action was published in the FEDERAL REGISTER on June 23, 1977 (42 FR 31045). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated April 11, 1977, and supplements thereto dated May 23, August 3, and September 8 and 15, 1977, (2) Amendment No. 21 to License No. DPR-2, and (3) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 20th day of September 1977.

For the Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[Docket 70-25]

ATOMICS INTERNATIONAL NUCLEAR FUEL FABRICATION FACILITIES

Negative Declaration Regarding Renewal of License No. SNM-21

The U.S. Nuclear Regulatory Commission (the Commission) has issued a renewal of Special Nuclear Material License No. SNM-21 for the continued operation of the Atomics International Nuclear Fuel Fabrication Facilities at Los Angeles, Calif.

The Commission's Division of Fuel Cycle and Material Safety has prepared an environmental impact appraisal for the renewal of License No. SNM-21. On the basis of this appraisal, the Commission has concluded that an environmental impact statement for this particular license renewal is not warranted because there will be no significant environmental impact attributable to the action. The environmental impact appraisal is available for public inspection and copying at the Commission's Public Document at 1717 H Street NW., Washington, D.C.

Dated at Silver Spring, Md., this 15th day of September, 1977.

For the Nuclear Regulatory Commission.

LELAND C. ROUSE,
Chief, Fuel Processing and Fabrication Branch, Division of Fuel Cycle and Material Safety.

[FR Doc. 77-28954 Filed 9-30-77; 8:45 am]

[7590-01]

[Docket No. 40-8102]

EXXON CO., U.S.A.; HIGHLAND URANIUM MILL

Availability of Applicant's Environmental Report

Pursuant to the National Environmental Policy Act of 1969 and the regu-

lations of the Commission in 10 CFR Part 51, Exxon Co., U.S.A. has filed an environmental report in support of their application for a source material license for the solution mining of uranium at the Highland uranium milling and mining operation site located in Converse County, Wyo. The report, which discusses environmental considerations related to the proposed solution mining operation is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555. Copies of the report are also being made available at the State Clearinghouse, State Planning Coordinator, Office of the Governor, Capitol Building, Cheyenne, Wyo. 82001.

After the environmental report has been analyzed by the staff, a draft environmental statement will be prepared. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement, with a request for comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of federal agencies and state and local officials will be made available when received. Upon consideration of comments submitted with respect to the draft environmental statement, the staff will prepare a final environmental statement, the availability of which will be published in the FEDERAL REGISTER.

Dated at Silver Spring, Maryland, this 23d day of September, 1977.

For the Nuclear Regulatory Commission.

W. T. Crow,
Fuel Processing and Fabrication Branch Division of Fuel Cycle and Material Safety.

[FR Doc. 77-28951 Filed 9-30-77; 8:45 am]

[7590-01]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS ENVIRONMENTAL SUBCOMMITTEE

Meeting

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the ACRS Environmental Subcommittee will hold an open meeting on October 20, 1977 in Room 1162, 1717 H St. NW., Washington, D.C. 20555. The purpose of this meeting is to review the concepts of Regulatory Guides 1.52 and 1.22, and Radiological Assessment Branch Technical Position (BTP) on Radiological Environmental Monitoring.

The agenda for subject meeting shall be as follows:

Thursday, October 20, 1977.

8:30 a.m. until conclusion of business. The Subcommittee may meet in Executive Session, with any of its consultants who may be present, to explore their preliminary opinions regarding matters which should be considered in order to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Subcommittee will meet to hear presen-

tations and hold discussions with representatives of the NRC Staff pertinent to this review.

At the conclusion of this session, the Subcommittee will caucus in order to determine whether the matters identified in the initial session have been adequately covered, and to formulate any recommendations the Subcommittee may wish to make to the full committee.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incomplete session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety and Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the radiological safety area.

With respect to public participation in the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than October 13, 1977 to Mr. Ragnwald Muller, ACRS, NRC, Washington, D.C. 20555, will normally be received in time to be considered at this meeting.

(b) Persons desiring to make an oral statement at the meeting should make a request to do so prior to the beginning of the meeting, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Subcommittee will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on October 19, 1977 to the Office of the Executive Director of the Committee (telephone 202-634-1413. Attn: Mr. Ragnwald Muller) between 8:15 a.m. and 5:00 p.m. EDT.

(d) Questions may be asked only by members of the Subcommittee, its consultants, and the Staff.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will be allowed while the meeting is in session at the discretion of the Chairman to a degree that is not disruptive to the meeting. When use of such equipment is permitted, appropriate measures will be taken to protect proprietary or privileged information which may be in documents, folders, etc. being used during the meeting. Records will be permitted only during those sessions of the meeting when a transcript is being kept.

(f) A copy of the transcript of the meeting where factual information is presented and a copy of the minutes of the meeting will be available for inspection on or after October 27, 1977 and January 20, 1978, respectively, at the NRC Public Document Room, 1717 H Street NW, Washington, D.C. 20555.

Copies may be obtained upon payment of appropriate charges.

Dated: September 29, 1977.

JOHN C. HOYLE,
Advisory Committee
Management Officer.

FR Doc. 77-29007 Filed 9-30-77; 9:45 am

[3110-01]

OFFICE OF MANAGEMENT AND
BUDGET
FEDERAL AUTOMATED INFORMATION
SYSTEM

On September 23, 1977, the Office of Management and Budget sent a Memorandum to the Heads of Executive Departments and Establishments concerning proposed policy for the security of Federal automated information systems (Circular No. A-71).

The purpose of this notice is to solicit comments from the public on this proposed policy. Comments should be forwarded to the Information Systems Policy Division, Office of Management and Budget, Washington D.C. 20503, on or before November 2, 1977.

VELMA N. BALDWIN,
Assistant to the Director
for Administration.

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington D.C. September 23, 1977.

To the Heads of Executive Departments and Establishments:

Subject: Proposed policy for the security of Federal automated information systems.

The attached draft memorandum supplements OMB Circular No. A-71 and provides policy guidance for developing and implementing a computer security program. Comments on the proposed policy should be forwarded to this office within 30 days. It is also requested that you provide estimates of both one-time and annually recurring resources required to implement the policy.

Questions should be addressed to the Information Systems Policy Division (202-395-4814).

WAYNE G. GRANQUIST,
Associate Director for Management
and Regulatory Policy.

Attachment.

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C.

Circular No. A-71—TRANSMITTAL
MEMORANDUM No. 1

To: The heads of executive departments and establishments

Subject: Security of Federal automated information systems

1. Purpose. This Transmittal Memorandum promulgates policy and responsibilities for the development and implementation of computer security programs by executive branch departments and agencies.

2. Background. Increasing use of computer and communications technology to improve the effectiveness of governmental programs has introduced a variety of new management problems. Many public concerns have been raised in regard to the risks associated with automated processing of personal, proprietary or other sensitive data. Problems have been encountered in the misuse of computer and communications technology to perpetrate crime. In other cases, inadequate administrative practices along with poorly designed computer systems have resulted in improper payments, unnecessary purchases or other improper actions. The policies and responsibilities for computer security established by this Transmittal Memorandum supplement those currently contained in OMB Circular No. A-71.

3. Responsibility of the heads of executive agencies. The head of each executive branch department and agency is responsible for assuring an adequate level of security for all agency data whether processed in-house or commercially. This includes responsibility for the establishment of physical, administrative and technical safeguards required to adequately protect personal, proprietary or other sensitive data not subject to national security regulations, as well as national security data. It also includes responsibility for assuring that automated processes operate effectively and accurately. In fulfilling this responsibility each agency head shall establish policies and procedures and assign responsibility for the development, implementation, and operation of an agency computer security program. The agency's computer security program shall be consistent with all Federal policies, procedures, standards and guidelines issued by the Office of Management and Budget, the General Services Administration, the Department of Commerce, and the Civil Service Commission. In consideration of problems which have been identified in relation to existing practices, each agency's computer security program shall at a minimum:

a. Assign responsibility for the security of each computer installation operated by the agency, including installations operated directly by or on behalf of the agency (e.g., government-owned contractor operated facilities), to a management official knowledgeable in data processing and security matters.

b. Establish personnel security policies for screening all individuals participating in the

design, operation or maintenance of Federal computer systems or having access to data in Federal computer systems. These policies should include, as appropriate, requirements for background investigations of both government and contractor personnel. Personnel security policies for Federal employees shall be consistent with policies issued by the Civil Service Commission.

c. Establish a management control process to assure that appropriate administrative, physical and technical safeguards are established for all new computer applications. While this control process should apply to all new computer applications, particular emphasis should be placed on computer applications intended to be used to issue checks, requisition supplies or perform similar functions based on programmed criteria with little or no human intervention (so-called automated decisionmaking systems). The management control process shall, at a minimum, include policies and responsibilities for:

(1) Defining and approving security specifications for all new computer applications and modifications to existing applications prior to programming such applications or changes. The views and recommendations of the computer user organization, the computer installation and the individual responsible for the security of the computer installation shall be sought and considered prior to the approval of the security specifications for the application.

(2) Conducting and approving design reviews and systems tests of new or changed computer applications prior to using them operationally. The objective of the design reviews should be to ascertain that the proposed design meets the approved security specifications. The objective of the system tests should be to verify that the planned administrative, physical and technical security requirements are operationally adequate prior to the use of the system. The results of the design review and system test shall be fully documented and maintained as a part of the official records of the agency. Upon completion of the system test, an official of the agency shall certify that the system meets the documented and approved system security specifications, meets all applicable Federal policies, regulations and standards, and that the results of the test demonstrate that the security provisions are adequate for the application.

d. Establish and agency program for conducting periodic audits and recertifying the adequacy of the security of each operational computer application which processes personal, proprietary or other sensitive data, or which issues checks, requisitions supplies or performs similar functions with little or no human intervention (automated decision-making applications). This audit and recertification process is to be conducted by technically qualified professionals in an organization independent of the user organization and computer facility manager. Periodic audits and recertification shall be performed at time intervals determined by the agency, commensurate with the sensitivity of information processed and the risk and magnitude of loss or harm that could result from the application operating improperly, but shall be conducted at least every three years.

e. Establish policies and responsibilities to assure that appropriate security requirements are included in specifications for the acquisition or operation of computer facilities, equipment, software, or related services,

whether produced by the agency or by the General Services Administration. These requirements shall be reviewed and approved by the management official assigned responsibility for security of the computer installation to be used. This individual must certify that the security requirements specified are adequate for the intended application and that they comply with current Federal computer security policies, procedures, standards and guidelines.

f. Assign responsibility for the conduct of periodic risk analyses for each computer installation operated by the agency, including installations operated directly by or on behalf of the agency. A risk analysis shall be performed:

(1) Prior to the approval of design specifications for new computer installations.

(2) Whenever there is a significant change to the physical facility, hardware or software at a computer installation. Agency criteria for defining significant changes shall be commensurate with the sensitivity of the information processed by the installation.

(3) At periodic intervals of time established by the agency, commensurate with the sensitivity of the information processed by the installation, but not to exceed three years, if no risk analysis has been performed during that time.

4. Responsibility of the Department of Commerce. The Secretary of Commerce shall develop and issue standards and guidelines for assuring security of automated information. Each standard shall, at a minimum, identify:

a. Whether the standard is mandatory or voluntary.

b. Specific implementation actions which agencies are required to take.

c. The time at which implementation is required.

d. A process for monitoring implementation of each standard and evaluating whether the standard is meeting its intended objectives.

e. Requirements for use of the standard in specifications for computer hardware, software or related services issued by the agency and the General Services Administration.

f. Requirements for use of the standard in specifications for the acquisition or construction of computer facilities.

g. The conditions or criteria under which waivers to the standards may be granted.

h. The procedures for granting waivers.

5. Responsibility of the General Services Administration. The Administrator of General Services shall:

a. Issue policies and regulations for the physical security of computer rooms in Federal buildings consistent with standards and guidelines issued by the Department of Commerce.

b. Assure that agency procurement requests for computers, software, and related services include security requirements which have been certified by a responsible agency official. Delegations of procurement authority to agencies by the General Services Administration under mandatory programs, dollar threshold delegations, certification programs or other so-called blanket delegations shall include requirements for agency specifications and certification of security requirements. Other delegations of procurement authority shall require specific agency certification of security requirements as a part of the agency request for delegation of procurement authority.

c. Assure that computer equipment, software, computer room construction, guard or custodial services, telecommunications services, and any other related services procured

by the General Services Administration meet the security requirements established by the user agency and are consistent with other applicable policies and standards issued by OMB, the Civil Service Commission and the Department of Commerce. Computer equipment, software, or related ADP services acquired by the General Services Administration in anticipation of future agency requirements shall include security safeguards which are consistent with mandatory standards established by the Secretary of Commerce.

6. Responsibility of the Civil Service Commission. The Chairman of the Civil Service Commission shall establish personnel security policies for Federal personnel associated with the design, operation or maintenance of Federal computer systems, or having access to data in Federal computer systems. These policies should emphasize personnel requirements to adequately protect personal, proprietary or other sensitive data not subject to national security regulations, as well as applications which issue checks, requisition supplies or perform similar functions based on programmed criteria with little or no human intervention. Background investigations of Federal personnel should be required, as appropriate, commensurate with the sensitivity of the data to be handled and the risk and magnitude of loss or harm that could be caused by the individual.

7. Reports. Within 60 days of the issuance of this Transmittal Memorandum, the Department of Commerce, General Services Administration and Civil Service Commission shall submit to OMB plans for fulfilling the responsibilities specifically assigned in this memorandum. Within 120 days of the issuance of this Transmittal Memorandum, each executive branch department and agency shall submit to OMB its plans, for implementing a security program consistent with the policies specified herein.

8. Inquiries. Questions regarding this memorandum should be addressed to the Information Systems Policy Division, 202-395-4814.

SMALL BUSINESS
ADMINISTRATION
MAXIMUM INTEREST RATES

Notice is given that the Small Business Administration ("SBA") has established the maximum rates of interest that lending institutions participating with SBA may charge on loans approved by SBA on and after October 1, 1977, under Section 7 of the Small Business Act, as amended, and Section 502 of the Small Business Investment Act, as amended.

Effective October 1, 1977, the maximum rate of interest acceptable to SBA on a guaranteed loan or a guaranteed revolving line of credit shall be nine and one-half percent (9½%) per year, and the maximum rate on an immediate participation loan shall be eight and one-half percent (8½%) per year. These maximum interest rates are the same as the rates published in the FEDERAL REGISTER on July 15, 1977 (42 FR 36586), and shall remain in effect until notification of a change is issued by SBA.

The "SBA Optional Peg Rate" for the October-December 1977 quarter will be

seven and one-eighth percent (7⅛%) per year.

This is an optional "peg" rate for use in connection with fluctuating-interest rate loans made in participation with SBA.

This Notice is issued under 13 CFR 120.3(b) (2) (iv).

DEPARTMENT OF STATE

Office of the Secretary
[Public Notice 570]

BUREAU OF OCEANS AND INTERNATIONAL ENVIRONMENTAL AND SCIENTIFIC AFFAIRS

Extension of Comment Period

The period for comments on the Draft Environmental Impact Statement for the new Panama Canal Treaty has been extended until October 13. The availability of the draft statement was announced in the FEDERAL REGISTER on August 29, 1977 (Public Notice No. 563, 42 FR 43466).

Copies of the draft environmental impact statement may be obtained from and comments should be submitted to William H. Mansfield III, Office of Environmental Affairs, Department of State, Room 7820, Washington, D.C. 20520.

For the Secretary of State.

LINDSEY GRANT,
Deputy Assistant Secretary, Environmental and Population Affairs.

SEPTEMBER 28, 1977.

DEPARTMENT OF
TRANSPORTATION

Federal Highway Administration

MEMORANDUM OF UNDERSTANDING BE-
TWEEN THE ECONOMIC DEVELOPMENT
ADMINISTRATION, DEPARTMENT OF
COMMERCE AND THE FEDERAL HIGH-
WAY ADMINISTRATION, DEPARTMENT
OF TRANSPORTATIONAGENCY: Federal Highway Adminis-
tration, DOT.ACTION: Notice of Memorandum of Un-
derstanding.

SUMMARY: This agreement is intended to facilitate the processing of direct or supplemental grant applications for road or highway projects under the Local Public Works Capital Development and Investment Act of 1976, 42 U.S.C. 6701 et seq., as amended. While the responsibilities of the Federal Highway Administration, Department of Transportation, with respect to this processing are delineated in the agreement, State and local governments must submit applications to the Economic Development Administration, Department of Commerce.

FOR FURTHER INFORMATION CON-
TACT:

Lawrence J. Roth, Office of the Chief Counsel (202-426-0754), Federal Highway Administration. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday-Friday.

The Memorandum of Understanding as set forth below between the Economic Development Administration, Department of Commerce, and the Federal Highway Administration, Department of Transportation, is published as a matter of public record.

I. INTRODUCTION.

The Local Public Works and Capital Development and Investment Act of 1976 (Act) 42 U.S.C. 6701 et seq., as amended by the Public Works Employment Act of 1977 (Pub. L. 95-28), authorizes the Secretary of Commerce, acting through the Economic Development Administration (EDA), to make direct grants to State or local governments (Eligible Applicant) and also to make grants supplementing other grant assistance received by an Eligible Applicant under any other Federal, State, or local law for local public works projects.

The Federal Highway Administration (FHWA), Department of Transportation, has authority to make grants for certain types of local public works projects, which projects could also be wholly funded or supplemented under the Act.

The FHWA and EDA wish to cooperate in order to facilitate the prompt and efficient delivery of the benefits conferred by the Act, and in furtherance of the intention, the parties hereby formalize this Memorandum of Understanding, which will establish certain procedures and agreements of the parties.

II. SUPPLEMENTAL GRANTS

A. In the event that FHWA allocates funds to a project as part of its grant approval process for the construction of the type of project contemplated by the Act, which project is apparently otherwise eligible for funding under the Act, the Eligible Applicant may request supplemental grant funds from EDA.

B. On request of the Eligible Applicant through the State highway agency, FHWA shall, within a period of 15 days from the receipt of the request, provide the Eligible Applicant with a Certificate, substantially in the form attached hereto and marked Exhibit A*, which attests to compliance with certain FHWA and EDA requirements.

III. GENERAL PROCEDURES FOR SUPPLEMENTAL GRANTS

A. EDA will, upon acceptance of the Supplemental Grant by the Eligible Applicant, transfer the funds to the FHWA by Form SF-1151 in accordance with the requirements of EDA Directive No. 4.06-1 (Accounting Systems Manual), a copy of which is attached hereto and marked Exhibit B*.

B. Within a reasonable period of time after final inspection and acceptance of the project, FHWA will advise EDA of project completion.

C. After the Supplemental Grant has been accepted, FHWA will assume full responsibility for the supervision of the project and disbursement of the grant funds.

D. The FHWA will comply with the reporting requirements for transferred funds as outlined in Exhibit B.

E. Disbursement of the Supplemental Grant will be in proportion to disbursements of all other funds available for the project and adequate safeguards will be established to eliminate the possibility of the Supplemental Grant exceeding the authorized percentage relationship to the total cost of the project.

F. If final eligible project costs are less than the estimated costs at the time of project approval, proportionate reductions will be made in the amount of the Supplemental Grant under this Act. However, any available supplemental grant funds resulting from such a shortfall in construction costs may be utilized for additional project construction, if approved by EDA. If no further construction is requested or if a request is not approved by EDA, such funds shall be promptly returned to EDA for deobligation, or such other action which EDA considers appropriate.

IV. DIRECT EDA GRANTS

In the case of a request for a direct grant, FHWA will cooperate with EDA by providing advisory assistance upon request from EDA.

In those cases where EDA and FHWA determine that it is in the Federal interest to administer a supplemental and direct grant as a combined project, the FHWA will administer such project in accordance with the supplemental grant provision of this memorandum.

V. PENDING APPLICATIONS WITH FEDERAL
HIGHWAY ADMINISTRATION (FHWA)

A. In the event that an Eligible Applicant requests authorization, through the State highway agency, from FHWA for the construction of the type of project contemplated by the Act, and FHWA lacks available funding for such project, yet the project is otherwise eligible for funding under the Act, the Eligible Applicant may apply for assistance from EDA under the Act.

B. On request of the Eligible Applicant, FHWA shall within a period of 30 days of receipt of the request, provide the Eligible Applicant with a Certificate, substantially in the form of Exhibit C*, which will certify to EDA regarding the following matters:

(1) That the proposed project is in conformity with FHWA general design, program, technical, statutory and regulatory standards.

(2) That there are no unusual aspects of the project, other than those noted in the Certificate, in connection with (1) above, that should be specifically considered by EDA in approving a grant to the Eligible Applicant;

(3) That there will be provided with the Certificate a copy of any environmental analysis or environmental impact statement that has been prepared in connection with this proposed project, and

(4) That the pending application of the Eligible Applicant has been withdrawn, without prejudice, and will not be further processed while it is under consideration by EDA.

VI. ADDITIONAL FUNDING PROGRAMS

In the event that there are future programs providing funding of facilities for which applications have already been received by EDA, but which applications either inadvertently did not include FHWA certification or such certification is not presently adequate in the opinion of EDA, FHWA agrees to provide the appropriate Regional Office of EDA with a Certificate pursuant to Section II or V hereof within 20 days of receipt of the Local Public Works Capital Development and Investment Program application by the FHWA Regional Office, if issuance of such a Certificate is appropriate. If a Certificate cannot be issued, FHWA will state the reasons for not issuing the Certificate.

*While the exhibits referred to are not being published they are available for inspection in the Office of Chief Counsel, FHWA.

EFFECTIVE DATE

The effective date of this Memorandum of Understanding shall be September 26, 1977.

For the Economic Development Administration, Department of Commerce.

ROBERT T. HALL,
Assistant Secretary for
Economic Development

For the Federal Highway Administration,
Department of Transportation.

WILLIAM M. COX,
Federal Highway Administrator.

DEPARTMENT OF THE TREASURY

United States Customs Service

COLUMBUS, N. MEX., CUSTOMS PORT
OF ENTRYDelay in Effective Date of Change in Hours
of ServiceAGENCY: United States Customs Service,
Department of the Treasury.

ACTION: Notice of delay in effective date.

SUMMARY: This notice delays from September 30, 1977, to October 17, 1977, the effective date of the reduction in the hours of service at the Customs port of entry at Columbus, N. Mex., from the current 24 hours a day to 16 hours a day. This delay is being made in order to reduce the impact the change in hours of service may cause.

DATES: The new hours will become effective October 17, 1977.

FOR FURTHER INFORMATION CON-
TACT:

Robert Schenarts, Operations Officer,
Inspection and Control Division, U.S.
Customs Service, 1301 Constitution
Avenue NW., Washington, D.C. 20229
(202-566-8151).

SUPPLEMENTAL INFORMATION: On September 15, 1977, the Customs Service published a notice in the FEDERAL REGISTER (42 FR 46452), announcing a reduction in the hours of service at the Customs port of entry at Columbus, N. Mex., from the current 24 hours a day to 16 hours a day. The reduction in regular hours of service is being taken because the volume of traffic at the port between the hours of Midnight and 8 a.m. does not warrant providing regular service during those hours. The reduced hours of service will permit better utilization of Customs manpower and will reduce the cost of Customs operations at the port. The new hours of service, from 8 a.m. to Midnight, were to have become effective on September 30, 1977.

In order to reduce the impact the change in hours of service may cause, the Customs Service is delaying the effective date of the change until October 17, 1977.

ROBERT E. CHASEN,
Commissioner of Customs.

Fiscal Service

[Dept. Circ. 570, 1977; Rev., Supp. No. 3]

SURETY COMPANIES ACCEPTABLE ON
FEDERAL BONDS

A certificate of authority as an acceptable surety on Federal bonds is here-

by issued by the Secretary of the Treasury to the following company under Sections 6 to 13 of Title 6 of the United States Code. An underwriting limitation of \$298,000 has been established for the company.

Name of Company, Business Address,
and State in Which Incorporated

Republic-Franklin Insurance Company
P.O. Box 1438
Columbus, Ohio 43216
Ohio

Certificates of authority expire on June 30 each year, unless sooner revoked, and new certificates are issued on July 1 so long as the companies remain qualified (31 CFR Part 223). A list of qualified companies is published annually as of July 1 in Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Copies of the circular, when issued, may be obtained from the Audit Staff, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226.

Dated: September 27, 1977.

D. A. PAGLIAI,
Commissioner, Bureau of
Government Financial Operations.

[4810-40]

Office of the Secretary

[Department circular; Public Debt Series—
No. 23-77]TREASURY NOTES OF NOVEMBER 15,
1982

Series F-1982

SEPTEMBER 28, 1977.

1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately \$2,500,000,000 of United States securities, designated Treasury Notes of November 15, 1982, Series F-1982 (CUSIP No. 912827 HB 1). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the prime equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

1.2. If the interest rate determined in accordance with this circular is identical to the rate on an outstanding issue of United States notes, and the terms and conditions of such outstanding issue are otherwise identical to terms and conditions of the securities offered by this circular, this shall be considered an invitation for an additional amount of the outstanding securities and this circular will be amended accordingly. Payment for the securities in that event will be calculated on the basis of the auction price determined in accordance with this circular plus accrued interest from the last preceding interest payment date on the outstanding securities.

2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated October 17, 1977, and will bear interest from that date, payable on a semiannual basis on May 15, 1978, and each subsequent 6 months on November 15 and May 15 until the principal becomes payable. They will mature November 15, 1982, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of \$1,000, \$5,000, \$10,000, \$100,000, and \$1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Wednesday, October 5, 1977. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, October 4, 1977.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is \$1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed \$1,000,000.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the

deadline established in Section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as lenders who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowing on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5% of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full at the weighted average price (in three decimals) of accepted competitive tenders, and competitive tenders with the lowest yields will be accepted to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a $\frac{1}{8}$ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 98.750. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination

of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the weighted average price of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full or when the price is over par.

4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Monday, October 17, 1977, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Thursday, October 13, 1977, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Wednesday, October 12, 1977, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted se-

curities are not required to be assigned. If the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the descriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for securities offered by this circular" in the name of (name and taxpayer identifying number). If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

DAVID MOSSO,
Fiscal Assistant Secretary.

INTERSTATE COMMERCE COMMISSION

[Notice No. 123TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

The following are notices of filing of applications for temporary authority

under Section 210(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six(6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 720 (Sub-No. 34TA), filed September 13, 1977. Applicant: BIRD TRUCKING COMPANY, INC., P.O. Box 227, Waupun, Wis. 53968. Applicant's representative: Wayne Wilson, 329 W. Madison, Wis. 53708. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Canned vegetables, from Clintonville, Antigo, Cambria, and Markesan, Wis., to Alabama, Florida, Georgia, North Carolina, South Carolina, Tennessee, Virginia, Mississippi, Texas, Massachusetts, New York, and Connecticut, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Fall River Canning Co., P.O. Box 68, Fall River, Wis. 53932, (Ruby S. Yohn). Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building & Courthouse, 517 East Wisconsin Avenue, Room 619, Milwaukee, Wis. 53202.

No. MC 12078 (Sub-No. 744TA), filed August 29, 1977. Applicant: SCHWERTMAN TRUCKING CO., 611 South 28th St., Milwaukee, Wis. 53246. Applicant's representative: Mr. Richard H. Prevette (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Fertilizer and fertilizer materials, in bulk, from the facilities of CF Industries, Inc. at or near Albany,

Ill., to points in Illinois, Iowa, Minnesota, and Wisconsin, for 180 days. Supporting shipper: There are approximately 5 statements of support attached to the application which may be examined at Interstate Commerce Commission in Washington, D.C., or copies thereof may be examined at the field office below. Send protest to: Gail Daugherty, Transportation Asst. Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building & Courthouse, 517 East Wisconsin Ave., Rm. 619, Milwaukee, Wis. 53202.

No. MC 19553 (Sub-No. 38TA), filed August 31, 1977. Applicant: KNOX MOTOR SERVICES, INC., 5680 Eleventh Street, P.O. Box 359, Rockford, Ill. 61105. Applicant's representative: Eugene L. Cohn, One North LaSalle Street, Chicago, Ill. 60602. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: General commodities (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment). Applicant requests authority to operate from, to and between the following points, over regular routes: Between Milwaukee, Racine, and Kenosha, Wis., to the following Illinois points, as intermediate or off-route points: Bondville, Champaign, Charleston, Chrisman, Danville, Fairbury, Gibson City, Hoopeston, Mahomet, Mattoon, Milford, Monticello, Paris, Paxton, Pontiac, Rantoul, Tilton, Tolono, Tuscola, Urbana and Watseka; (1) over presently authorized regular routes to junction U.S. Highway 30; (2) from junction U.S. Highway 30 and Illinois Highway 1, via Illinois Highway 1 to junction Illinois Highway 16; thence via Illinois Highway 16 to junction Illinois Highway 45; thence via Illinois Highway 45 to junction Illinois Highway 121; thence via Illinois Highway 121 to junction Illinois Highway 32; (3) from junction U.S. Highway 30 and Illinois Highway 1, via Illinois Highway 1 to junction U.S. Highway 36; thence via U.S. Highway 36 to junction Illinois Highway 32; (also via Illinois Highway 1 to junction U.S. Highway 1-74; thence via U.S. Highway 1-74 to junction U.S. Highway 136; thence via U.S. Highway 136 to junction U.S. Highway 51);

(4) From junction U.S. Highway 30 and U.S. Highway I-57, via U.S. Highway I-57 to junction Illinois Highway 16; thence via Illinois Highway 16 to junction Illinois Highway 32; (5) from junction U.S. Highway 30 and U.S. Highway I-57; thence via U.S. Highway I-57 to junction U.S. Highway I-72; thence via U.S. Highway I-72 to junction U.S. Highway 51; thence via U.S. Highway 51 to junction U.S. Highway 136; (13) from junction U.S. Highway 30 and Illinois Highway 47; thence via Illinois Highway 47 to junction U.S. Highway I-72; thence via U.S. Highway I-72 to junction U.S. Highway 51; thence via U.S. Highway 51 to junction U.S. Highway 136; (14) from junction U.S. Highway 30 and Illinois Highway 47 via Illinois Highway 47 to junction U.S. Highway 24; thence via U.S. Highway 24 to U.S. Highway I-55; thence via U.S. Highway I-55 to U.S. Highway 51; thence via U.S. Highway 51 to junction U.S. Highway 136; (15) from junction of Illinois Highway 1 and U.S. Highway 24; thence along U.S. Highway 24 to junction with U.S. Highway I-57; (16) from the junction of Illinois Highway 1 and Illinois Highway 9; thence along U.S. Highway 9 to junction with Illinois Highway 47; (17) from junction of Illinois Highway 1 and U.S. Highway 52; thence along U.S. Highway 52 to junction U.S. Highway 45. Return over the same routes with tacking at all points of joinder with each other and with authorized regular and irregular routes and serving the points of Milwaukee, Racine, and Kenosha, Wis., and all of the above-named Illinois points and the commercial zones of all of the aforesaid Wisconsin and Illinois points as intermediate and off-route points, for 180 days. Applicant has also filed an underlying ETA seeking up to

Illinois Highway 16 to junction Illinois Highway 32 (also via U.S. Highway I-57 to junction U.S. Highway 24; thence via U.S. Highway 24 to junction U.S. Highway I-55; thence via U.S. Highway I-55 to junction U.S. Highway 51; thence via U.S. Highway 51 to junction U.S. Highway 136); (8) from junction U.S. Highway 30 and U.S. Highway 45; thence via U.S. Highway 45 to junction Illinois Highway 121; thence via Illinois Highway 121 to Illinois Highway 32; (9) from U.S. Highway 30 and U.S. Highway 45 via U.S. Highway 45 to junction Illinois Highway 116; thence via Illinois Highway 116 to junction U.S. Highway I-55; thence via U.S. Highway I-55 to junction U.S. Highway 136; (10) from junction U.S. Highway 30 and U.S. Highway 45 via U.S. Highway 45 to junction Illinois Highway 10; thence via Illinois Highway 10 to junction U.S. Highway I-72; thence via Illinois Highway I-72 to junction U.S. Highway 51; thence via U.S. Highway 51 to junction U.S. Highway 136; (11) from junction U.S. Highway 30 and U.S. Highway I-55; thence via U.S. Highway I-55 to junction Illinois Highway 23; thence via Illinois Highway 23 to junction Illinois Highway 116; thence via Illinois Highway 116 to junction U.S. Highway I-55; thence via U.S. Highway I-55 to junction U.S. Highway 51; thence via U.S. Highway 51 to junction U.S. Highway 136;

(12) From junction U.S. Highway 30 and Illinois Highway 59; thence via U.S. Highway 59 to junction U.S. Highway I-55; thence via U.S. Highway I-55 to junction Illinois Highway 47; thence via Illinois Highway 47 to junction Illinois Highway 9; thence via Illinois Highway 9 to junction U.S. Highway 51; thence via U.S. Highway 51 to junction U.S. Highway 136; (13) from junction U.S. Highway 30 and Illinois Highway 47; thence via Illinois Highway 47 to junction U.S. Highway I-72; thence via U.S. Highway I-72 to junction U.S. Highway 51; thence via U.S. Highway 51 to junction U.S. Highway 136; (14) from junction U.S. Highway 30 and Illinois Highway 47 via Illinois Highway 47 to junction U.S. Highway 24; thence via U.S. Highway 24 to U.S. Highway I-55; thence via U.S. Highway I-55 to U.S. Highway 51; thence via U.S. Highway 51 to junction U.S. Highway 136; (15) from junction of Illinois Highway 1 and U.S. Highway 24; thence along U.S. Highway 24 to junction with U.S. Highway I-57; (16) from the junction of Illinois Highway 1 and Illinois Highway 9; thence along U.S. Highway 9 to junction with Illinois Highway 47; (17) from junction of Illinois Highway 1 and U.S. Highway 52; thence along U.S. Highway 52 to junction U.S. Highway 45. Return over the same routes with tacking at all points of joinder with each other and with authorized regular and irregular routes and serving the points of Milwaukee, Racine, and Kenosha, Wis., and all of the above-named Illinois points and the commercial zones of all of the aforesaid Wisconsin and Illinois points as intermediate and off-route points, for 180 days. [Notice No. 124TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATION

SEPTEMBER 26, 1977.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than October 18, 1977. One copy of the protest must be served on the applicant, or its authorized representatives, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 2900 (Sub-No. 312TA), filed September 7, 1977. Applicant: RYDER TRUCK LINES, INC., 2050 Kings Road, P.O. Box 2408, Jacksonville, Fla. 32209. seeking up to 90 days of operating authority. Supporting shipper(s): Florida Tile—Sikes Corp., P.O. Box 81, Lawrenceburg, Ky. 40342. Send protests to: Donna M. Jones Transportation Assistant, Interstate Commerce Commission, Monterey Building, Suite 101, 8410 Northwest 53d Terrace, Miami, Fla. 33166.

No. MC 143636 (Sub-No. 1 TA), filed September 9, 1977. Applicant: RON SMITH TRUCKING, INC., R.R. No. 3, Arcola, Ill. 61910. Applicant's representative: John L. Jenkins, R.R. No. 3, Arcola, Ill. 61910. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: Coal, in bulk, in dump vehicles, from points in Douglas, Edgar and Vermillion Counties, Ill., to the facilities of The Public Service Company of Indiana Inc., in Vermillion and Vigo Counties, Ind., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): J. P. Masselink Fuel Manager, Public Service Co. of Indiana, Inc., 1000 E. Main Street, Plainfield, Ind. 46168. Send protests to: District Supervisor, Interstate Commerce Commission, P.O. Box 2418, Springfield, Ill. 62705.

No. MC 143669TA, filed September 1, 1977. Applicant: TOWPICH EXPRESS LINES, LTD., 2840 58th Avenue SE., Calgary, Alberta, Can. T2C 0B8. Applicant's representative: George Robert Crotty, Jr., 400 First National Bank Bldg., Great Falls, Mont. 59401. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural fertilizers, herbicides, fungicides, pesticides, insecticides and ingredients thereof*, in ocean going containers on specially designed wheeled under-carriages, having a prior water-rail move in foreign commerce from the port of entry at the United States-Canada International Boundary line at or near Sweetgrass, Mont., to points in Montana, Idaho, Washington, and Utah, for 180 days. Applicant intends to tack with its Canadian authority. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Geoff Hogan, Manager Western Region, Manchester Liners Limited, No. 406, 131-9 Avenue SW., Calgary, Alberta, Canada. Geoff Hogan, Manager Western Region, Canadian Pacific Ships, No. 406, 131-9 Avenue SW., Calgary, Alberta, Canada. Send protests to: District Supervisor Paul J. Labane, Interstate Commerce Commission, 2602 First Avenue North, Billings, Mont. 59101.

No. MC 143694TA, filed September 12, 1977. Applicant: PRESTON W. ALBERT, d.b.a. TIGATOR TRUCKING SERVICE, Rt. 1, Box 18, Talbot Road, Plaquemine, La. 70764. Applicant's representative: J. H. Campbell, Jr., P.O. Box 1748 (8686 Anselmo Lane), Baton Rouge, La. 70821. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Beef*, from

Amarillo, Tex., to Baton Rouge, La., restricted to a transportation service performed under a continuing contract, or contracts, with Associated Grocers, Inc., for 180 days. Supporting shipper(s): Associated Grocers, Inc. P.O. Box 1748, Baton Rouge, La. 70821. Send protests to: Ray C. Armstrong, Jr., District Supervisor, 701 Loyola Avenue, 9038 Federal Building, New Orleans, La. 70113.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

IRREGULAR-ROUTE COMMON CARRIERS OF PROPERTY—ELIMINATION OF GATEWAY LETTER NOTICES

SEPTEMBER 23, 1977.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before October 13, 1977. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC 60014 (Sub-No. E33) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 9, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that, or provided that, the loading or unloading which necessitates the special equipment, is performed by the consignor or consignee, or both, between points in New Jersey, on the one hand, and, on the other, points in Maine. The purpose of this filing is to eliminate the gateway of points in New York within 10 miles of Greenwich, Conn.; and points in Massachusetts within 35 miles of Boston, and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway to be eliminated.

No. MC 60014 (Sub-No. E37) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 9, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that, or provided that, the loading or unloading which necessitates the special equipment, is performed by the consignor or consignee, or both, between those points in New Jersey on and east of a line beginning at the Pennsylvania-New Jersey State line and extending along New Jersey Highway 94 to junction New Jersey Highway 521, thence along New Jersey Highway 521 to junction New Jersey Highway 519, thence along New Jersey Highway 519 to junction New Jersey Highway 23, thence along New Jersey Highway 23 to junction New Jersey Highway 284, thence along New Jersey Highway 284 to the New Jersey-New York State line, on the one hand, and, on the other, those points in Vermont on and east of a line beginning at the United States-Canada International Boundary line, and extending along Vermont Highway 105 to junction Vermont Highway 101, thence along Vermont Highway 101 to junction Vermont Highway 100, thence along Vermont Highway 100 to junction Vermont Highway 15/15A, thence along Vermont Highway 15/15A to junction Vermont Highway 15, thence along Vermont Highway 15 to junction U.S. Highway 2, thence along U.S. Highway 2 to junction U.S. Highway 302, thence along U.S. Highway 302 to junction Vermont Highway 110, thence along Vermont Highway 110 to junction Vermont Highway 14, thence along Vermont Highway 14 to junction Vermont Highway 107, thence along Vermont Highway 107 to junction Vermont Highway 12, thence along Vermont Highway 12 to junction Vermont Highway 106, thence along Vermont Highway 106 to junction Vermont Highway 131, thence along Vermont Highway 131 to the Vermont-New Hampshire State line, those in New Hampshire on and northeast of a line beginning at the Vermont-New Hampshire State line, and extending along New Hampshire Highway 12/103, thence along New Hampshire Highway 12/103 to junction New Hampshire Highway 11/103, thence along New Hampshire Highway 11/103 to junction New Hampshire Highway 31, thence along New Hampshire Highway 31 to junction New Hampshire Highway 10, thence along New Hampshire Highway 10 to junction New Hampshire Highway 12, thence along New Hampshire Highway 12 to the New Hampshire-Massachusetts State line, and those in Rhode Island on and north of Interstate Highway 6. The purpose of this filing is to eliminate the gateways of New York within 10 miles of Greenwich, Conn.; Greenwich, Conn.; and points in Massachusetts within 35 miles of Boston, and

points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this filing is to correct the territorial description and the gateway elimination territory.

No. MC 60014 (Sub-No. E40) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 9, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that, or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, between points in Maryland, on the one hand, and, on the other, points in Maine, New Hampshire, those in Vermont on and east of a line beginning at the United States-Canada International Boundary line and extending along Vermont Highway 105 to junction Vermont Highway 101, thence along Vermont Highway 101 to junction Vermont Highway 100, thence along Vermont Highway 100 to junction Vermont Highway 30, thence along Vermont Highway 30 to junction U.S. Highway 5, thence along U.S. Highway 5 to the Vermont-Massachusetts State line, those in Rhode Island on and north of a line beginning at the Connecticut-Rhode Island State line and extending along Rhode Island Highway 165 to junction Rhode Island Highway 102, thence along Rhode Island Highway 102 to junction U.S. Highway 1-A, thence along U.S. Highway 1-A to Rhode Island Sound, and those in Massachusetts on and east of U.S. Highway 5. The purpose of this filing is to eliminate the gateways of points in New York within ten miles of Greenwich, Conn.; and points in Massachusetts within 35 miles of Boston, and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this filing is to correct the gateway territorial description.

No. MC 60014 (Sub-No. E45) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 9, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that, or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, between points in Delaware, on the one hand, and, on the other, points in Maine. The purpose of this filing is to eliminate the

gateways of points in New York within ten miles of Greenwich, Conn., Greenwich, Conn., and points in Massachusetts within 35 miles of Boston, and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E46) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 24, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that, or provided that, the loading or unloading which necessitate the special equipment, is performed by the consignor or consignee, or both, between points in Delaware, on the one hand, and, on the other, points in New Hampshire, Rhode Island, and those in Vermont on and east of a line beginning at Champlain, and extending along U.S. Highway 7 to junction Vermont Highway 103, thence along Vermont Highway 103 to junction Vermont Highway 155, thence along Vermont Highway 155 to junction Vermont Highway 100, thence along Vermont Highway 100 to junction Vermont Highway 30, thence along Vermont Highway 30 to junction U.S. Highway 5, thence along U.S. Highway 5 to the Vermont-Massachusetts State line. The purpose of this filing is to eliminate the gateways of points in New York within ten miles of Greenwich, Conn.; and points in Massachusetts within 35 miles of Boston, and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E49) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 9, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, which by reason of size or weight require the use of special equipment, from points in New York to points in Kentucky, Mississippi, Alabama, those in Tennessee on and west of a line beginning at the Virginia-Tennessee State line, and extending along Tennessee Highway 33 to junction Tennessee Highway 31, thence along Tennessee Highway 31 to junction U.S. Highway 11W, thence along U.S. Highway 11W to junction U.S. Highway 25E, thence along U.S. Highway 25E to junction Tennessee Highway 32, thence along Tennessee Highway 32 to junction U.S. Highway 11W, thence along U.S. Highway 11W to junction Interstate Highway 40, thence along Interstate Highway 40 to the Tennessee-North Carolina State line. The

purpose of this filing is to eliminate the gateways of Wheeling and Beechbottom, W. Va.

NOTE.—The purpose of this correction is to state the correct territorial description.

No. MC 60014 (Sub-No. E52) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 9, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that, or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, from those points in New York on and south of a line beginning at Lake Erie and extending along U.S. Highway 20 to junction New York Highway 12, thence along New York Highway 12 to junction New York Highway 23, thence along New York Highway 23 to junction New York Highway 8, thence along New York Highway 8 to junction New York Highway 206, thence along New York Highway 206 to junction New York Highway 30, thence along New York Highway 30 to junction New York Highway 28, thence along New York Highway 28 to junction New York Highway 199, thence along New York Highway 199 to junction U.S. Highway 44, thence along U.S. Highway 44 to the New York-Connecticut State line, to those points in Maine on and east of a line beginning at the United States-Canada international boundary line and extending along Maine Highway 11 to junction Interstate Highway 95, thence along Interstate Highway 95 to junction U.S. Alternate Highway 1, thence along U.S. Alternate Highway 1 to junction U.S. Highway 1, thence along U.S. Highway 1 to Penobscot Bay. The purpose of this filing is to eliminate the gateways of points in New York within ten miles of Greenwich, Conn., Greenwich, Conn., and points in Massachusetts on and east of U.S. Highway 5, and points in Massachusetts within 35 miles of Boston.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E68) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 15, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that, or provided that, the loading or unloading, which necessitates the special equipment, is performed by the consignor or consignee, or both, between those points in Michigan on and north of a line beginning at Lake Huron line and extend-

ing along Michigan Highway 21 to junction Michigan Highway 78, thence along Michigan Highway 78 to junction U.S. Highway 127, thence along U.S. Highway 127 to junction Michigan Highway 12, thence along Michigan Highway 12 to junction Michigan Highway 66, thence along Michigan Highway 66 to the Michigan-Indiana State line, on the one hand, and, on the other, those points in Vermont on and east of a line beginning at the United States-Canada International boundary line and extending along U.S. Highway 5, to junction U.S. Highway 302, thence along U.S. Highway 302 to the Vermont-New Hampshire State line. The purpose of this filing is to eliminate the gateway of Columbiana, Cuyahoga, Mahoning, Summit, and Trumbull Counties, Ohio; Pennsylvania; points in New York within 10 miles of Greenwich, Conn.; Greenwich, Conn.; and points in Massachusetts within 35 miles of Boston, and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E69) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of September 8, 1975, and republished as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that, or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, between points in Virginia, on the one hand, and, on the other, points in Maine, New Hampshire, those in Vermont on and east of a line beginning at the Canada-United States international boundary line and extending along Vermont Highway 105 to junction Vermont Highway 101, thence along Vermont Highway 101 to junction Vermont Highway 100, thence along Vermont Highway 100 to junction U.S. Highway 4, thence along U.S. Highway 4 to junction Vermont Highway 100, thence along Vermont Highway 100 to the junction Vermont Highway 30, thence along Vermont Highway 30 to junction U.S. Highway 5, thence along U.S. Highway 5 to the Vermont-Massachusetts State line, those in Massachusetts on and east of a line beginning at the Massachusetts-Connecticut State line and extending along Massachusetts Highway 8 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Massachusetts Highway 9/8A, thence along Massachusetts Highway 9/8A to junction Massachusetts Highway 116, thence along Massachusetts Highway 116 to junction Massachusetts Highway 8A, thence along Massachusetts Highway 8A to the Massachusetts-Vermont State line, and those in Rhode Island on and north of a line beginning at the Connecticut-Rhode Island State line and extending along

Rhode Island Highway 165 to junction Rhode Island Highway 102, thence along Rhode Island Highway 102 to junction U.S. Highway 1A, thence along U.S. Highway 1A to Narragansett Bay. The purpose of this filing is to eliminate the gateways of points in New York within 10 miles of Greenwich, Conn.; Greenwich, Conn.; and points in Massachusetts within 35 miles of Boston, and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E81) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of October 21, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, the transportation of which, by reason of their size or weight, requires the use of special equipment, between those points in West Virginia on, north and east of a line beginning at the Ohio-West Virginia State line and extending along U.S. Highway Alternate Highway 50 to junction West Virginia Highway 16, thence along West Virginia Highway 16 to junction West Virginia Highway 5, thence along West Virginia Highway 5 to junction U.S. Highway 19, thence along U.S. Highway 19 to junction U.S. Highway 60, thence along U.S. Highway 60 to the West Virginia-Virginia State line, on the one hand, and, on the other, those points in Michigan, and between points in West Virginia, on the one hand, and, on the other, those points in the Upper Peninsula of Michigan on and north of a line beginning at the United States-Canada international boundary line and extending along Interstate Highway 75 to junction U.S. Highway 2, thence along U.S. Highway 2 to the Michigan-Wisconsin State line. The purpose of this filing is to eliminate the gateways of Brooke, Hancock, Marshall, and Ohio Counties, W. Va.; Columbiana, Cuyahoga, Mahoning, Summit, and Trumbull Counties, Ohio; and points in that part of Ohio on and east of a line extending from Mansfield to Pomeroy, Ohio, along Ohio Highway 13 to junction thereof with U.S. Highway 33, thence along U.S. Highway 33 to Pomeroy, and, on and south of U.S. Highway 30 extending from Mansfield to the Ohio-West Virginia State line.

NOTE.—The purpose of this correction is to state the correct territorial description.

No. MC 60014 (Sub-No. E84) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of September 8, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular

routes, transporting: *Iron and steel articles*, requiring special equipment, restricted so that, or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, from points in Rhode Island, to those points in Alabama on and west of a line beginning at the Tennessee-Alabama State line and extending along U.S. Highway 231 to junction Alabama Highway 79, thence along Alabama Highway 79 to junction U.S. Highway 11, thence along U.S. Highway 11 to junction Alabama Highway 5, thence along Alabama Highway 5 to junction Alabama Highway 219, thence along Alabama Highway 219 to junction Alabama Highway 41, thence along Alabama Highway 41 to the Alabama-Florida State line. The purpose of this filing is to eliminate the gateways of points in Massachusetts within 35 miles of Boston; Greenwich, Conn.; points in New York within 10 miles of Greenwich, Conn.; and Wheeling and Beechbottom, W. Va.; and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E85) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 21, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, requiring special equipment, restricted so that or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, from those points in Rhode Island on and east of a line beginning at the Atlantic Ocean and extending along Rhode Island Highway 2/112 to junction Rhode Island Highway 112, thence along Rhode Island Highway 112 to junction Rhode Island Highway 3, thence along Rhode Island Highway 3 to junction Rhode Island Highway 102, thence along Rhode Island Highway 102 to the Rhode Island-Massachusetts State line, to points in Alabama. The purpose of this filing is to eliminate the gateways of points in Massachusetts within 35 miles of Boston; Greenwich, Conn.; points in New York within 10 miles of Greenwich, Conn.; and Wheeling and Beechbottom, W. Va.; and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E86) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 21, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier,

by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, requiring special equipment so that or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, from points in Rhode Island to those in Tennessee on and west of a line beginning at the Kentucky-Tennessee State line and extending along Tennessee Highway 216 to junction Tennessee Highway 52, thence along Tennessee Highway 52 to junction Tennessee Highway 136 to junction Tennessee Highway 136 to junction Tennessee Highway 42, thence along Tennessee Highway 42 to junction Highway 70S, thence along U.S. Highway 70S to the junction Tennessee Highway 55, thence along Tennessee Highway 55 to junction U.S. Highway Alt. 41, thence along U.S. Highway Alt. 41 to junction U.S. Highway 64, thence along U.S. Highway 64 to junction Tennessee Highway 97, thence along Tennessee Highway 97 to the Tennessee-Alabama State line. The purpose of this filing is to eliminate the gateways of Boston, Mass.; and points in Massachusetts within 35 miles of Boston; Greenwich, Conn.; points in New York within 10 miles of Greenwich, Conn.; and Wheeling and Beechbottom, W. Va.; and point in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E87) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 21, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, requiring special equipment, restricted so that or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, from those points in Rhode Island on and east of a line beginning at the Massachusetts-Rhode Island State line and extending along Rhode Island Highway 24 to junction Rhode Island Highway 114, thence along Rhode Island Highway 114 to junction Rhode Island Highway 103, thence along Rhode Island Highway 103 to junction U.S. Highway 1, thence along U.S. Highway 1 to junction Rhode Island Highway 146, thence along Rhode Island Highway 146 to the Rhode Island-Massachusetts State line, to points in Tennessee. The purpose of this filing is to eliminate the gateways of points in Massachusetts within 35 miles of Boston; Greenwich, Conn.; and Wheeling and Beechbottom, W. Va.; and points in Massachusetts on the east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E88) (correction), filed June 4, 1974, published in the

FEDERAL REGISTER issue of July 21, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, requiring special equipment, restricted so that or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, from points in Rhode Island to those points in Kentucky on and west of a line beginning at the West Virginia-Kentucky State line and extending along U.S. Highway 119 to junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction Interstate Highway 75, thence along Interstate Highway 75 to the Kentucky-Tennessee State line. The purpose of this filing is to eliminate the gateways of points in Massachusetts within 35 miles of Boston; Greenwich, Conn.; points in New York within 10 miles of Greenwich, Conn.; and Wheeling and Beechbottom, W. Va.; and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this filing is to state the correct gateway territory.

No. MC 60014 (Sub-No. E89) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 21, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, requiring special equipment, restricted so that or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, from those points in Rhode Island on and east of a line beginning at the Connecticut-Rhode Island State line and extending along Rhode Island Highway 101 to junction Rhode Island Highway 102, thence along Rhode Island Highway 102 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction Interstate Highway 295, thence along Interstate Highway 295 to junction Rhode Island Highway 2, thence along Rhode Island Highway 2 to junction Rhode Island Highway 4, thence along Rhode Island Highway 4 to junction Rhode Island Highway 138, thence along Rhode Island Highway 138 to the Rhode Island-Massachusetts State line, to points in Kentucky. The purpose of this filing is to eliminate the gateways of points in Massachusetts within 35 miles of Boston; Greenwich, Conn.; points in New York within 10 miles of Greenwich, Conn.; and Wheeling and Beechbottom, W. Va.; and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this filing is to state the correct gateway territory.

No. MC 60014 (Sub-No. E114) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 21, 1975, and republished as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Machinery, materials, supplies, and equipment*, incidental to, or used in the construction, development, and production of natural gas, and petroleum, the transportation of which, by reason of their size or weight, requires the use of special equipment, between points in Fulton, Hickman, Carlisle, Ballard, McCracken, Graves, Marshall, Lyon, Livingston, Crittenden, Hopkins, Union, Henderson, Daviess, McLean, Muhlenberg, Butler, Ohio, Hancock, Breckinridge, Grayson, Edmonson, Warren, Hardin, Meads, Nelson, Bullitt, Jefferson, Caldwell, Spencer, Anderson, Shelby, Oldham, Trimble, Henry, Carroll, Gallatin, Owen, Franklin, Woodford, Fayette, Scott, Grant, Boone, Kenton, Campbell, Pendleton, Harrison, Bourbon, Clark, Nicholas, Robertson, Bracken, Mason, Fleming, Bath, Morgan, Johnson, Pike, Martin, Lawrence, Elliott, Carter, Boyd, Greenup, and Lewis County, Ky., on the one hand, and, on the other, points in Delaware, District of Columbia, Maryland, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, points in Massachusetts within 35 miles of Boston, and points in Virginia east of a line beginning at the West Virginia-Virginia State line. The purpose of this filing is to eliminate the gateways of (1) West Virginia; (2) Pennsylvania; (3) New York; and (4) points in Massachusetts within 35 miles of Boston; (5) points in Massachusetts east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway.

No. MC 60014 (Sub-No. E118) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of August 25, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, which by reason of size or weight require the use of special equipment, from points in Pennsylvania to points in Mississippi, Kentucky, Alabama, and those in Tennessee on and west of a line beginning at the Tennessee-Virginia State line and extending along Tennessee Highway 63 to junction U.S. Highway 25W, thence along U.S. Highway 25W to junction Tennessee Highway 55, thence along Tennessee Highway 55 to junction U.S. Highway 11, thence along U.S. Highway 11 to junction Tennessee Highway 30, thence along Tennessee Highway 30 to junction U.S. Highway 411, thence

along U.S. Highway 411 to the Tennessee-Georgia State line. The purpose of this filing is to eliminate the gateway of Wheeling, W. Va.

NOTE.—The purpose of this filing is to correct the E number to read E118 instead of E24 and correct the territorial description.

No. MC 60014 (Sub-No. E120) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 9, 1975, and August 25, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, between those points in Pennsylvania on and south of Interstate Highway 80 on the one hand, and, on the other, those points in Vermont on and east of U.S. Highway 5. The purpose of this filing is to eliminate the gateway of points in New York within 10 miles of Greenwich, Conn.; Greenwich, Conn.; and points in Massachusetts within 35 miles of Boston, Mass.; and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E122) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of August 25, 1975 as (Sub-No. E20), and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that, or provided that, the loading or unloading which necessitate the special equipment, is performed by the consignor or consignee, or both, between those points in Pennsylvania on and west of a line beginning at the New York-Pennsylvania State line and extending along Pennsylvania Highway 171 to junction Pennsylvania Highway 247, thence along Pennsylvania Highway 247, to junction Pennsylvania Highway 348, thence along Pennsylvania Highway 348 to junction Pennsylvania Highway 191, thence along Pennsylvania Highway 191 to the Pennsylvania-New Jersey State line, on the one hand, and, on the other, those points in Rhode Island on and east of Interstate Highway 95. The purpose of this filing is to eliminate the gateways of points in New York within 10 miles of Greenwich, Conn.; Greenwich, Conn.; and points in Massachusetts within 35 miles of Boston, and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E125) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of October 1, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William R. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Building, roofing and insulating material*, requiring special equipment, restricted so that, or provided that, the loading or unloading which necessitate the special equipment, is performed by the consignor, or consignee, or both (except in bulk), from the plantsite of Johns Manville Perlite Corp., Rockdale, Ill., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, Rhode Island, Vermont, Virginia, and the District of Columbia (Pennsylvania); points in New York within 10 miles of Greenwich, Conn.; Greenwich, Conn., and points in Massachusetts within 35 miles of Boston); *Cement pipe* containing asbestos fibre, requiring special equipment, restricted so that, or provided that the loading or unloading, which necessitates the special equipment, is performed by the consignor or consignee or both, from Waukegan, Ill., to points in Virginia (West Virginia)*, Connecticut, Delaware, Maine, Maryland, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, those in Massachusetts on and east of a line beginning at the Vermont-Massachusetts state line and extending along Massachusetts Highway 8 to junction Massachusetts Highway 2, thence along Massachusetts Highway 2 to junction Massachusetts Highway 8A, thence along Massachusetts Highway 8A to junction Massachusetts Highway 116, thence along Massachusetts Highway 116 to junction Massachusetts Highway 8A, thence along Massachusetts Highway 8A to junction Massachusetts Highway 9, thence along Massachusetts Highway 9 to junction Massachusetts Highway 112, thence along Massachusetts Highway 112 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Massachusetts Highway 8, thence along Massachusetts Highway 8 to the Massachusetts-Connecticut State line; and those in Vermont on and east of a line beginning at the United States-Canada International Boundary line and extending along Vermont Highway 5 to junction Vermont Highway 14, thence along Vermont Highway 14 to junction Vermont Highway 15, thence along Vermont Highway 15 to junction Vermont Highway 100, thence along Vermont Highway 100 to junction Vermont Highway 12, thence along Vermont Highway 12 to junction Vermont Highway 4, thence along Vermont Highway 4 to junction Vermont Highway 100, thence along Vermont Highway 100 to junction Vermont Highway 8A, thence along Vermont Highway 8A to the Vermont-Massachusetts State line, and the District of Columbia. (points in Pennsylvania on and west of

U.S. Highway 15; and points in New York within 10 miles of Greenwich, Conn.; Greenwich, Conn.; and points in Massachusetts within 35 miles of Boston, and points in Massachusetts on and east of U.S. Highway 5)*. The purpose of this filing is to eliminate the gateways as indicated by asterisks above.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E136) (Correction), filed June 3, 1974, published in the FEDERAL REGISTER issue of September 19, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William R. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, the transportation of which, by reason of size or weight, require the use of special equipment, between those points in Ohio on and west of a line beginning at Lake Erie and extending along Ohio Highway 91 to junction U.S. Highway 422, thence along U.S. Highway 422 to junction Ohio Highway 88, thence along Ohio Highway 88 to the Ohio-Pennsylvania State line, on the one hand, and, on the other, points in Rhode Island, those in Massachusetts within 35 miles of Boston, Mass., those in Connecticut on and east of a line beginning at the Massachusetts-Connecticut State line and extending along U.S. Highway 5 to junction Interstate Highway 91, thence along Interstate Highway 91 to junction Connecticut Highway 2, thence along Connecticut Highway 2 to junction Connecticut Highway 85, thence along Connecticut Highway 85 to the Rock Island Sound, those in New Hampshire on and east of a line beginning at the Vermont-New Hampshire State line and extending along U.S. Highway 302 to junction New Hampshire Highway 112, thence along New Hampshire Highway 112 to junction New Hampshire Highway 118, thence along New Hampshire Highway 118 to junction U.S. Highway 3, thence along U.S. Highway 3 to junction New Hampshire Highway 3A/25, thence along New Hampshire Highway 3A/25 to junction New Hampshire Highway 3A, thence along New Hampshire Highway 3A to junction New Hampshire Highway 104, thence along New Hampshire Highway 104 to junction U.S. Highway 4, thence along U.S. Highway 4 to junction New Hampshire Highway 11, thence along New Hampshire Highway 11 to junction New Hampshire Highway 10, thence along New Hampshire Highway 10 to junction New Hampshire Highway 123A, thence along New Hampshire Highway 123A to junction New Hampshire Highway 123, thence along New Hampshire Highway 123 to the Vermont-New Hampshire State line. The purpose of this filing is to eliminate the gateways of Columbiana, Cuyahoga, Mahoning, Summit, and Trumbull Counties, Ohio, Pennsylvania, New York, and points in Massachusetts within 35 miles of Boston.

NOTE.—The purpose of this correction is to state the correct territorial description.

No. MC 60014 (Sub-No. E146) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 21, 1975, as E83, and republished as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, requiring special equipment, restricted so that or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, from points in Rhode Island to points in Mississippi. The purpose of this filing is to eliminate the gateways of points in Massachusetts within 35 miles of Boston, Greenwich, Conn., points in New York within 10 miles of Greenwich, Conn., and Wheeling and Beechbottom, W. Va., and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct gateway territory.

No. MC 60014 (Sub-No. E311) (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 17, 1975, and republished as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: A. Charles Tell, 100 E. Broad St., Columbus, Ohio 43215. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, the transportation of which, by reason of their size or weight require the use of special equipment or handling, between points in Indiana on the one hand, and, on the other, points in New Hampshire, Rhode Island, those points in Massachusetts within 35 miles of Boston, and those points in Connecticut on and east of a line beginning at the Massachusetts-Connecticut State line extending along Connecticut Highway 83 to junction Connecticut Highway 190, thence along Connecticut Highway 190 to junction Connecticut Highway 32, thence along Connecticut Highway 32 to Long Island Sound. The purpose of this filing is to eliminate the gateway of Columbiana, Cuyahoga, Mahoning, Summit, and Trumbull Counties, Ohio; points in Pennsylvania on and west of a line extending from the Pennsylvania-Maryland State line north along unnumbered highway to York, Pa., thence along Interstate Highway 83 (formerly U.S. Highway 111) to Harrisburg, thence along north Pennsylvania Highway 147 (formerly portion Pennsylvania Highway 14) to junction U.S. Highway 220, thence along U.S. Highway 220 to junction U.S. Highway 15; thence along U.S. Highway 15 to Trout Run, thence along U.S. Highway 15 to the Pennsylvania-New York State line; New York; and points in Massachusetts within 35 miles of Boston.

NOTE.—The purpose of this correction is to state the correct Sub-No. E311 previously published as E23.

No. MC 60014 (Sub-No. E312), (correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 23, 1975, and republished, as corrected, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: A. Charles Tell, 100 E. Broad St., Columbus, Ohio 43215. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, requiring special equipment, restricted so that, or provided that, the loading or unloading, which necessitate the special equipment, is performed by the consignor or consignee, or both, between points in Indiana, on the one hand, and, on the other, those points in New Hampshire, Rhode Island, Connecticut, Maine, Vermont on and east of a line beginning at the United States-Canada International Boundary line extending along U.S. Highway 5 to junction U.S. Highway 302, thence along U.S. Highway 302 to the Vermont-New Hampshire State line, and Massachusetts on and east of a line beginning at the Vermont-Massachusetts State line extending along Massachusetts Highway 8A to the junction of Massachusetts Highway 9, thence along Massachusetts Highway 9 to junction Massachusetts Highway 112, thence along Massachusetts Highway 112 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction U.S. Highway 202, thence along U.S. Highway 202 to the Massachusetts-Connecticut State line. The purpose of this filing is to eliminate the gateways of Columbiana, Cuyahoga, Mahoning, Summit, and Trumbull Counties, Ohio; Pennsylvania; points in New York within ten miles of Greenwich, Conn.; and points in Massachusetts within 35 miles of Boston, and points in Massachusetts on and east of U.S. Highway 5.

NOTE.—The purpose of this correction is to state the correct Sub number E312 instead of E28.

No. MC 61825 (Sub-No. E1066), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in Texas on and south of a line beginning at the Louisiana-Texas State line and extending along Texas Highway 125, thence west along Texas Highway 125 to junction Texas Highway 11, to junction U.S. Highway 380, to junction Texas Highway 199, to junction U.S. Highway 82, to junction Texas Highway 116 to the New Mexico-Texas State line, to points in Pennsylvania on and east of a line beginning at the Pennsylvania-West Virginia State line, and extending along Pennsylvania Highway 166 to junction Pennsylvania Highway 51, to junction Pennsylvania Highway 8, to junction Pennsylvania Highway 68, to junction U.S. Highway 322, to junction Pennsylvania Highway 36, to

junction U.S. Highway 62 to the New York-Pennsylvania State line. The purpose of this filing is to eliminate the gateway of Smyth County, Va. and Martinsville, Va.

No. MC 61825 (Sub-No. E1067), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORPORATION, P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in Arizona, California, Nevada, New Mexico, and Texas, and points in Arkansas on and west and south of a line and beginning at the Arkansas-Tennessee State line and extending along Arkansas Highway 137, thence west along Arkansas Highway 137 to junction Arkansas Highway 18, to junction Arkansas Highway 39, to junction Arkansas Highway 14, to junction Arkansas Highway 9, to junction Interstate Highway 40, thence along Interstate Highway 40 to the Arkansas-Oklahoma State line; those points in Oklahoma on and south and west of a line beginning at the Oklahoma-Arkansas State line and extending along Interstate Highway 40 to junction U.S. Highway 283, to junction U.S. Highway 270, to junction U.S. Highway 64, thence along U.S. Highway 64 to the Oklahoma-Colorado State line; points in Colorado on and south and west of a line beginning at the Colorado-Oklahoma State line, and extending along U.S. Highway 385 to junction U.S. Highway 160, to junction Colorado Highway 101; to junction U.S. Highway 50, to junction U.S. Highway 85, to junction U.S. Highway 24, to junction Colorado Highway 13, to junction Colorado Highway 64, thence along Colorado Highway 64 to the Colorado-Utah State line; points in Utah on and south and west of a line beginning at the Utah-Colorado State line, and extending along U.S. Highway 40, to junction Interstate Highway 15 to the Utah-Idaho State line, to points in Pennsylvania on and east of a line beginning at the Pennsylvania-Maryland State line and extending along U.S. Highway 220, thence north along U.S. Highway 220 to junction U.S. Highway 15 to the New York-Pennsylvania State line. The purpose of this filing is to eliminate the gateway of Smyth County, Va. and Martinsville, Va.

No. MC 61825 (Sub-No. E1068), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORP. P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. NW., Washington, D.C. 20036. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in Arizona, Arkansas, California, Idaho, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, and those points in Kansas on and west of a line beginning at the Kansas-Oklahoma State line, and extending along U.S. Highway 169, thence north along U.S. Highway 169 to junction

tion U.S. Highway 160, to junction Kansas Highway 99, to junction U.S. Highway 54, to junction U.S. Highway 77, to junction Kansas Highway 4, to junction Kansas Highway 15, to junction U.S. Highway 40, to junction U.S. Highway 183, to junction U.S. Highway 24, to junction U.S. Highway 33, to junction U.S. Highway 36, thence along U.S. Highway 36 to the Kansas-Colorado State line; those points in Colorado on and west of a line beginning at the Colorado-Kansas State line, and extending along U.S. Highway 36 to junction Colorado Highway 71, to junction U.S. Highway 34, to junction U.S. Highway 287, to junction Colorado Highway 14, to junction Colorado Highway 125, thence along Colorado Highway 125 to the Colorado-Wyoming State line; points in Wyoming on and west of a line beginning at the Wyoming-Colorado State line, and extending along Wyoming Highway 230, to junction Wyoming Highway 130, to junction Interstate Highway 80, to junction Wyoming Highway 789, to junction Wyoming Highway 120, to junction U.S. Highway 310, thence along U.S. Highway 310 to the Wyoming-Montana State line; points in Montana on and west of a line beginning at the Montana-Wyoming State line, and extending along U.S. Highway 310 to junction U.S. Highway 10, to junction U.S. Highway 87, to junction U.S. Highway 191 to the Canadian-United States International Boundary line, to points in Pennsylvania on and east of a line beginning at the New York-Pennsylvania State line and extending south along Interstate Highway 81 to junction U.S. Highway 15 to the Pennsylvania-Maryland State line. The purpose of this filing is to eliminate the gateway of Smyth County, Va. and Martinsville, Va.

No. MC 61825 (Sub-No. E1069), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORP., P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. N.W., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, except commodities of unusual value, commodities in bulk, household goods as defined by the Commission, from points in Arkansas, Kansas, Oklahoma, and Texas to New York, N.Y. The purpose of this filing is to eliminate the gateway of Smyth County, Va., Lynchburg, Va. and Baltimore, Md.

No. MC 61825 (Sub-No. E1070), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORP., P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. N.W., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in Arizona, Arkansas, California, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington and those points in Kansas on and south and west of a line beginning at the

Kansas-Missouri State line and extending along U.S. Highway 66, to junction Kansas Highway 26, to junction Kansas Highway 96, to junction Kansas Highway 99, to junction U.S. Highway 54, to junction U.S. Highway 77, to junction Kansas Highway 4, to junction U.S. Highway 81, to junction U.S. Highway 40, to junction U.S. Highway 183, to junction U.S. Highway 24, to junction Kansas Highway 27, to junction U.S. Highway 36, thence along U.S. Highway 36 to the Kansas-Colorado State line; points in Colorado on and south and west of a line beginning at the Colorado-Kansas State line and extending along U.S. Highway 36 to junction U.S. Highway 34, to junction U.S. Highway 40, to junction Colorado Highway 789, thence along Colorado Highway 789 to the Colorado-Wyoming State line; points in Wyoming on and west of a line beginning at the Wyoming-Colorado State line, and extending along Wyoming Highway 789 to junction Interstate Highway 80, to junction U.S. Highway 187, to junction U.S. Highway 26, thence along U.S. Highway 26 to the Wyoming-Idaho State line; points in Idaho on and west of a line beginning at the Idaho-Wyoming State line, and extending along U.S. Highway 26 to junction U.S. Highway 91, thence along U.S. Highway 91 to the Idaho-Montana State line; points in Montana on and west of a line beginning at the Montana-Wyoming State line, and extending along U.S. Highway 91, thence along U.S. Highway 91 to the Canadian-United States International Boundary line, to points in New York on and east of a line beginning at the Pennsylvania-New York State line, and extending along New York Highway 79 to junction New York Highway 7, to junction New York Highway 50, to junction U.S. Highway 4 to the New York-Vermont State line. The purpose of this filing is to eliminate the gateways of Smyth County, Va., and Martinsville, Va.

No. MC 61825 (Sub-No. E1071), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORP., P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. N.W., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in the states of Arizona, California, on, south and west of a line beginning at the Arkansas-Missouri State line, and extending along Arkansas Highway 25 and extending west along Arkansas Highway 25 to junction Interstate Highway 40, thence along Interstate Highway 40 to the Arkansas-Oklahoma State line; those points in Oklahoma on and south and west of a line beginning at the Oklahoma-Arkansas State line, and extending along Interstate Highway 40, thence along Interstate Highway 40 to the Oklahoma-Texas State line; points in Texas on and south and west of a line beginning at the Texas-Oklahoma State line, and extending

along Interstate Highway 40 to junction U.S. Highway 83, to junction Texas Highway 281, thence along Texas Highway 281 to junction U.S. Highway 87, thence along U.S. Highway 87 to the Texas-New Mexico State line; points in New Mexico on and south and west of a line beginning at the New Mexico-Texas State line, and extending along U.S. Highway 87, thence along U.S. Highway 87 to the New Mexico-Colorado State line; points in Colorado on and south and west of a line beginning at the Colorado-New Mexico State line, and extending along U.S. Highway 87 to junction Colorado Highway 69, to junction U.S. Highway 50, thence along U.S. Highway 50 to the Colorado-Utah State line; points in Utah on and south and west of a line beginning at the Utah-Colorado State line and extending along U.S. Highway 50, to junction Utah Highway 36, to junction Utah Highway 199, to junction unnumbered highway, to junction Interstate Highway 80, thence along Interstate Highway 80 to the Utah-Nevada State line; points in Nevada on and south and west of a line beginning at the Nevada-Utah State line, and extending along Interstate Highway 80 to junction U.S. Highway 93, thence along U.S. Highway 93 to the Nevada-Idaho State line; points in Idaho on and south and west of a line beginning at the Idaho-Nevada State line, and extending along U.S. Highway 93 to junction U.S. Highway 30, to junction U.S. Highway 20, to junction Interstate Highway 80-N, thence along Interstate Highway 80-N to the Idaho-Oregon State line; points in Oregon on and south and west of a line beginning at the Oregon-Idaho State line, and extending along Interstate Highway 80-N to junction Oregon Highway 11, to junction U.S. Highway 12, to junction U.S. Highway 395, to junction Washington Highway 17, to junction U.S. Highway 97 to the Canadian-United States International Boundary line to points in New York on and east of a line beginning at Lake Ontario and extending along New York Highway 13 to junction Interstate Highway 81, to junction New York Highway 13, to junction New York Highway 14 to the Pennsylvania-New York State line. The purpose of this filing is to eliminate the gateways of Smyth County, Va., and Martinsville, Va.

No. MC 61825 (Sub-No. E1072), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORP., P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. N.W., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in New Mexico on and south of a line beginning at the Texas-New Mexico State line and extending along U.S. Highway 82, to junction U.S. Highway 85, to junction New Mexico Highway 52, to junction New Mexico Highway 59, to junction New Mexico Highway 61, to junction New Mexico Highway 78, to junction New Mexico Highway 32, to

junction Interstate Highway 40, thence along Interstate Highway 40 to the New Mexico-Arizona State line; those points in Arizona on and south of a line beginning at the Arizona-New Mexico State line, and extending along Interstate Highway 40 to junction U.S. Highway 93, thence along U.S. Highway 93 to the Arizona-Nevada State line; points in Nevada on and south and west of a line beginning at the Nevada-Arizona State line, and extending along U.S. Highway 93 to junction U.S. Highway 95, to junction Nevada Highway 58, thence along Nevada Highway 58; to the Nevada-California State line; points in California on and south and west of a line beginning at the California-Nevada State line and extending along unnumbered California Highway near Daylight Pass, Calif., to junction California Highway 190, to junction U.S. Highway 395, to junction California Highway 178, to junction California Highway 99, to junction California Highway 65, to junction California Highway 69, to junction California Highway 180, to junction California Highway 99, to junction California Highway J17, to junction California Highway 130, to junction U.S. Highway 101, to the Pacific Ocean, to points in New York on and east of a line beginning at the Pennsylvania-New York State line and extending north along U.S. Highway 62 to Lake Erie, thence north along Canadian-United States International Boundary line to Lake Ontario. The purpose of this filing is to eliminate the gateways of Smyth County, Va., and Martinsville, Va.

No. MC 61825 (Sub-No. E1073), filed May 13, 1974. Applicant: ROY STONE TRANSFER CORP., P.O. Box 385, Collinsville, Va. 24078. Applicant's representative: Harry J. Jordan, 1000 Sixteenth St. N.W., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, from points in Texas on and south of a line beginning at the Louisiana-Texas State line and extending along U.S. Highway 80, thence along U.S. Highway 80 to junction U.S. Highway 69, to junction U.S. Highway 380 to the New Mexico-Texas State line, to points in New York on and east of a line beginning at the Pennsylvania-New York State line, and extending north along U.S. Highway 62 to Lake Erie, thence north along the United States-Canadian International Boundary line to Lake Ontario. The purpose of this filing is to eliminate the gateways of Smyth County, Va., and Martinsville, Va.

No. MC-106603 (Sub-No. E53), filed May 10, 1974. Applicant: DIRECT TRANSIT LINES, INC., P.O. Box 8099, Grand Rapids, Mich. 49508. Applicant's representative: Martin J. Leavitt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such roofing and roofing materials, as are building contractor's materials*, from those points in Illinois on, north, and west of a line beginning at the Illinois-

Missouri State line at Chester, Ill., and extending southeast along Illinois Highway 3 to junction Illinois Highway 149, thence east on Illinois Highway 149 to junction Illinois Highway 13, thence east on Illinois Highway 13 to junction Interstate Highway 57, thence north on Interstate Highway 57 to junction U.S. Highway 50, thence west on U.S. Highway 50 to junction U.S. Highway 51, thence east on U.S. Highway 51 to junction Illinois Highway 16, thence east on Illinois Highway 16 to junction Interstate Highway 57, thence north on Interstate Highway 57 to junction Interstate Highway 74, thence east on Interstate Highway 74 to the Illinois-Indiana State line, and those points in Illinois on and south of a line beginning at the Illinois-Indiana State line and extending along Illinois Highway 17 and extending west to junction Illinois Highway 29, thence south on Illinois Highway 29 to junction Illinois Highway 116, thence west on Illinois Highway 116 to junction U.S. Highway 67, thence south on U.S. Highway 67 to junction Illinois Highway 9, thence west on Illinois Highway 9 to the Illinois-Iowa State line, to points in Delaware, Maryland (except points on and northwest of U.S. Highway 220), to points in New Jersey on and southwest of a line beginning at the Pennsylvania-New Jersey State line and extending east along Interstate Highway 276 to junction Interstate Highway 295, thence on Interstate Highway 295 to junction U.S. Highway 206, thence south on U.S. Highway 206 to junction New Jersey Highway 70, thence east on New Jersey Highway 70 to junction New Jersey Highway 72, thence east on New Jersey Highway 72 to the Atlantic Ocean, those points in Pennsylvania on and northeast of a line beginning at the Pennsylvania-Maryland State line and extending north along U.S. Highway 219 to junction Pennsylvania Highway 31, thence west on Pennsylvania Highway 31 to junction Pennsylvania Highway 136, thence west on Pennsylvania Highway 136 to junction Pennsylvania Highway 51, thence north on Pennsylvania Highway 51 to the Pennsylvania-Ohio State line, and those points in Pennsylvania on and south of a line beginning at the Pennsylvania-Ohio State line and extending east along Interstate Highway 80 to junction Pennsylvania Highway 147, thence south on Pennsylvania Highway 147 to junction Pennsylvania Highway 61, thence south on Pennsylvania Highway 61 to junction U.S. Highway 422, thence southeast on U.S. Highway 422 to junction Interstate Highway 276, thence along Interstate Highway 276 to the Pennsylvania-New Jersey State line, Washington, D.C., points in Virginia on and north of U.S. Highway 50 and points in West Virginia on and north of U.S. Highway 50 beginning at the Virginia-West Virginia State line and extending west to junction U.S. Highway 220 at the West Virginia-Maryland State line. The purpose of this filing is to eliminate the gateways of Whiting, Ind., and the plant site of Certain-teed Products Corp. at Avery, Ohio.

No. MC 106603 (Sub-No. E56), filed May 10, 1974. Applicant: DIRECT TRANSIT LINES, INC., P.O. Box 8099, Grand Rapids, Mich. 49508. Applicant's representative: Martin J. Leavitt (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Facing tile and flooring tile*, from Kankakee, Ill., to points in Delaware, Maryland, New Jersey, New York, Pennsylvania, Washington, D.C., points in Virginia on and north of U.S. Highway 50 and West Virginia on and east of a line beginning at the Ohio-West Virginia State line and extending south along U.S. Highway 33 to junction Interstate Highway 77, thence south on Interstate Highway 77 to junction U.S. Highway 21, thence southwest on U.S. Highway 21 to the West Virginia-Virginia State line. The purpose of this filing is to eliminate the gateways of points in Indiana and the plant site of Certain-teed Products Corp. at Avery, Ohio.

No. MC 107012 (Sub-No. E10), filed May 16, 1974. Applicant: NORTH AMERICAN VAN LINES, INC., P.O. Box 988, Fort Wayne, Ind. 46801. Applicant's representative: David D. Bishop and Gary M. Crist, P.O. Box 988, Fort Wayne, Ind. 46801. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New commercial and institutional fixtures, uncrated*, (1) from points in Alabama, to points in California, Colorado, Idaho, Kansas, Minnesota, Montana, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming; (2) from points in Autauga, Bibb, Blount, Calhoun, Chambers, Cherokee, Chilton, Clay, Cleburne, Coosa, Cullman, Elmore, Etowah, Jefferson, Lee, Randolph, St. Clair, Shelby, Talladega, and Tallapoosa Counties, Ala., to points in Arizona; Benton, Boone, Carroll, Crawford, Franklin, Johnson, Logan, Madison, Marion, Newton, Pope, Searcy, Sebastian, Van Buren, and Washington Counties, Ark.; points in Iowa, New Mexico, Oklahoma; Armstrong, Bailey, Briscoe, Carson, Castro, Childress, Cochran, Collingsworth, Cottle, Dallam, Deaf Smith, Donley, Foyd, Foard, Gray, Hale, Hall, Hansford, Hardeman, Hartley, Hemphill, Haskell, Hutchinson, Lamb, Lipscomb, Moore, Motley, Ochiltree, Oldham, Parmer, Potter, Randall, Roberts, Sherman, Swisher, Wheeler, Wichita, Wilbarger, Brewster, Culberson, El Paso, Hudspeth, Jeff Davis, Loving, Pecos, Presidio, Reeves, Terrell, Ward, and Winkler Counties, Tex.; (3) from points in Barbour, Bullock, Coffee, Covington, Crenshaw, Dale, Geneva, Henry, Houston, Macon, Montgomery, Pike, and Russell Counties, Ala., to points in Arizona; Benton, Boone, Carroll, Crawford, Franklin, Johnson, Logan, Madison, Marion, Newton, Pope, Searcy, Sebastian, Van Buren, and Washington Counties, Ark., to points in Iowa; Bernalillo, Guadalupe, Los Alamos, Sandoval, San Miguel, Santa Fe, Torrance, Valencia, McKinley, Rio Arriba, San Juan, Catron, Dona Ana, Grant, Hidalgo, Luna, Otero,

Sierra, Socorro, Colfax, Harding, Mora, Taos, and Union Counties, N. Mex.; Alfalfa, Beckham, Blaine, Caddo, Comanche, Cotton, Custer, Dewey, Ellis, Greer, Harmon, Harper, Jackson, Kiowa, Major, Roger Mills, Tillman, Washita, Woods, Woodward, Adair, Cherokee, Craig, Delaware, McIntosh, Mayes, Muskogee, Nowata, Okmulgee, Osage, Ottawa, Rogers, Sequoyah, Tulsa, Wagoner, Washington, Beaver, Cimarron, Texas, Canadian, Carter, Cleveland, Creek, Garfield, Grady, Grant, Hughes, Jefferson, Johnston, Kay, Kingfisher, Lincoln, Logan, Love, McClain, Marshall, Murray, Noble, Okfuskee, Oklahoma, Osage, Pawnee, Payne, Pontotoc, Pottawatomie, Seminole, and Stephens Counties, Okla.; Armstrong, Bailey, Briscoe, Carson, Castro, Childress, Cochran, Collingsworth, Cottle, Dallam, Deaf Smith, Donley, Floyd, Foard, Gray, Hale, Hall, Hansford, Hardeman, Hartley, Hemphill, Hockley, Hutchinson, Lamb, Lipscomb, Moore, Motley, Ochiltree, Oldham, Parmer, Potter, Randall, Roberts, Sherman, Swisher, Wheeler, Wichita, Wilbarger, Brewster, Culberson, El Paso, Hudspeth, Jeff Davis, Loving, Pecos, Presidio, Reeves, Terrell, Ward and Winkler Counties, Tex.

(4) From points in Colbert, Fayette, Franklin, Lamar, Lauderdale, Lawrence, Marion, Pickens, Tuscaloosa, Walker and Winston Counties, Ala., to points in Arizona; Benton, Boone, Carroll, Crawford, Franklin, Johnson, Logan, Madison, Marion, Newton, Pope, Searcy, Sebastian, Van Buren, and Washington Counties, Ark.; Allamakee, Black Hawk, Bremer, Buchanan, Butler, Cerro Gordo, Chickasaw, Clayton, Delaware, Fayette, Floyd, Franklin, Hancock, Hanks, Howard, Mitchell, Winnebago, Winneshiek, Worth, and Wright Counties, Iowa; Appanoose, Boone, Clarke, Dallas, Decatur, Greene, Grundy, Hamilton, Hardin, Jasper, Lucas, Madison, Mahaska, Marion, Marshall, Monroe, Polk, Poweshiek, Story, Tama, Warren, Wayne, Webster, Adams, Audubon, Cass, Fremont, Guthrie, Harrison, Mills, Montgomery, Page, Pottawattamie, Ringgold, Shelby, Taylor, and Union Counties, Iowa; Buena Vista, Calhoun, Carroll, Cherokee, Clay, Crawford, Dickinson, Emmet, Humboldt, Ida, Kossuth, Lyon, Monona, O'Brien, Osceola, Palo Alto, Plymouth, Pocahontas, Sac, and Sioux Counties, Iowa; points in New Mexico, Oklahoma; Andrews, Archer, Baylor, Blanco, Borden, Bosque, Brown, Burnet, Callahan, Clay, Coke, Coleman, Comanche, Concho, Cooke, Coryell, Crane, Crockett, Crosby, Dawson, Denton, Dickens, Eastland, Ector, Edwards, Erath, Fisher, Gaines, Garza, Gillespie, Glasscock, Hamilton, Haskell, Hill, Hood, Howard, Irion, Jack, Johnson, Jones, Kendall, Kent, Kerr, Kimble, King, Knox, Lampasa, Llano, Lubbock, Lynn, McCulloch, McLennan, Martin, Mason, Menard, Midland, Mills, Mitchell, Montague, Nolan, Palo Pinto, Parker, Reagan, Runnels, San Saba, Schleicher, Scurry, Shackelford, Somervell, Stephens, Sterling, Stonewall, Sutton, Tarrant, Taylor, Terry, Throckmorton, Tom Green, Upton, Val Verde, Wise, Yoakum, Young Counties, Texas; Armstrong, Bailey, Briscoe, Carson, Castro, Childress, Cochran, Collingsworth, Hall, Hansford, Hardeman, Hartley, Hemphill, Hockley, Hutchinson, Lamb, Lipscomb, Moore, Motley, Ochiltree, Oldham, Parmer, Potter, Randall, Roberts, Sherman, Swisher, Wheeler, Wichita, and Wilbarger Counties, Tex.; Aransas, Atascosa, Bandera, Bee, Bexar, Brooks, Cameron, Dimmit, Duval, Frio, Goliad, Hidalgo, Jim Hogg, Jim Wells, Kaines, Kennedy, Kinney, Kleberg, La Salle, Live Oak, McMullen, Maverick, Mediana, Nueces, Real, Regugio, San Patricio, Starr, Uvalde, Webb, Willacy, Wilson, Zapata, and Zavala Counties, Tex.; Brewster, Culberson, El Paso, Hudspeth, Jeff Davis, Loving, Pecos, Presidio, Reeves, Terrell, Ward and Winkler Counties, Tex.; Anderson, Angelina, Bowie, Camp, Cass, Cherokee, Collin, Dallas, Delta, Ellis, Fannin, Franklin, Freestone, Grayson, Gregg, Harrison, Henderson, Hopkins, Hunt, Kaufman, Lamar, Marion, Morris, Nacogdoches, Navarro, Panola, Rains, Red River, Rockwall, Rusk, Sabine, San Augustine, Shelby, Smith, Titus, Upshur, Van Zandt, and Wood Counties, Tex.

vada, Pike, Polk, Scott, Sevier, Yell, Benton, Boone, Carroll, Crawford, Franklin, Johnson, Logan, Madison, Marion, Newton, Pope, Searcy, Sebastian, Van Buren, and Washington Counties, Ark.; Allamakee, Black Hawk, Bremer, Buchanan, Butler, Cerro Gordo, Chickasaw, Clayton, Delaware, Fayette, Floyd, Franklin, Hancock, Howard, Mitchell, Winnebago, Winneshiek, Worth, and Wright Counties, Iowa; Appanoose, Boone, Clarke, Dallas, Decatur, Greene, Grundy, Hamilton, Hardin, Jasper, Lucas, Madison, Mahaska, Marion, Marshall, Monroe, Polk, Poweshiek, Story, Tama, Warren, Wayne, and Webster Counties, Iowa; Adair, Adams, Audubon, Cass, Fremont, Guthrie, Harrison, Mills, Montgomery, Page, Pottawattamie, Ringgold, Shelby, Taylor, and Union Counties, Iowa; Buena Vista, Calhoun, Carroll, Cherokee, Clay, Crawford, Dickinson, Emmet, Humboldt, Ida, Kossuth, Lyon, Monona, O'Brien, Osceola, Palo Alto, Plymouth, Pocahontas, Sac, and Sioux Counties, Iowa; points in New Mexico, Oklahoma; Andrews, Archer, Baylor, Blanco, Borden, Bosque, Brown, Burnet, Callahan, Clay, Coke, Coleman, Comanche, Concho, Cooke, Coryell, Crane, Crockett, Crosby, Dawson, Denton, Dickens, Eastland, Ector, Edwards, Erath, Fisher, Gaines, Garza, Gillespie, Glasscock, Hamilton, Haskell, Hill, Hood, Howard, Irion, Jack, Johnson, Jones, Kendall, Kent, Kerr, Kimble, King, Knox, Lampasa, Llano, Lubbock, Lynn, McCulloch, McLennan, Martin, Mason, Menard, Midland, Mills, Mitchell, Montague, Nolan, Palo Pinto, Parker, Reagan, Runnels, San Saba, Schleicher, Scurry, Shackelford, Somervell, Stephens, Sterling, Stonewall, Sutton, Tarrant, Taylor, Terry, Throckmorton, Tom Green, Upton, Val Verde, Wise, Yoakum, Young Counties, Texas; Armstrong, Bailey, Briscoe, Carson, Castro, Childress, Cochran, Collingsworth, Hall, Hansford, Hardeman, Hartley, Hemphill, Hockley, Hutchinson, Lamb, Lipscomb, Moore, Motley, Ochiltree, Oldham, Parmer, Potter, Randall, Roberts, Sherman, Swisher, Wheeler, Wichita, and Wilbarger Counties, Tex.; Aransas, Atascosa, Bandera, Bee, Bexar, Brooks, Cameron, Dimmit, Duval, Frio, Goliad, Hidalgo, Jim Hogg, Jim Wells, Kaines, Kennedy, Kinney, Kleberg, La Salle, Live Oak, McMullen, Maverick, Mediana, Nueces, Real, Regugio, San Patricio, Starr, Uvalde, Webb, Willacy, Wilson, Zapata, and Zavala Counties, Tex.; Brewster, Culberson, El Paso, Hudspeth, Jeff Davis, Loving, Pecos, Presidio, Reeves, Terrell, Ward and Winkler Counties, Tex.; Anderson, Angelina, Bowie, Camp, Cass, Cherokee, Collin, Dallas, Delta, Ellis, Fannin, Franklin, Freestone, Grayson, Gregg, Harrison, Henderson, Hopkins, Hunt, Kaufman, Lamar, Marion, Morris, Nacogdoches, Navarro, Panola, Rains, Red River, Rockwall, Rusk, Sabine, San Augustine, Shelby, Smith, Titus, Upshur, Van Zandt, and Wood Counties, Tex.

(6) From points in Baldwin, Butler, Choctaw, Clarke, Conecuh, Dallas, Escambia, Greene, Hale, Lawndes, Maren-

go, Mobile, Monroe, Perry, Sumter, Washington, and Wilcox Counties, Ala., to points in Apache, Coconino, Mohave, Navajo, Yavapai, Maricopa, Pima, Pinal, Santa Cruz and Yuma Counties, Ariz.; Benton, Boone, Carroll, Crawford, Franklin, Johnson, Logan, Madison, Marion, Newton, Pope, Searcy, Sebastian, Van Buren, and Washington Counties, Ark.; points in Iowa; Bernalillo, Guadalupe, Los Alamos, Sandoval, San Miguel, Santa Fe, Torrance, Valencia, McKinley, Rio Arriba, San Juan, Colfax, Harding, Mora, Taos and Union Counties, N. Mex.; Adair, Cherokee, Craig, Delaware, McIntosh, Mayes, Muskogee, Nowata, Okmulgee, Osage, Ottawa, Rogers, Sequoyah, Tulsa, Wagoner, Washington, Beaver, Cimarron and Texas Counties, Okla. The purpose of this filing is to eliminate the gateway of Greene County, Ark.

No. MC 114868 (Sub-No. E33), filed August 1, 1975. Applicant: NEWLON'S TRANSFER & STORAGE, 1511 N. Nelson St., Arlington, Va. 22201. Applicants representative: H. E. Newlon, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, (1) between points in New Jersey, on the one hand, and, on the other, points in Illinois. The purpose of this filing is to eliminate the gateways of Washington, D.C. or points in Kentucky within 125 miles of Nashville. (2) Between points in New Jersey, on the one hand, and, on the other, points in Indiana. The purpose of this filing is to eliminate the gateways of Washington, D.C. and points in Kentucky within 125 miles of Nashville. (3) Between points in New Jersey, on the one hand, and, on the other, points in Maryland within 125 miles of Washington, D.C. The purpose of this filing is to eliminate the gateway of Washington, D.C. (4) Between points in New Jersey, on the one hand, and, on the other, points in Kentucky. The purpose of this filing is to eliminate the gateway of Washington, D.C. or points in Kentucky within 125 miles of Nashville. (5) (a) Between points in New Jersey (except Hunterdon and Warren Counties), on the one hand, and, on the other, points in Ohio on and south of Interstate Highway 70. The purpose of this filing is to eliminate the gateway of Washington, D.C. (5) (b) Between points in New Jersey, on, east, and south of U.S. Highway 202, on the one hand, and, on the other, points in Ohio on and west of Interstate Highway 77, and on and north of Interstate Highway 70. The purpose of this filing is to eliminate the gateway of Washington, D.C. (5) (c) Between points in New Jersey on and south of New Jersey Highway 33, on the one hand, and, on the other, points in Ohio. The purpose of this filing is to eliminate the gateway of Washington, D.C. (6) Between points in New Jersey, on the one hand, and, on the other, points in Missouri. The purpose of this filing is to eliminate the gateways of Washington, D.C. and points in Kentucky within

125 miles of Nashville. (7) Between points in New Jersey, on the one hand, and, on the other, points in North Carolina. The purpose of this filing is to eliminate the gateways of Washington, D.C., points in Kentucky, and points in Tennessee within 125 miles of Nashville.

No. MC 115840 (Sub-No. E111), filed September 12, 1977. Applicant: COLONIAL FAST FREIGHT LINES, INC., P.O. Box 10327, Birmingham, Ala. 35202. Applicant's representative: E. Stephen Heasley, 666 Eleventh St., NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel pipe, iron castings encompassed by iron and steel articles, and contractors' equipment, material, and supplies consisting of fittings, valves, hydrants, and gaskets used in the agricultural, water treatment, food processing, wholesale groceries, and institutional supply industries* (except commodities in bulk), (1) Between points in North Carolina, on the one hand, and, on the other, points in Arizona, Arkansas, California, Colorado, Idaho, Kansas, Louisiana, Mississippi, Montana, Nevada, Nebraska, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming. (2) Between points in South Carolina, on the one hand, and, on the other, points in Arizona, Arkansas, California, Colorado, Idaho, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming. The purpose of this filing is to eliminate the gateways of Holt and Birmingham, Ala.

No. MC 115840 (Sub-No. E112), filed September 12, 1977. Applicant: COLONIAL FAST FREIGHT LINES, INC., P.O. Box 10327, Birmingham, Ala. 35202. Applicant's representative: E. Stephen Heasley, 666 Eleventh St., NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Valves, hydrants, fittings, and accessories* (except commodities in bulk), from Anniston, Ala., to points in Connecticut, Illinois, Maine, Massachusetts, New Hampshire, Ohio, Rhode Island, and Vermont. The purpose of this filing is to eliminate the gateway of Holt, Ala.

No. MC 115840 (Sub-No. E114), filed September 12, 1977. Applicant: COLONIAL FAST FREIGHT LINES, INC., P.O. Box 10327, Birmingham, Ala. 35202. Applicant's representative: E. Stephen Heasley, 666 Eleventh St., NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Cast iron pipe, pipe fittings, pipe valves, and fire hydrants* (except commodities in bulk), from Coshocton, Ohio, to points in Arizona, New Mexico and Texas. The purpose of this filing is to eliminate the gateway of Holt, Ala.

No. MC 124004 (Sub-No. E1), filed May 15, 1974. Applicant: RICHARD DAHN, INC., 620 W. Mountain Road, Sparta,

N.J. 07871. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Quarried magnetite Ore*, (1) from Albany and Tahawus, N.Y., to points in Kentucky, Pennsylvania, Virginia and West Virginia; (2) from Albany and Tahawus, N.Y., to points in Pennsylvania on and south of a line beginning at the Pennsylvania-New Jersey State line, and extending along Interstate Highway 80 to junction U.S. Highway 322, to junction U.S. Highway 62, to junction Pennsylvania Highway 358, thence along Pennsylvania Highway 358 to the Pennsylvania-Ohio State line. The purpose of this filing is to eliminate the gateway of Mt. Hope, N.J.

By the Commission.

[Notice No. W-ITA]

WATER CARRIER TEMPORARY AUTHORITY APPLICATION

SEPTEMBER 30, 1977.

The following is notice of filing of application for temporary authority under section 311(a) of the Interstate Commerce Act. One copy of a petition, if any, must be served on the applicant, or its authorized representative, if any, and the petitioner must certify that such service has been made. The petition must identify the operating authority upon which it is predicated, specifying the "W" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the petitioner shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a petition shall be governed by the completeness and pertinence of the petitioner's information.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office.

No. W-5 (Sub-No. 7TA), by order entered September 27, 1977, the Motor Carrier Board granted Igert, Paducah, Ky., 180-day temporary authority to engage in the business of transportation by water vessel, in interstate commerce, in the transportation of iron and steel articles (bridge girders), and miscellaneous construction, equipment, between points on Yellow Creek in Tishomingo County, Miss., from the mouth of the Tennessee River Mile 215 and Mississippi Highway 25 Bridge across Yellow Creek, with the privilege to tack with its existing authority and to interline with other water common carriers, John C. Lovett, Lovett, Johnson, and Shapiro, P.O. Box 165, Benton, Ky. 42045, representatives for applicant. Any interested person may file a petition for reconsideration on or before October 26, 1977. Within 20 days after the filing of such petition with the Commission, any interested person may file and serve a reply thereto.

fore October 26, 1977. Within 20 days after the filing of such petition with the Commission, any interested person may file and serve a reply thereto.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

FOURTH SECTION APPLICATION FOR RELIEF

SEPTEMBER 28, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER. FSA No. 43437—Barley and Oats to North Pacific Coast Points. Filed by North Pacific Coast Freight Bureau, Agent (No. 77-4), for and on behalf of Chicago, Milwaukee, St. Paul & Pacific Railroad Co. Rates on barley and oats, feed grade, in carloads, as described in the application, from specified points in Montana, to North Pacific Coast points. Grounds for relief—Rate relationship and market competition. Tariff—Supplement 23 to North Pacific Coast Freight Bureau, Agent, tariff 13-I, I.C.C. No. 1302. Rates are published to become effective on October 29, 1977.

By the Commission.

PETITION OF RAILROADS SEEKING AUTHORIZATION TO WAIVE DEMURRAGE CHARGES CAUSED BY SEVERE WINTER WEATHER

SEPTEMBER 27, 1977.

In an order served August 12, 1977, the Commission granted specified rail carriers the right to waive a portion of demurrage charges caused by severe winter weather. Published at 42 FR P. 41,948 on August 19, 1977. In that order, the Commission stated that other carriers

who want to participate in the proposal could, upon notifying the Commission in writing of their intent to do so. The following carriers should also be added to those who intend to participate in the proposal: Johnstown and Stoney Creek Railroad Co., The Newburgh and South Shore Railway Co., and The Pittsburgh and Lake Erie Railroad Co.

[No. 36634]

MONTANA INTRASTATE FREIGHT RATES AND CHARGES—1977

SEPTEMBER 28, 1977.

In the matter of petition for investigation of intrastate freight rates and charges within the state of Montana.

By joint petition authorized under section 13(3) of the Interstate Commerce Act, filed July 14, 1977, petitioners, three common carriers by railroad¹ subject to Part I of the Interstate Commerce Act, and also operating in intrastate commerce in the State of Montana, and on behalf of all other railroads engaged in the same or similar transportation services, request that this Commission institute an investigation of their Montana intrastate freight rates and charges, under section 13 and 15a of the Interstate Commerce Act; wherein they will seek an order authorizing them to increase such rates and charges in the same amounts approved for interstate application by this Commission in Ex Parte Nos. 305-RE,² 318, 330, and 336.

By tariff filed with the Montana Public Service Commission, petitioners sought to make the general increases granted in the above ex parte proceedings applicable on Montana intrastate traffic. Said Commission ordered cancelled the tariff supplements which would have implemented the increases.

Petitioners contend that present interstate freight rates from, to, and within Montana are just and reasonable and that the proposed intrastate rates will not exceed a just and reasonable level; that transportation conditions for intrastate traffic in Montana are not more favorable than for interstate traffic; that disparity in favor of Montana intrastate freight rates and charges generally exists in relation to interstate rates and charges; that the present Montana intrastate rail freight rates and charges create undue, unreasonable, and unjust discrimination against and an undue burden on interstate commerce in violation of sections 13 and 15a of the Interstate Commerce Act, to the extent that

¹ Chicago, Milwaukee, St. Paul & Pacific R.R. Co.; Union Pacific Railroad Co.; and Burlington Northern Inc.

² Since the filing of their petition, an order has been decided in Ex Parte No. 305-RE, August 22, 1977, further explicating the effect of the increases authorized therein.

they do not include the increases authorized in Ex Parte Nos. 305-RE, 318, 330, and 336; and that failure of the Montana Public Service Commission to authorize petitioners to increase Montana intrastate freight rates and charges corresponding to the aforesaid interstate increases has resulted in depriving petitioners of additional revenues required by them to enable them under honest, economical and efficient management to provide adequate and efficient railroad transportation and services consistent with the public interest and the National Transportation Policy.

Petitioners also contend that upon entering the order prayed for it may become necessary to make readjustments for the purpose of retaining rail traffic and maintaining market relationships, which adjustments have no relation to interstate rates and charges on like traffic as to the provisions of the act. They therefore request that provision be made in said Order for subsequent rate adjustments by petitioners on a self-executing basis without further proceedings or orders of this Commission so that excessive delays of supplemental orders may be avoided. They suggest that the order contain a self-operative provision permitting such adjustment in rates, and charges upon 30 days' notice given to the Commission and to the general public, or upon such a lesser period as may be authorized by special permission application, and where no protest to such adjustment is received by the Commission, on or before 12 days prior to the expiration of the 30 day notice, said adjustments may become effective automatically, unless otherwise ordered by the Commission.

Under section 13 of the Interstate Commerce Act, this Commission may institute an investigation, into the lawfulness of intrastate rail freight rates and charges for the purpose of adjusting such rates and charges to those charged on similar traffic moving in interstate or foreign commerce. This Commission may act not withstanding the laws or constitution of any State.

Therefore, *It is ordered*, That the petition is granted. An investigation, under section 13 and 15a of the Interstate Commerce Act, is instituted to determine whether the Montana intrastate rail freight rates in any respect cause any unjust discrimination against or any undue burden on interstate or foreign commerce, or are otherwise unlawful, by reason of the failure of such rates and charges to include the full increases authorized for interstate application by this Commission in Ex Parte Nos. 305-RE, 318, 330, and 336. It will also determine if any rates or charges, or maximum or minimum charges, or both, shall be prescribed to remove any unlawful advantage, preference, discrimination, undue burden, or other violation of law, found to exist. The investigation will also determine whether the requested self-operative provision permitting self-executing rate readjustments is properly within the scope of an investigation such

as this one, and, if so, whether the pleadings submitted in this investigation show reason sufficient to warrant such a provision.

It is further ordered, That all common carriers by railroad operating in the State of Montana, subject to the jurisdiction of this Commission are made respondents in this proceeding.

It is further ordered, That all persons who wish to actively participate in this proceeding and to file and receive copies of pleadings shall make known that fact by notifying the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423, on or before 15 days from the FEDERAL REGISTER publication date. Although individual participation is not precluded, to conserve time and to avoid unnecessary expense, persons having common interests should endeavor to consolidate their presentations to the greatest extent possible. The Commission desires participation of only those who intend to take an active part in the proceeding.

It is further ordered, That as soon as practicable after the date of indicating a desire to participate in the proceeding has passed, the Commission will serve a list of names and addresses of all persons upon whom service of all pleadings must be made and that thereafter this proceeding will be assigned for oral hearing or handling under modified procedure.

And it is further ordered, That a copy of this order shall be served upon each of the petitioners and respondents herein. The State of Montana shall be notified of the proceeding by sending copies of this order of the instant petition by certified mail to the Governor of the State of Montana and to the Public Service Commission of Montana. Further notice of this proceeding shall be given to the public by depositing a copy of this order in the Office of the Secretary of the Interstate Commerce Commission, at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

This is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 12th day of September, 1977.

By the Commission, Commissioner Murphy.

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 231]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211,

312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission on or before November 2, 1977. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopsis form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-77118 filed September 14, 1977. Transferee: Robert Airport Harris, doing business as R. A. Harris & Sons, 3501 22d Street, Menominee, Mich. 49858. Transferor: Service Ice Company, a corporation, 1013 N. 14th Street, Sheboygan, Wis. 53081. Applicant's representative: Robert A. Harris, (address same as transferee). Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit No. MC 119704 issued February 17, 1961, as follows: Ice cream and frozen milk products, from Sheboygan, Wis., to points in Iowa, Minnesota, Illinois, Indiana, and Michigan and nuts and fruit flavors for use as ingredients in the manufacture of ice cream and frozen milk products, returned shipments of ice cream and frozen milk products, and empty cases and containers used in packing ice cream and frozen products, from points in Iowa, Minnesota, Illinois, Indiana, and Michigan, to Sheboygan, Wis. The operations authorized are limited to a transportation service to be performed under a continuing contract, or contracts, with Verifine Dairy Products Co., of Sheboygan, Wis. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-FC-77262, filed September 20, 1977. Transferee: Ronald B. Pearson, doing business as Pearson's Express, 132 Vale Street, Fall River, Mass. 02724. Transferor: Link Transportation Company, Inc., 70 Christine Terrace, Milford,

Conn. 06460. Applicant's representative: Ronald B. Pearson, 132 Vale Street, Fall River, Mass. 02724. Authority sought for purchase by transferee of a portion of the operating rights of transferor as set forth in Certificate No. MC 100825 (Sub-No. 1), issued March 20, 1975 as follows: General commodities, except those of unusual value, and except automobiles, dangerous explosives, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, over regular routes between Jewett City, Conn., and Providence, R.I., serving all intermediate points, and serving the off-route points of Voluntown, Griswold, Norwich, Hanover, Baltic, Versailles, Taftville, Oneco, Sterling Moosup, Canterbury, Brooklyn, Attawaugan, Goodyear, and East Killingly, Conn., and Foster Center, R.I.; from Jewett City over Connecticut Highway 12 to Danielson, Conn., thence over U.S. Highway 6 to Providence, and return over the same route. Between Danielson, Conn., and Providence, R.I., serving all intermediate points, and serving the off-route points of Canterbury, Wauregan, Brooklyn, East Killingly, Goodyear, Balloville, Pomfret, Grosvenor Dale, North Grosvenor Dale, and Mechanicsville, Conn.; from Danielson over Connecticut Highway 12 to Putnam, Conn., thence over U.S. Highway 44 to Providence, and return over the same route. Transferee holds Certificate of Registration No. MC 120880 authorizing service to all points in Massachusetts. Application has not been filed for temporary authority under section 210a(b).

No. MC-FC-77299, filed September 5, 1977. Transferee: S.R.T. MOTOR FREIGHT, INC., 1801 South Pennsylvania Ave., Morrisville, Pa. 19067. Transferor: Benjamin Brothers, Inc., 1729 West Allegheny Ave., Philadelphia, Pa. 19132. Applicant's representative: Alan Kahn, Suite 1920, Two Penn Center Plaza, Philadelphia, Pa. 19102. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC 84450, issued August 8, 1960, as follows: Green salted hides, from points in New Jersey, except points within 20 miles of New York, N.Y., to Philadelphia, Pa.; tanning materials, from Newark, N.J., to Philadelphia, Pa., and fish oil, in barrels, from Newark, N.J., to Philadelphia, Pa.; uncrated machinery, and articles requiring specialized handling or rigging because of size or weight, between Philadelphia, Pa., and points in New Jersey, Delaware, and Pennsylvania within 30 miles of Philadelphia, on the one hand, and, on the other points in New York, except New York, N.Y., and points within 75 miles thereof; machinery, and articles requiring specialized handling or rigging because of size or weight, between Philadelphia, Pa., points in New Jersey, Delaware, and Pennsylvania, within 30 miles of Philadelphia, on the one hand, and, on the other, points in New Jersey, Delaware, Maryland, Pennsylvania, Connecticut, and the District of Columbia, and

those in New York within 75 miles of New York, N.Y., including New York, N.Y.; hides and tallow, between Philadelphia, Pa., on the one hand, and, on the other, points in New York and New Jersey within 20 miles of New York, N.Y., including New York, N.Y.; and general commodities, except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special handling or rigging because of size or weight, and those injurious or contaminating to other lading, between points in Philadelphia, Pa. Transferee presently holds no authority from this Commission. Application has

not been filed for temporary authority under section 210a(b).

No. MC 77304, filed September 13, 1977. Transferee: Ray Holland, 13101 El Road, Little Rock, Ark. 72206. Transferor: William R. Pinkerton, doing business as Bill Pinkerton, 13801 Ironton Cutoff, Little Rock, Ark. 72206. Applicants' representative: THOMAS J. PRESSON, Lot 27 River Bend Estates, Redfield, Ark. 72132. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Permit Nos. MC 117834 (Sub-No. 1); MC 117834 (Sub-No. 4); and MC 117834 (Sub-No. 5); issued May 7, 1963, August 12, 1963, February 2, 1967,

and January 23, 1970, as follows: Bananas, from New Orleans, La., to Little Rock, Ark.; bananas from Gulfport, Miss., Mobile, Ala., and Houston and Galveston, Tex., to North Little Rock, Ark.; fruit and vegetable shipping containers, from Little Rock, Ark., to points in Louisiana; bananas, from New Orleans, La., Gulfport, Miss., Mobile, Ala., and Houston and Galveston, Tex., to Little Rock, Ark.; Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

Title 24—National Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-297]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for City of Boulder, Colo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On June 27, 1974, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included the City of Boulder, Colo. It has been determined by FIA, after further technical review of the Flood Hazard Boundary Map for the City of Boulder, Colo., in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirements to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year: *Provided*, That no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of Letter of Map Amendment.

Map No. H 080024A Panels 03 and 05, published on June 27, 1974 in 39 FR 23264, indicates that Lot 19, Block 3, Keewaydin Meadows Filing No. Three,

Boulder, Colo., as recorded on Plan File R-2-3, No. 6, in the office of the Clerk and Recorder of Boulder County, Colo., is within the Special Flood Hazard Area.

Map No. H 080024A Panels 03 and 05 is hereby corrected to reflect the entire area bounded by U.S. Route 36 on the south, Pawnee Drive on the west, Baseline Road on the north, and the City of Boulder corporate limits on the east, which includes Lot 19, Block 3, is not within the Special Flood Hazard Area identified on June 14, 1974.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-410]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Anne Arundel County, Md.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On November 29, 1974, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included Anne Arundel County, Md. It has been determined by FIA, after further technical review of the Flood Hazard Boundary map for the County of Anne Arundel, in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

[Docket No. FI-410]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Anne Arundel County, Md.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On November 29, 1974, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included Anne

Arundel County. It has been determined by FIA, after further technical review of the Flood Hazard Boundary map for the County of Anne Arundel, in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year: *Provided*, that no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H 240008 Panel 55, published on November 29, 1974, in 39 FR 41504, indicates that Lots 42 and 43, Crofton Commons, Anne Arundel County, Md., as recorded in Plat Number 2654, Platbook 49, Folio 29, in the Office of the Clerk of the Circuit Court of Anne Arundel County, Md., are within the Special Flood Hazard Area.

Map No. H 240008 Panel 55 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area identified on November 15, 1974.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

[Docket No. FI-2000]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Prince Georges County, Md.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On February 14, 1977, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included Prince Georges County, Md. It has been determined by FIA, after further technical review of the Flood Insurance Rate map for the County of Prince Georges, in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or Federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or Federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year; *Provided*, That no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association

(NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H&I 245208A Panel 33, published on February 14, 1977, in 42 FR 9113, indicates that Lot 17, Block E, Section 3, Rambling Hills, Prince Georges County, Md., as recorded in Book 64, Plat 23 in the Office of Land Records of Prince Georges County, Md., is within the Special Flood Hazard Area.

Map No. H&I 245208A Panel 33 is hereby corrected to reflect that the existing structure on the above property is not within the Special Flood Hazard Area identified on August 28, 1976. The structure is in Zone C.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: September 8, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-326]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for City of Marlborough, Mass.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included the City of Marlborough, Mass. It has been determined by FIA, after acquiring additional flood information and after further technical review of the Flood Hazard Boundary Map for the City of Marlborough, Mass., that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or Federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or Federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year; *Provided*, That no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The map amendments listed below are in accordance with § 1920.7(b):

Map No. H 250203 Panel 02, published on August 7, 1974, in 39 FR 28426, indicates that Lot 6, Section C, Indian Lake Shores, at 291 Lake Shore Drive, Marlborough, Mass., as recorded in Book 6985, Page End, in the office of the Registry of Deeds of Middlesex County, Mass., is within the Special Flood Hazard Area.

Map No. H 250203 Panel 02 is hereby corrected to reflect the above property is not within the Special Flood Hazard Area identified on July 26, 1974.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Borough of Upper Saddle River, N.J.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On January 16, 1974, the Federal Insurance Administrator pub-

lished a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included the Borough of Upper Saddle River, N.J. It has been determined by FIA, after further technical review of the Flood Hazard Boundary Map for the Borough of Upper Saddle River, N.J., in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the existing structure on the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or Federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year; *Provided*, That no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H 340077 Panel 02, published on January 16, 1974, in 39 FR 1986, indicates that the westerly portion of Lot 19, at 111 Lake Street, Upper Saddle River, N.J., as recorded in Book 5693, Pages 29 through 31, in the Office of the Clerk of Bergen County, N.J., is within the Special Flood Hazard Area.

Map No. H 340077 Panel 02 is hereby corrected to reflect that the existing structure on the above property is not within the Special Flood Hazard Area identified on January 4, 1974.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Borough of Allendale, N.J.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: The Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included the borough of Allendale, N.J. It has been determined by FIA, after acquiring additional flood information and after further technical review of the Flood Hazard Boundary Map for the borough of Allendale, N.J., that certain property is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or Federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: October 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or Federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year; *Provided*, That no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The map amendments listed below are in accordance with § 1920.7(b):

Map No. H 340019 Panel 02, published on March 12, 1973 in 38 FR 6679, indicates that Lot 1, Block 1705, located at 210 Mallinson Street, Allendale, N.J., as shown on the Allendale Tax Map, is within the Special Flood Hazard Area. This property is recorded as Lot 10 on Map No. 160, in Book 5665, Page 125, in the office of the Clerk of Bergen County, N.J.

Map No. H 340019 Panel 02 is hereby corrected to reflect that the existing structure on the above property is not within the Special Flood Hazard Area identified on March 16, 1973.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

[Docket No. FI-196]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Village of Ridgewood, N.J.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On August 24, 1973, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included the Village of Ridgewood, N.J. It has been determined by FIA, after further technical review of the Flood Hazard Boundary Map for the Village of Ridgewood, N.J., in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581, or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or federally related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year: *Provided*, That no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H 340067 Panel 03, published on August 24, 1973 in 38 FR 22776, indicates that property located at 379 South Irving Street, Ridgewood, N.J., as recorded in Book 5774, Page 270, in the office of the Clerk of Bergen County, N.J., is within the Special Flood Hazard Area.

Map No. H 340067 Panel 03 is hereby corrected to reflect that the existing structure on the above property is not within the Special Flood Hazard Area identified on August 31, 1973.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

[Docket No. FI-991]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for City of Grove City, Ohio

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On March 30, 1976, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included Grove City, Ohio. It has been determined by FIA, after further technical review of the Flood Hazard Boundary map for the city of Grove City, in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

[Docket No. FI-455]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Washington County, Oregon.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On January 27, 1975, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included Washington County, Oregon. It has been determined by FIA, after further technical review of the Flood Hazard Boundary Map for Washington County, Oregon, in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood in-

surance for that property as a condition of Federal or federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

[Docket No. FI-440]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Houston, Tex.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On January 10, 1975, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included Houston, Tex. It has been determined by FIA, after further technical review of the Flood Hazard Boundary map for the City of Houston, in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or Federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or Federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year: *Provided*, That no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H 480296A Panel 138, published on January 10, 1975, in 49 FR 2190, indicates that Fondren Place Townhomes, Houston, Tex., as recorded in Volume 230, Page Number 55 of Plats, in the Office of the Clerk of Court, Har-

ris County, Tex., is within the Special Flood Hazard Area.

Map No. H 480296A Panel 138 is hereby corrected to reflect that the structures on the above property are not within the Special Flood Hazard Area identified on December 27, 1974.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-2600]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Harris County, Tex.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On February 14, 1977, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included Harris County, Tex. It has been determined by FIA, after further technical review of the Flood Insurance Rate map for the County of Harris, in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or Federally-related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or Federally-related financial assistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year: *Provided*, That no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from

the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H & I 480287B Panel 41, published on February 14, 1977, in 42 FR 1118, indicates that Owen Tract, Harris County, Tex., as recorded in Volume 8321, Page 12, of General Warranty Deeds in the Office of the Clerk of Court of Harris County, Tex., is within the Special Flood Hazard Area.

Map No. H & I 480287B Panel 41 is hereby corrected to reflect that a portion of the above property, which can be described as follows:

Beginning at an iron pipe at a fence corner marking the northeast corner of the Mandred Wood Survey, Abstract No. 869, Harris County, Tex., and the northwest corner of the P. MacNaughton Survey; thence S. 2°24'11" E., approximately 598 feet to a point; thence S. 87° W., approximately 1,075 feet to a point; thence S. 60° 30' W., approximately 1,736 feet to a point; thence S. 77°15' W., approximately 1,570 feet to a point on the western line of said tract; thence N. 2°34'28" W., approximately 1,751 feet to a point being the northwest corner of said tract; thence N. 87°57'02" E., approximately 4,145.86 feet to a point, being the point of beginning.

is not within the Special Flood Hazard Area, but is within Zone C as identified on July 30, 1976.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

[Docket No. FI-2600]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for
Fairfax County, Va.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: On February 14, 1977, the Federal Insurance Administrator published a list of communities for which the Federal Insurance Administration (FIA) published maps identifying Special Flood Hazard Areas. This list included Fairfax County, Va. It has been determined by FIA, after further technical review of the Flood Insurance Rate map for the County of Fairfax, in light of additional, recently acquired flood information, that certain property (described below) is not within the Special Flood Hazard Area.

This map amendment, by establishing that the subject property is not within the Special Flood Hazard Area, removes the requirement to purchase flood insurance for that property as a condition of Federal or Federally related financial assistance for construction or acquisition purposes.

EFFECTIVE DATE: Date of this notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: If a property owner was required to purchase flood insurance as a condition of Federal or Federally related financial as-

sistance for construction or acquisition purposes, and the lender now agrees to waive the property owner from maintaining flood insurance coverage on the basis of this map amendment, the property owner may obtain a full refund of the premium paid for the current policy year: *Provided*, That no claim is pending or has been paid on the policy in question during the same policy year. The premium refund may be obtained from the National Flood Insurers Association (NFIA) through the agent or broker who sold the policy.

The text reads as follows:

§ 1920.7 Notice of letter of map amendment.

Map No. H & I 515525C Panel 13, published on February 14, 1977, in 42 FR 9119, indicates that Lot 26, Block K, Section 2, Resubdivision Merrifield View, Fairfax County, Va., as recorded in Deed-book 3525, Page 611 of Plats in the Office of the Clerk of the Circuit Court for Fairfax County, Va., is within the Special Flood Hazard Area.

Map No. H & I 515525C Panel 13 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area identified on May 7, 1976. The property is in Zone C.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January, 1974.)

Issued: September 8, 1977.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-3428]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Township of Unity, Westmoreland County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the township of Unity, Westmoreland County, Pa. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review on the bulletin board at the Township Municipal Building, R.D. 3, Latrobe, Pa. 15650.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Paul R. Watkins, Chairman of the Board of Supervisors of Unity, Box 526, Latrobe, Pa. 15650.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202-755-5581), or Toll Free Line (800-424-8872), Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Township of Unity, Westmoreland County, Pennsylvania, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any

existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet above mean sea level
Loyalhanna Creek	State Route 981	982
	Mission Rd.	998
	Route 982	1,004
	U.S. 30	1,017
	Route 217	1,029
	Spillway	1,036
	Confluence with tributary No. 1	1,150
Tributary No. 1	Mouth of tributary	1,150
	U.S. 30	1,179
	Township R.D. 689	1,243
Crabtree Creek	Abandoned railroad bridge	993
	Route 119	995
	LR 64031	996
Little Crabtree Creek	Mouth of Little Crabtree Creek	996
	Route 119	1,003
	Route 119	1,003
Nine Mile Run	T-890	1,048
	Karns St.	1,062
	State Route 982	1,064
	Confluence with 9-Mile Run	1,104
Tributary No. 2	LR 64151	1,110
	Route 130	1,036
	T-583	1,044

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 30, 1977.

Proposed Flood Elevation Determinations **for Douglas County, Wash.**

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in Douglas County, Wash. These base flood

elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Bulletin Board in the Courthouse, Douglas County, Washington.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. William E. Bechtol, Chairman of the Douglas County Commissioners, Douglas County, Wash.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for Douglas County, Wash., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Douglas Creek	Burlington Northern R.R. at Palisades.	970.8
	U.S. Route 2 bridge at Douglas.	2,369.6
Krummer Draw	Douglas Ave.	2,374.2

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 30, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations **for the Town of Rosalia, Whitman County,** **Wash.**

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the town of Rosalia, Whitman County, Wash. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the City Hall, Rosalia, Wash.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Hon. Joe Freeze, Mayor of Rosalia, Rosalia, Wash. 99170.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the town of Rosalia, Whitman County, Wash., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Mud Lake	Upstream corporate limits, right bank	2,220
	Upstream corporate limits, left bank	2,218
	7th Street Bridge	2,217
	Railroad bridge	2,215
	Downstream corporate limits	2,210

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 30, 1977.

NATIONAL FLOOD INSURANCE PROGRAM Proposed Flood Elevation Determinations for Clatsop County, Ore.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed Rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in Clatsop County, Ore. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at County Courthouse, Astoria, Ore. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Albert W. Palmer, Chairman, Board of Commissioners for Clatsop County, P.O. Box 179, Astoria, Ore. 97103.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION:

The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for Clatsop County, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

[Docket No. FI-3439]

NATIONAL FLOOD INSURANCE PROGRAM Proposed Flood Elevation Determinations for Douglas County, Ore.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in Douglas County, Ore. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at County Courthouse, Douglas Avenue, Roseburg, Ore. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. John Truett, Chairman, County Board of Commissioners, Douglas County, County Courthouse, Douglas Avenue, Roseburg, Ore. 97470.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for Douglas County, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures re-

quired by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Umpqua River	Scottsburg Bridge (Highway 38)	40
	Beckley Bridge	120
	Smith Bridge	114
	Kellogg Bridge	208

NATIONAL FLOOD INSURANCE PROGRAM Proposed Flood Elevation Determinations for the City of Pagedale, St. Louis County, Mo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Pagedale, St. Louis County, Mo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the City Hall, 1404 Ferguson Avenue, Pagedale, Mo. 63133.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable William D. Speiser, Mayor, City of Pagedale, City Hall, 1404 Ferguson Avenue, Pagedale, Mo. 63133.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Pagedale, Mo., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Northeast Branch River Des Peres	250 feet upstream from Pennsylvania Ave.	529
	Upstream side, St. Louis belt and terminal railway.	513
Engelholm Creek	Norfolk and Western RR.	523
	210 feet upstream from Kingsland Ave.	533
	130 feet downstream from North Market Bridge.	513

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 30, 1977.

[Docket No. FI-3414]

NATIONAL FLOOD INSURANCE PROGRAM Proposed Flood Elevation Determinations for the Village of Ellicottville, Cattaraugus County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Village of Ellicottville, Cattaraugus County, N.Y.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Town Hall, 1 West Washington Street, Ellicottville, N.Y. 14731.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Honorable Paul Stokes, Mayor of Ellicottville, N.Y. 14731.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Ellicottville, Cattaraugus County, N.Y. in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234),

87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Gates Creek	Upstream corporate limits	1,575
	Route 98	1,569
Iselma Creek	North corporate limits	1,590
	Con Rail	1,589
	Northwest corporate limits	1,588
	West corporate limits	1,580
	Route 98	1,570
	Con Rail	1,569
	Confluence of Gates Creek	1,569
	Con Rail and Clutes Rd.	1,556
	Pierce Hill Rd.	1,552
	5-Mile Rd.	1,449
	Downstream corporate limits	1,444

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 30, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

NATIONAL FLOOD INSURANCE PROGRAM Proposed Flood Elevation Determinations for the Town of Franklinville, Cattaraugus County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Franklinville, Cattaraugus County, N.Y.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review on the Bulletin Board in the Clerk's Office at the Franklinville Town Hall.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Charles J. Morton, Town Supervisor of Franklinville, Town Hall, Franklinville, N.Y. 14737.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Franklinville, Cattaraugus County, N.Y. 14737 in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Great Valley Creek	Mourne St.	1,533
	Martha St.	1,535
	Confluence with Elk Creek	1,536
Elk Creek	Miles St.	1,536
	Confluence with Great Valley Creek	1,536
	Private Rd.	1,537
	Washington St.	1,539
	Elizabeth St.	1,539
	Park Dr.	1,544
Flam Creek	Confluence with Great Valley Creek	1,530
	Jefferson St.	1,532
	Village boundary	1,640

National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).

Issued: August 30, 1977.

NATIONAL FLOOD INSURANCE PROGRAM Proposed Flood Elevation Determinations for the Village of Fort Edward, Wash- ington County, N.Y.

AGENCY: Federal Insurance Adminis-
tration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Village of Fort Edward, Washington County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Village Clerk's Office, 118 Broadway, Fort Edward, N.Y. 12828.

Any person having knowledge, information, or wishing to make a comment on these proposed elevation should immediately notify the Honorable Edith M. Amorosi, Mayor, Village of Fort Edward, P.O. Box 345, Fort Edward, N.Y. 12828.

FOR FURTHER INFORMATION CON- TACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION:

The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Fort Edward, N.Y., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in the flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Long Island Sound	Cold Spring Harbor	12
	Eastons Neck	12
	Centerport Harbor	12
	Northport Harbor	12
	Crab Meadow	11
	Huntington Harbor	12

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).

Issued: August 30, 1977.

NATIONAL FLOOD INSURANCE PROGRAM Proposed Flood Elevation Determinations for the Town of Huntington, Suffolk County, N.Y.

AGENCY: Federal Insurance Adminis-
tration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Huntington, Suffolk County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Huntington Town Hall, in the lobby, 227 Main Street, Huntington, N.Y. 11743.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Kenneth C. Butterfield, Supervisor of Huntington, 227 Main Street, Huntington, N.Y. 11743.

FOR FURTHER INFORMATION CON- TACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581, or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Huntington, Suffolk County, New York, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Hudson River (east and west channel)	At south corporate limits.	128
Hudson River	At Brightwood St. extended.	130
	At north corporate limit.	131
Bond Creek	At Baldwin Ave.	123

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Town of East Spencer, N.C.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of East Spencer, N.C. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Town Hall, Henderson Street, East Spencer, N.C.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Thomas J. Poate, Town Hall, Henderson Street, P.O. Box 338, East Spencer, N.C. 28039.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of East Spencer, N.C., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

[Docket No. FI-3421]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Town of Landis, N.C.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Landis, N.C. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Town Hall, 136 North Central Avenue, Landis, N.C.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Gene R. Beaver, P.O. Drawer 165, Landis, N.C. 28088.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Landis, N.C., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures re-

quired by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet (national geodetic vertical datum)
Mill Creek.....	Ryder Ave. 1.....	823
	do 2.....	823
Beaver Creek.....	Beaver St. 1.....	777

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Nash County, N.C.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in Nash County, N.C. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of

local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at County Courthouse, Main Street, Nashville, N.C. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. L. R. Holloman, Jr., County Manager, County Courthouse, Main Street, Nashville, N.C. 27856.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for Nash County, N.C., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the City of Lorain, Lorain County, Ohio

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the city of Lorain, Lorain County, Ohio. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review on the first floor, on the Bulletin Board, outside the Clerk of the Council's Office, City Hall, 200 West Erie Avenue, Lorain.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Joseph J. Rochoric, City Hall 200 West Erie Avenue, Lorain, Ohio 44052.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the city of Lorain, Lorain County, Ohio, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Borough of Port Allegany, McKean County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Borough of Port Allegany, McKean County, Pa. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review on the Bulletin Board at the Borough Office Building.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Mark O. Griffith, Borough Manager, Borough Office Building, Port Allegany, Pa.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202-755-5581), or Toll Free Line (800-424-8872), Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Borough of Port Allegany, McKean County, Pa. in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of

1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Allegheny River	U.S. Route 6	1,474
	Mill St.	1,477
Littlefield Creek	Con Rail bridge	1,480
	Mill St.	1,484

[Docket No. FI-3393]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Town of Reform, Ala.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Reform, Ala. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publi-

cation of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Town Hall, Reform, Ala. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor L. D. Vail, Town Hall, P.O. Box 431, Reform, Ala. 35481.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202-755-5581), or Toll Free Line (800-424-8872), Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Reform, Ala., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
Lubbub Creek tributary 1	2d St.	238
	4th Ave.	239
	8d Ave.	230
Lubbub Creek	Illinois Central Gulf RR	225
	U.S. Highway 82	226

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Adminis-

PROPOSED RULES

trator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 30, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

NATIONAL FLOOD INSURANCE PROGRAM

Revision of Proposed Flood Elevation Determinations for the City of West Helena, Phillips County, Ark.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed based flood elevations (100-year flood) listed below for selected locations in the City of West Helena, Phillips County, Ark. Due to recent engineering analysis, this notice revises the proposed determinations of base flood elevations published in 42 FR 36089 on July 13, 1977, and in the Twin City Tribune published on April 27 and May 4, 1977, and hence supersedes those notices.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at the City Clerk's Office, Municipal Building, West Helena, Ark. Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mayor Jesse E. Porter, 98 Plaza, West Helena, Ark. 72390.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202-755-5581), or Toll Free Line (800-424-8872), Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed flood elevations (100-year flood) are listed below for selected locations in the City of West Helena, Phillips County, Arkansas, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (Section 1917.4(a)).

These base flood elevations are the basis for the flood plain management measures that the community is required

to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year Flood Elevations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Cauey Creek	Corporate limits downstream of Little Rock Rd.	209
	Upstream of Oakland Ave.	212
	Northernmost corporate limits	260
Cauey Creek, lateral A.	Upstream of southern corporate limits	231
	Downstream of of Anderson Ave.	261
	Corporate limits, lateral B.	210
Cauey Creek, lateral D.	Upstream of Ashlar St.	223
	Corporate limits	241
Crooked Creek	Upstream of Kentue y. St.	248
	Upstream of Anderson Ave.	255
	Upstream of North 6th St.	259
Crooked Creek, lateral A.	Downstream of North 6th St.	271
	Downstream of Hill Rd.	276
	Corporate limits	238
Crooked Creek, lateral B.	Upstream of of Anderson Ave.	236
	Upstream of Substation	242
Crooked Creek, lateral C.	Downstream of Plaza Ave.	253

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

Issued: August 30, 1977.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the City of Costa Mesa, Calif.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the

City of Costa Mesa, Calif. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 77 Fair Drive, Costa Mesa, Calif.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Fred Sorsabal, City Manager, City of Costa Mesa, City Hall, 77 Fair Drive, Costa Mesa, Calif. 92626.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Costa Mesa, Calif., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet (national geodetic vertical datum)
Greenville-Hanning Channel	San Diego Freeway	32
	New Hampshire Dr.	30
	California St.	30
	Adams St.	20
	Victoria St.	11

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

NATIONAL FLOOD INSURANCE PROGRAM

Revision of Proposed Flood Elevation Determinations for the Town of Trumbull, Fairfield County, Conn.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Trumbull, Fairfield County, Conn. Due to recent engineering analysis, this notice revises the proposed determinations of base flood elevations published in 42 FR 34462 on July 5, 1977, and in the Trumbull Times published on June

30, 1977, and July 7, 1977, and hence supersedes those notices.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at the Town Clerk's Office and the Town Engineers Office, Trumbull Town Hall, 5866 Main Street, Trumbull, Conn. 06611.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify Mr. James A. Butler, First Selectman, Town of Trumbull, Trumbull Town Hall, 5866 Main Street, Trumbull, Conn. 06611.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard W. Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed flood elevations (100-year flood) are listed below for selected locations in the Town of Trumbull, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (section 1917.4(a)).

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year Flood Elevations are:

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the County of Kankakee, Ill.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the county of Kankakee, Ill. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Kankakee County Regional Planning Office, 435 Oak, Kankakee, Ill.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Roy M. West, Chairman of the Board of Supervisors of Kankakee County, Kankakee County Courthouse, Kankakee, Illinois 60901.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance,

202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the county of Kankakee, Ill., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

[Docket No. FI-3399]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for Peoria County, Illinois

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in Peoria County, Ill. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Bulletin Board at the Courthouse, Peoria County Courthouse, 300 Main Street, Peoria, Ill.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Ray A. Neumann, Chairman of Peoria County Board, 300 Main Street, Peoria County Courthouse, Peoria, Ill. 61602.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for Peoria County, Ill., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any

existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of Flooding	Location	Elevation in feet (national geodetic vertical datum)
Illinois River.....	Downstream County boundary	455
	City of Kingston Mines	457
	Chicago and North-western Railway (M151.2)	458

[Docket No. FI-3400]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the City of Lindsborg, McPherson County, Kans.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the city of Lindsborg, McPherson County, Kans. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the City Hall, Lindsborg, Kan.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Alden Shields, City Administrator of Lindsborg, City Hall, Lindsborg, Kans. 67450.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, Southwest, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the city of Lindsborg, McPherson County, Kans., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Cow Creek.....	North corporate limit	1,321
	Columbus St.....	1,324
	Swenson St.....	1,327
	Madison St.....	1,328
	3d St.....	1,330
	Grant St.....	1,331
	West corporate limit..	1,334
Smoky Hill River..	East corporate limit..	1,325
	2d St. (extended)....	1,326
	South corporate limit..	1,326
West fork, Cow Creek.	North corporate limit..	1,324
	West corporate limit..	1,325

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the City of Beattyville, Lee County, Ky.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed Rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Beattyville, Lee County, Ky. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the County Judge's Office in the basement of the County Jail, Main Street, Beattyville, Ky.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Charles Beach III, Peoples Exchange Bank, Beattyville, Ky. 41311.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Beattyville, Lee County, Ky. in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Earle D. Stevens, City Manager, City of Brewer, City Hall, 80 North Main Street, Brewer, Maine 04412.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202-755-5581), or Toll Free Line (800-424-8872), Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Brewer, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and

Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected location are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Penobscot River....	Downstream corporate limits.	14
	Downstream of State Route 1A.	17
	Downstream of State Route 9.	18

NATIONAL FLOOD INSURANCE PROGRAM
Proposed Flood Elevation Determinations
for the Township of Wisner, Mich.

AGENCY: Federal Insurance Adminis-
tration, HUD.

ACTION: Proposed Rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the township of Wisner. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Township Office, 9384 West Bay City-Forestville Road, Fairgrove, Mich. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Edward Duke, Supervisor, Township of Wisner, Township Office, 9384, West Bay City-Forestville Road, Fairgrove, Michigan 48733.

FOR FURTHER INFORMATION CON-
TACT:

Mr. Richard Krimm, Assistant Ad-
ministrator, Office of Flood Insurance,

8872, Room 5270, 451 Seventh Street,
Southwest, Washington, D.C. 20410

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator
gives notice of the proposed determina-
tions of base flood elevations (100-year
flood) for the township of Wisner, in ac-
cordance with section 110 of the Flood
Disaster Protection Act of 1973 (Pub. L.
93-234), 87 Stat. 980, which added sec-

tion 1363 to the National Flood Insurance
Act of 1968 (Title XIII of the Housing
and Urban Development Act of 1968 Pub.
L. 90-448), 42 U.S.C. 4001-4128, and 24
CFR Part 1917.

These elevations together with the
flood plain management measures re-
quired by section 1910.3 of the program
regulations are the minimum that are
required. They should not be construed
to mean the community must change any
existing ordinances that are more strin-
gent in their flood plain management re-
quirements. The community may at any
time enact stricter requirements on its
own, or pursuant to policies established
by other Federal, State, or regional en-
tities. These proposed elevations will also
be used to calculate the appropriate flood
insurance premium rates for new build-
ings and their contents and for the sec-
ond layer of insurance on existing build-
ings and contents.

The proposed 100-year flood elevations
for selected locations are:

ENVIRONMENTAL PROTECTION
AGENCY

[40 CFR Part 60]

[FRL 777-8]

STATIONARY GAS TURBINES

Standards of Performance for New
Stationary SourcesAGENCY: Environmental Protection
Agency.

ACTION: Proposed rule.

SUMMARY: The proposed standards would limit emissions of nitrogen oxides and sulfur dioxide from new, modified and reconstructed stationary gas turbines to 75 ppm and 150 ppm, respectively. A new reference method for determining the concentration of nitrogen oxides, sulfur dioxide and oxygen in the exhaust gases from stationary gas turbines is also proposed. The standards implement the Clean Air Act and are based on the Administrator's determination that stationary gas turbine emissions contribute significantly to air pollution. The intended effect is to require new, modified and reconstructed stationary gas turbines to use the best demonstrated system of emission reduction.

DATES: Comments must be received on or before December 2, 1977.

ADDRESSES: Comments should be submitted, preferably in triplicate, to the Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, N.C. 27711. Attention: Mr. Don R. Goodwin.

The Standards Support and Environmental Impact Statement (SSEIS) containing the data and information upon which the proposed standards are based may be obtained from the Public Information Center (PM-215), U.S. Environmental Protection Agency, Washington, D.C. 20460 (specify "Standards Support and Environmental Impact Statement, Volume 1: Proposed Standards of Performance for Stationary Gas Turbines").

The SSEIS and all public comments received may be inspected and copied at the Public Information Reference Unit (EPA Library), Room 2922, 401 M Street SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Don R. Goodwin, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, N.C. 27711, telephone No. 919-541-5271

SUPPLEMENTARY INFORMATION:

PROPOSED STANDARDS

The proposed standards would apply to all new, modified and reconstructed stationary gas turbines with a heat input at peak load equal to or greater than 10.7 gigajoules per hour (about 1,000 horsepower). The standards would apply to simple and regenerative cycle gas turbines and to the gas turbine portion of a

combined cycle steam/electric generating system.

The proposed standards would limit the concentration of nitrogen oxides (NO_x) in the exhaust gases from stationary gas turbines to 0.0075 percent by volume (75 ppm) at 15 percent oxygen on a dry basis. This emission limit would be adjusted upward for turbines with thermal efficiencies greater than 25 percent and upward for turbines burning fuels with a nitrogen content greater than 0.015 percent by weight.

The proposed standard would be referenced to International Standard Organization (ISO) standard day conditions of 288 degrees Kelvin, 60 percent relative humidity, and 101.3 kilopascals (1 atmosphere) pressure. Measured NO_x emission levels, therefore, would be adjusted to ISO reference conditions by use of an ambient condition correction factor included in the standard or by a custom ambient condition correction factor developed by the gas turbine manufacturer, owner, or operator and approved for use by EPA. Manufacturers, owners, or operators electing to develop custom ambient condition correction factors, however, would be required to develop such factors in terms of the following variables: combustor inlet pressure, ambient air pressure, ambient air humidity, and ambient air temperature. All correction factors would have to be substantiated with data and approved for use by the Administrator before they could be used for determining compliance with the proposed standard.

Stationary gas turbines with a heat input at peak load from 10.7 to, and including, 107.2 gigajoules per hour would be exempt from the NO_x emission limit for five years from the date of this proposal. Emergency-standby gas turbines, military gas turbines and firefighting gas turbines would be exempt permanently from the NO_x emission limit. In addition, stationary gas turbines using wet controls would be exempt temporarily from the NO_x emission limit during those periods when ice fog created by the gas turbine was deemed by the owner or operator of the gas turbine to present a traffic hazard. None of the exemptions mentioned in this paragraph would apply to the SO₂ emission limit.

The proposed standards would limit the SO₂ concentration in the exhaust gases from stationary gas turbines to 0.015 percent by volume (150 ppm) corrected to 15 percent oxygen on a dry basis, or would limit the sulfur content of the fuel used by any stationary gas turbine to 0.8 percent by weight.

SUMMARY OF ENVIRONMENTAL AND
ECONOMIC IMPACTS

The proposed standards would reduce NO_x emissions from stationary gas turbines by about 70 percent. Based on industry growth projections, by 1982 a reduction in national NO_x emissions of about 190,000 tons per year would be realized. By 1987, the reduction in national NO_x emissions would reach about 400,000 tons per year.

The adverse water pollution impact of the proposed standards would be minimal. The quantity of water or steam required for injection into the gas turbines to reduce NO_x emission would be small, less than 5 percent of the water consumed by a comparable size steam/electric power plant using cooling towers.

The solid waste impact of the proposed standards would be negligible. There would also be no adverse noise impact resulting from the proposed standards.

The energy impact of the proposed standards would be small. Gas turbine fuel consumption would be increased from 0 to 5 percent, depending largely on the rate of water injection required to comply with the proposed NO_x standard. There would be no energy impact associated with the proposed SO₂ standard. Few turbines will require the high water injection rates (about 1:1 water-to-fuel ratios) which result in a 5 percent fuel penalty. Assuming that all stationary gas turbines subject to the proposed NO_x standard would require a 1:1 water-to-fuel ratio, the fifth year (1982) energy impact of the standard on large stationary gas turbines would be an increase in fuel consumption of about 5,500 barrels of fuel oil per day. The fifth-year (1987) energy impact of the NO_x standard on small stationary gas turbines would be an increase in fuel consumption of about 7,000 barrels of fuel oil per day. This is equivalent to an increase in projected 1982 and 1987 national crude oil consumption of less than 0.03 percent. These estimates are based on assumptions which yield the greatest energy impacts and actual impacts are expected to be much lower.

The economic impact of the proposed standards is considered to be reasonable. The proposed standards would increase the capital costs or purchase price of a gas turbine for most installations by about 1 to 4 percent. For offshore applications, however, such as oil and gas drilling platforms, the increase could be as much as 7 percent. The annualized costs for a gas turbine in all applications would be increased by about 1 to 4 percent, with the largest application, utilities, realizing less than a 2 percent increase.

The proposed standards would increase the total capital investment requirements for all users of large stationary gas turbines by about 36 million dollars by 1982. For the period 1982 through 1987, the standards would increase the capital investment requirements for all users of both large and small stationary gas turbines by about 67 million dollars. Total annualized costs would be increased by about 11 million dollars in 1982 and by about 30 million dollars in 1987. These impacts would result in price increases for the end products or services provided by industrial and commercial users of stationary gas turbines ranging from less than 0.01 percent in the petroleum refining industry to about 0.1 percent in the electric utility industry.

The criteria for an action to be considered major, thereby requiring development of an Economic Impact Analysis (EIA) are: (1) an increase in the fifth-year annualized costs of 100 million dollars, (2) a major product price increase of 5 percent, or (3) an increase in national energy consumption of 25,000 barrels of fuel oil per day. The impacts resulting from the proposed standards would not exceed these criteria, except possibly for offshore applications, where the proposed standards could increase the price of a gas turbine by about 7 percent. Most gas turbines used on offshore oil and gas drilling platforms, however, are likely to have a heat input at peak capacity of less than 107.2 gigajoules per hour (about 10,000 horsepower). Consequently, they would be considered small gas turbines and would be exempt from the standards for five years. In any event, stationary gas turbines sold for offshore applications constitute such a small percentage (estimated at less than 3 percent) of the overall market for gas turbines that they are not considered a major product within the intent of the 5 percent major product price increase criteria for preparation of an EIA. Consequently, the proposed standards would not constitute a major action and no EIA has been prepared.

RATIONALE

SELECTION OF SOURCE FOR CONTROL

Assuming existing levels of emission controls, national NO_x emissions from stationary sources are projected to increase by about 65 percent by 1985. Applying best technology to all new sources would reduce this increase to about 25 percent, but would not prevent it from occurring. This unavoidable increase in NO_x emissions is attributable largely to the fact that few of the NO_x emission control techniques currently available can achieve large reductions in NO_x emissions. Consequently, EPA has assigned a high priority to the development of standards of performance for major NO_x emission sources wherever significant reductions in NO_x emissions can be achieved.

Several studies sponsored by EPA have ranked stationary gas turbines as major controllable sources of NO_x emissions. One study conducted by the Aero-therm Division of Acurex Corporation estimated that oil-fired and gas-fired stationary gas turbines accounted for 2.5 percent of the total NO_x emissions from stationary sources in the U.S. in 1972. This same study ranked gas-fired turbines as sixteenth and oil-fired gas turbines as twenty-third in a priority listing of 137 controllable stationary sources of NO_x emissions.

In another study the Research Corp. of New England (TRC) determined the impact which standards of performance would have on nationwide emissions of particulates, NO_x, SO₂, HC (hydrocarbons), and CO (carbon monoxide) from stationary sources. Sources were then ranked according to the impact a stand-

ard promulgated in 1975 would have on emissions in 1985. This ranking placed gas turbines first on a list of 40 stationary NO_x emission sources and eighth on a list of 41 stationary SO₂ emission sources.

In 1974, 90 percent of all domestic stationary gas turbine capacity was sold to the electric utility market, primarily for use as peaking units. It is expected that this large percentage of sales to utilities will continue in the future due to the many advantages of gas turbines as peaking units. In addition, gas turbine peaking units are often located in large urban centers where power demands are greatest and pollution problems are often most severe.

Stationary gas turbines, therefore, are significant contributors to total nationwide emissions of NO_x. They are ranked high on the various listings of sources for which standards of performance should be developed. In addition, the turbines coupled with the probability that many gas turbines will be installed near large urban centers underscores the need for standards of performance for stationary gas turbines. Consequently, stationary gas turbines were selected for development of standards of performance.

SELECTION OF POLLUTANTS

The pollutants emitted from stationary gas turbines are particulates, NO_x, SO₂, CO and HC. Combustor modifications (dry control) and water injection (wet control) are demonstrated techniques for reducing NO_x emissions at reasonable cost and depending on specific emission level selected, could reduce NO_x emissions by up to 190,000 tons per year in 1982. This is a significant decrease in total nationwide NO_x emissions. For these reasons, NO_x emissions from stationary gas turbines were selected for control by standards of performance.

SO₂ emissions from stationary gas turbines depend on the sulfur content of the fuel since nearly 100 percent of the fuel sulfur is converted to SO₂ during the combustion process. Due to the high volumes of exhaust gases, the cost of flue gas desulfurization (FGD) to control SO₂ emissions from stationary gas turbines is considered unreasonable. Control of SO₂ emissions, therefore, would require combustion of low sulfur fuels rather than the application of FGD. Selection of low sulfur fuels, however, is considered reasonable. Since gas turbines are a major source of SO₂ emissions and firing low sulfur fuels is considered an economically feasible control technique, SO₂ emissions from stationary gas turbines were selected for control by standards of performance.

HC and CO emissions from stationary gas turbines operating at peak load are relatively low because the higher the percentage of peak load at which a turbine operates, the more efficient the combustion of the fuel. Gas turbines normally operate at 80 to 100 percent of peak load with HC emissions averaging less than 50 ppm and CO emissions averaging less than 500 ppm at 15 percent oxygen. HC

and CO emissions from stationary gas turbines, therefore, were not selected for control by standards of performance.

Particulate emissions from stationary gas turbines depend on the ash content of the fuel and are minimal. Consequently, particulate emissions from stationary gas turbines were not selected for control by standards of performance.

SELECTION OF AFFECTED FACILITIES

Stationary gas turbines can be used in three different configurations: simple cycle, regenerative cycle, and combined cycle. All of these configurations emit NO_x and SO₂, and all can be controlled for NO_x emissions by water injection or dry controls and for SO₂ by the firing of low sulfur fuels. Consequently, simple cycle gas turbines, regenerative cycle gas turbines and the gas turbine portion of combined cycle steam/electric generating systems were selected as the affected facilities for standards of performance limiting NO_x and SO₂ emissions.

Gas turbines can burn either liquid or gaseous fuels. Dry and wet control techniques for the control of NO_x can be applied to gas turbines regardless of the type of fuel burned. Similarly, the firing of low sulfur fuel for the control of SO₂ emissions can be applied to gas turbines regardless of the type of fuel burned. EPA recognizes the fact that at the present time gas turbines firing coal-derived fuels probably could not meet the standards of performance. Coal-derived fuels, however, will not be available in commercial quantities to gas turbines for at least ten years and EPA feels that by that time the emission control technology for clean firing of these fuels could be developed. Consequently, gas turbines burning all types of fuels are selected as affected facilities for standards of performance.

For many applications up to about 10,000 hp stationary gas turbines compete with internal combustion engines. A standard of performance on one of these industries and not the other would tend to give the non-regulated industry a competitive advantage to some extent.

Currently, standards of performance are being developed for stationary internal combustion engines. Although relatively few internal combustion engines of greater than 1,000 hp are produced, these engines are responsible for 75 percent of the total NO_x emissions from stationary internal combustion engines. Under 1,000 hp, however, the number of internal combustion engines produced increases tremendously and enforcement of standards of performance would not be feasible in the absence of a certification program similar to that for automobiles. Since the Clean Air Act does not permit standards of performance to be enforced by a certification program, a lower size cutoff of 1,000 hp for standards of performance for stationary internal combustion engines is considered appropriate. Consequently, to be consistent a lower size cutoff of 10.7 gigajoules per hour heat input (about 1,000 hp) is selected for standards of performance for

stationary gas turbines. Gas turbines less than 10.7 gigajoules per hour heat input (about 1,000 hp) account for less than 10 percent of the total NO_x emissions from stationary gas turbines. Below this cutoff the standards limiting NO_x and SO₂ emissions would not apply.

Some stationary gas turbines are operated as a mechanical or electrical power source only when the primary power source for a facility has been rendered inoperable by an emergency situation. This type of gas turbine operates infrequently, usually only for checkout and maintenance; therefore, it contributes only a very small amount to total nationwide NO_x emissions. There also could be operational problems with the water injection system due to the long periods of non-operation. Consequently, emergency-standby stationary gas turbines were exempted from standards of performance limiting NO_x emissions.

Stationary gas turbines could contribute to the creation of ice fog, which consists of small ice crystals which are nucleated by airborne particulate. Ice fog occurs at temperatures below -28° C and is a serious problem in only a small portion of the United States, primarily Alaska. Ice fog severely restricts visibility and, since the crystals are long-lived, can plague auto and air traffic for extended periods. The actual impact of water or steam injection into gas turbines on the formation of ice fog is unknown; however, water or steam injection will increase the moisture content of the exhaust gas discharged by gas turbines. Since ice fog occurs only in a small portion of the United States and only under special weather conditions, the impact on air quality due to increased NO_x caused by exempting gas turbines creating ice fog would be minimal. Therefore, gas turbines using water or steam injection for control of NO_x emissions would be exempt from the standards limiting NO_x emissions when ice fog created by the gas turbine is deemed by the owner or operator of the gas turbine to be a traffic hazard.

Stationary gas turbines are sometimes used by the military in combat-type situations. The main advantage of these turbines is their mobility, which would be considerably restricted by a water injection system consisting of either water treatment equipment or a water storage vessel. Restriction of the mobility of these gas turbines could have an adverse effect on national defense; therefore, any military combat-type gas turbine for use in other than a garrison facility is exempt from the standards limiting NO_x emissions.

The possibility of exempting some gas turbines from the standard limiting SO₂ emissions was also examined. Except for exempting all turbines of less than 10.7 gigajoules per hour heat input (about 1,000 hp), no exemptions were considered necessary.

SELECTION OF THE BEST SYSTEM OF EMISSION REDUCTION

There are three possible control techniques for reducing NO_x emissions from

stationary gas turbines: wet controls, dry controls, and catalytic exhaust cleanup. Wet controls involve the injection of water or steam into the combustion reaction to reduce peak flame temperatures, thereby reducing NO_x formation. Wet control techniques have been demonstrated on a few large gas turbines (greater than 10,000 hp) used in utility and industrial applications. These installations have had good reliability over long periods of operation. Wet controls, however, have not been applied to small production gas turbines (less than 10,000 hp), although the effectiveness of these techniques for small gas turbines has been demonstrated in laboratory and combustor rig tests. Thus, wet controls can be applied immediately to large stationary gas turbines, but manufacturers estimate that at least three years would be required to incorporate and test wet control techniques on small production gas turbines.

Dry controls consist of operational or design modifications which govern combustion conditions to reduce NO_x formation. Although dry controls have been demonstrated in laboratory and combustor rig tests, manufacturers estimate that up to five years is required for further development, design, test, and incorporation of dry controls on large and small stationary gas turbines.

Catalytic exhaust gas cleanup consists of NO_x reduction by ammonia in the presence of a catalyst. While laboratory tests are very promising, this technique is not demonstrated for stationary gas turbines.

The NO_x emission reduction achievable with wet and dry control techniques clearly favors the development of standards of performance based on wet controls. Reductions in NO_x emissions of more than 70 percent have been demonstrated using wet controls. Dry controls, however, have demonstrated NO_x emission reductions of only about 30 percent.

Standards of performance based on wet controls would reduce national NO_x emissions by about 190,000 tons per year in 1982. In contrast, standards of performance based on dry controls would have no impact on national NO_x emissions in 1982, due to the necessity of allowing a five-year delay to incorporate dry controls on gas turbines. By 1987, standards based on wet controls would reduce national NO_x emissions by about 400,000 tons per year, whereas standards based on dry controls would reduce NO_x emissions by only about 90,000 tons per year. Thus, standards of performance based on wet controls would have a much greater impact on national NO_x emissions than standards based on dry controls.

The water pollution impact of standards based on wet controls would be minimal. Water needed for wet controls may be treated by the same processes used to treat steam boiler make-up water. The quality of the wastewater from this treatment is essentially the same as the influent water except that the concentration of total dissolved solids in the effluent stream is 3 to 4

times that of the influent. In most cases, the effluent may be sewerage directly or returned to the river supplying the water. Where this is not possible, the effluent may be discharged to an evaporation pond. Consequently, the water pollution impact of standards based on wet controls would be minimal.

The quantity of water required by a stationary gas turbine using wet controls is relatively small. The upper limit water-to-fuel ratio of about 1:1 requires only about 5 percent of the quantity of water consumed by a comparable size steam boiler using cooling towers. A water treatment system for five 28 MW stationary gas turbines operating 10 hours per day using a water-to-fuel ratio of 1:1, for example, would treat 125,000 gallons of water and reject about 25,000 gallons of wastewater per day. A steam boiler of comparable size with cooling towers would consume 20 times as much water. In fact, the usage rate of water for wet controls is small enough that the unlikely prospect of having to truck water 50 miles was determined to be economically reasonable as discussed below. Standards based on dry controls, however, would have no impact on water pollution or water supplies.

Standards based on wet controls would have a negligible solid waste impact. Also, there would be no adverse noise impact resulting from standards based on either wet or dry controls.

The potential energy impact of standards based on wet controls is small. Standards based on wet controls could increase the fuel consumption of a gas turbine from 0 to 5 percent, depending on the rate of water injection required to comply with the standard. Few turbines will require the high water injection rates (about 1:1 water-to-fuel ratios) which result in a 5 percent fuel penalty. Assuming, however, that all stationary gas turbines subject to compliance with standards would require a 1:1 water-to-fuel ratio, the energy impact on large stationary gas turbines would be an increase in fuel consumption of about 5500 barrels of fuel oil per day in 1982. The energy impact on small stationary gas turbines would be an increase in fuel consumption of about 7,000 barrels per day of fuel oil in 1987, as a result of the delayed effective date of the proposed standards on small turbines. Each increase represents less than a 0.03 percent increase in projected crude oil consumption in the United States in 1982 and 1987. It should also be recognized that these estimates are based on assumptions which yield the greatest energy impacts. Actual energy impacts are expected to be much lower. The energy impact of standards based on wet controls, therefore, would be minimal. Standards based on dry controls, however, would have no energy impact.

Although wet controls would result in a small adverse impact on gas turbine efficiency, the costs associated with this increased fuel consumption for some applications may be partially offset by an increase in the gas turbine's rated power output capability. Based on manufacturer's estimates, gas turbine baseload

capacity will be increased by 3 to 4 percent as a result of water injection. In applications where turbines are operated at maximum capacity, such as utility power generation and pipeline compressor stations, this increased baseload capacity essentially reduces the installed costs per kilowatt by the percentage increase in the capacity of the unit, thus slightly reducing the cost impact of standards based on wet controls.

The economic impacts associated with standards based on either wet or dry controls would be small and are considered reasonable. Dry control costs are difficult to quantify. Many manufacturers, however, have indicated that the cost of dry controls would not exceed the cost of wet controls. Consequently, the analysis of the economic impact of standards of performance was based on the costs of wet controls and assumes that the costs of dry controls, and hence the economic impact of standards based on dry controls, would be comparable. Standards of performance, therefore, based on either wet or dry controls would increase the capital cost of a gas turbine for most applications by about 1 to 4 percent. For offshore industrial applications where desalinization equipment is required to provide water for wet controls, standards would result in a 7 percent increase in the capital cost of a gas turbine. The annualized costs for a stationary gas turbine in all applications would be increased by about 1 to 4 percent, with utility applications realizing less than a 2 percent increase.

In this situation and in the absence of regulations requiring stationary gas turbines to fire specific fuels, the choice between firing either premium distillate fuel oils or heavy fuel oils will likely be decided on the basis of the relative convenience and availability of these fuels. Premium distillate fuel oils are more convenient to burn than heavy fuel oils because they have a lower viscosity and are easier to handle. Heavy fuel oils frequently require heating, for example, to reduce their viscosity to the point where they can be readily pumped from one location to another. Even if the price differential between premium distillate fuel oils and heavy fuel oils were to increase to the point where the firing of heavy fuel oils was marginally attractive, the greater inconvenience of scheduling and performing the additional maintenance would probably cause a gas turbine owner or operator to choose to fire the premium distillate fuel oil. On the basis of convenience, therefore, stationary gas turbines are likely to continue firing premium distillate fuel oils even if the economic incentive to do so becomes marginal.

The impact on ambient air quality of standards of performance based on the firing of low sulfur premium distillate fuel oils in gas turbines, therefore, would be negligible. The economic impact would also be negligible for the same reason and there would be no water, energy, solid waste or noise impact associated with standards based on the firing of low sulfur premium distillate fuel oils. Standards of performance based on dry controls would have no economic impact by 1982. Following 1982, however, the economic impact of standards based on dry controls would be comparable to that of standards based on wet controls. Based on this assessment of the impacts of standards of performance based on the firing of low sulfur fuel oils, this control technique is selected as "the best system of emission reduction (considering costs)" for the reduction of SO₂ emissions.

Standards of performance based on dry controls would have no economic impact by 1982. Following 1982, however, the economic impact of standards based on dry controls would be comparable to that of standards based on wet controls.

Based on this assessment of the impacts of standards of performance based on wet controls and dry controls, wet controls were selected as the "best system of emission reduction (considering cost)" for reduction of NO_x.

There are two possible control techniques for reducing SO₂ emissions from stationary gas turbines: flue gas desulfurization (FGD) and the firing of low sulfur fuels. FGD, however, would cost about two to three times as much as the gas turbine. The economic impact of standards of performance for stationary gas turbines based on FGD, therefore, is not considered reasonable.

Low sulfur fuels, such as premium distillate oils or natural gas, are now being burned by nearly all stationary gas turbines. These premium fuels are being burned primarily because the increased maintenance costs associated with firing heavy fuel oils are greater than the savings that would be realized by buying these cheaper heavy or residual fuel oils. Over the next five to ten years, however, as oil prices continue to escalate, the price differential between premium distillate fuel oils and heavy fuel oils will probably increase and the economic incentive to burn the premium fuels will probably become marginal.

In this situation and in the absence of regulations requiring stationary gas turbines to fire specific fuels, the choice between firing either premium distillate fuel oils or heavy fuel oils will likely be decided on the basis of the relative convenience and availability of these fuels. Premium distillate fuel oils are more convenient to burn than heavy fuel oils because they have a lower viscosity and are easier to handle. Heavy fuel oils frequently require heating, for example, to reduce their viscosity to the point where they can be readily pumped from one location to another. Even if the price differential between premium distillate fuel oils and heavy fuel oils were to increase to the point where the firing of heavy fuel oils was marginally attractive, the greater inconvenience of scheduling and performing the additional maintenance would probably cause a gas turbine owner or operator to choose to fire the premium distillate fuel oil. On the basis of convenience, therefore, stationary gas turbines are likely to continue firing premium distillate fuel oils even if the economic incentive to do so becomes marginal.

The impact on ambient air quality of standards of performance based on the firing of low sulfur premium distillate fuel oils in gas turbines, therefore, would be negligible. The economic impact would also be negligible for the same reason and there would be no water, energy, solid waste or noise impact associated

with standards based on the firing of low sulfur premium distillate fuel oils.

Based on this assessment of the impacts of standards of performance based on the firing of low sulfur fuel oils, this control technique is selected as "the best system of emission reduction (considering costs)" for the reduction of SO₂ emissions.

SELECTION OF FORMAT FOR THE STANDARDS

A number of different formats could be selected to limit NO_x emissions from stationary gas turbines. Mass standards limiting emissions in terms of power output (i.e., mass of emissions per unit of power output) or concentration standards limiting the concentration of emissions in the exhaust gases discharged into the atmosphere could be developed.

While mass standards may appear more meaningful in the sense that they relate directly to the quantity of emissions discharged into the atmosphere, enforcement of mass standards is more costly and the results more subject to error than enforcement of concentration standards.

Concentration standards, however, must be written to insure that the standards are not met merely by addition of dilution air. For combustion processes, this can be accomplished by correcting measured concentration to a reference concentration of O₂ (oxygen). The O₂ concentration in the exhaust gases is related to the excess (or dilution) air. Typical O₂ concentrations in gas turbine exhaust gases are about 15 percent. Thus, referencing standards to 15 percent oxygen effectively precludes circumvention by dilution. Consequently, concentration standards referenced to 15 percent oxygen were selected as the format for standards of performance for stationary gas turbines.

Selection of a concentration format, however, could penalize high efficiency gas turbines. Higher efficiencies are normally achieved by increasing combustor operating pressures and temperatures and NO_x formation generally increases exponentially with increased pressure and temperature. High efficiency turbines, therefore, generally discharge gases with higher NO_x concentrations than low efficiency turbines. A concentration standard based on low efficiency turbines could restrict the use of some high efficiency turbines. Conversely, a concentration standard based on high efficiency turbines could allow such high NO_x concentrations that low efficiency turbines would require no controls. Consequently, having selected a concentration format for standards of performance, an efficiency adjustment factor needed to be selected to permit higher NO_x emissions from high efficiency gas turbines.

NO_x emissions tend to increase exponentially with increased efficiency. It is not reasonable from an emission control viewpoint, however, to select an exponential efficiency adjustment factor. Such an adjustment would at some point allow very large increases in emissions for very small increases in effi-

ciency. The objective of an efficiency adjustment factor should be to give an emission credit for the lower fuel consumption of high efficiency gas turbines. Since the relative fuel consumption of gas turbines varies linearly with efficiency, a linear efficiency adjustment factor is selected to permit increased NO_x emissions from high efficiency gas turbines. A linear efficiency adjustment factor also effectively limits NO_x emissions to a constant mass emission rate per unit of power output.

The efficiency adjustment factor must be referenced to a baseline efficiency. Since most existing simple cycle gas turbines fall in the range of 20 to 30 percent efficiency, 25 percent was selected as the baseline efficiency. The efficiency of stationary gas turbines is usually expressed in terms of heat rate which is the ratio of heat input, based on lower heating value (LHV) of the fuel, to the mechanical power output. The heat rate of a gas turbine operating at 25 percent efficiency is 14.4 kilojoules per watt-hr (10,180 Btu per hp-hr). Thus, the linear adjustment factor as presented in the regulation was selected to permit increased NO_x emissions from high efficiency stationary gas turbines.

The intent of the efficiency adjustment factor is to permit a linear increase in NO_x emissions with increased efficiencies above 25 percent. Consequently, the adjustment factor would not be used to adjust the emission limit downward for gas turbines with efficiencies of less than 25 percent.

The rationale for selection of the format for SO₂ emissions is much the same as that discussed above for NO_x emissions. Thus, to be consistent with the format selected for standards limiting NO_x emissions, a concentration standard is chosen as the format for the SO₂ standard. An emission limit in terms of percent fuel sulfur content has also been included in the SO₂ standard to give the owner or operator the flexibility of either measuring the SO₂ concentration of the exhaust gas or analyzing the fuel being fired in the turbine. Either format for the SO₂ standard can be used since nearly all of the sulfur in the fuel is converted to SO₂.

The efficiency factor associated with the NO_x emission limit would not apply to the SO₂ emission limit, however, because SO₂ emissions do not vary with turbine efficiency.

SELECTION OF THE EMISSION LIMITS

The available data on emission from stationary gas turbines using wet controls come primarily from simple cycle gas turbine and combustor rig tests. No reliable data was available concerning NO_x emissions from regenerative cycle gas turbines using wet controls, although some dry control data was obtained. Careful consideration, therefore, was given to the question of whether regenerative cycle gas turbines could be controlled to the same emission levels as simple cycle gas turbines.

There is general agreement that wet controls will give essentially the same

percentage reduction in NO_x emissions from regenerative cycle gas turbines as from simple cycle gas turbines. Thus, the question becomes whether uncontrolled NO_x emissions from regenerative cycle gas turbines are higher than those from simple cycle gas turbines. On first comparison, NO_x emissions from regenerative cycle gas turbines appear higher than those from simple cycle gas turbines. Regenerative cycle gas turbines, however, frequently operate at higher thermal efficiencies than simple cycle gas turbines, and when NO_x emissions are plotted against gas turbine thermal efficiency, emissions from regenerative and simple cycle gas turbines do not appear significantly different. As a result, the application of wet controls to either regenerative or simple cycle gas turbines of comparable thermal efficiencies should reduce NO_x emissions to essentially the same level. Consequently, regenerative cycle gas turbines would be subject to the same emission limit as simple cycle gas turbines.

The data also indicate that gas turbines firing gaseous fuels typically have slightly lower controlled NO_x emission levels than gas turbines firing distillate fuels. Again, considering only the data representing major NO_x control efforts, controlled emissions from gas turbines firing gaseous fuels range from about 15 to 50 ppmv, while controlled emissions from gas turbines firing distillate fuels range from about 25 to 60 ppmv. This slight difference in controlled emission levels does not warrant the selection of a separate emission limit for each type of fuel. Only one emission limit, therefore, was selected which applies to gas turbines burning all types of fuel.

Based on this emission data and allowing for some uncertainty in the limited data base, 75 ppmv NO_x corrected to 15 percent oxygen was selected as the numerical emission limit for stationary gas turbines.

The gaseous and premium distillate fuels which have traditionally been burned in stationary gas turbines contain little or no "fuel-bound" or "organic" nitrogen. However, heavy residual fuel oils and crude oils can contain high levels of fuel-bound nitrogen. Total NO_x emissions from any combustion source, including stationary gas turbines, are a function of both thermal NO_x and organic NO_x formation. Thermal NO_x is formed in a well defined high temperature reaction between nitrogen and oxygen from the combustion air. Organic NO_x, however, is formed by the combination of fuel-bound nitrogen with oxygen during combustion. The reaction mechanism is not fully understood. Wet controls are effective for reducing thermal NO_x, but are not effective for reducing organic NO_x.

Three alternatives were considered to address the fuel-bound nitrogen contribution to total NO_x emissions from stationary gas turbines. The first alternative would have exempted heavy or residual fuel oils from standards of performance. This approach would have al-

lowed gas turbines firing heavy residual fuel oils to operate with no emission controls. In addition to the difficulties of distinguishing between premium and residual fuel oils in the standards, this approach would have encouraged owners or operators to burn heavy or residual fuel oils as a means of evading standards of performance.

The second alternative would have been to base standards of performance on the firing of low nitrogen fuels. This approach would have required emission controls on all new, modified, and reconstructed stationary gas turbines, but would have effectively precluded the firing of fuels other than those premium gaseous and distillate fuels which turbines are now using. Firing of heavy or residual fuel oils would have required major breakthroughs in controlling organic NO_x formation, or additional refining of these fuels to reduce their nitrogen content (as well as their sulfur content) to a level equivalent to that of premium distillate fuels.

The third alternative would include an adjustment to the NO_x emission limit as a function of the fuel-bound nitrogen level in the fuel fired. This approach would require NO_x controls on all new stationary gas turbines, but would not restrict new, modified or reconstructed gas turbines to firing premium gaseous and distillate fuels. Thus, stationary gas turbines would not be penalized for firing heavy fuel oils, nor would there be any added impetus toward the firing of heavy or residual fuel oils in order to evade standards of performance.

As discussed earlier, low sulfur fuels, such as premium distillate fuel oils or natural gas are now being fired by nearly all stationary gas turbines. These premium fuels are being fired primarily because the increased maintenance costs associated with firing heavy fuel oils are greater than the savings that would be realized by buying these less expensive heavy or residual fuel oils. Over the next five to ten years, however, as oil prices continue to escalate, the price differential between premium distillate fuel oils and heavy fuel oils will probably increase and economic incentive to fire the premium fuel oils will probably become marginal. It is also possible that there could be limited supplies of premium distillate fuel oils over the next five to ten years due to declining production of oil and natural gas in the United States, increased demands for these premium fuels by users other than gas turbines which cannot utilize heavy or residual fuel oils, and the uncertainty of additional crude oil supplies in the world energy markets. In fact, in anticipation of the possibility of limited supplies of premium distillate fuel oils, approximately 50 percent of the new gas turbines on order are being designed to allow the owner or operator the flexibility of firing either premium distillate fuel oils, or residual or heavy fuel oils. Consequently, in order to provide gas turbine owners and operators the flexibility to fire either premium or heavy and residual fuels, but to ensure that standards

of performance add no impetus toward the firing of heavy fuel oils as a means of evading standards, alternative three is selected for standards of performance limiting NO_x emissions from stationary gas turbines.

An allowance in the NO_x emission limit dependent on fuel-bound nitrogen level with no upper limit on emissions, however, could permit extremely high NO_x emissions when fuels with very high nitrogen contents are fired. Thus, it is essential that restraints be placed on such an emission allowance. Therefore, a fuel-bound nitrogen allowance was developed that allows approximately 50 percent availability of the heavy fuel oils. This corresponds to a fuel-bound nitrogen content of 0.25 percent. Firing a fuel with 0.25 percent nitrogen content increases controlled NO_x emissions by about 50 ppm.

The effect of ambient atmospheric conditions on NO_x emissions from stationary gas turbines is substantial. Large changes in relative humidity, for example, can cause NO_x emissions to vary by a factor of 2 or more. In order to insure that standards of performance are enforced uniformly, therefore, the effect of ambient atmospheric conditions was derived by extracting the common elements from several ambient condition correction factors proposed by gas turbine manufacturers. This correction factor, therefore, represents the general effect of ambient atmospheric conditions on NO_x emissions. Consequently, the ambient condition correction factor, as presented in the regulation, or an alternative correction factor as discussed below, will be used to adjust measured NO_x emissions during any performance test to determine compliance with the numerical emission limit.

As an alternative, gas turbine manufacturers, owners, or operators may elect to develop custom ambient condition correction factors for adjusting measured NO_x emissions from particular gas turbine models to ISO standard ambient conditions of pressure (101.3 kilopascals), humidity (60 percent relative humidity), and temperature (288 degrees Kelvin). Some gas turbine manufacturers have proposed ambient condition correction factors which include variables such as fuel-to-air ratios and combustor temperatures. These variables are difficult to measure and are operating parameters which may vary widely due to factors other than ambient conditions. For this reason, any custom ambient condition correction factor must be developed in terms of the following variables only: combustor inlet pressure, ambient air pressure, ambient air humidity, and ambient air temperature. All ambient condition correction factors must be substantiated with data and then approved for use by EPA before they can be used in determining compliance with the NO_x emission limit. Ambient condition correction factors will be applied to all performance tests, not only those in which the use of such factors would reduce measured emission levels.

Some delay is required before the NO_x standard of performance can be applied to small stationary gas turbines. A delay is necessary to provide time for manufacturers to incorporate NO_x controls on their small production stationary gas turbine models. It is estimated that about three years delay in the effective date of the standard for small stationary gas turbines would be required to allow manufacturers time to incorporate and test wet controls on these gas turbines. Some manufacturers have expressed optimism at being able to meet the NO_x standards using dry controls if given about five years delay. Since small gas turbines represent only about 10 to 15 percent of the total NO_x emissions from stationary gas turbines, the difference in environmental impact of a three-year versus five-year delay would be small. Additionally, a three-year delay would essentially force these manufacturers to incorporate wet controls, whereas a five-year delay would provide the flexibility to use wet controls or to develop and use dry controls. Consequently, five years was selected as the delay period for implementation of the NO_x emission limit on small stationary gas turbines.

In selecting the size cutoff to differentiate between large and small stationary gas turbines, consideration was given to the purpose for the cutoff and the effect on competitive markets. The purpose of the cutoff is to differentiate between large gas turbines where wet controls have been commercially demonstrated and small gas turbines where wet controls although effective, have not been generally applied on a commercial basis. Consideration of the market data reveals that there are two major competitive markets for stationary gas turbines which can be generally described as small gas turbines and large gas turbines. The size range of 5000 to 10,000 horsepower essentially separates these two markets. All gas turbines above this range are manufactured by companies which have developed wet control systems for their stationary gas turbines. The size cutoff, therefore, between small and large gas turbines was selected as the upper end of this range. Thus, large stationary gas turbines are defined as those with heat input at peak load of greater than 107.2 gigajoules per hour (approximately 10,000 horsepower for a 25 percent efficient gas turbine).

The best system of emission reduction, considering costs, selected for SO₂ emissions was the firing of low sulfur fuel oils. To be consistent with the objective of the fuel-bound nitrogen allowance NO_x emission limit and allow for approximately 50 percent availability of the residual and heavy fuel oils, the SO₂ emission limit is selected as 150 ppm referenced to 15 percent O₂ which corresponds to a fuel sulfur content of 0.8 percent by weight.

The five-year delay of the NO_x emission limit applied to small gas turbines (less than 10,000) to provide manufacturers time to incorporate wet controls onto their turbines would not apply to the SO₂ emission limit since the control tech-

nique of burning low sulfur fuels is now available to all turbines.

It should be noted that standards of performance for new sources established under Section 111 of the Clean Air Act reflect emission limits achievable with the best adequately demonstrated systems of emission reduction considering the cost of such systems. State implementation plans (SIPs) approved or promulgated under Section 110 of the Act, on the other hand, must provide for the attainment and maintenance of National Ambient Air Quality Standards (NAAQS) designed to protect public health and welfare. For that purpose SIPs must in some cases require greater emission reductions than those required by standards of performance for new sources. For example, EPA's Interpretative Ruling (41 FR 55524, December 21, 1976) on the construction of a new or modified source in an area that exceeds a NAAQS requires, among other things, that the new source must meet an emission limitation which reflects the "lowest achievable emission rate" for such type of source. At a minimum, the lowest rate achieved in practice would have to be specified unless the applicant can demonstrate that it cannot achieve such a rate. In no event could the rate exceed any applicable standard of performance for new sources.

This stringent requirement reflects EPA's judgment that a new source should be allowed to emit pollutants into an area violating a NAAQS only if its contribution to the violation is reduced to the greatest degree possible. While the cost of achievement may be an important factor in selecting a standard of performance for new sources applicable to all areas of the country, the cost factor must be accorded far less weight in determining an appropriate emission limitation for a source locating in an area violating statutorily-mandated health and welfare standards. Thus, while there may be technology available for new sources which have been determined not to be appropriate for standards of performance because of the consideration given to costs, this technology would be considered for purposes of determining the "lowest achievable emission rate" for such type of sources. Consequently, standards of performance for new sources should not be viewed as the ultimate in achievable control and should not limit the imposition of a more stringent standard, where appropriate.

States are free under Section 116 of the Act to establish even more stringent emission limits than those established under Section 111, or those necessary to attain or maintain the NAAQS under Section 110. Thus, new sources may in some cases be subject to limitations more stringent than EPA's standards of performance under Section 111, and prospective owners and operators of new sources should be aware of this possibility in planning for such facilities.

SELECTION OF MONITORING REQUIREMENTS

To provide a convenient means for enforcement personnel to insure that an

emission control system installed to comply with standards of performance is properly operated and maintained, monitoring requirements are generally included in standards of performance. For stationary gas turbines, the most straightforward means of insuring proper operation and maintenance is to monitor emissions released to the atmosphere.

EPA has established NO_x monitoring performance specifications in Appendix B of 40 CFR Part 60 for large industrial sources with well developed velocity and temperature profiles. Stationary gas turbines, however, do not have well developed velocity and temperature profiles in all cases. Gas stratification of the turbine exhaust, for example, makes the location of the sample point critical. Also, since some gas turbines are started remotely from a central location, special systems and data reporting procedures would be necessary to start and maintain continuous monitors.

Currently there are no NO_x continuous monitors operating on gas turbines, and resolution of these sampling problems and development of performance specifications for continuous monitoring systems would entail a major development program. For these reasons, continuous monitoring of NO_x emission from gas turbines would not be required by the proposed standards.

An effective means of ensuring operation of the water injection system used to control NO_x emissions from gas turbines is to monitor the water-to-fuel ratio being fed to the turbine. Both water and fuel monitors are readily available and are demonstrated technology for use on gas turbines. Consequently, to ensure operation of water injection systems, the proposed standards for stationary gas turbines would require continuous monitoring of the water-to-fuel ratio where water injection is employed to comply with NO_x standard.

Also, an effective means of ensuring the firing of fuels with the proper nitrogen content to control NO_x emissions caused by fuel bound nitrogen is to monitor the nitrogen content of the fuel being fired. Consequently, any owner or operator that uses the fuel-bound nitrogen allowance to comply with NO_x emission limit will be required by the standard to monitor the nitrogen content of the fuel.

The continuous monitoring of SO₂ emissions would not be required by the proposed standards for the same reasons continuous monitoring of NO_x emissions would not be required. A means of ensuring the firing of low sulfur fuels to control SO₂ emissions, however, is to monitor the sulfur content of the fuel being burned. This is already a common practice among gas turbine users. Consequently, to ensure the use of low sulfur fuels by stationary gas turbines to comply with the SO₂ emission limit, the standard would require monitoring the sulfur content of the fuel.

SELECTION OF PERFORMANCE TEST METHODS

Reference Method 20, "Determination of Nitrogen Oxides, Sulfur Dioxide, and

Oxygen Emissions from Stationary Gas Turbines," was selected as the performance test method to determine compliance with the standards of performance limiting NO_x emissions for stationary gas turbines. This test method is based on the EPA gas turbine field tests and on background data for continuous monitoring system specifications (FEDERAL REGISTER, October 6, 1975). Reference Method 20 includes (1) measurement system design criteria, (2) measurement system performance specifications and performance test procedures, and (3) procedures for emission sampling. The performance specifications include the span drift, zero drift, linearity check, response time of the system, and interference checks. This method allows a choice of instruments and will provide reliable data if the performance specifications are met.

Both the Society of Automotive Engineers (SAE) and Mobile Source test methods are acceptable alternative methods, if the selected instrument models are capable of meeting the performance specifications of Reference Method 20.

NO_x emission measured by Reference Method 20 will be affected by ambient atmospheric conditions. Consequently, measured NO_x emissions would be adjusted during any performance test by the ambient condition correction factor discussed earlier, or by custom correction factors approved for use by the Administrator.

In order to apply the fuel-bound nitrogen allowance included as part of the NO_x emission limit, the nitrogen content of the fuel must be determined. The analytical methods and procedures employed to determine the nitrogen content of the fuel would be approved by the Administrator and would be accurate to within plus or minus five percent.

In lieu of determining the SO₂ concentration of the exhaust gas from a gas turbine by using Method 20, compliance with the standard may be demonstrated by determining the sulfur content of the fuels being used by the gas turbine. Sulfur content of the fuel will be determined using ASTM D2880-71 for liquid fuels and ASTM D1072-70 for gaseous fuels.

MISCELLANEOUS

As prescribed by Section 111 of the Act, this proposal of standards has been preceded by the Administrator's determination that emissions from stationary gas turbines contribute to air pollution which causes or contributes to the endangerment of public health or welfare, and by his publication of this determination in this issue of the FEDERAL REGISTER. In accordance with Section 117 of the Act, publication of these proposed standards was preceded by consultation with appropriate advisory committees, independent experts and Federal departments and agencies. The Administrator will welcome comments on all aspects of the proposed regulations, including the designation of stationary gas turbines as a significant contributor to air pollution which causes or contributes to the en-

dangerment of public health or welfare, economic and technological issues, and on the proposed test methods.

Comments are also specifically invited on the severity of the economic impact of the proposed standards on stationary gas turbines located offshore, since a number of interested parties have expressed objection to not exempting the offshore turbine from compliance with the standard. Any comments submitted to the Administrator on this issue, however, should contain specific information and data pertinent to an evaluation of the magnitude of this impact and its severity.

Economic impact analysis: The criteria for an action to be considered major, thereby requiring development of an Economic Impact Analysis (EIA) are: (1) an increase in the fifth-year annualized costs of 100 million dollars, (2) a major product price increase of 5 percent, or (3) an increase in national energy consumption of 25,000 barrels of fuel oil per day. The impacts resulting from the proposed standards would not exceed these criteria, except possibly for those stationary gas turbines sold for offshore oil and gas drilling platforms, where the proposed standards could increase the price of a gas turbine by about 7 percent. Most gas turbines used in the application, however, are likely to have a heat input at peak capacity of less than 107.2 gigajoules per hour (about 10,000 horsepower). Consequently, they would be considered small gas turbines and would be exempt from the standards for five years following proposal of the standards. In any event, however, stationary gas turbines sold for offshore applications constitute such a small percentage (estimated at less than 3 percent) of the overall market for stationary gas turbines that they are not considered a major product within the meaning of the 5 percent major product price increase criteria for an action to be considered major, thereby requiring preparation of an EIA. The Environmental Protection Agency has determined, therefore, that his proposed action does not constitute a major action requiring preparation of an Economic Impact Analysis under Executive Orders 11821 and 11949 and OMB Circular A-107.

Dated: September 21, 1977.

DOUGLAS M. COSTLE,
Administrator.

It is proposed to amend Part 60 of Chapter I, Title 40 of the Code of Federal Regulations as follows:

1. By adding subpart GG as follows:

Subpart GG—Standards of Performance for Stationary Gas Turbines	
Sec. 60.330	Applicability and designation of affected facility.
60.331	Definitions.
60.332	Standard for nitrogen oxides.
60.333	Standard for sulfur dioxide.
60.334	Monitoring of operations.
60.335	Test methods and procedures.

AUTHORITY: Sections 111 and 301(a) of the Clean Air Act, as amended, [42 U.S.C. 1857c-7, 1857g(a)], and additional authority as noted below.

Subpart GG—Standards of Performance for Stationary Gas Turbines

§ 60.330 Applicability and designation of affected facility.

The provisions of this subpart are applicable to the following affected facilities: all stationary gas turbines with a heat input at peak load equal to or greater than 10.7 gigajoules per hour, based on the lower heating value of the fuel fired.

§ 60.331 Definitions.

As used in this subpart, all terms not defined herein shall have the meaning given them in the Act and in subpart A of this part.

(a) "Stationary gas turbine" means any simple cycle gas turbine, regenerative cycle gas turbine or any gas turbine portion of a combined cycle steam/electric generating system that is not self-propelled. It may, however, be mounted on a vehicle for portability.

(b) "Simple cycle gas turbine" means any stationary gas turbine which does not recover heat from the gas turbine exhaust gases to preheat the inlet combustion air to the gas turbine, or which does not recover heat from the gas turbine exhaust gases to heat water or generate steam.

(c) "Regenerative cycle gas turbine" means any stationary gas turbine which recovers heat from the gas turbine exhaust gases to preheat the inlet combustion air to the gas turbine.

(d) "Combined cycle gas turbine" means any stationary gas turbine which recovers heat from the gas turbine exhaust gases to heat water or generate steam.

(e) "Emergency gas turbine" means any stationary gas turbine which operates as a mechanical or electrical power source only when the primary power source for a facility has been rendered inoperable by an emergency situation.

(f) "Ice fog" means an atmospheric suspension of highly reflective ice crystals.

(g) "ISO standard day conditions" means 288 degrees Kelvin, 60 percent relative humidity and 101.3 kilopascals pressure.

(h) "Efficiency" means the gas turbine manufacturer's rated heat rate at peak load in terms of heat input per unit of power output based on the lower heating value of the fuel.

(i) "Peak load" means 100 percent of the manufacturer's design capacity of the gas turbine.

(j) "Base load" means the load level at which a gas turbine is normally operated.

(k) "Fire-fighting turbine" means any stationary gas turbine that is used primarily to pump water for extinguishing fires.

§ 60.332 Standard for nitrogen oxides.

(a) On and after the date on which the performance test required to be conducted by § 60.8 is completed, no owner

or operator subject to the provisions of this subpart shall cause to be discharged into the atmosphere, except as provided in paragraphs (b), (c), and (d) of this section.

(1) From any gas turbine with a heat rate at peak load of more than or equal to 14.4 kilojoules per watt hour, based on the lower heating value of the fuel fired, any gases which contain nitrogen oxides in excess of:

$$STD = 0.0075 + F$$

where:
STD = allowable NO_x emissions (percent by volume at 15 percent oxygen and on a dry basis).
F = NO_x emission allowance for fuel-bound nitrogen as defined in part (3) of this paragraph.

(2) From any gas turbine with a heat rate at peak load of less than or equal to 14.4 kilojoules per watt hour, based on the lower heating value of the fuel fired, any gases which contain nitrogen oxides in excess of:

$$STD = 0.0075 \left(\frac{14.4}{Y} \right) + F$$

where:
STD = allowable NO_x emissions (percent by volume at 15 percent oxygen and on a dry basis).
Y = manufacturer's rated heat rate at peak load (kilojoules per watt hour).
F = NO_x emission allowance for fuel-bound nitrogen as defined in part (3) of this paragraph.

(3) F shall be defined according to the nitrogen content of the fuel as follows:

Fuel-bound nitrogen (percent by weight)	F (NO _x percent by volume)
N < 0.015	0
0.015 < N ≤ 0.1	0.04(N)
0.1 < N ≤ 0.25	0.004 + 0.007(N - 0.1)
N > 0.25	0.005

where:
N = the nitrogen content of the fuel (percent by weight).

(b) Stationary gas turbines with a heat input at peak load of 107.2 gigajoules per hour (100 million Btu/hour) or less, based on the lower heating value of the fuel fired, are exempt from paragraph (a) of this section for a period not to exceed five years from (date of proposal).

(c) Stationary gas turbines using water or steam injection for control of NO_x emissions are exempt from paragraph (a) when ice fog is deemed a traffic hazard by the owner or operator of the gas turbine.

(d) Emergency standby gas turbines, military gas turbines for use in other than a garrison facility, and fire-fighting gas turbines are exempt from paragraph (a) of this section.

§ 60.333 Standard for sulfur dioxide.

(a) On and after the date on which the performance test required to be conducted by § 60.8 is completed, no owner or operator subject to the provisions of this subpart shall cause to be discharged into the atmosphere from any stationary gas turbine any gases which contain sulfur dioxide in excess of 0.015 percent by volume at 15 percent oxygen and on a dry basis.

(b) The sulfur content of the fuel fired by the gas turbine may be used to determine compliance with paragraph (a) of this section. Under such circumstances,

on and after the date on which the performance test required to be conducted by § 60.8 is completed, no owner or operator subject to the provisions of this subpart shall burn in any stationary gas turbine any fuel which contains sulfur in excess of 0.8 percent by weight.

§ 60.334 Monitoring of operations.

(a) The owner or operator of any stationary gas turbine subject to the provisions of this subpart and using water injection to control NO_x emissions shall install and operate a continuous monitoring system to monitor and record the fuel consumption and the ratio of water to fuel being fired in the turbine. This system shall be accurate to within ±5.0 percent and shall be approved by the Administrator.

(b) The owner or operator of any stationary gas turbine subject to the provisions of this subpart shall record daily the sulfur content, nitrogen content, and lower heating value of the fuel being fired in the gas turbine.

(c) For the purpose of reports required under § 60.7(c), periods of excess emissions that shall be reported are defined as follows:

(1) Nitrogen oxides. Any one-hour period during which the average water-to-fuel ratio, as measured by the continuous monitoring system, falls below the water-to-fuel ratio determined to demonstrate compliance with § 60.332 by the performance test required in § 60.8. Each report shall include the average water-to-fuel ratio, average fuel consumption, ambient conditions and nitrogen content of the fuel during the period of excess emissions, and the graphs or figures developed under § 60.335(a).

(2) Sulfur dioxide. Any daily period during which the sulfur content of the fuel being fired in the gas turbine exceeds 0.8 percent.

(Sec. 114 of the Clean Air Act as amended (42 U.S.C. 1857c-9)).

§ 60.335 Test methods and procedures.

(a) The reference methods in Appendix A to this part, except as provided in § 60.8(b), shall be used to determine compliance with the standards prescribed in § 60.332 as follows:

(1) Reference Method 20 for the concentration of nitrogen oxides and oxygen.

(1) The nitrogen oxides emission level measured by Reference Method 20 shall be adjusted to ISO standard day conditions by the following ambient condition correction factor:

$$NO_x = (NO_{x,obs}) \left(\frac{P_{ref}}{P_{obs}} \right)^{0.5} e^{19(H_{obs} - 0.00633)}$$

where:
NO_x = emissions of NO_x at 15 percent oxygen and ISO standard ambient conditions.
NO_{x,obs} = measured NO_x emissions at 15 percent oxygen, ppmv.
P_{ref} = reference combustor inlet absolute pressure at 101.3 kilopascals ambient pressure.
P_{obs} = measured combustor inlet absolute pressure at test ambient pressure.
H_{obs} = specific humidity of ambient air at test.
e = transcendental constant (2.718).

The adjusted NO_x emission level shall be used to determine compliance with § 60.332.

(ii) Manufacturers, owners or operators may develop custom ambient condition correction factors in terms of combustor inlet pressure, ambient air pressure, ambient air humidity and ambient air temperature to adjust the nitrogen oxides emission level measured by the performance test as provided for in § 60.8 to ISO standard day conditions. These ambient condition correction factors shall be substantiated with data and must be approved for use by the Administrator before they can be used to determine compliance with paragraph (a) of this subpart. Notices of approval of custom ambient condition correction factors will be published in the FEDERAL REGISTER.

(iii) The water-to-fuel ratio necessary to comply with § 60.332 will be determined during the initial performance test by measuring NO_x emissions using Reference Method 20 and the water-to-fuel ratio necessary to comply with § 60.332 at 30, 50, 75, and 100 percent of peak load.

(2) ASTM D-2382 for the lower heating value of liquid fuels and ASTM D-1826 for the lower heating value of gaseous fuels. These methods shall also be used to comply with § 60.334(b).

(3) The analytical methods and procedures employed to determine the nitrogen content of the fuel being fired shall

be approved by the Administrator and shall be accurate to within plus or minus five percent.

(b) The method for determining compliance with § 60.333, except as provided in § 60.8(b), shall be as follows:

(1) Reference Method 20 for the concentration of sulfur dioxide and oxygen.

(2) ASTM D2880-71 for the sulfur content of liquid fuels and ASTM D1072-70 for the sulfur content of gaseous fuels. These methods shall also be used to comply with § 60.334(b).

(Sec. 114 of the Clean Air Act as amended (42 U.S.C. 1857c-9).)

APPENDIX A—REFERENCE METHODS

2. Part 60 is amended by adding Reference Method 20 to Appendix A as follows:

METHOD 20—DETERMINATION OF NITROGEN OXIDES, SULFUR DIOXIDE, AND OXYGEN EMISSIONS FROM STATIONARY GAS TURBINES

1. Principle and Applicability.

1.1 Principle. A gas sample is continuously extracted from the exhaust stream of a stationary gas turbine; a portion of the sample stream is conveyed to instrumental analyzers for determination of nitrogen oxides (NO_x) and oxygen (O₂) content. During each NO_x and O₂ determination, a separate measurement of sulfur dioxide (SO₂) emissions is made, using Method 6, or its equivalent. The O₂ determination is used to adjust the NO_x and SO₂ to a reference condition.

1.2 Applicability. This method is applicable for the determination of nitrogen oxide, sulfur dioxide, and oxygen emissions from stationary gas turbines. For the NO_x and O₂ determinations, this method includes: (1) Measurement system design criteria; (2) analyzer performance specifications and performance test procedures; and (3) procedures for emission testing.

2. Apparatus and Reagents

2.1 Measurement System. The equipment required to extract, transport, and analyze the gas sample constitutes the "measurement system." A schematic of the measurement system is shown in Figure 20-1. (Measurement system performance specifications are described in detail in Section 3.) The essential components of the measurement system are described below.

2.1.1 Probe. Stainless steel type 316 or equivalent, to transport gas from stack.

2.1.2 Particulate Filter. A filter is used to remove particulates ahead of the calibration valve assembly. In most cases, either in-stack or out-stack filter location is acceptable; however, out-stack filtration is required when the sample gas temperature is above 500°C (930°F). The filtration temperature shall be at least 120°C (250°F) to prevent moisture condensation. Glass fiber filters, of the type specified in EPA Method 5, or equivalent, are recommended.

2.1.3 Calibration Valve Assembly. A three-way valve assembly is used to direct the zero and span calibration gases to the analyzers. This assembly shall be located directly behind the probe and filter and shall be capable of blocking the sample gas flow and introducing the span and zero gases when the system is in the calibration mode.

Figure 20.1 Measurement system design for stationary gas turbine tests.

2.1.4 Calibration Gases. Calibration gases are used to perform zero, span and calibration checks of the analyzers during each test run. The concentrations and specifications of these gases are described in detail in Sections 2.2 and 6.2.

2.1.5 Heated Sample Line. A FEP fluorocarbon or stainless steel (type 316 or equivalent) sample line is used to transport the gases to the sample conditioner and analyzers. The sample gas shall be maintained at least 5°C (10°F) above the stack gas dew point to prevent moisture condensation.

2.1.6 Moisture Trap. A moisture trap, designed to reduce the dew point of the sample gas to 3°C (37°F) or less, is used. For instruments not affected by water vapor, this device is not required; however, the moisture

content shall be determined using methods subject to the approval of the Administrator and the NO_x and O₂ concentrations shall be corrected to a dry gas basis.

2.1.7 Pump. A nonreactive leak-free sample pump is used to pull the sample gas through the system at a flow rate sufficient to minimize transport delay. The pump shall be made from or coated with nonreactive material (FEP fluorocarbon or type 316 stainless steel).

2.1.8 Sample Gas Manifold. A sample gas manifold is recommended for diverting portions of the sample gas stream to the analyzers. The manifold may be constructed of glass, FEP fluorocarbon, or stainless steel (type 316 or equivalent). Instead of using

the manifold, separate sample lines may be connected to each analyzer.

2.1.9 Oxygen Analyzer. An oxygen analyzer is used to determine the oxygen concentration (percent O₂) of the sample gas stream.

2.1.10 Nitrogen Oxides Analyzer. A NO_x analyzer is used to determine the ppm concentration of nitrogen oxides in the sample gas stream.

2.1.11 Sulfur Dioxide Analysis. Method 6 apparatus, or equivalent, is required for sulfur dioxide determination.

2.2 Calibration Gas Specifications.

2.2.1 Zero Gas. Prepurified nitrogen is used.

2.2.2 Nitrogen Oxide Calibration Gases. Mixtures of known concentrations of NO in

nitrogen are required. Nominal NO concentrations of 25, 50, and 90 percent of the instrument full scale range are needed. The 90 percent gas mixture is used to set and check the instrument span and is referred to as span gas. The 25 and 50 percent gas mixtures shall be used to validate the analyzer calibration, prior to each test.

2.2.3 Oxygen Calibration Gases. Ambient air at 20.9 percent oxygen shall be used as the span gas (high range concentration gas). A midscale calibration gas (approximately 13 percent O₂ in nitrogen) shall be used to validate the analyzer calibration prior to each test.

2.2.4 Concentration Validation. Within one month prior test use, calibration gases shall be analyzed, by the appropriate test method specified in Section 6.2, to determine their true concentration levels. Gas concentrations that are traceable to the National Bureau of Standards and which can be demonstrated to be stable are exempted from the analysis requirements.

3. Measurement System Performance Specifications and Performance Test Procedures.

3.1 Analyzer. "Span" is defined as the concentration range (specified by manufacturer) over which an analyzer will give valid readings. The spans for the analyzers used in this method shall be as follows:

TABLE 20.1 INTERFERENCE TEST GAS CONCENTRATIONS

CO	500 ppm
SO ₂	200 ppm
NO/NO ₂	200 ppm
CO ₂	10%
O ₂	20.9% (Air)

FIGURE 20.2 INTERFERENCE RESPONSE

Date of Test: _____			
Analyzer Type: _____ S/N _____			
Test Gas Type	Conc.	Analyzer Output Response	% of Span

$$\% \text{ of Span} = \frac{\text{Analyzer Output Response}}{\text{Instrument Span}} \times 100$$

3.1.1 Oxygen Analyzer: 0 to 25% O₂.

3.1.2 NO_x Analyzer: 0 to 120 ppm.

3.2 Analyzer Interferences and Interference Response. The "interference response" of an analyzer is defined as the output response to a component in the sample gas stream, other than the gas component being analyzed; the analyzers used in this method shall not have a total interference response of more than +2 percent of span.

Particulate matter and water vapor are the primary interfering species for most instrumental analyzers, but these may be removed physically by using filters and condensers. Other possible specific interferences found in turbine exhaust streams include carbon monoxide, carbon dioxide, nitrogen oxides, sulfur dioxide and hydrocarbons. Each analyzing instrument may respond to one or more of these interferences in ways that alter the desired measurement.

The interference response of an analyzer is determined by measuring the total analyzer response to the gaseous components (or mixtures) listed in Table 20.1; these gases may either be introduced into the analyzer separately or as a single gas mixture. The total interference output response of the analyzer to these components, if any shall be determined (in concentration units). The values obtained in an interference response test shall be recorded on a form similar to Figure 20.2.

If the sum of the interference responses of the test gases is greater than 2 percent of the instrument span, the analyzer shall not be used in the measurement system of this method.

An interference response test of each analyzer shall be conducted prior to its initial use in the field. Thereafter, if changes are made in the instrumentation which could alter the interference response, e.g., changes in the type of gas detector, the instruments shall be retested.

In lieu of conducting the interference response test, instrument vendor data, which demonstrate that for the test gases of Table 20.1 the interference performance specification is not exceeded, are acceptable. If these data are not available, the tests shall be made.

3.3 Analyzer Response Time. When a change in pollutant concentration occurs at the inlet of the measurement system (i.e., at probe), the change is not immediately registered by the analyzer; "response time" is defined as the amount of time that it takes for the analyzer to register a concentration value within 5 percent of the new inlet concentration. The maximum response time for the analyzers used in this method is three minutes.

To determine response time, first introduce zero gas into the system until all readings are stable; then, introduce span gas into the system. The amount of time that it takes for the analyzer to register 95 percent of the final span gas concentration is the upscale response time. Next, reintroduce zero gas into the system; the length of time that it takes for the analyzer output to come within 5 percent of the final reading is the downscale response time. The upscale and downscale response times shall each be measured three times. The readings shall be averaged, and the average upscale or downscale response time, whichever is greater, shall be reported as the "response time" for the analyzer. Response time data are recorded on a form similar to Figure 20.3. A response time test shall be conducted prior to the initial field use of the measurement system, and shall be repeated if changes are made in the measurement system.

3.4 Zero Drift. "Zero drift" is the change in analyzer output during a turbine performance test, when the input to the measurement system is a pure grade of nitrogen (zero gas). The maximum allowable zero drift for the analyzers used in this method is ±2 percent of the specified instrument span. The zero drift calculation is made for each gas for each turbine test run; this is done by taking the difference of the zero gas concentration values measured at the start and finish of the test (see Section 6.1). The zero drift is recorded as a percentage of the instrument span) on a form similar to Figure 20.4.

3.5 Span Drift. "Span drift" is the change in the analyzer output during a turbine performance test, when the input to the measurement system is span gas. The maximum allowable span drift for the analyzers used in this method is ±2 percent of the specified instrument span. The span drift calculation is to be made for each gas for each turbine test run; this is done by taking the difference between the span gas concentration values measured at the beginning and end of the test. Span drift is recorded (as a percentage of instrument span) on a form similar to Figure 20.4. Span drift must be corrected for any zero drift that occurred during the test period (see Figure 20.4).

4. Procedure for Field Sampling.

4.1 Selection of a Sampling Site and the Minimum Number of Traverse Points.

*Corrected for zero drift, i.e., if zero drift over test period is +2 ppm then 2 ppm shall be subtracted from the difference between the initial and final readings.				

Figure 20.4

PROPOSED RULES

4.1.1 Select a sampling site as close as practical to the exhaust of the turbine. Turbine geometry, stack configuration, internal baffling, and point of introduction of dilution air will vary for different turbine designs. Thus, each of these factors must be given special consideration in order to obtain a representative sample. Whenever possible, the sampling site shall be located upstream of the point of introduction of dilution air into the duct. Sample ports may be located before or after the upturn elbow, in order to accommodate the configuration of the turning vanes and baffles and to permit a complete, unobstructed traverse of the stack. The sample ports shall not be located within 5 feet or 2 diameters (whichever is less) of the gas discharge to atmosphere. For supplementary-fired, combined-cycle plants, the sampling site shall be located between the gas turbine and the boiler.

4.1.2 The minimum diameter of the sample ports shall be 3-inch nominal pipe size (NPS).

4.1.3 The minimum number of points for the preliminary O₂ sampling (Section 8.3.2) shall be as follows: (1) eight, for stacks having cross-sectional areas less than 1.5 m² (16.1 ft²); (2) one sample point for each 0.2 m² (2.2 ft²) of area, for stacks of 1.5 m² to 10.0 m² (16.1–107.6 ft²) in cross-sectional area; and (3) one sample point for each 0.4 m² (4.4 ft²) of area, for stacks greater than 10.0 m² (107.6 ft²) in cross-sectional area. Note that for circular ducts, the number of sample points must be a multiple of 4, and for rectangular ducts, the number of points must be one of those listed in Table 20.2; therefore, round off the number of points (upward), when appropriate.

TABLE 20.2.—Cross-sectional layout for rectangular stacks

No. of traverse points:	Matrix layout
9	3×3
12	4×3
16	4×4
20	5×4
25	5×5
30	6×5
36	6×6
42	7×6
49	7×7

4.2 Cross-sectional Layout and Location of Traverse Points. After the number of traverse points for the preliminary O₂ sampling has been determined, use Method 1 to locate the traverse points.

4.3 Measurement System Operation.

4.3.1 Preliminaries.

4.3.1.1 Prior to the turbine test, the measurement system shall have been demonstrated to have met the performance specifications for interference response and response time described in Sections 3.2 and 3.3.

4.3.1.2 Turn on the sample pump and instruments; allow the normal warmup time required for stable instrument operation.

4.3.1.3 After the instruments have stabilized, the measurement system shall be calibrated using the procedures detailed in Section 6.1. Transfer the zero and span gas calibration data from Figure 20.5 to a form similar to Figure 20.4.

4.3.1.4 At the beginning of each NO_x test run and, as applicable, during the run, record turbine data as indicated in Figure 20.6. Also, record the location and number of the traverse points on a diagram.

4.3.2 Preliminary Oxygen Sampling.

4.3.2.1 At the start of a 3-run sample sequence, position the probe at the first traverse point and begin sampling. The minimum sampling time at each point shall be 1 minute plus the average system response time. Determine the average steady-state concentration of O₂ at each point and record the data on Figure 20.7.

PROPOSED RULES

FIGURE 20.7

[illegible]

4.3.2.2 Select the eight sample points at which the lowest oxygen concentrations were obtained. These same points shall be used for all three runs which comprise the emission test. More points may be used, if desired.

4.3.3 Emission Sampling.

4.3.3.1 Position the probe at the first point determined in the preceding section and begin sampling. The minimum sampling time at each point shall be 3 minutes plus the average system response time. Determine the average steady-state concentration of O_2 and NO_x at each point and record the data on Figure 20.8.

4.3.2.2 After sampling the last point, conclude the test run by recording the final turbine operating parameters and by determining the zero and span drift, as described in Sections 3.4 and 3.5. If the zero and/or span drift exceed ± 2.0 percent the run may be considered invalid, or may be accepted provided the calibration data which results

in the highest corrected emission concentration is used.

4.3.2.3 If additional turbine runs are conducted within 4 hours of the previous run, an initial calibration of the measurement system is not required. If more than 4 hours have elapsed between runs, the pretest calibration shall be done.

4.4 An SO_2 determination shall be made (using Method 6, or equivalent) during the test. A minimum of six total points, selected from those required for the NO_x measurement, shall be sampled; two points shall be used for each sample run. The sample time at each point shall be at least 10 minutes. The oxygen readings taken during the NO_x test runs corresponding to the SO_2 traverse points (see Section 4.3.3.1) shall be averaged, and this average oxygen concentration shall be used to correct the integrated SO_2 concentration obtained by Method 6 to 15 percent O_2 (see Equation 20-1).

1	0		

*Average steady state value from recorder or instrument readout.

5. Emission Calculations.

5.1 Correction to 15 Percent Oxygen. Using Equation 20-1, calculate the NO_x and SO_2 concentrations (adjusted to 15 percent O_2). The correction to 15 percent oxygen is sensitive to the accuracy of the oxygen measurement. At the level of analyzer drift specified in the method (± 2 percent of full scale), the change in the oxygen concentration correction can exceed 10 percent when the oxygen content of the exhaust is above 16 percent O_2 . Therefore O_2 analyzer stability and careful calibration are necessary.

Actual pollutant concentration (NO_x or SO_2)

$$\times \frac{5.9\%}{20.9\% - 0.5\% \text{ actual}} =$$

where:
5.9% is 20.9% - 15% (the defined concentration basis)

O_2 actual is the sample point oxygen-concentration for ΔO_2 calculation, and the average O_2 concentration for SO_2 calculation.

5.2 Calculate the average adjusted NO_x concentration by summing the point values and dividing by the number of sample points.

6. Calibration.

6.1 Measurement System. Prior to each turbine test, the measurement system shall be calibrated according to the procedures described below. The manufacturer's operation and calibration instructions are also to be followed as required for each specific analyzer.

6.1.1 Turn on all measurement system components and allow them to warm up until stable conditions are achieved. Next, introduce zero gas and each of the calibration gases described in Section 6.2, one at a

PROPOSED RULES

time, into the inlet of the probe. The responses of the analyzer to these gases shall be used to establish a calibration curve or to verify the manufacturer's calibration curve. The data obtained in these procedures shall be recorded on a form similar to Figure 20.4. If, for the mid-scale gases, the accuracy of the manufacturer's calibration curve or the expected response curve cannot be shown to be ± 2 percent of full scale (or better), the calibration shall be considered invalid and corrective measures on the instrument shall be taken. The calibration procedure shall be repeated, using only zero gas and span gas, at the conclusion of test; this

allows calculation of zero and span drift (Sections 3.2 and 3.3).

6.2 Calibration Gas Mixtures.

6.2.1 Within one month prior to the turbine test, the NO_x calibration gas mixtures shall be analyzed, using the phenoldisulfonic acid procedure (Method 7) for nitrogen oxides. A minimum of three analyses shall be done, and the average concentration of each gas shall be reported as the true calibration gas value (see Figure 20.9). Alternate procedures may be employed, subject to the approval of the Administrator, to determine the calibration gas concentration.

Figure 20.9

MONDAY, OCTOBER 3, 1977

PART IV

CONSUMER PRODUCT SAFETY COMMISSION

ARCHITECTURAL GLAZING MATERIALS

Proposed Safety Standard and Denial
of Petitions

Federal Register

[6355-01]

CONSUMER PRODUCT SAFETY
COMMISSION

[16 CFR Part 1201]

ARCHITECTURAL GLAZING MATERIALS

Proposed Amendments to Safety Standard

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed amendments to standard.

SUMMARY: In this document the Commission proposes amendments to the Safety Standard for Architectural Glazing Materials (16 CFR 1201) to clarify the definition of certain glazed panels in nonresidential buildings which are subject to the standard, and to modify the description of certain items of test apparatus and certain test procedures specified by the standard.

DATE: Comments concerning this proposal must be received by November 2, 1977.

ADDRESS: Comments should be sent to: Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT:

Allen F. Brauninger, Attorney, Division of Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207 (301-492-6629)

SUPPLEMENTARY INFORMATION:

In the FEDERAL REGISTER of January 6, 1977 (42 FR 1427), the Consumer Product Safety Commission issued the Safety Standard for Architectural Glazing Materials (16 CFR 1201) with an effective date of July 6, 1977. This standard was issued under provisions of the Consumer Product Safety Act to reduce or eliminate risks of injuries associated with walking, running, or falling through or against glazing materials in storm doors, doors (both exterior and interior), shower and bathtub doors and enclosures, certain glazed panels, and sliding or patio-type doors.

The standard prescribes safety requirements for glazing materials manufactured on or after July 6, 1977, for use in storm doors, doors (both exterior and interior), shower and bathtub doors and enclosures, certain glazed panels, and sliding or patio-type doors. The standard also requires that the architectural products enumerated above which are manufactured on or after July 6, 1977, must be constructed or assembled using glazing materials that meet the requirements of the standard.

In the FEDERAL REGISTER of June 20, 1977 (42 FR 31164), the Commission amended the standard to exempt from its requirements any architectural product which would otherwise be subject to the standard if that product is manufactured between July 6, 1977, and July 5, 1978, using glazing materials, manufactured before July 6, 1977, which

are marked or certified to comply with ANSI Standard Z97.1-1972 or -1975, "Performance Specifications and Methods of Test for Safety Glazing Material Used in Buildings," published by American National Standards Institute, Inc., 1430 Broadway, New York, N.Y. 10018.

The Standard issued by the Commission is designed to reduce or eliminate unreasonable risks of injury associated with architectural glazing materials by ensuring that the glazing materials used in the products enumerated above either will not break when impacted with a certain energy, or will break so that they are less likely than other glazing materials to present the unreasonable risks of injury detailed above.

To determine the breakage characteristics of glazing materials used or intended for use in the products which are subject to the standard, an impact test is prescribed by the standard. The impact test consists of striking the glazing material to be tested with a punching bag filled with lead shot by dropping the bag from a height of 18 or 48 inches, depending on the architectural products in which the glazing material is used.

Additionally, the standard prescribes accelerated environmental durability tests for laminated glass, organic-coated glass, and plastics which are subject to the standard to demonstrate that those glazing materials will withstand exposure to sunlight, heat, water, and other factors which, over an extended period of time, may affect their breakage characteristics.

GLAZED PANELS

One risk of injury which the standard is intended to eliminate or reduce is the type resulting from accidents which occur when a person walks or runs into a glazed panel because the accident victim misperceives the glazed panel as open space rather than solid material.

To address this risk of injury, the products subject to the standard include glazed panels in nonresidential buildings which have the lower edge of the glazing material within 18 inches of a walking surface; an exposed surface of glazing material in excess of nine square feet; and a walking surface on both sides of the glazing material. The type of panel described above is defined as a glazed panel which is subject to the standard by § 1201.2(a)(10)(11)(iii) of the standard.

In the definition of "glazed panel" set forth in § 1201.2(a)(10)(iii), the following language is used to describe the location of the walking surfaces next to the glazing material:

(C) There is a walking surface on both sides, either of which is within 36 inches (92 centimeters) of such panel and the horizontal planes of such walking surfaces are within 12 inches (31 centimeters) of each other. [Emphasis added.]

The Commission has received several inquiries about the meaning of the language quoted above. Given a literal reading, that sentence states that if walking surfaces are present on both sides of a glazed panel, and if one of

those walking surfaces is within 36 inches of the glazing material, the glazing material is subject to the standard no matter how far away from the glazing material the other walking surface may be located (assuming that the panel falls within all other conditions set forth in § 1201.2(a)(10)(iii)).

After careful consideration of these questions and the language of § 1201.2(a)(10)(iii), the Commission believes that the language of that section may be overly broad. The present language may include some glazed panels which have walking surfaces on both sides, but which do not present an unreasonable risk of injury by reason of being misperceived as open space, because one of those walking surfaces is sufficiently far away from the glazing material to provide a visual signal that glazing material is present.

For this reason, in the amendments proposed below, the definition of glazed panel which appears at § 1201.2(a)(10)(iii) has been modified to restrict its coverage to glazed panels which have walking surfaces on both sides of the glazing material, each of which is within 36 inches of the glazing material.

TEST FRAME

As stated above, the standard prescribes an impact test in which a specimen of glazing material is struck by an impactor to determine whether it will break, and if so, if its breakage characteristics are acceptable. The glazing material to be tested is clamped inside a subframe which is held in position by an upright steel frame. This equipment is illustrated in figures 1, 2, 3, and 4 of the standard, and is described in § 1201.4(b)(1).

Section 1201.4(b)(1)(iii) states: "The subframe . . . shall be reinforced at each corner." The illustration of the subframe in figure 4 of the standard depicts a subframe with reinforcement located at each corner of the inner members of the subframe.

To improve the clarity of § 1201.4(b)(1)(iii) and its consistency with figure 4, the Commission proposes to amend that section to state that the "inner subframe . . . shall be reinforced at each corner."

As described in § 1201.4(b)(1) and illustrated in figure 3, the subframe is constructed with neoprene strips at all points where the test specimen contacts the subframe. Figure 3 states that the neoprene strips shall have a Shore A, durometer hardness ranging from 30 to 45.

An inquiry from one manufacturer of glazing materials asks whether neoprene with a durometer hardness of 50 may be used in the subframe. The Commission has no information that the use of neoprene having a durometer hardness as great as 50 will improperly affect the outcome of the impact test specified in the standard. Further, the Commission is aware that neoprene having a durometer hardness as great as 50 has been utilized for several years in equipment used to test materials for compliance with ANSI standard Z97.1. For this reason, the Commission purposes to

amend the standard by revising figure 3 to specify neoprene of a Shore A, durometer hardness of 30 to 50 for use in the subframe.

IMPACTOR

As stated above, the impact test is performed by striking the test specimen with a leather bag which has been filled with lead shot and covered with tape. The impactor is dropped from a height of either 18 or 48 inches (depending on the intended use of the glazing material) in order to subject the test specimen to an energy of either 150 or 400 foot pounds.

The impactor is described in § 1201.4(b)(2)(i) of the standard in the following language:

The impactor shall be a leather punching bag as shown in figure 5 of this section. The bag shall be filled with No. 7½ chilled lead shot to a total weight of completed assembly before taping, as shown in figure 5, of 100 pounds ± 4 ounces (45.36 ± 0.11 kilograms). [Emphasis added.]

Because the purpose of the test apparatus and procedure is to generate an energy of 150 or 400 foot pounds, the description of the impactor in § 1201.4(b)(2)(i) is slightly inaccurate in that it states that the punching bag shall weigh 100 pounds after it has been filled with lead shot but before it is taped. To correct this inaccuracy, the Commission proposes to amend this section to provide that the impactor shall weigh 100 pounds ± 4 ounces after taping.

The Commission also believes that the impactor should be supported in such a manner that it descends smoothly without wobbling or wobbling about its center of gravity. If the impactor descends smoothly, there should be greater uniformity in the nature of the impact from one test to the next. If, on the other hand, the impactor is allowed to wobble about its center of gravity as it descends, the involvement of the metal hardware at the top of the impactor might vary from impact to impact. Thus, in one test the metal might contact the test specimen very early in the test sequence, thereby producing an impact more severe than intended. In the next test, the metal hardware might not contact the test specimen at all.

In order to have the impactor descend smoothly without wobbling or oscillating, the present section 1201.4(b)(2)(ii) states:

The impactor shall be supported as shown in figure 2. Provisions shall be made for raising the impactor to drop heights of up to 48 inches (1.22 meters). At its release it shall have been supported so that the pin going through its center was in line with the steel cable. The impactor shall not wobble or oscillate after its release.

The Commission believes that the first sentence of this section may be unduly restrictive because it permits no deviation from the support system depicted in figure 2 of the standard. A support system for the impactor is thought to be sufficient if the resultant of the support forces acting on the impactor passes through the center of gravity of the

impactor, if the resultant is perpendicular to the steel cable supporting the impactor, and if the impactor is supported such that no twisting forces are imparted to it at its release.

The Commission also believes that the fourth sentence of § 1201.4(b)(2)(ii) may present unnecessary difficulty to persons conducting the impact test because it absolutely prohibits the presence of any wobbles or oscillation after the impactor is released. Wobble or oscillation of the impactor could occur, but to such a limited degree that its detection by the unassisted human eye would be difficult or impossible, without affecting the results of the impact test. Accordingly, the Commission proposes to amend the fourth sentence to indicate that the impactor shall be supported in a manner designed to minimize wobble or oscillation after its release.

ENVIRONMENTAL DURABILITY TESTS

In addition to the impact test, the standard also requires that some glazing materials must be subjected to accelerated environmental durability tests. The materials which must be subjected to environmental testing and the tests required for each such material are summarized in § 1201.4(a)(2) and Table 1 of the standard.

Table 1 states that plastics must be subjected to a simulated weathering test. This test requires exposure of specimens in a xenon arc Weather-Ometer for a period of 1200 hours, as specified by § 1201.4(d)(2)(ii) of the standard.

When the Commission issued the final standard on January 6, 1977 (42 FR 1427), it stated that an exposure of 1200 hours in a xenon arc Weather-Ometer had been estimated to represent the equivalent ultraviolet exposure of 2000 hours in the twin carbon arc Weather-Ometer used by many testers, and of 375,000 langley of solar irradiation. The Commission further stated that it would consider amending the exposure required in the xenon arc Weather-Ometer if the results of an interlaboratory testing program sponsored by American National Standards Institute (ANSI) indicated that such a revision is necessary to obtain the equivalent exposures described above (see 42 FR 1437, January 6, 1977).

Preliminary results from this interlaboratory testing program, as well as subsequent communications from experts in the field of accelerated environmental durability testing, have demonstrated that the original estimated exposure period of 1200 hours in the xenon arc Weather-Ometer does not simulate 375,000 langley of solar irradiation or produce the equivalent of 2000 hours in the twin carbon arc Weather-Ometer. Subsequently, the Plastic Safety Glazing Committee petitioned the Commission to amend the standard to require the use of a carbon arc Weather-Ometer or to increase the exposure of specimens in the xenon arc Weather-Ometer to 3480 hours. The Commission, in granting this petition, proposes to amend § 1201.4(d)(2)(ii) of the standard to increase the period of time for exposure of test speci-

mens using the xenon arc Weather-Ometer to 3480 ± 1 hours.

This exposure period is itself an estimate of the equivalent exposure of the glazing materials involved. Nevertheless, according to the best information available to the Commission at this time, the proposed exposure period of 3480 ± 1 hours in the xenon arc Weather-Ometer provides a much closer approximation of the equivalent of 2000 hours in a twin carbon arc Weather-Ometer.

The Commission has considered the possibility that the standard could be amended to specify an exposure of 2000 hours in a carbon arc Weather-Ometer. Because of the differences in spectra of a xenon arc and a carbon arc, the Commission believes that a xenon arc provides a fairer, more universal test for the full range of organic coated glass and plastic glazing materials that now exist or may exist in the future. This belief is based on comparisons of the two spectra with that of the sun, and on the phenomenon of selective spectral absorption by glazing materials.

When the Commission receives the final results of the ANSI interlaboratory testing program, it may again consider amending the requirements for exposure in the xenon arc Weather-Ometer.

The proposed amendment to § 1201.4(d)(2)(ii) which appears below also contains a change in the metric equivalent of the specified radiant flux. In its present form, § 1201.4(d)(2)(ii) states that the radiant flux shall be "50 microwatts per square centimeter (12 calories per second per square centimeter)." The metric equivalent appearing in parentheses in the language quoted above is incorrect and should be 12 microcalories per second per square centimeter. The correction of this error in the amendment proposed below makes no substantive change to the radiant flux required by § 1201.4(d)(2)(ii).

Section 9(c) of the Consumer Product Safety Act, 15 U.S.C. 2058(e) provides that when an amendment to a consumer product safety rule involves a material change the procedures in section 7 and 9 apply. It is the Commission's view that the amendments proposed below do not involve a material change to the Standard because they do not affect the basic purpose and provisions of the Standard. Therefore, the provisions of section 7 and 9 (a)-(d) do not apply. However, the Commission believes the informal rulemaking procedures of the Administrative Procedure Act, 5 U.S.C. 553, do apply.

ENVIRONMENTAL EFFECTS

Because the proposed amendments involve only minor modifications to the standard, the Commission believes there are no potentially significant adverse environmental effects associated with the proposed amendments.

PROPOSAL

Therefore, pursuant to provisions of the Consumer Product Safety Act (sec. 9(e), 15 U.S.C. 2058(e)), and the Admin-

istrative Procedure Act, 5 U.S.C. 553, the Commission proposes to amend the Safety Standard for Architectural Glazing Materials by revising 16 CFR 1201.2 (a) (10) (iii), 1202.4(b) (1) (iii), 1201.4 (b) (2) (i), 1201.4(b) (2) (ii), 1201.4(c) (2), 1201.4(d) (2) (ii), and Figure 3 as follows:

§ 1201.2 Definitions.

(a) As used in this Part 1201:

(10) "Glazed panel" means a glazing material used in any building listed in § 1201.1(b) that is:

(iii) In all buildings other than residential buildings, all panels not described in paragraph (a) (10) (ii) of this section where:

(A) The lowest edge of the glazing material is less than 18 inches (46 centimeters) above any floor or any walking surface; and

(B) The exposed glazing material in such panel exceeds 9 square feet (0.3 square meters); and

(C) There is a walking surface on both sides, each of which is within 36 inches (92 centimeters) of such panel and the horizontal planes of such walking surfaces are within 12 inches (31 centimeters) of each other.

§ 1201.4 Test procedures.

(b) Test equipment—(1) Impact test frame and subframe.

(iii) The inner subframe (see figures 2, 3, and 4) for securing the test specimen on all four edges shall be reinforced at each corner. The material is shown as wood in figure 3, but other materials may be used provided the test specimen will contact only the neoprene strips.

(2) Impactor. (i) The impactor shall be a leather punching bag as shown in figure 5 of this section. The bag shall be filled with No. 7½ chilled lead shot to a total weight of completed assembly as shown in figure 5, of 100 pounds ± 4 ounces (45.36 ± 0.11 kilograms). The rubber bladder shall be left in place and filled through a hole cut into the upper part. After filling the rubber bladder, the top should be either twisted around the threaded metal rod below the metal

sleeve or pulled over the metal sleeve and tied with a cord or leather thong. Note that the hanging strap must be removed. The bag should be laced in the normal manner. The exterior of the bag shall be completely covered by ½ inch 1.3 centimeters wide glass filament reinforced pressure sensitive tape. (Figure 5.)

(ii) Provisions shall be made for raising the impactor to drop heights of up to 48 inches (1.22 meters). At its release it shall have been supported so that the rod going through its center was in line with the steel support cable in a manner designed to minimize wobble or oscillation after its release.

(d) Test procedures.

(2) Environmental durability test procedures.

(ii) Accelerated weathering test. The specimens shall be retained in the Weather-Ometer (paragraph (b) (3) (ii) of this section) for a period of 3480 ± 1 hours, and exposed to a radiant flux of 50 microwatts per square centimeter (12 microcalories per second per square cen-

timeter) while monitoring at a wavelength of 340 nanometers.

Interested parties are invited to submit, on or before November 2, 1977, written comments regarding these proposed amendments to the Safety Standard for Architectural Glazing Materials.

Written submissions and any accompanying data or material should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Comments may be accompanied by a supporting memorandum or brief. Any comments that are received and all other material which the Commission has that is relevant to this proceeding may be seen in, or copies obtained from, the Office of the Secretary, 3d Floor, 1111 18th Street NW., Washington, D.C. 20207.

Dated: September 26, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product
Safety Commission.

[6355-01]

CONSUMER PRODUCT SAFETY COMMISSION

[Petition No. CP-77-8; CP-77-14, CP-77-15]

ARCHITECTURAL GLAZING MATERIAL Denial of Petitions

AGENCY: Consumer Product Safety Commission.

ACTION: Denial of petitions.

SUMMARY: The Commission has denied petitions from the National Association of Home Builders, the National Lumber & Building Material Dealers Association, and the Mahoney Sash & Door Co., who petitioned the Commission to exempt certain doors which contain architectural glazing materials from the scope of the Safety Standard for Architectural Glazing Materials.

FOR FURTHER INFORMATION CONTACT:

Harry I. Cohen, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, telephone 303-492-6453.

SUPPLEMENTARY INFORMATION: Section 10 of the Consumer Product Safety Act (15 U.S.C. 2059) provides that any interested person may petition the Consumer Product Safety Commission to commence a proceeding for the issuance, amendment, or revocation of a consumer product safety rule. Section 10 also provides that if the Commission denies a petition, it shall publish in the FEDERAL REGISTER its reasons for such denial.

On April 1, 1977, the National Association of Home Builders (NAHB) filed a petition to amend the Safety Standard for Architectural Glazing Materials to exempt openings in glazed doors through which a six-inch diameter sphere is unable to pass.

On June 10, 1977, NLBMDA filed a petition requesting an amendment to exempt openings in doors through which an eight-inch diameter sphere is unable to pass. This petition was endorsed by NAHB.

On July 6, 1977, Edward A. Mahoney, Jr., of the Mahoney Sash & Door Co., filed a petition requesting an amendment from the standard to exempt traditional wood stile and rail doors from the standard for architectural glazing materials, if the glazing material begins at least 42 inches off the floor.

In the three petitions, the petitioners allege that doors with small panes of glass, or with panes of glass beginning more than 42 inches off the floor, do not present the risks of injury that the standard was designed to reduce or eliminate. The petitioners also allege that the standard increases the cost for such doors out of proportion to the benefits, and that the utility and availability of substitute glazing materials are inadequate.

After careful consideration of these matters set forth in these petitions, and a review of information currently avail-

able to the Commission on these matters, the Commission has denied these petitions. The Commission has taken this action because it continues to conclude that the products affected by the petitions, if not manufactured in accordance with the Safety Standard for Architectural Glazing Materials, present the unreasonable risks of injury that the standard was designed to reduce or eliminate.

The Commission has reviewed 131 in-depth investigation reports collected during 1975 and 1976 for doors (other than storm doors) with glass panes. Of 126 for which the width of the panes could be determined, 7 of the accidents were associated with panels less than 6 inches wide, and 12 with panes 6.5 to 8 inches wide. Of those reports in which the height of the lowest edge of glazing material was provided, 20 were associated with panes whose lowest edge was 42 inches or more from the floor. Several additional injuries appear to be related to panes whose lowest edge is approximately 42 inches off the floor, although no measurements were provided. All the accidents appear to be of the same type and severity as occur with architectural glazing materials in general, and of the type the standard was designed to reduce or eliminate.

The Commission also determined what body parts could pass through various openings in doors. For adults, a six-inch opening would accept a fist, arm, or leg above the knee. An eight-inch opening could admit a head. A forty-two inch limitation on height could permit upper trunk interaction with the glazing material.

The Commission recognized in issuing the standard that the costs of doors would increase as a result of the standard. However, the Commission has no information, nor have the petitioners provided information, to indicate that there are any significant errors in the cost estimates made at the time of issuance of the standard.

The Commission understands that many doors had been covered by those state safety glazing laws which were in existence prior to the effective date of the standard. Furthermore, various trade organizations have issued voluntary industry standards to require glazing materials complying, first with existing voluntary standards, and now with the Commission's standard. Therefore, complying doors should soon replace non-complying doors in the chain of distribution because of voluntary action and the requirements of the standard.

Finally, the Commission believes on the basis of the information before it that glazing materials that comply with the Commission standard can be obtained for replacing broken glazing material in doors, and that such glazing materials are satisfactory replacements. Replacement materials include prefabricated tempered inserts for standardized doors, laminated glass, and plastic glazing materials.

Accordingly, in accordance with section 10(d) of the Consumer Product Safety Act (15 U.S.C. 2059(d)), the petitions are denied.

Dated: September 26, 1977.

RICHARD E. RAPPS,
Secretary, Consumer
Product Safety Commission.

[FR Doc. 77-28821 Filed 9-30-77; 8:45 am]

[6355-01]

[Petition No. CP 77-5]

ARCHITECTURAL GLAZING MATERIAL Denial of Petition

AGENCY: Consumer Product Safety Commission.

ACTION: Denial of petition.

SUMMARY: The Commission has denied a petition from Robert J. Cunitz, Ph. D., who petitioned the Commission to issue a consumer product safety rule (or an amendment to the Safety Standard for Architectural Glazing Materials, 16 CFR 1201), which would impose requirements for visual barriers on architectural glazing materials used for doors and certain windows, and to modify the design of the impactor used to perform some of the testing required by the standard.

FOR FURTHER INFORMATION CONTACT:

Harry I. Cohen, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, telephone 301-492-6453.

SUPPLEMENTARY INFORMATION: Section 10 of the Consumer Product Safety Act (15 U.S.C. 2059) provides that any interested person may petition the Consumer Product Safety Commission to commence a proceeding for the issuance, amendment or revocation of a consumer product safety rule. Section 10 also provides that if the Commission denies a petition, it shall publish in the FEDERAL REGISTER its reasons for such denial.

By letters dated November 23, 1976, and January 26, 1977, Dr. Cunitz petitioned the Commission to initiate a proceeding under § 7 of the Consumer Product Safety Act to issue a consumer product safety rule which would require the use of a visual barrier such as decals, etchings, or engravings on any glazing materials used in or as doors, and on any glazing material used for windows, if the bottom edge of the glazing material is located within two and one-half feet of any walking surface, if the height of the glazing material exceeds one foot, and if the width of the glazing material exceeds one foot. Alternatively, the petition requested amendment of the Safety Standard for Architectural Glazing Materials to include requirements for visual barriers for the products described above.

Additionally, the petition requested the Commission to amend the Safety Standard for Architectural Glazing Materials

to modify the design of the item of test equipment which is called an impactor in the standard, and which is used to perform the impact test prescribed by the standard.

In assessing the question of whether to begin a standard development proceeding for a consumer product, the Commission considers whether the product presents an unreasonable risk of injury, whether a standard is necessary and whether the petitioner or other consumers would be unreasonably exposed to a risk of injury presented by the product if the Commission failed to commence the proceeding requested. In determining whether a product presents an unreasonable risk of injury and whether a consumer product safety standard or amendment is necessary to address a risk of injury, the Commission weighs the degree, nature, and frequency of injury or injury potential associated with the consumer product against the potential effect of a standard on the cost, utility, and availability of the product. The Commission also considers the relative priority of the risk of injury associated with the product and the Commission's resources available for rulemaking with respect to that risk of injury (see the procedures for petitioning for rulemaking under section 10 of the CPSA, 16 CFR 110.11(b)). The Commission policy on establishing priorities for commission action, 16 CFR 1009.8, sets forth the criteria upon which Commission priorities are based.

After careful consideration of the matters set forth in this petition, and a review of all information now available to the Commission about these matters, the Commission has denied the petition. The Commission has taken this action because it concludes that the information available to it which is relevant to the issues raised by the petition is not an adequate basis to support the action requested by the petition.

With regard to the first issue raised by the petition—risks of injury which may result from human impacts with glazing materials in doors and certain windows and in which the impacts do not cause

those materials to break—the Commission has examined reports of in-depth investigations of injuries associated with glazing materials in doors and glazed panels. Of 250 such reports since January 1974, two reports described injuries associated with glazing materials which did not result from the breakage of those materials. In one of these cases, a visual barrier of the type urged in the petition might have prevented the accident. In the other case, such a barrier probably would not have prevented the accident. However, the lack of injury data does not conclusively show that architectural glazing materials that do not break have no injury potential. Because the Commission's standard for glazing materials requires certain glazing to be impacted with 400 foot pounds of energy and either to break with characteristics such that the glazing is less likely to present an unreasonable risk of injury or not to break, it is possible that injury potential due to contact with glazing that does not break may be increased. There is no information, however, that shows that decals, etchings, or engravings on the glazing will prevent accidents from occurring particularly in those situations where the hazard is due to accidentally falling into or through glazing, or due to installing, replacing, storing, or otherwise manipulating the glazing (16 CFR 1201(d)(1)(ii), (iii)). These risks of injury would not appear to be reduced by visual barriers.

The Commission concludes that the portion of the petition requiring that visual barriers be mandated should be denied because of the lack of available information sufficient to establish that the absence of visual barriers for doors and certain windows presents an unreasonable risk of injury; that a mandatory standard requiring such visual barrier is necessary; or that the failure of the Commission to initiate a standard development proceeding to mandate visual barriers would unreasonably expose consumers to a risk of injury presented by doors and certain windows containing architectural glazing materials which do not break when impacted.

With regard to the second issue raised by the petition—the alleged inadequacy of the design of the impactor specified in the standard—the Commission has no information which would confirm or refute the allegations of the petition. Limited studies performed for the Commission (to compare the effects of impacting glazing materials by the use of an anthropomorphic dummy with the effects of impacting glazing materials by the use of the impactor specified in the standard) are inconclusive. However, the impactor designated in the standard has a long history of use in the voluntary industry standard, ANSI Z97.1. In the absence of some information tending to support the allegations concerning the inadequacy of the impactor, the Commission is unable to conclude that use of the impactor specified in the standard, along with the criteria for "passing" the standard results in glazing materials that present an unreasonable risk of injury. On the contrary, in issuing the standard, the Commission concluded that the standard was reasonably necessary to eliminate or reduce an unreasonable risk of injury. In view of the foregoing, the Commission is unable to find that an amendment to the standard concerning the type impactor is necessary. In addition, the Commission believes that based on presently available information, the failure of the Commission to initiate a standard development proceeding for the purpose of modifying design of the impactor would not unreasonably expose the petitioner or other consumers to a risk of injury presented by products covered by the standard which contain architectural glazing materials.

This notice of the Commission's denial of the above-described petition and its reasons for denial has been issued pursuant to section 10(d) of the Consumer Product Safety Act, 15 U.S.C. 2059(d).

Dated: September 26, 1977.

RICHARD E. RAPPS,
Secretary, Consumer
Product Safety Commission.

TOXIC SUBSTANCES CONTROL

Supplemental Notice to Proposed Inventory
Reporting Requirements; Draft
Reporting FormsAGENCY: Environmental Protection
Agency.ACTION: Supplemental notice to pro-
posed rules; draft forms.

SUMMARY: This document supplements the inventory reporting regulations re-proposed on August 2, 1977 in the FEDERAL REGISTER (42 FR 39182). Specifically, this notice provides some information that may be useful in understanding the re-proposed regulations and provides draft reporting forms for comment.

DATES: Comments on the draft reporting forms must be received on or before October 13, 1977. Comments on other issues raised in this notice must be received on or before November 2, 1977. These comments may supplement any comments previously submitted with respect to any issue raised by this notice.

ADDRESS: Comments should be addressed to the Federal Register Section, WH-557, Office of Toxic Substances, Attention: Joan Urquhart, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Comments should be filed in triplicate and bear the identifying notation OTS-081002A. All written comments filed pursuant to this notice will be available for public inspection at that office from 8:30 a.m. to 4:00 p.m. Monday through Friday.

FOR FURTHER INFORMATION CON-
TACT:

Mr. John B. Ritch, Jr., Director, Office of Industry Assistance, Office of Toxic Substances (TS-788), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460 (202-755-0535).

SUPPLEMENTARY INFORMATION: This document supplements the regulations proposed on August 2, 1977, in the FEDERAL REGISTER (42 FR 39182) under the authority of subsection 8(a) of the Toxic Substances Control Act (90 Stat. 2003; 15 U.S.C. 2601 et seq.) hereinafter referred to as TSCA.

On March 9, 1977, EPA first published in the FEDERAL REGISTER (42 FR 13130) proposed inventory reporting regulations to govern reporting of chemical substances for inclusion on an inventory of chemical substances required by subsection 8(b) of TSCA. On April 12, 1977, EPA published a supplemental notice of proposed rulemaking in the FEDERAL REGISTER (42 FR 19298) providing additional information pertaining to the proposed inventory regulations. This notice set forth instructions for use of a Candidate

List of Chemical Substances and specified minerals which EPA proposed to include in the inventory of chemical substances. On April 18, 1977, EPA held a public meeting in Washington, D.C., to provide interested persons an opportunity to comment publicly on the proposed regulations. On April 28, 1977, EPA published a notice of availability of the Candidate List of Chemical Substances for use in reporting chemicals for inclusion on the inventory (42 FR 21639). In addition, on July 8, 1977, the Agency published a notice to amend the procedures for securing a copy of the Candidate List on computer-readable tape (42 FR 35183).

On August 2, 1977, EPA re-proposed the inventory reporting regulations to revise the March 9, 1977, proposed regulations. In order to provide interested persons an opportunity to comment publicly on the proposed regulations, EPA held a public meeting in Washington, D.C., on August 24, 1977. A transcript of the public meeting is available for public inspection in the Office of Toxic Substances at the address provided above. At this meeting, EPA distributed copies of draft reporting forms to accompany the re-proposed regulations. Copies of the revised forms are published below for public comment. In addition, EPA presented some introductory comments on the re-proposed regulations. Copies of these remarks are available from the Office of Industry Assistance at the address above.

CLARIFICATION CONCERNING IMPORTERS OF
MIXTURES AND ARTICLES CONTAINING A
CHEMICAL SUBSTANCE

Some have brought to EPA's attention ambiguity in the August 2, 1977, preamble regarding the statutory requirements on importers of mixtures and articles containing a chemical substance.

Section 710.3(a)(2) of these regulations provides that importers would be required to report those chemical substances they have imported into the United States for a commercial purpose since January 1, 1977. Section 710.3(b) of the regulations provides that any person who imported a chemical substance for a commercial purpose since January 1, 1975, may report concerning that substance. In addition, § 710.3(c) provides that during a 120-day period following the first publication of the inventory, any person who has processed or used a chemical substance (including the manufacture of a mixture or article containing that chemical substance) for a commercial purpose since January 1, 1975, may report that substance if it was not included in the inventory. The preamble to these regulations stated at page 39185 that it was EPA's intent that importers would not be required to report the chemical substances which are components of the articles they import.

EPA is proposing that importers of chemical substances be required to report all chemical substances they have imported in bulk into the United States since January 1, 1977 and that they

be permitted to report all chemical substances they have so imported since January 1, 1975. In addition, EPA is proposing that importers of chemical substances be permitted to report each chemical substance which is a component of a mixture or article which has been imported since January 1, 1975. Importers may report chemical substances comprising an imported mixture or article during either the initial reporting period or the 120-day period following publication of the initial inventory. As proposed the August 2, 1977 preamble, chemicals imported "in bulk" includes all chemical substances which are imported in cans, bottles, drums, barrels, packages, tanks, bags, and other devices which are used to contain the substances during importation.

The clarification with respect to chemical substances comprising an imported mixture or article becomes significant in light of EPA's proposed implementation of section 5(a)(1)(A) of TSCA. This section provides that no person may manufacture a new chemical substance (one not included on the inventory compiled in accordance with section 8(b)) unless that person submits premanufacture notification to EPA at least 90 days prior to manufacturing the chemical substance for a commercial purpose. The premanufacture notification requirement of section 5(a)(1)(A) applies to manufacturers and, because the term "manufacture" includes "import", importers of chemical substances. Since an importer of a mixture or article is also importing the component chemical substances in the mixture or article, such an importer would be subject to the premanufacture notification requirements with respect to all new chemical substances in the mixture or article. However, EPA intends to apply the premanufacture notification requirements of section 5(a)(1)(A) only to importers of chemical substances in bulk and importers of chemical substances in mixtures. As is discussed in greater detail below, the premanufacture notification requirements of section 5 will not be applied to the importation of an article containing a new chemical substance.

Accordingly, although importers of chemical substances in mixtures would not be required to report for compilation of the inventory, they should ensure that the chemical substances they import in mixtures are included on the inventory. After compilation of the expanded inventory on the basis of the 120-day reporting period, no person will be permitted to import a mixture containing a new chemical substance except in accordance with TSCA section 5.

The legislative history of TSCA makes clear that Congress intended the premanufacture notification requirements of section 5 to provide the Administrator with an opportunity to review and evaluate information on new chemical substances to determine if any regulatory controls would be necessary to prevent an unreasonable risk of injury to health or the environment. The section reflects Congress' recognition of the

fact that the most desirable time to determine effects of a substance and to take action if necessary, is before full commercial production begins. Congress did not intend that the purposes of this section could be circumvented by importation rather than domestic manufacture of a chemical substance. If EPA did not require importers to report any new chemical substance contained in an imported mixture, persons could manufacture new chemical substances abroad, mix them with water or other solvents, and import them into the United States as a mixture. This practice would not only significantly undermine the intent of Congress that any new chemical substance be subject to review before its introduction and use in commerce, but might also encourage domestic manufacturers to move at least part of their operations abroad. EPA does not believe that Congress intended such a result.

Moreover, Congress intended domestic manufacturers and importers to be treated with parity (H.R. Rep. No. 94-1341, 94th Cong., 2d Sess. 12-13). Premanufacture notification must be given on every new chemical substance manufactured domestically. If the importer of a mixture were not required to give premanufacture notification on any new chemical substance in a mixture, the domestic manufacturers would be put at a distinct disadvantage. An importer could enter domestic markets with a substantial savings of both time and money. The costs in terms of protection of the public health and environment would thereby be significant. Accordingly, importers of mixtures will be required to give premanufacture notification of new chemical substances.

It is the proposed Agency policy that the premanufacture notification requirements of section 5(a)(1)(A) should not be applied to the importation of chemical substances in articles. The March 9, 1977 proposed regulations would have required importers to report chemical substances contained in the articles they import. The August 2, 1977 re-proposed regulations would permit but not require importers of an article to report component chemical substances for the inventory. As was discussed in the preamble to these re-proposed regulations (42 FR 39185), comments from industry and trade associations argued that it would be extremely burdensome for importers to identify the chemical substances contained in the articles they import. According to estimates from the American Importers Association, the total direct costs would range from \$187 million to about \$437 million. The value of the component chemical substance(s) may be small in proportion to the value of the article itself. Accordingly, to require an importer of the article to identify its constituent chemical substances would impose a proportionately greater burden. Moreover, EPA does not believe that domestic manufacturers of articles would move their operations abroad or put at a serious disadvantage if the importer is not required to identify constituent substances in articles. Finally,

because of its form, the health and environmental risk posed by a chemical substance imported in an article may be less than the risk posed by a chemical substance imported in bulk or in a mixture.

Accordingly, the inventory reporting requirements of section 8(a) and the premanufacture notification requirements of section 5(a)(1)(A) will not be applied to importers of chemical substances in articles. However, the Agency will exercise its authority to regulate the import of chemical substances in bulk, in mixtures, and in articles under section 6 of the Act, as necessary to protect against unreasonable risks of injury to health and the environment. This might, for example, include prohibiting, limiting or in other ways restricting the import of such chemical substances.

The Agency encourages importers of chemical substances in mixtures to ensure that the chemical substances they import are included on the inventory. If the importer chooses to report for the inventory in accordance with § 710.5(e) of the proposed regulations, he could authorize the foreign supplier of the chemical substance to report to EPA on his behalf, if both the foreign supplier and the importer sign the declarations provided on the reporting form. EPA, however, encourages importers of chemical substances in mixtures to wait to report until after the initial inventory is published next fall. Many of the imported chemical substances may be contained in the inventory, and importers could thus avoid duplicative reporting.

EPA solicits comment concerning this revision to the earlier proposals. EPA specifically welcomes comment on the distinctions we propose between importers of chemical substances in mixtures and importers of chemical substances in articles, and, in particular, on the relative burdens which would be imposed to these two sectors. The Agency has already received some comments on the broad issues and these need not be resubmitted. Conforming changes will be made to the final inventory reporting regulations.

REPORTING ON MAGNETIC TAPE

EPA is currently working with the Chemical Abstracts Service (CAS) to develop a computer file structure which can be used to allow persons to report chemical substances with CAS registry numbers on magnetic tape. These substances otherwise would be reported on either Form A or B, as discussed below. Instructions concerning how to report by magnetic tape will be included with the final regulations. EPA will probably require that there be a minimum number of substances reported on a tape so that reporting by tape would be at least as efficient as by the forms. In addition, anyone submitting a tape would have to submit at least one form with a signed certification statement and, for tapes containing confidential information, sign and submit appropriate confidentiality statements.

A WORD OF CAUTION

Several manufacturers have complained to EPA that they have spent substantial amounts of time and money compiling inventories in response to the March 9, 1977 and August 2, 1977 proposed regulations. The March 9, 1977 and August 2, 1977 proposed regulations are proposals published for public comment. The regulations will be revised in response to public comment before final promulgation. Accordingly, manufacturers and others are encouraged to keep this in mind as they prepare for compiling information for submittal to EPA.

REPORTING FORMS: FORM A, B, & C

EPA is proposing four forms for reporting under these regulations. Form A is for reporting chemical substances which are included on the Toxic Substances Control Act (TSCA) Candidate List of Chemical Substances, a list of approximately 33,000 chemical substances. This Candidate List was published by EPA last April and is available through the Office of Industry Assistance in EPA's Office of Toxic Substances. It was compiled as a tool for reporting chemical substances that are included on it. Form A provides space for the Chemical Abstracts Service (CAS) registry number and code designation which are provided for each of the chemical substances in the Candidate List. The code designation is a check number to verify that the corresponding CAS registry number was entered correctly. Code designations will not be included in the inventory. For any listed chemical, a manufacturer merely has to report these numbers on Form A rather than the chemical name or description of the chemical substance.

Everything on the Candidate List will not automatically be included on the inventory. Only those substances that are reported will be included. Further, not everything on the List is eligible for inclusion in the inventory. The Candidate List contains some mixtures such as hydrates and some chemical substances, such as those used solely as drugs and pesticides, which are excluded under these proposed regulations. In addition, the Candidate List contains naturally occurring substances which need not be reported as they will automatically be included in the inventory.

Many product trademarks are included in the Candidate List but should not be reported for the inventory. Product trademarks will not be included on the inventory because they may refer to mixtures or, in the case of trademarked chemical substances, the trademark may not always be linked with that specific substance over time. The product trademark may, however, be reported on Form D, as is discussed below. Product trademarks should be distinguished from certain generic names, such as Colour Index names, included on the Candidate List which may be reported. The purpose of the proposed Form D for trademarked products is discussed more fully below.

Form B is for reporting chemical substances which have chemical Abstracts Service Registry Numbers but are not included in the Candidate List. Form C is for reporting either chemical substances which do not have a Chemical Abstracts Service Registry Number or whose identities are confidential.

On each of the forms there will be an opportunity for manufacturers to assert all potential confidentiality claims. If a manufacturer makes a confidentiality claim, he must sign a statement that certifies that certain statements concerning confidentiality printed on the back of the forms are true. EPA welcomes any comments concerning the provisions concerning confidentiality information, the clarity of the instructions, or any other aspect of the forms. These comments must be received on or before (ten days after publication of this notice) so that EPA may make appropriate modifications prior to publication of these forms.

FORM D: PRODUCT TRADEMARKS LIST

EPA has received comments from processors and users of chemical substances that they do not always know the chemical identities of the substances they purchase. Rather, they often know only the product trademarks. Accordingly, during the special 120-day report-

ing period, processors and users may have difficulty identifying whether or not the chemical substance(s) they purchase are in fact on the inventory. Processors could individually request suppliers to certify the substances that they sell are being reported. In order to ease this burden somewhat, we are proposing to provide an opportunity for manufacturers who sell products under product trademarks to certify that the chemical substances have been reported for the inventory and to report those trademarks to EPA on a separate form. A manufacturer would not be required to report his trademarks.

EPA would not require manufacturers who chose to report their trademarks to link the product trademarks with specific chemical substances. We realize that many trademarks refer to mixtures of varying compositions. Thus, linking a trademark to one specific chemical substance would in some instances be inaccurate or misleading. To require product trademarks to be defined in terms of their component chemical substances may be desirable for future requirements, but we feel it would be too burdensome for the limited purpose of compilation of the inventory.

EPA would publish a separate document along with the initial inventory

that would simply list alphabetically those product trademarks which had been reported by manufacturers. As mentioned earlier, a manufacturer would first have to certify that all the chemical substances subject to these regulations contained in the trademarked products have been reported to EPA as required by the inventory regulations. Reporting of any false information would be subject to criminal penalty under 18 USC 1001.

EPA welcomes comment on the usefulness of this approach. In particular, as proposed here, a person may report a trademarked product that is a chemical substance, a mixture, or an article containing a chemical substance. EPA is proposing to permit reporting on Form D of trademarked mixtures and articles to provide a simple mechanism for manufacturers of these mixtures and articles to assure their customers that the chemical substances contained in the mixture and articles have been reported for the inventory. EPA welcomes comment on whether such reporting should be permitted.

Dated: September 26, 1977.

DOUGLAS M. COSTLE,
Administrator.

U.S. Environmental Protection Agency
Chemical Substance Inventory Report
Section 8(a) and (b) -- Toxic Substances Control Act
(15 U.S.C. 2607)

Instructions Form A: TSCA Candidate List Chemical Substances

Form A may only be used to report, for the Toxic Substances Control Act (TSCA) Section 8(a) and Section 8(b) Inventory, chemical substances that are identified in the EPA publication "Toxic Substances Control Act (TSCA), PL 94-469, Candidate List of Chemical Substances," April 1977, GPO Stock Number 055-007-00001-2, or in any addendum to that list published by EPA in the FEDERAL REGISTER. Chemical substances with known Chemical Abstracts Service (CAS) Registry Numbers but which do not appear in the TSCA Candidate List of Chemical Substances should be reported using Form B. A chemical substance which has no known CAS Registry Number and/or whose identity as a commercial chemical substance is claimed confidential, must be reported on Form C.

Before completing this form, carefully read the inventory reporting regulations published in final form in the FEDERAL REGISTER and which also appear in the Code of Federal Regulations, Chapter 40, Part 710 (40 CFR 710). A Guide to the Use of the Candidate List of Chemical Substances appears in Appendix A of the inventory reporting regulations. After completing and signing this form, retain the last copy and send the remainder to:

U.S. Environmental Protection Agency
Office of Toxic Substances
P.O. Box
Columbus, Ohio 43210

EPA will acknowledge receipt of the forms to the addressee identified in block III of the form.

TYPE OR USE A BLACK BALL POINT PEN (Press Firmly).

BLOCK I. CERTIFICATION STATEMENT AND SIGNATURE:

The certification statement must be signed by a person authorized by the company to sign official documents for the company. If a trade association reports on behalf of one or more persons, a duly authorized official of the trade association must sign the form. If an importer elects to have his foreign supplier/manufacturer complete block V of this form, the importer must, nevertheless, sign the form, and a duly authorized official of the foreign supplier/manufacturer (identified in block IV) must sign in the space below the importer's signature.

DATE: Enter the month, day, and year that the form was signed.

NAME AND TITLE: Enter the name and title of the person who signed the form.

BLOCK II. CORPORATION:

Enter the complete name of the domestic corporation of which the plant site identified in block III is a part or, if that corporation is controlled by another domestic corporation, enter the complete name of the controlling corporation. If the plant site is owned by an unincorporated entity, enter the company name. A trade association should enter its complete name.

BLOCK III. COMPANY NAME AND PLANT SITE ADDRESS

Enter the company name and address of the plant where the chemical substances identified in block V are manufactured or processed. An importer should enter his company name and business address. A trade association should enter its name and headquarters address.

BLOCK IV. PRINCIPAL TECHNICAL CONTACT(S)

Enter the name, address, and telephone number (including area code) of the person(s) whom EPA may contact for clarification of information submitted on this form. An importer who elects to have his foreign supplier/manufacturer complete block V should enter the name and address of his foreign supplier/manufacturer.

BLOCK V. CANDIDATE LIST CHEMICAL SUBSTANCES:

CAUTION: The TSCA Candidate List of Chemical Substances inappropriately includes some mixtures and certain chemical substances which, as explained in the inventory reporting regulations, are excluded from the inventory. Do not report mixtures or excluded chemical substances. Furthermore, the Candidate List includes some trademarks. Do not use Candidate List entries which are trademarks to identify and report chemical substances. Trademarks will not be included on the inventory.

Up to 27 Candidate List chemical substances may be reported on this form. Manufacturers and processors should report on this form only TSCA Candidate List chemical substances which are manufactured or processed at the plant site identified in block III.

For each chemical substance entered in block V:

1. Enter in the column labeled "CAS Registry Number" the Chemical Abstracts Service (CAS) Registry Number as it appears in the Candidate List. Include hyphens.

2. Enter in the column labeled "EPA Code Designation" the code number (including hyphen) which accompanies the CAS Registry Number in the Candidate List.

PROPOSED RULES

3. As specified below, make the appropriate entry in the box under "Production Volume". Quantities should be entered in pounds and be expressed accurate to two (2) significant figures (for example, report 175,411 as 180,000; or 2,550 as 2,600).

- a) **Manufacturers and Importers:** Enter the quantity manufactured and/or imported during calendar year 1976; except that (i) if there was no manufacture or importation during 1976, enter the quantity projected for manufacture and/or for importation during calendar year 1977, or (ii) if there was no manufacture during 1976 or 1977, enter the quantity manufactured or imported during calendar year 1975, or (iii) if you did not manufacture or import the chemical substance since January 1, 1975, enter the average annual quantity distributed in commerce since that date.
- b) **Processors:** If you only processed the chemical substance since January 1, 1975, make no entry.
- c) **Trade Associations:** The estimated aggregate quantity manufactured by your member companies during calendar year 1976 may be entered.

4. Enter a check in the appropriate box(es) under the general heading "Activity" to indicate whether you manufacture, process, and/or import the chemical substance. Check as many boxes as applicable.

5. Enter a check in the box under "Site Limited" if you manufacture the chemical substance within the plant site identified in block III and do not distribute the chemical substance, or any mixture or article containing that substance, for commercial purposes outside that site.

6. **Confidentiality Claims:**

Enter checks in the appropriate boxes to indicate which information is claimed confidential. Trade associations are not permitted to make any confidentiality claims.

- (a) By checking the box under "Manufacture" for a particular chemical substance, you assert that the fact that you manufacture the chemical substance at the plant site identified in block III for commercial purposes is confidential.
- (b) By checking the box under "Process" for a particular chemical substance, you assert that the fact that you process the chemical substance at the plant site identified in block III for commercial purposes is confidential.
- (c) By checking the box under "Import" for a particular chemical substance, you assert that the fact that you import the chemical substance for commercial purposes is confidential.
- (d) By checking the box under "Site-Limited" for a particular chemical substance, you assert that the fact that the chemical substance is not distributed for commercial purposes outside of the manufacturing site identified in block III is confidential.
- (e) By checking the box under "Production Volume" for a particular chemical substance, you assert that the production volume of the chemical substance for the plant site identified in block III is confidential.
- (f) By checking the box under "Corporation" for a particular chemical substance, you assert that the link of this particular chemical substance to the corporation identified in block II is confidential because the corporation is not known to the public as a manufacturer, importer, or processor of this particular chemical substance for commercial purposes.
- (g) By checking the box under "Plant Site" for a particular chemical substance, you assert that the link of this chemical substance to the plant site identified in block III is confidential because it is not known to the public that the particular chemical substance is manufactured, imported, or processed for commercial purposes at this particular plant site.

CONFIDENTIALITY STATEMENTS
[For Chemical Substance Inventory Report Forms A and B]

By signing the statement appearing in block I of this form, the person signing the form certifies that the following statements are true for all information on this form that has been claimed as confidential by checking one or more of the boxes under the heading "Confidentiality Claims."

- By checking the box under "Manufacture" for a particular chemical substance, I assert that the fact that we manufacture the chemical substance at the plant site identified in block III for commercial purposes is confidential.
- By checking the box under "Process" for a particular chemical substance, I assert that the fact that we process the chemical substance at the plant site identified in block III for commercial purposes is confidential.
- By checking the box under "Import" for a particular chemical substance, I assert that the fact that we import the chemical substance for commercial purposes is confidential.
- By checking the box under "Site-Limited" for a particular chemical substance, I assert that the fact that the chemical substance is not distributed for commercial purposes outside of the manufacturing site identified in block III is confidential.
- By checking the box under "Production Volume" for a particular chemical substance, I assert that the production volume of the chemical substance for the plant site identified in block III is confidential.
- By checking the box under "Corporation" for a particular chemical substance, I assert that the link of this chemical substance to the corporation identified in block II is confidential because the corporation is not known to the public as a manufacturer, importer, or processor of this particular chemical substance for commercial purposes.
- By checking the box under "Plant Site" for a particular chemical substance, I assert that the link of this chemical substance to the plant site identified in block III is confidential because it is not known to the public that the particular chemical substance is manufactured, imported, or processed for commercial purposes at this particular plant site.

General Statement

For ALL of the claims I have asserted by checking any of the boxes under "Confidentiality Claims" the following statements are true:

- We have taken reasonable measures to protect the confidentiality of the information, and we intend to continue to take such measures.
- The information is not, and has not been, reasonably obtainable without our consent by other persons (other than governmental bodies) by use of legitimate means (other than discovery based on a showing of special need in a judicial or quasi-judicial proceeding).
- The information is not publicly available elsewhere.
- Disclosure of the information would cause substantial harm to our competitive position.

PROPOSED RULES

U.S. ENVIRONMENTAL PROTECTION AGENCY
CHEMICAL SUBSTANCE INVENTORY REPORT
Section 8(a) and (b) -- Toxic Substances Control Act
(15 U.S.C. 2607)-Instructions-
FORM B: Chemical Substances with CAS Registry Numbers

Form B may only be used to report, for the Toxic Substances Control Act (TSCA), Section 8(a) and Section 8(b) Inventory, chemical substances with known Chemical Abstracts Service (CAS) Registry Numbers. Chemical substances which appear in the TSCA Candidate List of Chemical Substances, should be reported using Form A. A chemical substance which has no known CAS Registry Number and/or whose identity as a commercial chemical substance is claimed confidential, must be reported on Form C.

Before completing this form, carefully read the inventory reporting regulations published in final form in the FEDERAL REGISTER and which also appear in the Code of Federal Regulations, Chapter 40, Part 710 (40 CFR 710). After completing and signing this form, retain the last copy and send the remainder to:

U.S. Environmental Protection Agency
Office of Toxic Substances
P.O. Box
Columbus, Ohio 43210

EPA will acknowledge receipt of the forms to the addressee identified in block III.

TYPE, OR USE A BLACK BALL POINT PEN (Press Firmly).

BLOCK I. CERTIFICATION STATEMENT AND SIGNATURE:

The certification statement must be signed by a person authorized by the company to sign official documents for the company. If a trade association reports on behalf of one or more persons, a duly authorized official of the trade association must sign the form. If an importer elects to have his foreign supplier/manufacturer complete Block V of this form, the importer must, nevertheless, sign the form and a duly authorized official of the foreign supplier/manufacturer (identified in block IV) must sign in the space below the importer's signature.

DATE: Enter the month, day, and year that the form was signed.

NAME and TITLE: Enter the name and title of the person who signed the form.

BLOCK II. CORPORATION:

Enter the complete name of the domestic corporation of which the plant site identified in block III is a part or, if that corporation is controlled by another domestic corporation, enter the complete name of the controlling corporation. If the plant site is owned by an unincorporated entity, enter the company name. A trade association should enter its complete name.

BLOCK III. COMPANY NAME AND PLANT SITE ADDRESS:

Enter the company name and address of the plant where the chemical substances identified in block V are manufactured or processed. An importer should enter his company name and business address. A trade association should enter its name and headquarters address.

BLOCK IV. PRINCIPAL TECHNICAL CONTACT(S)

Enter the name, address, and telephone number (including area code) of the person(s) whom EPA may contact for clarification of information submitted on this form. An importer electing to have his foreign supplier/manufacturer complete block V, should enter the name and address of the foreign supplier/manufacturer.

BLOCK V. CHEMICAL SUBSTANCES WITH CAS REGISTRY NUMBERS

Up to 10 chemical substances may be reported on this form. Manufacturers and processors should report on this form only chemical substances with CAS Registry Numbers which are manufactured or processed at the plant site identified in block III.

For each chemical substance entered in Block V:

- Enter in the column "CAS Registry Number" the Chemical Abstracts Service (CAS) Registry Number. Include hyphens.
- Enter in the column labeled "Specific Chemical Name" the systematically derived or other specific chemical name. Enter only nonconfidential chemical names. All names reported in this column will be published in the inventory with the CAS Registry Number.
- As specified below, make the appropriate entry in the box under "Production Volume". Quantities should be entered in pounds and be expressed accurate to two (2) significant figures (for example, report 175,411 as 180,000; or 2,550 as 2,600).
 - Manufacturers and Importers: Enter the quantity manufactured and/or imported during calendar year 1976; except that (i) if there was no manufacture or importation during 1976, enter the quantity projected for manufacture and/or for importation during calendar year 1977, or (ii) if there was no manufacture during 1976 or 1977, enter the quantity manufactured or imported during calendar year 1975, or (iii) if you did not manufacture or import the chemical substance since January 1, 1975, enter the average annual quantity distributed in commerce since that date.
 - Processors: If you only processed the chemical substance since January 1, 1975, make no entry.
 - Trade Associations: The estimated aggregate quantity manufactured by your member companies during calendar year 1976 may be entered.

PROPOSED RULES

4. Enter a check in the appropriate box(es) under the general heading "Activity" to indicate whether you manufacture, process, and/or import the chemical substance. Check as many boxes as applicable.
5. Enter a check in the box under "Site Limited" if you manufacture and process the chemical substance only within the plant site identified in block III and do not distribute the chemical substance, or any mixture or article containing that substance, for commercial purposes outside that site.
6. **CONFIDENTIALITY CLAIMS**

Enter checks in the appropriate blocks to indicate which information is claimed confidential. Trade associations are not permitted to make any confidentiality claims.

 - (a) By checking the box under "Manufacture" for a particular chemical substance, you assert that the fact that you manufacture the chemical substance at the plant site identified in block III for commercial purposes is confidential.
 - (b) By checking the box under "Process" for a particular chemical substance, you assert that the fact that you process the chemical substance at the plant site identified in block III for commercial purposes is confidential.
 - (c) By checking the box under "Import" for a particular chemical substance, you assert that the fact that you import the chemical substance for commercial purposes is confidential.
 - (d) By checking the box under "Site-Limited" for a particular chemical substance, you assert that the fact that the chemical substance is not distributed for commercial purposes outside of the manufacturing site identified in block III is confidential.
 - (e) By checking the box under "Production Volume" for a particular chemical substance, you assert that the production volume of the chemical substance for the plant site identified in block III is confidential.
 - (f) By checking the box under "Corporation" for a particular chemical substance, you assert that the link of this particular chemical substance to the corporation identified in block III is confidential because the corporation is not known to the public as a manufacturer, importer, or processor of this particular chemical substance for commercial purposes.
 - (g) By checking the box under "Plant Site" for a particular chemical substance, you assert that the link of this chemical substance to the plant site identified in block III is confidential because it is not known to the public that the particular chemical substance is manufactured, imported, or processed, for commercial purposes at this particular plant site.

PROPOSED RULES

CONFIDENTIALITY STATEMENTS
[For Chemical Substance Inventory Report Forms A and B]

By signing the statement appearing in block I of this form, the person signing the form certifies that the following statements are true for all information on this form that has been claimed as confidential by checking one or more of the boxes under the heading "Confidentiality Claims."

- By checking the box under "Manufacture" for a particular chemical substance, I assert that the fact that we manufacture the chemical substance at the plant site identified in block III for commercial purposes is confidential.
- By checking the box under "Process" for a particular chemical substance, I assert that the fact that we process the chemical substance at the plant site identified in block III for commercial purposes is confidential.
- By checking the box under "Import" for a particular chemical substance, I assert that the fact that we import the chemical substance for commercial purposes is confidential.
- By checking the box under "Site-Limited" for a particular chemical substance, I assert that the fact that the chemical substance is not distributed for commercial purposes outside of the manufacturing site identified in block III is confidential.
- By checking the box under "Production Volume" for a particular chemical substance, I assert that the production volume of the chemical substance for the plant site identified in block III is confidential.
- By checking the box under "Corporation" for a particular chemical substance, I assert that the link of this chemical substance to the corporation identified in block II is confidential because the corporation is not known to the public as a manufacturer, importer, or processor of this particular chemical substance for commercial purposes.
- By checking the box under "Plant Site" for a particular chemical substance, I assert that the link of this chemical substance to the plant site identified in block III is confidential because it is not known to the public that the particular chemical substance is manufactured, imported, or processed for commercial purposes at this particular plant site.

General Statement

For ALL of the claims I have asserted by checking any of the boxes under "Confidentiality Claims" the following statements are true:

- We have taken reasonable measures to protect the confidentiality of the information, and we intend to continue to take such measures.
- The information is not, and has not been, reasonably obtainable without our consent by other persons (other than governmental bodies) by use of legitimate means (other than discovery based on a showing of special need in a judicial or quasi-judicial proceeding).
- The information is not publicly available elsewhere.
- Disclosure of the information would cause substantial harm to our competitive position.

PROPOSED RULES

U.S. Environmental Protection Agency
Chemical Substance Inventory Report
Section 8(a) and (b) -- Toxic Substances Control Act
(15 U.S.C. 2607)

-Instructions-

Form C: Chemical Substance Whose Identity is Claimed Confidential or Whose CAS Registry Number is Unknown

Form C may only be used to report, for the Toxic Substances Control Act (TSCA), Section 8(a) and Section 8(b) Inventory, a chemical substance whose identity as commercial chemical substance is claimed confidential or whose Chemical Abstract Service (CAS) Registry Number is unknown. Chemical substances which appear in the TSCA Candidate List of Chemical Substances should be reported using Form A. Chemical substances with known CAS Registry Numbers but which do not appear in the TSCA Candidate List of Chemical Substances should be reported using Form B.

Before completing this form, carefully read the inventory reporting regulations published in final form in the FEDERAL REGISTER and which also appear in the Code of Federal Regulations, Chapter 40, Part 710 (40 CFR 710). After completing and signing this form, retain the last copy and send the remainder to:

U.S. Environmental Protection Agency
Office of Toxic Substances
P.O. Box
Columbus, Ohio 43210

EPA will acknowledge receipt of the forms to the addressee identified in block III.

TYPE, OR USE BLACK BALL POINT PEN (Press Firmly).

BLOCK I. CERTIFICATION STATEMENT AND SIGNATURE:

The certification statement should be signed by a person authorized by the company to sign official documents for the company. If a trade association reports on behalf of one or more persons, a duly authorized official of the trade association should sign the form. If an importer elects to have his foreign supplier/manufacturer complete block V of this form, the importer must, nevertheless, sign the form, and a duly authorized official of the foreign supplier/manufacturer (identified in block IV) must sign in the space below the importer's signature.

DATE: Enter the month, day, and year that the form was signed.

NAME AND TITLE: Enter the name and title of the person who signed the form.

BLOCK II. CORPORATION:

Enter the complete name of the domestic corporation of which the plant site identified in block III is a part or, if that corporation is controlled by another domestic corporation, enter the complete name of the controlling corporation. If the plant site is owned by an unincorporated entity, enter the company name. A trade association should enter its complete name.

BLOCK III. COMPANY NAME AND PLANT SITE ADDRESS:

Enter the company name and address of the plant where the chemical substances identified in block V are manufactured or processed. An importer should enter his company name and business address. A trade association should enter its name and headquarters address.

BLOCK IV. PRINCIPAL TECHNICAL CONTACT(S):

Enter the name, address, and telephone number (including area code), of the person(s) whom EPA may contact for clarification of information submitted on this form. An importer electing to have his foreign supplier/manufacturer complete block V, should enter the name and address of the foreign supplier/manufacturer.

BLOCK V. CHEMICAL SUBSTANCE WHOSE IDENTITY IS CONFIDENTIAL and/or CAS REGISTRY NUMBER IS UNKNOWN

- SPECIFIC CHEMICAL NAME:** Indicate whether the chemical substance proposed for inclusion in the inventory falls within class 1 or 2, described as follows:
Class 1 chemical substances are distinct chemicals which can be represented by definite structural diagrams. For a class 1 chemical substance, propose, if possible, a systematically derived name that uniquely defines the chemical species. Also provide synonyms known to you, other than trademarks, by which the chemical substance is commonly known.

Class 2 chemical substances are those which can not be named by a class 1 description. For a class 2 chemical substance, propose a name which is as descriptive of the substance as possible. Also provide synonyms known.

- ACTIVITY:** Check the appropriate box(es) to indicate whether you import, manufacture, or process the chemical substance at the plant site identified in block III. Check as many boxes as applicable.

PROPOSED RULES

C. PRODUCTION VOLUME: As specified below, make the appropriate entry in the blank provided for "Production Volume". Quantities should be entered in pounds and be expressed accurate to two (2) significant figures (for example, report 175,411 as 180,000; or 2,550 as 2,600).

1. Manufacturers and Importers: Enter the quantity manufactured and/or imported during calendar year 1976; except that (i) if there was no manufacture or importation during 1976, enter the quantity projected for manufacture and/or for importation during calendar year 1977, or (ii) if there was no manufacture during 1976 or 1977, enter the quantity manufactured or imported during calendar year 1975, or (iii) if you did not manufacture or import the chemical substance since January 1, 1975, enter the average annual quantity distributed in commerce since that date.
2. Processors: If you only processed the chemical substance since January 1, 1975, make no entry.
3. Trade Associations: The estimated aggregate quantity manufactured by your member companies during calendar year 1976 may be entered.

D. CONFIDENTIALITY CLAIMS:

Enter checks in the appropriate boxes to indicate which information is claimed confidential. Trade associations are not permitted to make any confidentiality claims.

1. By checking the box under "Chemical Identity" for the substance reported, you assert that the chemical identity of the particular substance on the TSCA inventory is confidential. Enter the CAS Registry Number (including hyphens), if known. Check one or more of the justification statement boxes which refer to statements appearing on the back of this form under Item 1. These statements explain the reasons for asserting the identity to be confidential. EPA must know the reason for asserting the identity to be confidential.

In addition, provide a generic name for inclusion on the Inventory which is only as generic as necessary to protect the confidential identity of the particular chemical substance.

2. By checking the box under "Manufacture" for a particular chemical substance, you assert that the fact that you manufacture the chemical substance at the plant site identified in block III for commercial purposes is confidential.
3. By checking the box under "Process" for a particular chemical substance, you assert that the fact that you process the chemical substance at the plant site identified in block III for commercial purposes is confidential.
4. By checking the box under "Import" for a particular chemical substance, you assert that the fact that you import the chemical substance for commercial purposes is confidential.
5. By checking the box under "Site-Limited" for a particular chemical substance, you assert that the fact that the chemical substance is not distributed for commercial purposes outside of the manufacturing site identified in block III is confidential.
6. By checking the box under "Production Volume" for a particular chemical substance, you assert that the production volume of the chemical substance for the plant site identified in block III is confidential.
7. By checking the box under "Corporation" for a particular chemical substance, you assert that the link of this particular chemical substance to the corporation identified in block II is confidential because the corporation is not known to the public as a manufacturer, importer, or processor of this particular chemical substance for commercial purposes.
8. By checking the box under "Plant Site" for a particular chemical substance, you assert that the link of this chemical substance to the plant site identified in block III is confidential because it is not known to the public that the particular chemical substance is manufactured, imported, or processed for commercial purposes at this particular plant site.

E. STRUCTURAL AND SUPPLEMENTAL INFORMATION

For Class 1 chemical substances, provide a structure diagram indicating the atoms and the nature of the bonds joining the atoms. Stereochemistry, if known, and ionic charges should be shown. In addition, provide a molecular formula which is an inventory of the kinds and numbers of atoms present in the molecule without regard to how the atoms are bonded.

For Class 2 chemical substances, describe, in the form of a reaction scheme, the final reaction sequence used to produce the reported chemical substance. Such description should identify all immediate precursor substance(s) and the nature of the reaction. All reactants should be identified by their CAS Registry Numbers, if known. In addition, provide, to the extent possible, a partial structural diagram.

Supplemental instructions for the proper identification of chemical substances is provided in Appendix A of the inventory reporting regulations (40 CFR 710).

PROPOSED RULES

CONFIDENTIALITY STATEMENTS
(For Chemical Substance Inventory Report Form C)

By signing the statement appearing in block I of this form, the person signing the form certifies that the following statements are true for all information on this form that has been claimed as confidential by checking one or more of the boxes under the heading "Confidentiality Claims" or the box entitled "Chemical Identity."

1. By checking the box entitled "Chemical Identity," I assert that the chemical identity of this chemical substance is confidential for one or more of the following reasons (as indicated by a check by the appropriate statement or statements):
 - A. ☒ This chemical substance is known to exist; however, no one knows that this chemical substance is being manufactured, imported, or processed for commercial purposes. If our competitors knew that this chemical substance is being manufactured, imported, or processed for commercial purposes, it would show them that the chemical substance has commercial potential and might lead them into research concerning its use. No one knows that this chemical substance has commercial possibilities except us to the best of our knowledge.
 - B. ☒ This chemical substance is known to exist; however, no one knows that this chemical substance is being manufactured, imported, or processed for commercial purposes. If our competitors knew that this substance is being manufactured, imported, or processed for commercial purposes, they would immediately conclude that we had reported it. The fact that we manufacture, import, or process this chemical substance for commercial purposes is confidential.
 - C. ☒ This chemical substance is not known to exist. If our competitors knew that this chemical substance does exist and that it is manufactured, imported, or processed for commercial purposes, it would show them that the chemical substance has commercial potential and might lead them into research concerning its use. No one knows that this chemical substance has commercial possibilities except us to the best of our knowledge.
2. By checking the box under "Manufacture" for a particular chemical substance, I assert that the fact that we manufacture the chemical substance at the plant site identified in block III is confidential for commercial purposes is confidential.
3. By checking the box under "Process" for a particular chemical substance, I assert that the fact that we process the chemical substance at the plant site identified in block III for commercial purposes is confidential.
4. By checking the box under "Import" for a particular chemical substance, I assert that the fact that we import the chemical substance for commercial purposes is confidential.
5. By checking the box under "Site-Limited" for a particular chemical substance, I assert that the fact that the chemical substance is not distributed for commercial purposes outside of the manufacturing site identified in block III is confidential.
6. By checking the box under "Production Volume" for a particular chemical substance, I assert that the production volume of the chemical substance for the plant site identified in block III is confidential.
7. By checking the box under "Corporation" for a particular chemical substance, I assert that the link of this chemical substance to the corporation identified in block III is confidential because the corporation is not known to the public as a manufacturer, importer, or processor of this particular chemical substance for commercial purposes.
8. By checking box under "Plant Site" for a particular chemical substance, I assert that the link of this chemical substance to the plant site identified in block III is confidential because it is not known to the public that the particular chemical substance is manufactured, imported, or processed for commercial purposes at this particular plant site.

General Statement

For ALL of the claims I have asserted by checking any of the boxes under "Confidentiality Claims" or the box entitled "Chemical Identity" the following statements are true:

1. We have taken reasonable measures to protect the confidentiality of the information, and we intend to continue to take such measures.
2. The information is not, and has not been, reasonably obtainable without our consent by other persons (other than governmental bodies) by use of legitimate means (other than discovery based on a showing of special need in a judicial or quasi-judicial proceeding).
3. The information is not publicly available elsewhere.
4. Disclosure of the information would cause substantial harm to our competitive position.

PROPOSED RULES

U.S. Environmental Protection Agency
Voluntary Product Trademark Report
(In conjunction with the Toxic Substances Control Act
Chemical Substance Inventory Reporting)Instructions
Form D: Product Trademarks

Form D may be used by manufacturers and importers of trademarked products to report their product trademarks. If such products contain chemical substances which are permitted to be reported for the Toxic Substances Control Act (TSCA), Section 8(a) and Section 8(b) Chemical Substance Inventory by the inventory reporting regulations (40 CFR 710), the manufacturer or importer must certify that those chemical substances have been reported. Form D may not be used to report chemical substances. Chemical substances must be reported using Chemical Substance Inventory Report Forms A, B, or C, whichever is applicable.

From reports voluntarily submitted using Form D, EPA will compile and publish a Product Trademark List in conjunction with the TSCA Chemical Substance Inventory. The list will serve primarily two purposes. First, it will allow manufacturers and importers of trademarked products to assure customers that all reportable chemical substances contained in their products appear in the TSCA Chemical Substance Inventory. Second, processors and users, who may add chemical substances to the inventory during a special 120-day reporting period following its publication, will be able to consult both the Inventory and the Product Trademark List to determine if the chemical substances they process or use have been reported.

Before completing this form, carefully read the inventory reporting regulations as published final in the FEDERAL REGISTER and which also appear in the Code of Federal Regulations, Chapter 40, Part 710 (40 CFR 710). After completing and signing this form, retain the last copy and send the remainder to:

U.S. Environmental Protection Agency
Office of Toxic Substances
P.O. Box
Columbus, Ohio 43210

EPA will acknowledge receipt of the form to the addressee identified in block II of the form.

TYPE OR USE A BLACK BALL POINT PEN (Press Firmly).

BLOCK I. CERTIFICATION STATEMENT AND SIGNATURE:

The certification statement must be signed by a person authorized by the company to sign official documents for the company. By signing the statement, you certify for each product trademark listed in block IV that all chemical substances permitted to be reported under the Toxic Substances Control Act Section 8(b) inventory reporting regulation (40 CFR 710) which comprise that trademarked product have been reported by someone for inclusion on the Chemical Substance Inventory.

BLOCK II. CORPORATE NAME AND ADDRESS:

Enter the complete name and address of the domestic corporation which manufactures or imports the trademarked products. For unincorporated entities, enter the company name and address.

BLOCK III. PRINCIPAL TECHNICAL CONTACT(S):

Enter the name, address, and telephone number (including area code) of the person(s) whom EPA may contact for clarification of information submitted on this form.

BLOCK IV. PRODUCT TRADEMARKS:

List the trademarks for products which you manufacture or import. Trademarks which cover a line of products may be listed in aggregated form if the certification statement is true for all products within that line.

PROGRAMS AND
COMMISSIONER'S
DISCRETIONARY
PROGRAMS

For submission to the Federal Register

[4110-02]

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION,
DEPARTMENT OF HEALTH, EDUCA-
TION, AND WELFARESTATE ADMINISTERED PROGRAMS AND
COMMISSIONER'S DISCRETIONARY
PROGRAMS

AGENCY: Office of Education, HEW.

ACTION: Final regulations.

SUMMARY: These regulations implement the Vocational Education Act of 1963 as completely revised by the Education Amendments of 1976. The regulations cover both the State administered programs and the Commissioner's discretionary programs. Generally, the regulations are designed to assist States to improve planning in the use of all resources for vocational education and to overcome sex discrimination in vocational education. Also, the regulations permit consolidation of programs to provide greater flexibility to the States in conducting vocational education programs.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232 (d)), these regulations have been transmitted to the Congress concurrently with their publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

FOR FURTHER INFORMATION CON-
TACT:

Ms. Juliette Lester, Chair of the Regulations Task Force, Bureau of Occupational and Adult Education, Room 5002, Regional Office Building No. 3, 7th and D Streets SW., Washington, D.C. 20202 (202-245-3465).

SUPPLEMENTARY INFORMATION:

RULEMAKING HISTORY

The Office of Education has been vitally concerned about the need for intensive public participation in the development of these regulations because of the substantial impact Pub. L. 94-482 will have on the administration and operation of vocational education programs throughout the nation. The major steps and activities involved in carrying out these public participation objectives are set forth below.

After the Act was passed the Commissioner published in the FEDERAL REGISTER (41 FR 49742) a Notice of Intent to Issue Regulations (NOI) on November 10, 1976. This NOI contained a comprehensive overview of the Act and set forth fifteen substantive issues needing clarification in the regulations. After publication of the

NOI, a 65-day comment period followed, during which public comment was solicited. Between November 22, 1976 and January 15, 1977, public meetings were held in each State to discuss the issues raised in the NOI and any other relevant issues. Approximately 6,000 people attended these 66 meetings. Also, during this 65-day comment period, over 600 letters and telephone calls were received in response to the NOI from a wide variety of commenters. At the end of this initial comment period, all comments and suggestions received were analyzed and the proposed regulations were drafted to reflect this public participation.

The Notice of Proposed Rulemaking (NPRM) was published in the FEDERAL REGISTER at 42 FR 16542 on April 7, 1977. In addition to the proposed regulations, the NPRM also contained in the preamble an overview of the regulations. A 30-day comment period followed publication of the NPRM. A press release from the Office of Education was sent to approximately 450 local organizations and newspapers announcing the publication of the NPRM and the schedule for the public meetings. Public meetings were conducted in the ten HEW regional cities from April 20 through April 29. Letters of invitation were sent to approximately 10,000 individuals and organizations. Educators, administrators, consumers of the program, and members of the general public attended these meetings and presented formal statements. In addition, almost 700 letters were received containing comments, criticisms, recommendations, and questions on nearly every section of the proposed regulations. These comments came from diverse groups and individuals, including State and local educators and administrators, women's groups, and a large number of vocational students and teachers. This massive amount of public input was analyzed during the development of the final regulations. A summary of the comments received and the responses to these comments are set forth in this preamble.

Although the final regulations have been significantly affected by intense public involvement, the Office of Education sees the development of regulations implementing the Vocational Education Act as being an evolutionary process which will continue over a period of several years. The actual impact and consequences of the statutory provisions and problems which States and local educational agencies may have in implementing these provisions are not known at the present time. Therefore, the public is encouraged to continue to submit their views on these regulations, and the Office of Education will amend and revise the regulations in the future as need and experience dictate.

OVERVIEW OF THE REGULATIONS

PART 104—STATE ADMINISTERED PROGRAMS
STATE ADMINISTRATION

Any State which desires to receive funds under the Act must designate a State board to be the sole State agency

responsible for the administration of programs under the Act (§ 104.31). This board may delegate any of its responsibilities (§ 104.33) except those listed in § 104.32 (a) to (d). The State must also assign full-time personnel to assist in reducing sex discrimination and sex stereotyping in vocational education programs and activities throughout the State (§ 104.72). Each State is to expend \$50,000 from the basic grant for this purpose (§ 104.74).

Each State must establish a State advisory council representing at least 20 designated interests (§ 104.92). There must be an appropriate representation by sex, race, ethnicity, and geography on the council to effectively reflect the diverse interests and needs of the general public (§ 104.92(b)). The functions and responsibilities of the State advisory council are expanded to include identifying manpower as well as vocational needs, commenting on the reports of the State Manpower Services Council, and providing technical assistance to local advisory councils (§ 104.93). The expenditure of funds made available to the council is to be determined solely by the council for carrying out its functions (§ 104.96).

Each local educational agency (LEA) and postsecondary institution receiving Vocational Education Act (VEA) funds through the State board must establish a local advisory council composed of members of the general public to provide advice on job needs and relevancy of courses to those needs (§ 104.111).

Each State must also establish a State Occupational Information Coordinating Committee (SOICC) (§ 104.122). This SOICC must implement an occupational information system in the State which will meet the common needs for the planning for, and operation of, programs of the State board and of the administering agencies under the Comprehensive Employment and Training Act (§ 104.123).

PLANNING

To be eligible to receive funds, a State must maintain on file with the Commissioner a general application containing twelve assurances covering a broad range of administrative and fiscal matters (§ 104.141). This application includes the assurance that the State will give priority, in distributing funds, to (1) economically depressed areas and areas with high unemployment rates which are unable to meet the vocational needs of these areas without Federal assistance, and to (2) programs which are new to the areas to be served and which meet new and emerging manpower needs. The State must also use as the two most important factors in distributing funds to local educational agencies (1) the relative financial ability to provide needed services and (2) the relative concentration of low-income populations within such agencies. In the case of other eligible recipients, the State must use, as the two most important factors, the recipient's relative financial ability to provide needed services and the relative concentration of students it serves who impose

higher than average costs (e.g. handicapped, disadvantaged, those with limited English-speaking ability).

The State must submit to the Commissioner a five-year State plan by July 1, 1977 for fiscal years 1978 through 1982 and a second five-year State plan on July 1, 1982 for fiscal years 1983 through 1987 (§ 104.161).

In formulating the plan, the State board is to involve actively a representative of the State agencies for secondary education, postsecondary vocational education, community and junior colleges, and institutions of higher education. The State board must also involve representatives from local school boards, vocational teachers, local school administrators, the State Manpower Services Council, the State agency for Comprehensive Postsecondary Education Planning, and the State advisory council (§ 104.162). The State board and these designated representatives must meet at least four times during the planning year (§ 104.163). If these representatives are not able to agree on the contents of the State plan, the State board is responsible for reaching a final decision (§ 104.164). In this event, the State board must include in the plan the recommendations rejected by the State board and the reason for each rejection. Any dissatisfied agency may appeal the State board's decision to the Commissioner (§ 104.281). The Commissioner will then decide whether that State plan is supported by substantial evidence, as shown in the State plan, and will best carry out the purposes of the Act (§ 104.288).

The five-year State plan must contain the procedures for carrying out certain assurances of the general application (§ 104.182) and the specific program provisions described in § 104.183 through § 104.188. These provisions include an assessment of employment opportunities in the State (§ 104.183), the goals the State will seek to meet employment needs (§ 104.184), the planned funding to meet employment needs (§ 104.185), the intended uses of funds to meet specific program needs (§ 104.186), the policies adopted by the State to eradicate sex discrimination (§ 104.187), and a description of the mechanism established for coordination between manpower training programs and vocational education programs (§ 104.188).

The planning process also includes the submission of an annual program plan (§ 104.202) and annual accountability report (§ 104.203). The procedural requirements for developing the five-year plan are also applicable to the annual plan and accountability report but the number of required planning meetings is reduced to three (§ 104.205).

Even though the annual plan is essentially an updating of the five-year plan, it must contain the proposed distribution of funds among eligible recipients. The additional requirements of the annual plan are described in §§ 104.221 and 104.222. The content of the annual accountability report is described in § 104.241.

FISCAL REQUIREMENTS

Federal VEA funds must be used to share only in expenditures which are made in accordance with the assurances of the general application, five-year State plan and annual program plan (§ 104.301). The Federal share of expenditures under the five-year State plan and annual program plan may not exceed 50 percent of the cost of carrying out the programs (§ 104.302).

The fiscal requirements for allowable expenditures for the national priority programs are described in § 104.304. At least 10 percent of the State's allotment under section 102(a) of the Act is to be used to pay up to 50 percent of the costs of special programs, services, and activities for the handicapped (§ 104.312); at least 20 percent of the State's allotment under section 102(a) of the Act is to be used to pay up to 50 percent of the costs of special programs, services, and activities for the disadvantaged, for persons with limited English-speaking ability and for stipends for students with acute economic needs which cannot be met under other programs (§ 104.313); and at least 15 percent to pay up to 50 percent of the cost of postsecondary and adult programs, services, and activities (§ 104.314). The percentage of the 20 percent set-aside which goes to persons with limited English-speaking ability is equivalent to the proportion such persons age 15-24 are to the entire population of the State in the same age bracket (§ 104.313).

The Federal share for State administration of the five-year State plan and annual program plan, from funds allotted to the State under section 102(a) of the Act, is up to 50 percent of the cost of administration of the plans (§ 104.306). The Federal share in fiscal year 1978 is up to 80 percent and in fiscal year 1979 the Federal share is up to 60 percent. The Federal share for the cost of local supervision and administration from funds available under section 102(a) must be computed in accordance with either of the two methods set forth in § 104.307.

STATE EVALUATION

Each State must evaluate the effectiveness of each funded program within a five-year period (§ 104.402). These evaluations must be in terms of the planning and operational processes, results of student achievement, results of student employment success and results of additional services that the State provides under the Act of special populations (§ 104.402). Programs which purport to impart entry level job skills are to be evaluated according to the extent to which program completers and leavers find employment in related occupations and are considered well-trained by their employers (§ 104.404).

BASIC GRANT

Each State shall use its basic grant, which is 80 percent of the funds allotted under section 102(a) of the Act, for the purposes described in § 104.502. These purposes include vocational education

programs, work-study programs, cooperative vocational programs, energy education programs, construction of area vocational education facilities, support of full-time personnel to eliminate sex bias, stipends for students who have acute economic needs which cannot be met by other programs, placement services for students whose needs cannot be met by other programs, industrial arts programs, support services for women who enter programs designed to prepare individuals for programs traditionally limited to men, day care services for children of persons enrolled in vocational schools, construction and operation of residential vocational schools, provision of vocational training through arrangements with private vocational training institutions and State and local administration. The scope and specific program requirements of each purpose are set forth in §§ 104.511 through 104.634. This extensive list of programs, activities, and services has been consolidated into a single basic grant to allow the States to determine their own priorities for funding.

PROGRAM IMPROVEMENT AND SUPPORTIVE
SERVICES

The State must use 20 percent of its allotment under section 102(a) of the Act for Subpart 3—program improvement and supportive services (§ 104.701). Under program improvement and supportive services, funds may be used for research programs (§ 104.705), exemplary and innovative programs (§ 104.706), and curriculum development programs (§ 104.708). These programs are to be operated by research coordinating units (RCU) or are to be conducted by contracts awarded by the RCU (§ 104.703). The State must develop a comprehensive plan of program improvement which includes the intended uses of funds and a description of the State's priorities. The pertinent contract requirements for research programs and for curriculum programs are described in § 104.704. Exemplary and innovative programs must give priority to reducing sex bias and sex stereotyping in vocational education (§ 104.706).

Not less than 20 percent of the funds reserved for program improvement and supportive services are to be used for guidance and counseling services which may include initiation and improvement of counseling services, counseling leading to greater understanding of educational and vocational options, provision of placement and follow-up services for vocational students and individuals preparing for occupations requiring a baccalaureate or higher degree, training to help overcome sex-biased counseling, counseling in correctional institutions, counseling for persons of limited English-speaking ability, resource centers for out-of-school individuals, and leadership for guidance and counseling personnel (§ 104.763).

The State may also use part of the funds reserved for program improvement and supportive services for vocational education personnel training (§ 104.771). Training may be provided to

persons serving or preparing to serve in vocational education programs, including teachers, administrators, supervisors, and vocational guidance and counseling personnel (§ 104.773).

Funds under program improvement and supportive services may also be used for grants to overcome sex bias and sex stereotyping (§ 104.791). The purpose of these grants is to support activities which show promise of overcoming sex bias and sex stereotyping in vocational education and may be in the areas of research, curriculum development, or guidance and counseling (§ 104.793).

The State may also use part of the funds reserved for program improvement and support services for State and local administration (§§ 104.306 and 104.307).

SPECIAL PROGRAMS FOR THE DISADVANTAGED

Each State must use the funds allotted to it from the authorization under section 102(b) of the Act for special programs of vocational education for disadvantaged persons in areas of high youth unemployment or school dropouts (§ 104.802). The criteria of need and eligibility for disadvantaged persons are described in § 104.804. These projects for the disadvantaged may receive up to 100 percent Federal support (§ 104.802).

CONSUMER AND HOMEMAKING

The State must also use the funds allotted to it from the authorization under section 102(c) of the Act for programs of consumer and homemaking education (§ 104.901). The Federal share is 50 percent except in economically depressed areas where the Federal share is 90 percent (§ 104.906). One-third of the separate authorization is for economically depressed areas. Grants may be used for (1) educational programs that encourage males and females to prepare for combining homemaking and wage earning roles, develop curriculum materials which encourage elimination of sex stereotyping, give greater consideration to needs in economically depressed areas, encourage outreach programs, prepare persons for the homemaker role, emphasize consumer, nutrition, and parenthood education (§ 104.904) and (2) for ancillary services (§ 104.905).

An appendix containing definitions is added at the end of Part 105.

PART 105—COMMISSIONER'S DISCRETIONARY PROGRAMS PROGRAM IMPROVEMENT

Under this subpart the Commissioner is authorized to support projects of national significance for improvement of vocational education primarily through contracts and, in some cases, through grants (§ 105.101). The Commissioner may fund up to 100 percent of the cost of the following types of activities if they are found to be of national significance: (a) Research projects; (b) exemplary and innovative projects; (c) vocational curriculum development projects; (d) vocational guidance and counseling programs; (e) vocational education personnel training programs; and

(f) grants to assist in overcoming sex bias and sex stereotyping (§ 105.104).

A grant applicant must be able to demonstrate a reasonable probability that the project will result in improved teaching techniques or curriculum materials that will be used in a substantial number of classrooms or other learning situations within five years after the termination date. Exemplary and innovative projects must provide for appropriate participation by nonprofit private school children (§ 105.109). Activities funded shall include contracts to convert job preparation curriculums prepared for use by the armed services to curriculums usable by the schools (§ 105.103).

CONTRACT PROGRAM FOR INDIAN TRIBES

The Commissioner will enter into contracts with Indian tribal organizations at the request of Indian tribes to plan, conduct, and administer programs which are consistent with the Act and regulations (§ 105.201). The sections of the Indian Self-Determination and Education Assistance Act of 1975 which are applicable are set forth in § 105.202. The criteria for the selection of award recipients are in § 105.211. Additional factors for declining to enter into a contract are listed in § 105.212.

TRAINING AND DEVELOPMENT PROGRAMS FOR VOCATIONAL EDUCATION PROGRAMS FOR VOCATIONAL EDUCATION PERSONNEL

The Commissioner is to provide opportunities for full-time advanced study of vocational education, opportunities for certified teachers in other fields to become vocational education teachers, and opportunities for persons in industry with skills in fields for which there is a need for vocational educators to be so trained (§§ 105.302 and 105.431). Persons having two years of experience in vocational education or in comparable types of situations and who have a baccalaureate degree may receive awards for use at the graduate level, in approved institutions of higher education (§ 105.304). Persons certified to teach in any field who have applicable vocational skills or persons employed in industry with similar skills may receive awards for use in approved teacher-training institutions (§ 105.311). The criteria for approving applications for leadership development awards are in § 105.309. The criteria for approving applications for certification fellowships are in § 105.443.

EMERGENCY ASSISTANCE FOR REMODELING AND RENOVATING OF VOCATIONAL EDUCATION FACILITIES

The Commissioner will make grants to urban and rural local educational agencies which are unable to provide vocational programs to meet existing manpower needs because of the obsolescence of their facilities or equipment (§ 105.501). Grants may be used to support 75 percent of the cost of modernizing such facilities (100 percent in cases of extreme need) and the cost of changes necessary to comply with the Architectural Barriers Act (§ 105.506). The criteria for approving applications are set forth in § 105.505.

BILINGUAL VOCATIONAL TRAINING

The Commissioner will make grants to support bilingual vocational training programs (§ 105.601), bilingual vocational instructor training programs (§ 105.611), and programs for the development of bilingual instructional materials (§ 105.621). The criteria to be used in reviewing applications for these three programs are set forth in §§ 105.606, 105.616, and 105.626 respectively.

TECHNICAL AMENDMENTS

On June 3, 1977, Pub. L. 95-40 was signed into law by the President. This Act makes several technical and miscellaneous amendments to provisions relating to vocational education contained in Title II of the Education Amendments of 1976, Pub. L. 94-482. As a result of the enactment of these Technical Amendments, certain revisions have been made to these final regulations.

In accordance with section 431(b)(2)(A) of the General Education Provisions Act it is the practice of the Office of Education to provide an opportunity for interested parties to take part in its rulemaking process. However, a separate rulemaking procedure on these revisions to the regulations is unnecessary because these revisions to the regulations conform to the language of the Technical Amendments.

Furthermore, a separate rulemaking procedure on the revisions to the regulations would be contrary to the public interest because it would prolong the effective date of the regulations and cause undue delay in the implementation of the vocational education State-administered program. Since the five year State plan and annual program plan are to be effective as of October 1, 1977, it is necessary to have the publication of final regulations at this time.

The amendments contained in Pub. L. 95-40, other than those merely typographical, are briefly summarized in the following paragraphs. (The numbered paragraphs do not correspond to the sequential order of the Technical Amendments.) In each instance in which a conforming change is made in the regulation, a citation to the regulation is given.

1. Use of Federal funds for State administration is deleted from the authorization of section 102(d) and is made an allowable use of funds under the authorization of section 102(a). This amendment has the effect of removing the \$25 million limitation on use of Federal funds for State administration which was contained in section 102(d). Instead, the State now has the flexibility to use whatever amount of Federal funds is necessary for prudent State administration of vocational programs. Federal funds used for State administration, however, must be expended in accordance with the State plan and the matching requirements of section 111(a)(2). In addition, Federal funds used for State administration must be prorated between the amount available for basic grants in subpart 2 (80 percent) and program improvement and support services in sub-

part 3 (20 percent). Although this division will prevent administrative expenses from being disproportionately charged against a single program activity, it is not required that administrative personnel be distributed in an 80/20 ratio between subpart 2 and subpart 3 activities. Rather, the State may distribute its administrative personnel in whatever proportion best meets its needs. Section 104.306 of the NPRM is rewritten to conform to these changes in the Act.

(2) Pub. L. 95-40 permits local administrative and supervisory costs to be paid out of the State's allotment under section 102(a). Federal funds used for local administration must also be prorated between subpart 2 (80 percent) and subpart 3 (20 percent).

Section 111(a)(1)(C) sets forth two methods for computing the Federal share. In the first case, the percentage of Federal funds used by an eligible recipient for the costs of supervision and administration of vocational education programs may be no greater than the percentage of Federal funds used to support the total vocational education program carried out by the eligible recipient. For example, the total cost of the vocational education program of the eligible recipient is \$100,000 and the Federal contribution to this eligible recipient is \$25,000 or 25 percent of the total. If local administrative costs are \$10,000, then up to 25 percent of this amount or \$2,500 may be charged against the Federal funds.

The second method allows up to 50 percent of the costs of supervision and administration to be charged to Federal funds provided that State funds match Federal funds dollar for dollar. State funds used to match Federal funds must be specifically made available for the purpose of local administration. For example, if the total cost of local administration is \$10,000, then up to \$5,000 may be charged to Federal funds as long as the State contributes the same amount from a specific State appropriation.

Both methods for computing local administrative costs are contained in a new regulation, § 104.307.

(3) Section 110 of the Act is amended to allow for the cost of all programs, services, and activities listed in subpart 2 (section 120) and subpart 3 (section 130) to be applied against the minimum percentages for the national priority programs (i.e. handicapped, disadvantaged, and postsecondary). Previously, the cost of vocational education programs as defined in section 195 was the only allowable use of funds to meet the section 110 minimum percentage requirement. In addition, the amendments remove an ambiguity in the Act by applying the three minimum percentages for the national priority programs directly against the section 102(a) authorization. Sections 104.303 and 104.304 are revised to conform to these statutory changes.

(4) Section 120 of the Act is amended to authorize the use of Federal funds

for vocational training through private vocational training institutions. Arrangements may be made with these institutions if they can make a significant contribution to attaining the objectives of the State plan, and can provide substantially equivalent training at a lesser cost, or can provide equipment or services not available in public institutions. The definition of "private vocational training institutions" is added to section 195 of the Act. Sections 104.502 and 104.514 are amended accordingly. The new definition is added to Appendix A to these regulations.

(5) Sections 132 and 133 of the Act are amended to clarify that the State's research coordinating unit shall be responsible for coordinating exemplary and innovative programs (section 132) and curriculum programs (section 133) as well as research programs in section 131.

(6) Substantive changes are made to the section 103(a)(1)(B) responsibilities for the Bureau of Indian Affairs (BIA). First, the amendments require BIA, beginning in fiscal year 1979, to expend an amount which is equal to the amount available to the Commissioner for the Indian contract program for vocational education programs, services, and activities. BIA must expend not less than the amount expended during the prior year on these programs. In addition, the Commissioner of Education and the Commissioner of Indian Affairs will jointly prepare a plan for the expenditure of the funds and for the evaluation of programs assisted under this part. The Commissioner (OE) will assume responsibility for the administration of the program with the assistance and consultation of the Bureau of Indian Affairs. BIA is no longer deemed a State board. Accordingly, the reference in § 105.214 in the NPRM to BIA being deemed a State board is deleted.

(7) The Technical Amendments amend the eligibility provision for Indian tribes to participate in the contract program. Section 103(a)(1)(B) extends the authority of the Commissioner to contract for vocational programs with any Indian tribe which is eligible to contract for administration of programs under the Indian Self-Determination Act, rather than just those tribes which have actually contracted under that Act. The corresponding change is made to § 105.205.

(8) The Amendments include the Northern Mariana Islands as a State for the purpose of the Vocational Education Act and also include the Northern Mariana Islands with the other outlying areas for determination of allotment ratios under the Act.

(9) Section 105(d)(4)(A) is amended to require State advisory councils on vocational education to assess the extent to which special education programs as well as vocational education and manpower programs are meeting the needs of the State. Section 104.93(f) of the regulations is amended to reflect this additional responsibility in relation to special education.

(10) Section 105(f)(1) is amended to require that appropriations for the State advisory councils are to be allocated under the allotment method contained in section 103(a)(2).

(11) The Technical Amendments correct an error in section 111(a)(1)(C) which contains the authority for 100 percent Federal funding. Former references to sections 122(f), 133(b) and 140 are deleted and references to sections 122(f), 132(b) and 140(b)(2) are inserted. The result is that cooperative vocational education programs, exemplary programs, and special programs for the disadvantaged, when they include students from nonprofit private schools, may be supported with up to 100 percent Federal funding. Section 104.305 of the regulations conforms to these amendments.

(12) Section 111(a) of the Act is amended by adding a new subparagraph (3) to clarify the Commissioner's authority to pay, from the amount available to each State under the section 102(d) allotment, an amount up to 100 percent of the cost of planning and evaluation activities authorized under section 102(d).

(13) The section 111(a)(2)(B) provision which allows the Federal share of State administration in fiscal year 1978 to be in excess of 80 percent if the State has over matched the Federal funds by ten to one is amended. The determination year is changed from fiscal year 1977 to the latest fiscal year for which reliable data are available. Section 104.306(c) of the regulations conforms to this amendment.

(14) The noncommingling requirement in the cooperative vocational education program (section 122(g)) is amended in order to clarify that the noncommingling requirement applies only to those funds used for programs involving students in nonprofit private schools. Subsection (e) of the new § 104.533 prohibits the commingling of Federal, State, and local funds for programs which include students enrolled in nonprofit private schools.

(15) The clerical error in the language of section 134(a) concerning the use of funds for the eight guidance and counseling activities is corrected. Whereas the provision previously appeared to require section 134 funds to be used for all eight activities, the correction makes it clear that funding shall be for one or more of these activities.

(16) Section 161(a)(3)(A) is amended by delaying for one year the date the national vocational education data reporting and accounting system is to be in full operation.

(17) The implementation date for the occupational information data system in section 161(b)(1) is delayed for one year to September 30, 1978.

(18) Two changes are made to the section 162 authority governing the National Advisory Council on Vocational Education. First, this section restores the authority to the Council to accept gifts if the acceptance of such gifts will better enable the Council to carry out its func-

tions. Secondly, the section makes clear that the Council is to review special education programs as well as vocational education and manpower programs.

(19) The statutory definition of "handicapped" is amended to conform the definition to that used in the Education of the Handicapped Act. Persons with specific learning disabilities are now included under the definition. Also, the term "orthopedically impaired" is substituted for the term "crippled." Corresponding changes are made to the definition of "handicapped" in Appendix A of the regulations.

(20) Pub. L. 95-40 also amends section 107(b)(4) of the Comprehensive Employment and Training Act of 1973 (CETA). The amendment requires the National Commission on Manpower Policy and the State Manpower Services Councils to review the extent to which special education programs as well as vocational education and manpower programs represent a coordinated approach to the employment and training and vocational education needs of the nation.

(21) Finally, Pub. L. 95-40 makes certain amendments to section 523 of the Education Amendments of 1976. The amendments delay for one year the final submission of the reports by the National Institute of Education and makes the report on consumer and homemaking education submittable on the same date as the report on the regular vocational education program. Also, beginning in fiscal year 1978 the full sum of the reservation of funds in this section will be made available to the National Institute of Education for its studies.

CRITICAL ISSUES

Many comments were submitted on many sections of the proposed regulations. These comments and the responses are set forth following the text of the regulations. Some of the comments raised critical policy issues with respect to the interpretation and implementation of the Act. The critical issues are briefly summarized in the following paragraphs.

1. FUNDING FORMULA FOR THE LIMITED ENGLISH-SPEAKING ABILITY POPULATION

Section 110(b)(2) of the Act requires each State to compute the amount of funds for persons with limited English-speaking ability from the "funds used by a State pursuant to section 110(b)(1)." Section 110(b)(1) directs the State to use at least 20 percent of the allotment under section 102(a) for the cost of vocational education for disadvantaged persons, for persons of limited English-speaking ability and for stipends.

The interpretation contained in the NPRM was for the State to apply the percentage of persons of limited English-speaking ability to the amount of the set-aside. For example, if the limited English-speaking population of the State is 10 percent, then 10 percent of the 20-percent set-aside (2 percent of the section 102(a) allotment) would be earmarked for persons of limited English-speaking ability.

Another legally supportable interpretation which would result in a significant change in the method by which Federal funds are distributed by the States to disadvantaged persons was given serious consideration by the Commissioner during the comment period. Under this interpretation, the State would apply the percentage of persons of limited English-speaking ability to the entire allotment under section 102(a), but such amount could not exceed the total amount reserved for the section 110(b)(1) set-aside. In accordance with this interpretation, if the limited English-speaking population of the State is 10 percent, then 10 percent of the entire allotment (rather than 10 percent of the set-aside) would be earmarked for the limited English-speaking population.

Since the Act is susceptible of two interpretations, the Commissioner has decided to retain the interpretation contained in the NPRM, set forth in § 104.313(c). The Commissioner believes that the adoption of the latter interpretation would place drastic limitations on funds available for other disadvantaged students' needs and would substantially undermine many on-going vocational education programs for disadvantaged persons.

2. EXCESS COSTS OF VOCATIONAL EDUCATION PROGRAMS FOR HANDICAPPED AND DISADVANTAGED PERSONS

Section 110(a) of the Act requires each State to expend at least 10 percent of its allotment under section 102(a) for the "cost of vocational education for handicapped persons." Section 110(b) requires at least 20 percent of the allotment under section 102(a) to be expended for the "cost of vocational education for disadvantaged persons."

The statutory language "cost of vocational education," in sections 110(a) and 110(b) was interpreted in the NPRM to mean "full cost." It was stated in the preamble at 42 FR 18549 that, as long as the State complies with the matching requirements in section 110 of the Act, the State could use the combined Federal, State, and local funds to pay the entire cost of the vocational education program for handicapped and disadvantaged persons. In other words, Federal funds for vocational education programs for handicapped and disadvantaged persons were not limited solely to the cost of special services needed by the handicapped and disadvantaged.

Many commenters believed that the interpretation contained in the NPRM was a serious misreading of Congressional intent. According to these commenters, unless the Federal and matching State and local funds were used to pay the excess costs of necessary program modifications, supplementary services or special programs for handicapped and disadvantaged persons, funds available to accommodate these special populations would be greatly reduced. These commenters suggested that the statutory language "cost of vocational education" must be read in the context of the definitions of "handicapped" and disadvan-

tagged" which emphasize the special services which are needed to enable handicapped and disadvantaged persons to take full advantage of the vocational education program.

The Commissioner agrees that paragraphs (a) and (b) of section 110 are susceptible of the interpretation proffered by these commenters. Since a reduction in services for handicapped and disadvantaged persons might result by charging the full cost of the vocational education program against the required minimum, the comments in support of charging the excess costs are accepted. Accordingly, § 104.303 of the regulations is amended to require the Federal and matching State and local funds to be used to pay only the "excess costs" (that is, the costs of special education and related services above the costs of the regular students) of the programs for the handicapped and disadvantaged. For example, if the cost of providing vocational training to the non-handicapped student is \$600, and the cost of providing vocational training to the handicapped student in the same class is \$750, the State may use the combined Federal, State, and local funds to pay only the incremental cost of \$150 for the vocational education program for the handicapped student.

Alternatively, if the handicapped or disadvantaged student is placed in a separate program, Federal, State and local funds may only be used to pay those costs which exceed the average per pupil cost for vocational education for non-handicapped or non-disadvantaged students.

3. PROVIDING DATA BY "PROGRAMS" RATHER THAN "COURSES"

Section 104.184(a) of the NPRM contained a requirement that the five-year State plan describe the State's goals in terms of the "programs (courses) and other training opportunities to be offered to meet employment needs." "Program" is defined as a "planned sequence of courses, services, or activities designed to meet an occupational objective." Since the Act uses the term "courses," there has been considerable debate during the development of the regulations over which term, "program," or "course" carries the proper interpretation in line with Congressional intent.

The major difficulty in changing from "programs" to "courses" in the final regulations is that it would create an undue reporting burden on the States and would greatly increase paperwork. Another problem is that "course" has no standard definition throughout the States, while "program" is specifically defined by the Office of Education in Handbook VI, entitled "Standard Terminology for Curriculum and Instruction in Local and State School Systems" (1970), which currently provides for reporting on at least 160 designated programs. Educators are familiar with OE's list of "instructional programs." The definitions are used by all States. Data by "courses" would be very difficult to obtain since all reporting presently is in

terms of "programs." Definitions of "courses" vary from State to State and within a particular State. Since "course" is not a standardized term, aggregation of data would be virtually impossible.

In view of these difficulties, reporting data by programs rather than by courses should provide sufficient detail in the five-year State plan to meet the intent of the law adequately. Accordingly, the text of the final regulation has not been changed.

4. DEFINITIONS OF "ADULT PROGRAM" AND "POSTSECONDARY PROGRAM"

A great many comments were received in relation to the definitions of "adult program" and "postsecondary program" as they appeared in the Appendix to Part 104 in the Notice of Proposed Rulemaking. These comments objected to the definitions on three grounds:

(1) The definitions are not contained in the Act;

(2) They would jeopardize the student's eligibility for a Basic Educational Opportunity Grant (BEOG) or a College Work Study (CWS) grant; and

(3) They would "eliminate" post-high school programs in vocational and technical schools.

While it is true that the definitions, labeled as such, are not in the new Act, the language of the two definitions as set forth in Appendix A is taken directly from section 110(c) of the Act, which requires the State to set aside 15 percent of its basic grant for persons in two categories of programs. While these two categories of persons are not labeled in section 110(c) as "adult" or "postsecondary," they are so labeled in the legislative history of the Act (H. Rept. No. 94-1085, pp. 48-49) which indicates strong Congressional intent that the definitions be used to avoid the "enormous confusion" which has existed in reporting adult and postsecondary programs and that "a majority of the States urged Congress to clarify these definitions."

Further study has indicated clearly that the definitions of "adult program" and "postsecondary program" will not affect a student's eligibility for a BEOG or CWS grant. Eligibility for grants under those programs is dependent on the Act and regulations for the particular program; they are not affected by definitions in the new Vocational Education Act or the regulations under the Act.

The definitions are intended, as the legislative history makes clear, for reporting (in the annual program plan and accountability report) and not for allocation purposes. Section 110(c) of the new Act, which uses the definitions, requires a set-aside of 15 percent for both categories; it does not require any specific apportionment between the two categories. Since a State may apportion its 15 percent set-aside between adult and postsecondary programs according to its decision as set forth in its State plan, the definitions as used in the Appendix to Part 104 will not "eliminate" any program at the post-high school level in a vocational and technical school. Nor should the definition in

any way encourage States to favor post-high school level programs in community or junior colleges (which lead to an associate or other degree) over those in vocational and technical schools (which lead to a certificate). While some commenters suggested that post-high school programs leading to a certificate should be added to the definition of "postsecondary program," the legislative history is clear (H. Rept. No. 94-1085, bottom of page 48 and top of page 49), that such programs are to be considered for reporting purposes as adult programs.

5. EQUAL ACCESS FOR MINORITIES AND WOMEN

With respect to the policies and procedures that assure equal access for minorities and women, the question was posed whether the Office of Education will require more than a simple "we will not discriminate" statement in the five-year State plan.

Section 107(b)(4)(A) of the Act and § 104.187(a) of the regulations require the State to set forth a detailed description of the policies and procedures to assure equal access to programs by women and men. This description must include the specific actions taken to overcome sex discrimination and the incentives adopted to encourage enrollment of both women and men in nontraditional courses. A perfunctory statement in the five-year State plan that "we will not discriminate" will not satisfy this requirement in the Act and regulations.

The issue of equal access for minorities is not specifically addressed in the Vocational Education Act. Federal financial assistance under the Act, however, is subject to the regulations in 45 CFR Part 80 which effectuate the provisions of Title VI of the Civil Rights Act of 1964. These civil rights requirements are referenced in 45 CFR 100b.252 of the General Education Provisions Regulations and have a direct application to the vocational education regulations. In this connection, it is expected that the Office of Civil Rights will review the five-year plan and annual program plan for civil rights compliance, particularly in the program areas serving women, minorities, and the handicapped.

EXPLANATION OF THE DOCUMENT

SELF-CONTAINED DOCUMENT

The regulations are designed as a self-contained document, making it unnecessary to refer constantly to the Act. Accordingly, the regulations repeat all essential requirements of the Act so that the States, local educational agencies, and other eligible recipients under the State administered program (45 CFR Part 104) and all eligible applicants under the Commissioner's discretionary programs (45 CFR Part 105) may, in general, rely on the regulations without reference to the Act.

Reference to the General Education Provisions Act (GEPA) and the General Education Provisions Regulations (GEPR) will, however, be necessary. In particular, the civil rights requirements referenced in the General Education

Provisions Regulations (45 CFR 100a.262 and 45 CFR 100b.262) have a direct application to Part 104 and Part 105. In addition, Federal financial assistance under the Vocational Education Act is subject to the regulations in 45 CFR Part 80 (which effectuate the provisions of Title VI of the Civil Rights Act of 1964), the regulation in 45 CFR Part 84 (which effectuate Section 504 of the Rehabilitation Act of 1973), and to the regulations in 45 CFR Part 86 (which effectuate the provisions of Title IX). Title IX provides that no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. To repeat these civil rights requirements, as well as the requirements of the General Education Provisions Regulations, in Part 104 and Part 105 would defeat the express purpose of the General Education Provisions Regulations, which is to publish in one place regulations which affect the various education programs generally.

TERMINOLOGY

To make reading and understanding of the regulations easier, the new Vocational Education Act is referred to simply as "the Act." Sections of the Act are referred to in the text, for example, as "section 101 of the Act." A section of the regulations is referred to, for example, as "§ 104.101" with use of the section symbol (§). The phrase "of these regulations" is not repeated. Thus a reference to "section 101" should be recognized as a reference to section 101 of the Act; a reference to "§ 104.101" is a reference to § 104.101 of the regulations.

To make the regulations more readable (and at the same time shorter) Acts or regulations which are frequently mentioned are referred to by their acronyms, "CETA," "GEPA," "GEPR," for example. The Department of Health, Education, and Welfare is "HEW." If an acronym is used, it is defined in the definitions or the text.

CITATION TO LEGAL AUTHORITY

As required by section 431(a) of the General Education Provisions Act (20 U.S.C. 1232(a)), a citation to the statutory or other legal authority for each provision of the regulations has been placed in parentheses on the line immediately following the text of the regulation. Each citation applies to the text of the regulations between that citation and the next preceding citation.

Citation is to the Vocational Education Act of 1963, as amended by Title II of the Education Amendments of 1976 (Pub. L. 94-482), as further amended by Pub. L. 95-40, unless otherwise noted. Citation to another act refers to the other act by name or other designation. For example, "section 434 of GEPA" is a citation to section 434 of the General Education Provisions Act. Citation to the United States Code, for example "(20 U.S.C. 2301)," generally follows a citation to a section of the Act.

It is important to note that a citation standing alone means that the regulation closely follows the section of the Act cited, with only minor editorial simplification. Where language is added in the regulation in order to interpret the Act, the citation reads "(Interprets Sec. ----)." Where the regulation implements the Act, such as when criteria are set forth, the citation reads "(Implements Sec. ----)."

INTERNAL FEDERAL MATTERS NOT REGULATED

The requirements of the Act relating to matters of internal Federal administration are not set forth in the regulations. For example, these regulations do not repeat the statutory requirement that the President appoint members of the National Advisory Council on Vocational Education (section 163 of the Act). Likewise, the regulations do not address the following: (a) The establishment and duties of the Bureau of Occupational and Adult Education (section 160 of the Act); (b) the requirement that the Commissioner make findings and suggestions in relation to State plans (section 112(a)(1) of the Act); (c) the requirement that the Bureau of Occupational and Adult Education (BOAE) review and analyze the programs in at least 10 States a year (section 112(a)(2) of the Act); (d) the requirement that the HEW Audit Agency conduct fiscal audits within the same States in which BOAE conducts its reviews (section 112(a)(2) of the Act); (e) the requirement that the Commissioner file an annual report with Congress (section 112(c) of the Act); and (f) the duties of the National Occupational Information Coordinating Committee (section 161(b) of the Act).

To conclude, in general terms, matters of internal Federal administration appearing in the Act under "Federal and State Evaluation" (section 112 of the Act) and "Federal Administration" (sections 160-162 of the Act) are not set forth in the regulations.

The Act provides for appeal to the United States Court of Appeals in several instances, including an appeal from the Commissioner's findings of noncompliance with the State plan (section 109(d)). Since an appeal to the courts is a legal matter to be handled by attorneys, the procedures for appeal set forth in the Act are not repeated in the regulations.

The Commissioner's delegations of authority are not set forth in the regulations. Hence, when the regulations say "the Commissioner" will perform a function, the Commissioner's authority to perform this function may have been delegated to another official in the Office of Education.

Appendix A, containing definitions of terms, is set forth following the text of the regulations for Parts 104 and 105. Appendix B contains questions and answers raised by interested persons with respect to the implementation of the

Act. These questions raised important policy considerations and have legal significance. Following Appendix B, the comments, suggestions, and recommendations received during the rulemaking period and the responses to these comments are set forth as supplementary information.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: August 18, 1977.

JOHN ELLIS,
Acting Commissioner
of Education.

Approved: September 26, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education,
and Welfare.

(Catalog of Federal Domestic Assistance Program Nos. 13.493 Vocational Education—Basic Grants; 13.494 Consumer and Homemaking; 13.495 Program Improvement and Supportive Services; 13.498 Program Improvement Projects; 13.499 Special Needs; 13.500 State Advisory Councils; 13.503 Training and Development Awards for Vocational Education Personnel—Leadership Development Awards; 13.558 Bilingual Vocational Training; 13.566 Bilingual Vocational Instructor Training; 13.587 Bilingual Vocational Instructional Materials, Methods, and Techniques; 13.588 Vocational Education Contract Program for Indian Tribes and Indian Organizations; (to be assigned), Training and Development Awards for Vocational Education Personnel—Vocational Education Certification Fellowships.)

PART 100a—DIRECT PROJECT GRANT AND CONTRACT PROGRAMS

1. In part 100a, § 100a.10(a)(11) and § 100a.10(a)(26) (relating to programs under the Education Professions Development Act) are amended to read as follows:

§ 100a.10 Scope.

(a) *

(11) Programs of contracts with Indian tribal organizations under section 103(A)(1)(B), programs of national significance under sections 171 and 172 of subpart 2 of Part B; programs of bilingual vocational training under sections 181-189B of subpart 3 of Part B; and programs of emergency assistance for remodeling and renovation of vocational education facilities under sections 191-194 of subpart 4 of Part B, of Title I of the Vocational Education Act of 1963, as amended by section 202 of Pub. L. 94-482 (20 U.S.C. 2303(a)(1)(B), 2401, 2402; 2411-2421; 2411-2444).

•

(26) Teacher Corps and Teacher Training Programs under Title V of the Higher Education Act of 1965, as amended by sections 151-153 of Pub. L. 94-482 (20 U.S.C. 1102-1104, 1119-1119a-1).

•

PART 100b—STATE ADMINISTERED PROGRAMS

2. In Part 100b, § 100b.10(f) is amended to read as follows:

§ 100b.10 Scope.

(f) State vocational education programs under sections 101-150 of Part A of Title I of the Vocational Education Act of 1963, as amended (20 U.S.C. 2301-2380).

PART 100c—INDIRECT COSTS UNDER CERTAIN PROGRAMS

3. In Part 100c, § 100c.1(f) is amended to read as follows:

§ 100c.1 Scope.

(f) State vocational education programs under sections 101-150 of Part A of Title I of the Vocational Education Act of 1963, as amended (20 U.S.C. 2301-2380).

4. New Parts 104 and 105 are added to read as follows:

PART 104—STATE VOCATIONAL EDUCATION PROGRAMS

Subpart 1—State Administration

Sec. 104.1 Scope.
104.2 Purpose.
104.3 Applicability of General Education Provisions Regulations.
104.4 Cross reference to definitions.
104.5 Requirements under Part B of the Education of the Handicapped Act.

STATE BOARD

104.31 Establishment of State board.
104.32 Responsibilities of the State board.
104.33 Delegation of functions.
104.34 State administration and leadership.

FULL-TIME PERSONNEL AND FUNCTIONS TO ELIMINATE SEX DISCRIMINATION AND SEX STEREOTYPING

104.71 Scope.
104.72 Selection of full-time personnel to eliminate sex discrimination and sex stereotyping.
104.73 Definitions.
104.74 Funds for full-time personnel and functions.
104.75 Functions of full-time personnel.
104.76 Studies to carry out functions.

STATE ADVISORY COUNCIL

104.91 Establishment and certification.
104.92 Membership.
104.93 Functions and responsibilities.
104.94 Meetings and rules.
104.95 Staff and services.
104.96 Fiscal control.
104.97 Annual evaluation report.

LOCAL ADVISORY COUNCILS

104.111 Establishment of local advisory councils.
104.112 Duties of local advisory councils.
104.116 Vocational education information data system.

NATIONAL AND STATE OCCUPATIONAL INFORMATION COORDINATING COMMITTEES

104.121 Establishment of National Occupational Information Coordinating Committee.

Sec. 104.122 Requirement to establish State occupational information coordinating committees.
104.123 Duties of the State occupational information coordinating committee.

GENERAL APPLICATION

104.141 Requirement for filing a general application.

DEVELOPMENT OF FIVE-YEAR STATE PLAN

104.161 Submission of five-year State plan.
104.162 Representation required in the development of the five-year State plan.
104.163 Meetings of participating representatives.
104.164 State board adoption of the five-year State plan.
104.165 Public hearings on the five-year State plan.
104.171 Certification of plans.
104.181 Content of five-year State plan.
104.182 Procedures to assure compliance with the general application.
104.183 Assessment of employment opportunities.
104.184 Goals to meet employment needs.
104.185 Funding to meet employment needs.
104.186 Funding to meet program (purpose) needs.
104.187 Policies for eradicating sex discrimination.
104.188 Coordination between manpower training programs and vocational education programs.

DEVELOPMENT OF ANNUAL PROGRAM PLAN AND ACCOUNTABILITY REPORT

104.202 Due date of annual program plan.
104.203 Due date of annual accountability report.
104.204 Representation required in the development of the annual program plan and accountability report.
104.205 Meetings of participating representatives.
104.206 State board adoption of the annual program plan and accountability report.
104.207 Public hearing on the annual program plan and accountability report.
104.221 Content of annual program plan for fiscal year 1978.
104.222 Content of annual program plans for the fiscal years following 1978.
104.241 Content of the accountability report.

APPROVAL OF FIVE-YEAR STATE PLAN AND ANNUAL PROGRAM PLAN AND ACCOUNTABILITY REPORT

104.261 Conditions for approval of five-year State plan.
104.262 Conditions for approval of annual program plan and accountability report.
104.263 Notice of approval or disapproval.

WITHHOLDING OF APPROVAL OF PLAN

104.271 Disapproval of plan.

HEARINGS BEFORE THE COMMISSIONER ON AGENCY OR COUNCIL CHALLENGES TO THE FIVE-YEAR STATE PLAN OR THE ANNUAL PROGRAM PLAN

104.281 Opportunity for a hearing.
104.282 Appeal to the Commissioner.
104.283 Hearing.
104.284 Prehearing.
104.285 Right to counsel, witnesses, cross examination.
104.286 Evidence and standard of evidence.

Sec. 104.287 Determinations to be made by the hearing officer.
104.288 Commissioner's decision.
104.289 Appeals by State board or agency to the court of appeals.

SUSPENSION AND TERMINATION OF PAYMENTS FOR NONCOMPLIANCE

104.291 Suspension and termination of payments for noncompliance.

APPEAL TO THE COURTS

104.292 Appeal by State board on withholding of approval of State plan.
104.293 Appeal by eligible recipients to the court of appeals.

FISCAL REQUIREMENTS FEDERAL SHARE

104.301 Application of Federal requirements.
104.302 Federal share of expenditures—annual program plan.
104.303 Federal share of expenditures—national priority programs.
104.304 Allowable expenditures for vocational education for national priority programs.
104.305 Federal share of expenditures—100 percent payments.
104.306 Federal share of expenditures—State administration.
104.307 Federal share of expenditures—local administration.

MINIMUM PERCENTAGES

104.311 Percentage requirements with respect to State distribution of Federal funds.
104.312 Minimum percentage for the handicapped.
104.313 Minimum percentage for the disadvantaged.
104.314 Minimum percentage for postsecondary and adult.
104.315 Expenditures for programs in secondary schools.

MAINTENANCE OF EFFORT

104.321 Maintenance of fiscal effort at the State level.
104.322 Withholding of payments.
104.323 Five percent rule.
104.324 Unusual circumstance rule.
104.325 Maintenance of fiscal effort at the local level.
104.326 Withholding of payments.
104.327 Exceptions.
104.328 Maintenance of fiscal effort by postsecondary educational institutions.
104.329 Withholding of payments.
104.330 Exceptions.

STATE EVALUATION

104.401 Purpose.
104.402 Evaluation by State board.
104.403 Use of results of evaluation.
104.404 Special data on completers and leavers.

104.405 Assurance of compatible data.

Subpart 2—Basic Grants

GENERAL PURPOSES

104.501 Authorization of grants.
104.502 Use of funds under the basic grant.

VOCATIONAL EDUCATION PROGRAMS

104.511 Use of funds.
104.512 Vocational instruction.
104.513 Activities of vocational education student organizations.
104.514 Vocational instruction under contract.
104.515 Apprenticeship programs.

WORK STUDY PROGRAMS

Sec. 104.521 Use of funds.
104.522 Policy and procedure for work-study programs.
104.523 Requirements of work-study programs.

COOPERATIVE VOCATIONAL EDUCATION PROGRAMS

104.531 Use of funds.
104.532 Assurances in five-year State plan.
104.533 Students in nonprofit private schools.

ENERGY EDUCATION

104.541 Use of funds.
104.542 Applications by postsecondary educational institutions.
104.543 Solar energy.

CONSTRUCTION OF AREA VOCATIONAL EDUCATION SCHOOL FACILITIES

104.551 Use of funds.
104.552 Types of facilities.
104.553 Construction requirements.

PROVISION OF STIPENDS

104.571 Use of funds.
104.572 Restrictions on payment of stipends.
104.573 Application for payment of stipends by eligible recipients.
104.574 Rates for stipends.

PLACEMENT SERVICES FOR STUDENTS WHO HAVE SUCCESSFULLY COMPLETED VOCATIONAL EDUCATION PROGRAMS

104.581 Use of funds.
104.582 Restrictions on placement services.
104.583 Application for funds by eligible recipients.

INDUSTRIAL ARTS

104.591 Use of funds.
104.592 Industrial arts programs.

SUPPORT SERVICES FOR WOMEN

104.601 Use of funds.
104.602 Types of support services.
104.603 Support to increase number of women instructors.

DAY CARE SERVICES FOR CHILDREN OF STUDENTS

104.611 Use of funds.
104.612 Day care services.

VOCATIONAL EDUCATION PROGRAMS FOR DISPLACED HOMEMAKERS AND OTHER SPECIAL GROUPS

104.621 Use of funds.
104.622 Scope of programs.

CONSTRUCTION AND OPERATION OF RESIDENTIAL VOCATIONAL SCHOOLS

104.631 Use of funds.
104.632 Residential vocational schools.
104.633 Special considerations for residential vocational schools.
104.634 Construction requirements.

Subpart 3—Program Improvement and Supportive Services

PROGRAM IMPROVEMENT

104.702 Purpose.
104.703 Research coordinating unit.
104.704 Contract requirements.
104.705 Use of funds for research programs.
104.706 Use of funds for exemplary and innovative programs.
104.707 Disposition of exemplary and innovative programs.
104.708 Use of funds for curriculum development programs.

VOCATIONAL GUIDANCE AND COUNSELING

- Sec.
104.761 Purpose.
104.762 Conformity with five-year State plan.
104.763 Kinds of programs, services, and activities.
104.764 Special emphasis.

VOCATIONAL EDUCATION PERSONNEL TRAINING

- 104.771 Purpose.
104.772 Conformity with five-year State plan.
104.773 Eligible participants.
104.774 Types of training.
104.775 Grants or contracts.
104.776 Stipends to trainees.

GRANTS TO OVERCOME SEX BIAS AND SEX STEREOTYPING

- 104.791 Purpose.
104.792 Conformity with five-year State plan.
104.793 Types of projects.

Subpart 4—Special Programs for the Disadvantaged

- 104.801 Grants to States for special programs for the disadvantaged.
104.802 Use of funds.
104.803 Students in nonprofit private schools.
104.804 Criteria of need and eligibility.

Subpart 5—Consumer and Homemaking Education

- 104.901 Grants to States for consumer and homemaking education.
104.902 Use of funds.
104.903 Programs in consumer and homemaking education.
104.904 Purpose of educational programs in consumer and homemaking education.
104.905 Ancillary services.
104.906 Federal share.

AUTHORITY: Secs. 101-195 of Title II of Pub. L. 94-482 as further amended by Pub. L. 95-40 (20 U.S.C. 2301 to 2461), unless otherwise noted.

Subpart 1—State Administration

§ 104.1 Scope.

Part 104 contains regulations interpreting or implementing Part A of Title I of the Vocational Education Act of 1963, as amended by Title II of the Education Amendments of 1976, Pub. L. 94-482 (referred to as "the Act").

(Secs. 101 through 150, 195; 20 U.S.C. 2301.)

§ 104.2 Purpose.

(a) The purpose of Part A of the Act, as stated in section 101 of the Act, the "Declaration of Purpose," is to assist States in improving planning in the use of all resources available to the States for vocational education and manpower training by involving a wide range of agencies and individuals concerned with education and training within the State in the development of the vocational education plans.

It is also the purpose of this part to authorize Federal grants to States to assist them—

- (1) To extend, improve, and, where necessary, maintain existing programs of vocational education,
- (2) To develop new programs of vocational education,

(3) To develop and carry out such programs of vocational education within each State so as to overcome sex discrimination and sex stereotyping in vocational education programs (including programs of homemaking), and thereby furnish equal educational opportunities in vocational education to persons of both sexes, and

(4) To provide part-time employment for youths who need the earnings from such employment to continue their vocational training on a full-time basis, so that persons of all ages in all communities of the State, those in high school, those who have completed or discontinued their formal education and are preparing to enter the labor market, those who have already entered the labor market, but need to upgrade their skills or learn new ones, those with special educational handicaps, and those in postsecondary schools, will have ready access to vocational training or retraining which is of high quality, which is realistic in the light of actual or anticipated opportunities for gainful employment, and which is suited to their needs, interests, and ability to benefit from such training.

(b) The purpose of these regulations is to assist the States, local educational agencies, postsecondary institutions, and other institutions capable of carrying out vocational education programs, to administer the federally assisted State programs of vocational education under the Act.

(Sec. 101; 20 U.S.C. 2301.)

§ 104.3 Applicability of General Education Provisions Regulations.

Provisions in Parts 100, 100b, and 100c of the General Education Provisions Regulations (45 CFR Parts 100, 100b, and 100c), entitled "General Provisions for Office of Education Programs," are applicable to programs under the Act, except for the following sections:

- (a) Section 100b.16—Implementation of application procedures;
- (b) Section 100b.18—General application;
- (c) Section 100b.18—Annual program plan;
- (d) Section 100b.19—State plan requirements;
- (e) Section 100b.35(b)—Effective dates of application, plans, and amendments;
- (f) Section 100b.92(b)—Matching and cost sharing;
- (g) Section 100b.93—Valuation of in-kind contributions from third parties; and
- (h) Section 100b.94—Supporting records for in-kind contributions from third parties.

(20 U.S.C. 2301 et seq.)

§ 104.4 Cross reference to definitions.

Definitions necessary for the understanding of Parts 104 and 105 are set forth in Part C of Title I of the Act (section 195 of the Act) and as Appendix A at the end of Part 105 or these regulations. Some additional definitions necessary for the understanding of Part 105 appear in Part 105.

(Sec. 195; 20 U.S.C. 2461.)

§ 104.5 Requirements under Part B of the Education of the Handicapped Act.

(a) Regulations under Part B of the Education of the Handicapped Act are located in 45 CFR Part 121a.

(20 U.S.C. 1417(b).)

(b) Section 612(6) of the Education of the Handicapped Act requires that the State educational agency be responsible for ensuring that all educational programs for handicapped children within the State, including all of those programs administered by any other State or local agency, are under the general supervision of persons responsible for educational programs for handicapped children in the State educational agency.

(20 U.S.C. 1412(6).)

(c) Section 613(a)(2) of the Education of the Handicapped Act requires each State to insure that funds provided under this part to assist in the education of handicapped children are used only in a manner consistent with a goal of providing a free appropriate public education for all handicapped children.

(d) Paragraph (c) of this section does not limit the requirements of this Part or the statutes under which this part is authorized.

(20 U.S.C. 1413(a)(2).)

(e) Section 612(6) of the Education of the Handicapped Act requires that any activity to assist the education of handicapped children under this Part shall meet the educational standards of the State educational agency.

(20 U.S.C. 1412(6).)

(f) Section 616(a)(2)(B) of the Education of the Handicapped Act provides that the Commissioner may withhold payments available under this Part for assisting the education of handicapped children:

- (1) For failure to comply substantially with any provision of section 612 or 613 of the Education of the Handicapped Act; or
- (2) In the administration of the annual program plan under Part B of the Education of the Handicapped Act for failure to comply with:

- (i) Any provision of Part B of the Education of the Handicapped Act; or
- (ii) Any requirements in the application of a local educational agency or intermediate educational unit approved by the State educational agency under that annual program plan.

(g) The Commissioner will use the notice and hearing procedures in section 616 of the Education of the Handicapped Act before withholding payments under this section.

(20 U.S.C. 1416.)

STATE BOARD

§ 104.31 Establishment of State board.

(a) A State desiring to participate in programs under the Act shall, consistent with State law, designate or establish a

State board or agency which shall be the sole State agency responsible for the administration, or for the supervision of administration, of programs under the Act.

(b) The State board is solely accountable to the Commissioner for the State's expenditure of Federal vocational education funds.

(Sec. 104(a)(1); 20 U.S.C. 2304; Sen. Rept. No. 94-882, p. 72.)

§ 104.32 Responsibilities of the State board.

The responsibilities of the State board include (but are not limited to):

(a) Coordination of the development of policy with respect to programs under the Act (as set forth in §§ 104.162, 104.163, 104.204, and 104.205);

(b) Coordination of the development of the five-year State plan (as set forth in § 104.181), the annual program plan (as set forth in §§ 104.221 and 104.222), and the accountability report (as set forth in § 104.241);

(c) The submission to the Commissioner of the five-year State plan, the annual program plan, and the accountability report; and

(d) Consultation with the State advisory council on vocational education and with other State agencies, councils, and individuals (as set forth in § 104.162).

(Sec. 104(a)(1) (A), (B), and (C); 20 U.S.C. 2304.)

(e) Cooperation with the Administrator of the National Center for Educational Statistics in the development and submission of information required for a national vocational education data reporting and accounting system.

(Sec. 161(a); 20 U.S.C. 2391.)

§ 104.33 Delegation of functions.

The State board may delegate any of its responsibilities (except those responsibilities set forth in § 104.32), in whole or in part, to one or more appropriate agencies.

(Sec. 104(a)(1); 20 U.S.C. 2304.)

§ 104.34 State administration and leadership.

The State board shall provide for a State staff sufficiently qualified by education and experience and in sufficient numbers to enable the State board to carry out its functions under the State plan. The State board staff shall include a full-time State director.

(Implements sec. 104(a)(1) and sec. 106(a)(1).)

FULL-TIME PERSONNEL AND FUNCTIONS TO ELIMINATE SEX DISCRIMINATION AND SEX STEREOTYPING

§ 104.71 Scope.

Sections 104.72 through 104.76 apply only to the fifty States and the District of Columbia. (These sections do not apply to the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, Northern Mariana Islands,

or the Trust Territory of the Pacific Islands.)

(Sec. 104(b)(3); 20 U.S.C. 2304.)

§ 104.72 Selection of full-time personnel to eliminate sex discrimination and sex stereotyping.

(a) A State desiring to participate in the programs authorized by the Act shall select personnel to work full time to assist the State board in fulfilling the purposes of the Act concerned with:

(1) Furnishing equal educational opportunities in vocational education programs to persons of both sexes; and

(2) Eliminating sex discrimination and sex stereotyping from all vocational education programs.

(Secs. 101(3), 104(b)(1); 20 U.S.C. 2301, 2304.)

(b) In selecting the full-time professional personnel, the State shall match the qualifications of the applicants with the responsibilities of the job.

(Implements Sec. 104(b)(1); 20 U.S.C. 2304.)

§ 104.73 Definitions.

The following definitions apply for the purposes of §§ 104.72 through 104.76 and throughout the Act and regulations.

(a) "Sex bias" means behaviors resulting from the assumption that one sex is superior to the other.

(b) "Sex stereotyping" means attributing behaviors, abilities, interests, values, and roles to a person or group of persons on the basis of their sex.

(c) "Sex discrimination" means any action which limits or denies a person or a group of persons opportunities, privileges, roles, or rewards on the basis of their sex.

(Implements Sec. 104(b); 20 U.S.C. 2304.)

§ 104.74 Funds for full-time personnel and functions.

(a) Each State shall expend not less than \$50,000 in each fiscal year from funds available under basic grants (section 120 of the Act) to support the personnel working full time to carry out the functions set forth in § 104.75.

(Secs. 104(b)(2), 120(b)(1)(F); 20 U.S.C. 2304, 2330.)

(b) Funds set aside under paragraph (a) of this section shall be used for:

- (1) Salaries for full-time professional staff;
- (2) Salaries for support staff; and
- (3) Travel and other expenses directly related to the support of personnel in carrying out the functions set forth in § 104.75.

(Implements Sec. 104(b); 20 U.S.C. 2304.)

§ 104.75 Functions of full-time personnel.

Personnel designated under § 104.72 shall work full time to:

(a) Take action necessary to create awareness of programs and activities in vocational education designed to reduce sex bias and sex stereotyping in all voca-

tional education programs, including assisting the State board in publicizing the public hearings on the State plan in accordance with § 104.165(a);

(b) Gather, analyze, and disseminate data on the status of men and women students and employees in vocational education programs of the State;

(c) Develop and support actions to correct problems brought to the attention of this personnel through activities carried out under paragraph (b) and § 104.76, including creating awareness of the Title IX complaint process;

(d) Review the distribution of grants and contracts by the State board to assure that the interests and needs of women are addressed in all projects assisted under this Act;

(e) Review all vocational education programs (including work-study programs, cooperative vocational education programs, apprenticeship programs, and the placement of students who have successfully completed vocational education programs) in the State for sex bias;

(f) Monitor the implementation of laws prohibiting sex discrimination in all hiring, firing, and promotion procedures within the State relating to vocational education;

(g) Assist local educational agencies and other interested parties in the State in improving vocational education opportunities for women; and

(h) Make available to the State board, the State advisory council, the National Advisory Council on Vocational Education, the State Commission on the Status of Women, the Commissioner, and the general public, including individuals and organizations in the State concerned about sex bias in vocational education, information developed under this section;

(Sec. 104(b)(1); 20 U.S.C. 2304.)

(i) Review the self-evaluations required by Title IX; and

(Implements Sec. 104(b)(1); 20 U.S.C. 2304.)

(j) Review and submit recommendations with respect to overcoming sex bias and sex stereotyping in vocational education programs for the five-year State plan and its annual program plan prior to their submission to the Commissioner for approval.

(Secs. 104(b)(1), 109(a)(3)(B); 20 U.S.C. 2304, 2309.)

§ 104.76 Studies to carry out functions.

A State may use funds available under section 130 of the Act to support studies necessary to carry out the functions set forth in § 104.75.

(Implements Sec. 104(b)(1); 20 U.S.C. 2304.)

STATE ADVISORY COUNCIL

§ 104.91 Establishment and certification.

(a) *Establishment.* A State which desires to receive funds under the Act and the regulations in this part for any fiscal year shall establish a State advisory council. The council shall be appointed

by the Governor or, in a State in which the members of the State board are elected, by the State board itself.

(Sec. 105(a); 20 U.S.C. 2305.)

(b) *Appointment by the State board.* In order for the appointment power to be vested in the State board, under the authority of paragraph (a) of this section, a majority of its members must be individuals elected by the State legislature or directly by the eligible voters of the State or of the districts which the individuals represent.

(Interprets Sec. 105(a); 20 U.S.C. 2305.)

(c) *Certification.* The appointing authority, required by paragraph (a) of this section, shall certify to the Commissioner the establishment and membership of its State advisory council not less than 90 calendar days before the beginning of each fiscal year.

(Sec. 105(b); 20 U.S.C. 2305.)

§ 104.92 Membership.

(a) *Required representation.* The membership of the State advisory council shall include one or more individuals who:

(1) Represent, and are familiar with, the vocational needs and problems of management in the State;

(2) Represent, and are familiar with, the vocational needs and problems of labor in the State;

(3) Represent, and are familiar with, the vocational needs and problems of agriculture in the State;

(4) Represent State industrial and economic development agencies;

(5) Represent community and junior colleges;

(6) Represent other institutions of higher education, area vocational schools, technical institutes, and postsecondary agencies or institutions which provide programs of vocational or technical education and training;

(7) Have special knowledge, experience, or qualifications with respect to vocational education but are not involved in the administration of State or local vocational education programs;

(8) Represent, and are familiar with, public programs of vocational education in comprehensive secondary schools;

(9) Represent, and are familiar with, nonprofit private schools;

(10) Represent, and are familiar with, vocational guidance and counseling services;

(11) Represent State correctional institutions;

(12) Are vocational education teachers presently teaching in local educational agencies;

(13) Are currently serving as superintendents or other administrators of the local educational agencies;

(14) Are currently serving on local school boards;

(15) Represent the State Manpower Services Council established pursuant to section 107 of the Comprehensive Employment and Training Act of 1973;

(16) Represent school systems with large concentrations of persons who have special academic, social, economic, and cultural needs and of persons who have limited English-speaking ability;

(17) Are women with backgrounds and experiences in employment and training programs, and who are knowledgeable with respect to the special experiences and problems of sex discrimination in job training, and employment, and of sex stereotyping in vocational education, including women who are members of minority groups having special knowledge of the problems of discrimination in job training and employment against women in minority groups;

(18) Have special knowledge, experience, or qualifications with respect to the special educational needs of physically or mentally handicapped persons;

(19) Represent the general public, including at least one person representing and knowledgeable about the poor and disadvantaged; and

(20) Are vocational education students who are not qualified for membership under any of the preceding clauses of this sentence.

(Sec. 105(a); 20 U.S.C. 2305.)

(b) *Special considerations.* The appointing authority, pursuant to paragraph (a) of this section, shall insure that:

(1) The State advisory council has as a majority of its members persons who are not educators or administrators in the field of education;

(2) Members of the State advisory council do not represent more than one category;

(Sec. 105(a); 20 U.S.C. 2305.)

(3) There is appropriate representation of both sexes, racial and ethnic minorities, and the various geographic regions of the State. The Commissioner considers the term "appropriate representation" to be representation which generally reflects the percentage of women or minorities in the population of the State or the percentage of women or minorities in the work force of the State.

(Implements Sec. 105(a); 20 U.S.C. 2305.)

(4) In order to avoid any conflict of interest, the membership of the State advisory council excludes members of the State board and members of its staff who are directly involved in State administration of vocational education.

(Implements Sec. 105(d), (e); 20 U.S.C. 2305.)

(c) *Term of appointment.* Members of the State advisory council shall be appointed for terms of three years except that:

(1) In the case of the members appointed for fiscal year 1978, one-third of the membership shall be appointed for terms of one year each and one-third shall be appointed for terms of two years each;

(2) An appointment to fill a vacancy shall be for the term that remains unexpired; and

(Sec. 105(a); 20 U.S.C. 2305.)

(3) Members serving on the State advisory council on October 1, 1977, may continue to serve for the terms for which they were appointed, but for not more than two fiscal years unless reappointed.

(Sec. 204(b); 20 U.S.C. 2301 note.)

§ 104.93 Functions and responsibilities.

The State advisory council shall:

(a) Advise the State board in the development of the five-year State plan submitted under the authority of § 104.181, the annual program plan submitted under the authority of §§ 104.221, and 104.222, and the accountability report submitted under the authority of § 104.241. A statement describing its consultation with the State board shall be submitted with the five-year State plan, and the annual program plan and accountability report under § 104.171(f).

(Sec. 105(d)(1); 20 U.S.C. 2305.)

(b) Advise the State board on policy matters arising out of the administration of programs under the approved five-year State plan, the annual program plan, and the accountability report;

(Sec. 105(d)(1); 20 U.S.C. 2305.)

(c) Evaluate vocational education programs (including programs to overcome sex bias), services, and activities under the annual program plan, and publish and distribute the results thereof;

(Sec. 105(d)(2); 20 U.S.C. 2305.)

(d) Assist the State board in developing plans for State board evaluations under the authority of § 104.401 and monitor these evaluations;

(Sec. 112(b)(2); 20 U.S.C. 2312.)

(e) Prepare and submit through the State board to the Commissioner and to the National Advisory Council an annual evaluation report, accompanied by any additional comments of the State board as the State board deems appropriate;

(Sec. 105(d)(3); 20 U.S.C. 2305.)

(f) Identify, after consultation with the State Manpower Services Council, the vocational education and employment and training needs of the State and assess the extent to which vocational education, employment training, vocational rehabilitation, special education, and other programs assisted under this and related Acts represent a consistent, integrated, and coordinated approach to meeting these needs;

(Interprets Sec. 105(d)(4)(A); 20 U.S.C. 2305.)

(g) Comment, at least annually, on the reports of the State Manpower Services Council;

(Sec. 105(d)(4)(B); 20 U.S.C. 2305.)

(h) Prepare and submit to the Commissioner within 60 calendar days after the Commissioner's acceptance of certification of establishment and membership, submitted pursuant to § 104.91(c), an annual budget covering the proposed

expenditures of the State advisory council for the following fiscal year; and

(Implements Sec. 105(f); 20 U.S.C. 2305.)

(i) Provide technical assistance to eligible recipients and local advisory councils as may be requested by the recipients to establish and operate local advisory councils.

(Sec. 105(g); 20 U.S.C. 2305.)

§ 104.94 Meetings and rules.

The State advisory council shall meet within 30 calendar days after certification has been accepted by the Commissioner and shall select from among its membership a chairperson. The time, place, manner of meetings, as well as the councils operating procedures and staffing, shall be as provided by the rules of the State advisory council. The rules shall provide for not less than one public meeting each year at which the public is given an opportunity to express views concerning the vocational education program of the State.

(Sec. 105(c); 20 U.S.C. 2305.)

§ 104.95 Staff and services.

(a) The State advisory council is authorized:

(1) To obtain the services of professional, technical, and clerical personnel as may be necessary to enable it to carry out its functions described in § 104.93. Such personnel shall not include staff members of the State board and shall be subject only to the supervision and direction of the State advisory council with respect to all services performed by them.

(2) To contract for such services as may be necessary to carry out its evaluation functions, independent of programmatic and administrative control by other State boards, agencies, and individuals.

(Implements sec. 105(e); 20 U.S.C. 2305.)

(b) Members of the State advisory council and its staff, while serving on the business of the council, may receive subsistence, travel allowances, and compensation in accordance with State law, regulations, and practices applicable to persons performing comparable duties and services.

(Implements Sec. 105(e); 20 U.S.C. 2305.)

§ 104.96 Fiscal control.

(a) The State advisory council shall designate an appropriate State agency or other public agency, eligible to receive funds under the Act, to act as its fiscal agent for purposes of disbursement and accounting and for having its accounts audited at least every two years. The fiscal agent shall send a copy of the audit report to the Commissioner.

(Implements Sec. 105(f)(2); 20 U.S.C. 2305.)

(b) The expenditure of council funds is determined solely by the State advisory council for carrying out its function except as provided in § 104.95(b). Council funds may not be diverted or reprogrammed for any other purpose by any State board, agency, or individual.

(Sec. 105(f)(2); 20 U.S.C. 2305.)

(c) All expenditures of council funds shall be in accordance with the budget approved by the Commissioner under the authority of § 104.93(h).

(Implements Sec. 105(f)(2); 20 U.S.C. 2305.)

(d) The State advisory council shall submit to the Commissioner a financial status report within 90 days after the end of the fiscal year.

(45 CFR 100b.403.)

§ 104.97 Annual evaluation report.

The State advisory council shall prepare and submit to the Commissioner and to the National Advisory Council on Vocational Education, through the State board, within 90 days after the end of the fiscal year an annual evaluation report under the authority of § 104.93(e). This report shall include:

(a) The results of the evaluations by the State advisory council of the effectiveness of programs, services, and activities carried out in the year under review in meeting the program goals set forth in the five-year State plan and the annual program plan.

(Sec. 105(d)(3)(A); 20 U.S.C. 2305.)

(b) A review of the program evaluation results developed by the State under the authority of § 104.401;

(c) A review of the analysis of the distribution of Federal funds within the State submitted by the State according to the annual program plan and the accountability report;

(Sec. 105(d)(3)(A); 20 U.S.C. 2305.)

(d) Recommended changes in programs, services, and activities as may be considered necessary by the State advisory council based on the results of its evaluation;

(Sec. 105(d)(3)(B); 20 U.S.C. 2305.)

(e) Comments on the reports of the State Manpower Services Council; and

(Sec. 105(d)(4)(B); 20 U.S.C. 2305.)

(f) Identification of the vocational education and employment and training needs of the State and the assessment of the extent to which vocational education, employment training, vocational rehabilitation, special education, and other programs assisted under this and related Acts represent a consistent, integrated, and coordinated approach to meeting such needs.

(Sec. 105(d)(4)(A); 20 U.S.C. 2305.)

LOCAL ADVISORY COUNCILS

§ 104.111 Establishment of local advisory councils.

(a) Each eligible recipient (that is, each local educational agency or postsecondary educational institution which receives Federal assistance under the Act) shall establish a local advisory council on vocational education.

(b) The local advisory council may be established for:

(1) Program areas;

(2) Schools;

(3) The community; or

(4) The region in which the eligible recipient is located.

(c) The local advisory council shall be composed of representatives of the general public including at least a representative of:

(1) Business;

(2) Industry; and

(3) Labor.

(Sec. 105(g)(1); 20 U.S.C. 2305.)

(d) Each eligible recipient shall establish a local advisory council which has an appropriate representation of both sexes and an appropriate representation of the racial and ethnic minorities found in the program areas, schools, community, or region which the local advisory council serves.

(e) An eligible recipient may form a local advisory council composed of representatives from several craft committees, or representatives of several school councils, having the requisite representation in paragraph (c) of this section.

(Implements Sec. 105(g)(1); 20 U.S.C. 2305.)

§ 104.112 Duties of local advisory councils.

(a) The local advisory council shall advise the eligible recipient on:

(1) Current job needs; and

(2) The relevance of programs (courses) being offered by the local educational agency or postsecondary educational agency in meeting current job needs.

(Sec. 105(g)(1); 20 U.S.C. 2305.)

(b) The local advisory council shall consult with the eligible recipient in developing its application to the State board.

(Sec. 105(a)(4)(A); 20 U.S.C. 2306.)

VOCATIONAL EDUCATION INFORMATION DATA SYSTEM

§ 104.116 Vocational education data system.

(a) The Commissioner and the Administrator of NCES will jointly develop information elements and uniform definitions for a national vocational education data reporting and accounting system.

(b) This system will include information resulting from the evaluations under section 112(b) of the Act (§§ 104.402 and 104.404) and other information on vocational:

(1) Students (including information on their race and sex);

(2) Programs;

(3) Program completers and leavers;

(4) Staff;

(5) Facilities; and

(6) Expenditures.

(c) This system will be compatible insofar as possible with the occupational information data system developed under section 161(b) of the Act by the National Occupational Information Coordinating Committee and with other in-

formation systems involving data on programs assisted under CETA.

(Interprets 161(a); 20 U.S.C. 2391.)

NATIONAL AND STATE OCCUPATIONAL INFORMATION COORDINATING COMMITTEES

§ 104.121 Establishment of National Occupational Information Coordinating Committee.

Section 161(b) of the Act establishes a National Occupational Information Coordinating Committee composed of the Commissioner of Education and the Administrator of the National Center for Education Statistics, from the Department of Health, Education, and Welfare, and the Assistant Secretary of Labor for Employment and Training and the Commissioner of the Bureau of Labor Statistics, from the Department of Labor.

(Sec. 161(b); 20 U.S.C. 2391(b).)

§ 104.122 Requirement to establish State occupational information coordinating committees.

(a) Each State receiving assistance under the Act is required by section 161(b)(2) of the Act to establish a State occupational information coordinating committee by September 30, 1977.

(Implements Sec. 161(b)(2); 20 U.S.C. 2391.)

(b) The State occupational information coordinating committee shall be composed of a representative of each of the following:

- (1) The State board;
- (2) The State employment security agency;
- (3) The State Manpower Services Council; and
- (4) The agency administering the vocational rehabilitation program.

(Sec. 161(b)(2); 20 U.S.C. 2391.)

(c) The representatives shall be selected by the respective State board, agency, or council.

(Implements Sec. 161(b)(2); 20 U.S.C. 2391.)

(Implements Secs. 103(a)(1)(A), 161(b)(2); 20 U.S.C. 2302, 2391)

§ 104.123 Duties of the State occupational information coordinating committee.

(a) The State occupational information coordinating committee, with funds available to it from the National Occupational Information Coordinating Committee shall implement an occupational information system in the State which will meet the common needs for the planning for, and operation of, programs of the State board assisted under this Act and of the administering agencies under the Comprehensive Employment Training Act.

(Sec. 161(b)(2); 20 U.S.C. 2391.)

(b) A State occupational information coordinating committee shall use funds received from the National Occupational Information Coordinating Committee in accordance with guidance, direction or standards adopted by the National Oc-

cupational Information Coordinating Committee.

(Implements Sec. 161(b)(2); 20 U.S.C. 2391.)

GENERAL APPLICATION

§ 104.141 Requirement for filing a general application.

(a) In order to participate in programs authorized under the Act, the State board for vocational education must submit to, and maintain on file with, the Commissioner a general application.

(Sec. 106(a); 20 U.S.C. 2306.)

(b) This general application must be signed by the executive officer of the State board and submitted by the State board to the Commissioner by July 1, 1977, for eligibility for Federal funds under the Act.

(c) This general application is filed only once with the Commissioner and shall remain in effect until the provisions of section 106 of the Act are changed or expire.

(Implements Sec. 106(a); 20 U.S.C. 2306; Sen. Rept. No. 94-882, pp. 68-72.)

(d) This general application is in lieu of the general application required by section 434(b) of the General Education Provisions Act.

(Sec. 106(b); 20 U.S.C. 2306.)

(e) The procedures to be used by the State board to carry out assurances 4, 5, 9, and 10 in the general application shall be included in the five-year State plan (§ 104.162).

(Implements Sec. 109(a)(1); 20 U.S.C. 2309.)

(f) This general application shall contain the following 12 assurances; of these, ten are set forth in section 106(a) of Act:

(1) that the State will provide for such methods of administration as are necessary for the proper and efficient administration of the Act;

(2) that the State board will cooperate with the State advisory council on vocational education in carrying out its duties pursuant to section 105 and with the agencies, councils, and individuals specified in sections 107 and 108 to be involved in the formulation of the five-year State plan and of the annual program plans and accountability reports;

(3) that the State will comply with any requests of the Commissioner for making such reports as the Commissioner may reasonably require to carry out his functions under this Act;

(4) that funds will be distributed to eligible recipients on the basis of annual applications which—

(A) have been developed in consultation (i) with representatives of the educational and training resources available in the area to be served by the applicant and (ii) with the local advisory council required to be established by this Act to assist such recipients,

(B) (i) describe the vocational education needs of potential students in the area or community served by the applicant and indicate how, and to what extent, the program proposed in the application will meet such needs, and (ii) describe how the findings of any evaluations of programs operated by such applicant during previous years, includ-

ing those required by this Act, have been used to develop the program proposed in the application,

(C) describe how the activities proposed in the application relate to manpower programs conducted in the area by a prime sponsor established under the Comprehensive Employment and Training Act of 1973, if any, to assure a coordinated approach to meeting the vocational education and training needs of the area or community, and

(D) describe the relationship between vocational education programs proposed to be conducted with funds under this Act and other programs in the area or community which are supported by State and local funds;

and that any eligible recipient dissatisfied with final action with respect to any application for funds under this Act shall be given reasonable notice and opportunity for a hearing;

(5) (A) that the State shall, in considering the approval of such applications, give priority to those applicants which—

(i) are located in economically depressed areas and areas with high rates of unemployment, and are unable to provide the resources necessary to meet the vocational education needs of those areas without Federal assistance, and

(ii) propose programs which are new to the area to be served and which are designed to meet new and emerging manpower needs and job opportunities in the area and, where relevant, in the State and the Nation; and

(B) that the State shall, in determining the amount of funds available under this Act which shall be made available to those applicants approved for funding, base such distribution on economic, social and demographic factors relating to the needs for vocational education among the various populations and the various areas of the State, except that—

(i) the State will use as the two most important factors in determining this distribution (I) in the case of local educational agencies, the relative financial ability of such agencies to provide the resources necessary to meet the need for vocational education in the areas they service and the relative number or concentration of low-income families or individuals within such agencies, and (II) in the case of other eligible recipients, the relative financial ability of such recipients to provide the resources necessary to initiate or maintain vocational education programs to meet the needs of their students and the relative number or concentration of students whom they serve whose education imposes higher than average costs, such as handicapped students, students from low-income families, and students from families in which English is not the dominant language; and

(ii) the State will not allocate such funds among eligible recipients within the State on the basis of per capita enrollment or through matching of local expenditures on a uniform percentage basis, or deny funds to any recipient which is making a reasonable tax effort solely because such recipient is unable to pay the non-Federal share of the cost of new programs;

(6) that Federal funds made available under this Act will be so used as to supplement, and to the extent practicable, increase the amount of State and local funds that would in the absence of such Federal funds be made available for the uses specified in the Act, and in no case supplant such State or local funds;

(7) that the State will make provision for such fiscal control and fund accounting procedures as may be necessary to secure proper disbursement of, and accounting for, Federal

funds paid to the State (including such funds paid by the State to eligible recipients under this Act);

(8) that funds received under this Act will not be used for any program of vocational education (except personnel training programs under section 135, renovation programs under subpart 4 of part B, and home-making programs under subpart 5 of this part) which cannot be demonstrated to prepare students for employment, be necessary to prepare individuals for successful completion of such a program, or be of significant assistance to individuals enrolled in making an informed and meaningful occupational choice as an integral part of a program of orientation and preparation;

(9) that the State has instituted policies and procedures to insure that copies of the State plan and annual program plan and accountability report and all statements of general policies, rules, regulations, and procedures issued by the State board and by any State agencies to which any responsibility is delegated by the State board concerning the administration of such plan and report will be made reasonably available to the public; and

(10) that the funds used for purposes of section 110(a) are consistent with the State plan submitted pursuant to section 613(a) of the Education of the Handicapped Act.

(Sec. 106(a); 20 U.S.C. 2306.)

(11) The State board shall also assure that it will cooperate with the Administrator of the National Center for Education Statistics, HEW, in supplying information and complying in its reports with the information elements and definition requirements, as specified in section 161(a) of the Act.

(Implements Sec. 161(a); 20 U.S.C. 2391.)

(12) The State board shall also assure that students served by Indian tribal organizations applying for or receiving funds under the Commissioner's discretionary programs, under authority of section 103(a)(1)(B) of the Act, shall be afforded the opportunity to participate in vocational education programs administered by the State.

(Implements Sec. 103(a)(1)(B); 20 U.S.C. 2303.)

DEVELOPMENT OF FIVE-YEAR STATE PLAN

§ 104.161 Submission of five-year State plan.

Any State desiring to receive funds under the Act shall submit to the Commissioner a five-year State plan by:

- (a) July 1, 1977, for fiscal years 1978 through 1982; and
- (b) July 1, 1982, for fiscal years 1983 through 1987.

(Sec. 107(a)(1); 20 U.S.C. 2307.)

§ 104.162 Representation required in the development of the five-year State plan.

In formulating its five-year State plan, the State board is required to involve the active participation of a representative of:

(a) The State agency having responsibility for secondary vocational education programs, designated by that agency;

(b) The State agency, if a separate agency exists, having responsibility for postsecondary vocational education programs, designated by that agency;

(c) The State agency, if a separate agency exists, having responsibility for community and junior colleges, designated by that agency;

(d) The State agency, if a separate agency exists, having responsibility for institutions of higher education in the State, designated by that agency;

(Sec. 107(a)(1); 20 U.S.C. 2307.)

(e) A local school board or committee, as designated by the appropriate appointing authority under State law;

(Interprets Sec. 107(a)(1)(E); 20 U.S.C. 2307.)

(f) Vocational education teachers, as designated by the appropriate appointing authority under State law;

(Interprets Sec. 107(a)(1)(F); 20 U.S.C. 2307.)

(g) Local school administrators, as designated by the appropriate appointing authority under State law;

(Interprets Sec. 107(a)(1)(G); 20 U.S.C. 2307.)

(h) The State Manpower Services Council appointed under the authority of section 107(a)(2)(A)(i) of the Comprehensive Employment and Training Act of 1973, designated by that Council;

(i) The State agency or commission responsible for comprehensive planning in postsecondary education, which planning reflects programs offered by public, private nonprofit, and proprietary institutions, and includes occupational programs at a less-than-baccalaureate degree level, if a separate agency or commission exists, designated by that agency or commission; and

(j) The State advisory council on vocational education, designated by that council.

(Sec. 107(a)(1); 20 U.S.C. 2307.)

§ 104.163 Meetings of participating representatives.

The State board shall convene, as a group, the representatives of the agencies, councils, and individuals specified in § 104.162 for at least four meetings during the development of the five-year State plan. These meetings will be convened to accomplish the following purposes:

(a) First meeting: To plan for the development of the first draft of the five-year State plan;

(b) Second meeting: To consider the first draft of the five-year State plan;

(c) Third meeting: To consider the draft of the five-year State plan after it has been rewritten to reflect the results of the second meeting of the planning group; and

(d) Fourth meeting: To recommend for adoption the final five-year State plan.

(Sec. 107(a)(1); 20 U.S.C. 2307.)

§ 104.164 State board adoption of the five-year State plan.

(a) If the participating agencies, councils, and individuals are not able to agree upon the provisions of the five-year State plan, the State board will make a final decision.

(b) In accordance with § 104.171(b)(1), the State board shall include in the five-year State plan:

(1) Any recommendation which is rejected by the State board indicating its source (i.e., the name of the individual and agency or council affiliation); and

(2) The reasons of the State board for rejecting the recommendation.

(Sec. 107(a)(1); 20 U.S.C. 2307.)

§ 104.165 Public hearings on the five-year State plan.

(a) In formulating the five-year State plan, the State board is required to conduct a series of public hearings. This series of public hearings shall be conducted:

(1) During the development, prior State plan;

(2) After giving sufficient public notice; and

(3) Throughout all regions of the State.

(b) The purpose of these public hearings is to provide the opportunity for all segments of the population of the State to give their views on:

(1) The goals which ought to be adopted in the State plan;

(2) The programs to be offered under the State plan;

(3) The allocation of responsibility for programs (courses) among the various levels of education and among the various institutions of the State; and

(4) The allocation of local, State, and Federal resources to meet these goals.

(c) In accordance with § 104.171(d), the State board shall include in the five-year State plan:

(1) The views expressed at the public hearings or comments submitted in writing;

(2) A description of how these views are reflected in the provisions of the five-year State plan; and

(3) The reasons for rejecting any view which is not accepted for inclusion in the five-year State plan.

(Sec. 107(a)(2); 20 U.S.C. 2307.)

§ 104.171 Certification of plans.

As used in this section, the term "plans" refers to the five-year State plan and the annual program plan and accountability report. The plans submitted shall include, as attachments, the following certifications:

(a) *Certification by the State attorney general.* The State attorney general, or other official designated in accordance with State law to advise the State board on legal matters, shall certify that the State board named in the plan is the sole agency which has authority under State law to submit the plan and to administer or supervise the administra-

tion of vocational education, and that all the plan's provisions with respect to the use of funds under the Act can be carried out by the State.

(Implements Sec. 104(a)(1); 20 U.S.C. 2304.)

(b) *Certification of involvement of designated agencies.*

(1) The State board shall certify that each of the agencies, councils, and individuals required in § 104.162 has been afforded the opportunity to be involved. The State board shall include in this certification all recommendations rejected by the Board, complete identification of the agency, council, or individual having made the rejected recommendation and the reasons for rejecting these recommendations, as required by § 104.164(b). This certification shall also indicate the meetings held under the authority of § 104.163.

(2) Each representative required in § 104.162 shall certify that he or she has had the opportunity to participate actively in formulating the plan.

(Implements Secs. 104(a)(3), 107(a)(1); 20 U.S.C. 2304, 2307.)

(c) *Certification of delegation.* The State board shall certify any delegation by the State board of responsibilities for administration, operation, or supervision of vocational education programs to other appropriate State agencies. The statement shall set forth the procedures used for delegation, the specific responsibilities delegated, and the specific agency or agencies involved.

(Implements Sec. 104(a)(2); 20 U.S.C. 2304.)

(d) *Certification of public hearings.* The State board shall certify the method used to provide reasonable notice and opportunity for public hearings throughout all regions of the State in order to permit all segments of the population to give their views on the goals for vocational educational which ought to be adopted in the plan in terms of the elements listed in §§ 104.165(b) and 104.207(b). The statement shall also include the views expressed at the hearings and a description of how those views are reflected in the plan. If any views are not reflected, the statement shall set out the reasons for rejecting them.

(Implements Secs. 107(a)(2), 108(a)(2); 20 U.S.C. 2307, 2308.)

(e) *Certification of local advisory councils.* The State board shall certify that eligible recipients within the State have been notified of their responsibility to establish local advisory councils. The State board shall also certify that eligible recipients receiving assistance under the Act to operate vocational education programs have established these councils.

(Implements Sec. 105(g); 20 U.S.C. 2305.)

(f) *Certification of consultation with State advisory council.* The State advisory council shall certify that the plan was prepared in consultation with the council.

(Implements Sec. 105(d); 20 U.S.C. 2305.)

(g) *Certification by full-time personnel of opportunity to review the plans.*

The personnel assigned full time to review programs within the State to assure equal access to vocational education by both men and women shall certify that the opportunity to review the plan has been afforded.

(Implements Sec. 109(a)(3)(B); 20 U.S.C. 2309.)

(h) *Certification of adoption by State board.* The State board shall certify that development of the plan has been coordinated with the agencies, councils, and individuals as required by § 104.162 and that the final decision has been adopted by the State board, and that the plan constitutes the basis for operation and administration of the State's vocational education program.

(Implements Sec. 104(a)(1); 20 U.S.C. 2304.)

§ 104.181 *Content of five-year State plan.*

The State board shall submit the five-year State plan to the Commissioner, through the appropriate HEW Regional Office, by the July 1st preceding the beginning of the first fiscal year for which the plan is to take effect. The plan shall be composed of the following two parts:

(a) Procedures for carrying out certain assurances of the general application as required in § 104.182; and

(b) Program provisions as required in §§ 104.183 through 104.188.

(Sec. 107(b); 20 U.S.C. 2307.)

§ 104.182 *Procedures to assure compliance with the general application.*

The State board in its five-year State plan shall:

(a) Describe the information which the State board will require in local applications in order to meet the requirements of § 104.141(f)(4);

(Sec. 106(a)(4); 20 U.S.C. 2306.)

(b) Describe the procedures for affording eligible recipients reasonable notice of an opportunity for a hearing, for conducting the hearing, for providing a written record of the hearing, and for informing the recipient in writing of the decisions and reasons therefor;

(Implements Sec. 106(a)(4); 20 U.S.C. 2306.)

(c) Describe how the State board, for purposes of giving priority to applications, determines:

(1) Economically depressed areas and areas with high rates of unemployment which are unable to provide the resources necessary to meet the vocational education needs without Federal assistance; and

(2) Programs new to the area which are designed to meet new and emerging manpower needs and job opportunities in the area (and, where relevant, in the State and Nation);

(Implements Sec. 106(a)(5)(A); 20 U.S.C. 2306.)

(d) Describe the policies and procedures by which the State board determines how the amount of funds available under this Act will be made avail-

able to those applicants approved for funding, using the factors specified in § 104.141(f)(5)(B);

(Sec. 106(a)(5)(B); 20 U.S.C. 2306.)

(e) Set forth the policies and procedures instituted for public disclosure in accordance with § 104.141(f)(9); and

(Sec. 106(a)(9); 20 U.S.C. 2306.)

(f) Describe the procedures for insuring that funds for vocational programs for handicapped persons are used in a manner consistent with § 104.141(f)(10). The statement shall describe how the program provided each handicapped child will be planned and coordinated in conformity with and as a part of the child's individualized educational program as required by the Education of the Handicapped Act.

(Sec. 106(a)(10); 20 U.S.C. 2306.)

§ 104.183 *Assessment of employment opportunities.*

(a) The five-year State plan shall include an assessment of current and future needs for workers (job skills) within the State and, where appropriate, within the pertinent region of the country.

(b) This assessment shall reflect the latest available data of present and projected employment, including the data available from the State occupational information coordinating committee.

(Sec. 107(b)(1); 20 U.S.C. 2307.)

§ 104.184 *Goals to meet employment needs.*

The five-year State plan shall describe clearly the goals the State will seek to achieve with respect to its needs for workers identified in § 104.183 by the end of the five-year period covered by the five-year State plan. This description shall be in terms of the following four elements and shall include the reasons for choosing these elements:

(a) The programs (courses) and other training opportunities to be offered to meet the needs identified in § 104.183; (For the purposes of this part, the term "program" refers to OE instructional programs, as defined by the Office of Education in *Handbook VI, Standard Terminology for Curriculum and Instruction in Local and State School Systems* (1970), and means a planned sequence of courses, services, or activities designed to meet an occupational objective.)

(b) The projected enrollments of these programs and training opportunities;

(c) The allocations of responsibility for the offerings of those programs and training opportunities among the secondary, postsecondary, and adult levels of education and among the various types of institutions of the State; and

(d) The allocations of all local, State, and Federal financial resources available in the State for the programs and training opportunities among the secondary, postsecondary, and adult levels of education and among the various types of institutions of the State.

(Sec. 107(b)(2); 20 U.S.C. 2307.)

§ 104.185 *Funding to meet employment needs.*

(a) The five-year State plan shall set forth precisely the planned uses of Federal, State, and local education funds for each fiscal year of the State plan;

(b) The five-year State plan shall indicate how this allocation of funds will meet the goals identified in § 104.184;

(c) The description of the planned uses of funds shall be in terms of the four elements of § 104.184 (this does not require duplication of § 104.184(d));

(Sec. 107(b)(3)(A); 20 U.S.C. 2307.)

(d) The five-year State plan shall indicate the planned uses of funds under section 120(b)(1)(O) and section 130(b)(7) of this Act for:

(1) State administration;

(2) Local administration; and

(Implements Sec. 107(b)(3)(A); 20 U.S.C. 2307.)

(e) The five-year State plan shall set forth the reasons for choosing these particular uses of funds, except that the State will continue to use approximately the same amount of its State grant under subpart 2 (basic grant) of this part for programs in secondary schools during fiscal years 1978 and 1979 as it used during fiscal years 1975 and 1976, unless the State is able to demonstrate in its five-year State plan the need to shift funds from that use.

(Sec. 107(b)(3)(A); 20 U.S.C. 2307.)

§ 104.186 *Funding to meet program (purpose) needs.*

(a) The five-year State plan shall set forth precisely the intended uses of funds under the Act for:

(1) Basic grant programs in § 104.501;

(2) Program improvement and supportive services in § 104.701;

(3) Special programs for the disadvantaged in § 104.801 (funded under section 102(b) of the Act); and

(4) Consumer and homemaking education in § 104.901 (funded under section 102(c) of the Act).

(b) The five-year State plan shall set out the reasons for choosing the uses described in paragraph (a) of this section.

(c) The five-year State plan shall set forth precisely the intended uses of Federal funds, in accordance with the minimum percentages in §§ 104.312 and 104.313 to meet the special needs of:

(1) Handicapped persons;

(2) Disadvantaged persons; and

(3) Persons of limited English-speaking ability.

(d) The five-year State plan shall also set forth the intended allocation of State and local funds, in accordance with the matching requirements in § 104.303, to meet the special needs of:

(1) Handicapped persons;

(2) Disadvantaged persons; and

(3) Persons of limited English-speaking ability.

(Implements Secs. 107(b)(3)(B), 110(a), (b); 20 U.S.C. 2307, 2310.)

§ 104.187 *Policies for eradicating sex discrimination.*

(a) The five-year State plan shall set forth a detailed description of policies and procedures which the State will follow to assure equal access to vocational education programs by both women and men.

This description shall include:

(1) Actions to be taken to overcome sex discrimination and sex stereotyping in all State and local vocational education programs;

(2) Incentive adopted by the State for eligible recipients to:

(i) Encourage the enrollment of both women and men in nontraditional courses of study; and

(ii) Develop model programs to reduce sex bias and sex stereotyping in training for and placement in all occupations.

(b) The five-year State plan shall set forth a program to assess and meet the needs of persons described in § 104.621. This program shall include:

(1) Special courses for these persons to learn how to seek employment; and

(2) Placement services for these persons once they complete the vocational education program.

(Sec. 107(b)(4); 20 U.S.C. 2307.)

§ 104.188 *Coordination between manpower training programs and vocational education programs.*

The five-year State plan shall describe the mechanism established for coordinating vocational education programs with manpower training programs conducted by prime sponsors under the Comprehensive Employment and Training Act (CETA), Pub. L. 93-203, and vocational education programs assisted under this Act. This description shall include the criteria developed to avoid duplication of programs under this Act and CETA.

(Sec. 107(b)(5); 20 U.S.C. 2307; Sen. Rept. 94-882; p. 68.)

DEVELOPMENT OF ANNUAL PROGRAM PLAN AND ACCOUNTABILITY REPORT

§ 104.202 *Due date of annual program plan.*

For each fiscal year, the annual program plan is due by the July 1st preceding the beginning of the applicable fiscal year. For example, the first annual program plan is required for fiscal year 1978 and is due in the appropriate HEW Regional Office by July 1, 1977.

(Sec. 108(b); 20 U.S.C. 2308.)

§ 104.203 *Due date of annual accountability report.*

For each fiscal year, the annual accountability report is due by the July 1st following the completion of the applicable fiscal year. For example, the first annual accountability report is required for fiscal year 1978 and is due in the appropriate HEW Regional Office by July 1, 1979.

(Sec. 108(b); 20 U.S.C. 2308.)

§ 104.204 *Representation required in the development of the annual program plan and accountability report.*

In formulating the annual program plan and accountability report for any given fiscal year, the State board is required to involve the active participation of a representative of each group set forth in § 104.162 (a) through (j).

(Secs. 107(a)(1), 108(a)(1); 20 U.S.C. 2307, 2308.)

§ 104.205 *Meetings of participating representatives.*

The State board shall convene, as a group, the representatives of the agencies, councils, and individuals specified in § 104.204 for at least three meetings during each fiscal year. These meetings will be convened to accomplish the following purposes:

(a) First meeting: To plan for the development of the first draft of the annual program plan and the accountability report;

(b) Second meeting: To consider the draft of the annual program plan and accountability report;

(c) Third meeting: To recommend for adoption the final annual program plan and accountability report.

(Sec. 108(a)(1); 20 U.S.C. 2308.)

§ 104.206 *State board adoption of the annual program plan and accountability report.*

(a) If the participating agencies, councils, and individuals are not able to agree upon the provisions of the annual program plan or the accountability report, the State board will make a final decision.

(b) The State board shall include in the annual program plan or, as appropriate, in the accountability report:

(1) Any recommendation which is rejected by the State board indicating its source (including the name of the individual and agency or council affiliation); and

(2) The reasons of the State board for rejecting the recommendation.

(Sec. 108(a)(1); 20 U.S.C. 2308.)

§ 104.207 *Public hearing on the annual program plan and accountability report.*

(a) In formulating the annual program plan and accountability report, the State board is required to conduct a public hearing. This public hearing shall be conducted:

(1) During the development, prior to adoption of the annual program plan and accountability report; and

(2) After giving sufficient public notice.

(b) The purpose of this public hearing is to provide an opportunity for all segments of the population of the State to give their views on:

(1) The goals which ought to be adopted in the annual program plan;

(2) The programs to be offered under the annual program plan;

(3) The allocation of responsibility for programs among the various levels of education and among the various institutions of the State; and

(4) The allocation of local, State, and Federal resources to meet these goals. (Interprets Sec. 108(a)(2); 20 U.S.C. 2308.)

(c) The State board shall include in the annual program plan or, as appropriate, in the accountability report:

(1) The views expressed at the public hearing or comments submitted in writing;

(2) A description of how these views are reflected in the provisions of the annual program plan or the accountability report; and

(3) The reasons for rejecting any view which is not accepted for inclusion in the annual program plan or accountability report.

(Sec. 108(a)(2); 20 U.S.C. 2308.)

§ 104.221 Content of annual program plan for fiscal year 1978.

A five-year State plan which includes the program provisions in §§ 104.183 through 104.186 on a year-by-year basis will meet the requirements of the Act for the annual program plan, except that in addition to the planned uses of funds in § 104.186, the plan shall also set out precisely the proposed distribution of such funds among eligible recipients, together with an analysis of the manner in which such distribution complies with the assurance given in the general application and in accordance with the policies and procedures in § 104.182(d).

(Interprets 108(b)(1); 20 U.S.C. 2308.)

§ 104.222 Content of annual program plans for the fiscal years following 1978.

The plan shall contain: (a) Any updating of the five-year State plan, as submitted under §§ 104.183 and 104.184, considered necessary to reflect later or more accurate employment data or a different level of funding than was anticipated;

(b) A description of how the uses of funds proposed for the fiscal year in § 104.185 will be complied with or changed (in light of anticipated appropriations) and the reasons for the changes;

(c) A description of how the uses of funds under the Act proposed for the fiscal year in § 104.186 will be complied with or changed (in light of anticipated appropriations) and the reasons for the changes;

(d) A description of how funds used in (b) and (c) will comply with the minimum percentages, matching, and maintenance of effort requirements in § 104.301;

(e) The additional provisions set forth in § 104.221;

(f) The results of the:

(1) Coordination of programs funded under this Act and manpower training programs;

(2) Compliance of the State plan with the provisions contained in § 104.187 concerning providing equal access to

programs by both men and women; and

(3) Participation of local advisory councils required to be established under § 104.171(e).

(Implements Sec. 108(b)(1); 20 U.S.C. 2308.)

§ 104.241 Content of the accountability report.

(a) The accountability report shall:

(1) Show the extent to which the State, during the fiscal year preceding the submission of the report, has achieved the goals of the approved five-year State plan, including a description in terms of the elements in § 104.184;

(2) Show the degree to which proposed uses of Federal, State, and local funds in § 104.222(b) have been complied with, including a description in terms of the elements in § 104.185;

(3) Show in detail how the funds used in § 104.222(d) complied with the minimum percentage, matching, and maintenance of effort requirements in § 104.301;

(Implements Sec. 108(b)(2)(A).)

(4) Show in detail how funds under the Act allocated for programs in § 104.186 have been used during the fiscal year, including:

(i) A description of uses of funds as set out in §§ 104.222(c);

(ii) A description of the distribution of funds available for these sections among local educational agencies and other eligible recipients in conformity with § 104.222(e); and

(iii) The results achieved by the uses of these funds.

(Sec. 108(b)(2)(B); 20 U.S.C. 2308.)

(b) The accountability report shall contain:

(1) A summary of the evaluation of programs conducted by the State in accordance with §§ 104.402 and 104.404; and

(2) A description of how the evaluation information has been used to improve the State's programs of vocational education, including consideration given to each recommendation in the evaluation report of the State advisory council for vocational education.

(Sec. 108(b)(2)(C); 20 U.S.C. 2308.)

APPROVAL OF FIVE-YEAR STATE PLAN AND ANNUAL PROGRAM PLAN AND ACCOUNTABILITY REPORT

§ 104.261 Conditions for approval of five-year State plan.

The Commissioner will not approve a five-year State plan until the Commissioner:

(a) Makes specific findings in writing as to the compliance of the five-year State plan with the provisions of the Act and applicable regulations;

(b) Makes a determination that adequate procedures are set forth, in accordance with § 104.182, to insure that assurances of the general application will be carried out;

(c) Makes a determination that adequate procedures are set forth in the five-year State plan to insure that the provisions of the plan will be carried out;

(Sec. 109(a)(1); 20 U.S.C. 2309.)

(d) Has received assurances that the full-time personnel assigned to review programs within the State to assure equal access by both men and women have been afforded the opportunity to review the five-year State plan; and

(Sec. 109(a)(3)(B); 20 U.S.C. 2309.)

(e) Makes a determination that the State has complied in preparing the five-year State plan with the nationally uniform definitions and information elements which have been developed under the authority of section 161 of the Act.

(Sec. 109(a)(3)(C); 20 U.S.C. 2309.)

§ 104.262 Conditions for approval of annual program plan and accountability report.

The Commissioner will not approve an annual program plan and accountability report until the Commissioner:

(a) Makes specific findings in writing as to the compliance of the annual program plan and accountability report with the provisions of the Act and applicable regulations;

(b) Makes a determination that adequate procedures are set forth to insure that the assurances of the general application will be carried out;

(c) Makes a determination that adequate procedures are set forth in the annual program plan and accountability report to insure that the provisions of the plan will be carried out;

(d) Makes a determination that the annual program plan and accountability report show progress in achieving the goals set forth in the approved five-year State plan;

(Sec. 109(a)(2); 20 U.S.C. 2309.)

(e) Has received assurances that the full-time personnel assigned to review programs within the State to assure equal access by both men and women have been afforded the opportunity to review the annual program plan and accountability report; and

(Sec. 109(a)(3)(B); 20 U.S.C. 2309.)

(f) Makes a determination that the State has complied in preparing the annual program plan and accountability report with the nationally uniform definitions and information elements which have been developed under the authority of section 161 of the Act.

(Sec. 109(a)(3)(C); 20 U.S.C. 2309.)

§ 104.263 Notice of approval or disapproval.

After reviewing the five-year State plan, the annual program plan, and the accountability report, the Commissioner will notify the State board, in writing, of the granting or withholding of approval.

(Sec. 109(a), (b); 20 U.S.C. 2309.)

WITHHOLDING OF APPROVAL OF PLAN

§ 104.271 Disapproval of plan.

The Commissioner:

(a) Will not finally disapprove a State plan without first affording the State

board reasonable notice and opportunity for a hearing;

(Sec. 109(b)(1); 20 U.S.C. 2309.)

(b) Will not disapprove a State plan solely on the basis of the distribution of State and local expenditures for vocational education;

(Sec. 109(b)(2); 20 U.S.C. 2309.)

(c) Will give at least fifteen (15) work days written notice of the disapproval of a plan or disapproval of the method by which the State is administering the plan; and

(Implements Sec. 109(c); 20 U.S.C. 2309.)

(d) Will hold the hearing within the State.

(Sec. 109(b)(1); 20 U.S.C. 2309.)

HEARINGS BEFORE THE COMMISSIONER ON AGENCY OR COUNCIL CHALLENGES TO THE FIVE-YEAR STATE PLAN OR THE ANNUAL PROGRAM PLAN

§ 104.281 Opportunity for a hearing.

(a) Sections 107 and 108 of the Act require the Commissioner to provide an opportunity for a hearing to certain agencies and councils which may be dissatisfied with any final decision of the State board with respect to the proposed five-year State plan or the annual program plan filed with the Commissioner.

(b) The agencies and councils which may request a hearing are those agencies and councils set forth in § 104.162 (a) through (d), and (h) through (j). A representative of an agency or council may not request a hearing in his or her individual capacity.

(Secs. 107(a), 108(a); 20 U.S.C. 2307; 2308.)

(c) An agency or council may appeal to the Commissioner only:

(1) Matters which the agency or council has recommended to the State board for inclusion in the five-year State plan or annual program plan which the State board has not accepted (§ 104.164); or

(2) The State board's failure to follow the section 107 and section 108 process as to that agency or council.

(Interprets Sec. 107(a), 108(a), 20 U.S.C. 2307, 2308.)

§ 104.282 Appeal to the Commissioner.

(a) If a hearing is to be requested, the notice of appeal shall be in writing, addressed to the Commissioner and to the State board, and mailed by registered mail no later than fifteen (15) work days after the notification in writing has been received by the agency or council that the recommendations of the agency or council have been disapproved by the State board.

(b) Pending resolution of the matter for which a hearing has been requested, the five-year State plan or annual program plan submitted by the State board, if in substantially approvable form, may be conditionally approved by the Commissioner and may be conditionally deemed the operative plan.

(Implements Secs. 107(a), 108(a); 20 U.S.C. 2307, 2308.)

§ 104.283 Hearing.

(a) The Commissioner may delegate authority to an employee of the Office of Education to be the hearing officer. The hearing officer shall take testimony, consider the arguments of the parties, make findings of fact, make conclusions of law, and make recommendations to the Commissioner.

(b) The hearing officer shall give each party at least fifteen (15) work days notice of the time, place, and purpose of the hearing.

(c) The fifteen (15) work days notice of time and place of the hearing may be reduced or waived if all parties agree.

(d) The hearing may take place in Washington, D.C., or within the State whose agency or council is appealing, at the option of the requesting party and with the hearing officer's approval.

(e) The hearing officer may adjourn the hearing to a more satisfactory time or place on the motion of the hearing officer or on motion of a party.

(f) A record shall be kept of the hearing. The record may be taken by shorthand, stenotype, or mechanical or electrical means, and shall be transcribed.

(Implements Sec. 107(a)(1); 20 U.S.C. 2307.)

§ 104.284 Prehearing.

(a) The hearing officer may require a prehearing conference.

(b) The prehearing conference shall be conducted in an informal manner for the purpose of:

(1) Simplification of the issues;

(2) Exchange of documents;

(3) Stipulation of facts;

(4) Deciding on procedures at the hearing; and

(5) Such other matters as may properly be dealt with to aid in expediting the orderly conduct or disposition of the hearing.

(Implements Sec. 107(a)(1); 20 U.S.C. 2307.)

§ 104.285 Right to counsel, witnesses, cross examination.

(a) The parties shall have the right to be represented by counsel.

(b) The parties may offer evidence by witnesses appearing in person.

(c) Where a witness appears in person, the other party shall have the right to cross examine the witness.

(d) If a witness is unable to appear in person, documentary evidence or affidavits may be accepted in lieu of personal appearance. Affidavits shall be given only the probative value of a sworn statement which has not been subjected to cross examination.

(Implements Sec. 107(a)(1); 20 U.S.C. 2307.)

§ 104.286 Evidence and standard of evidence.

(a) Formal rules of evidence do not apply. The hearing officer shall restrict the admission of evidence to that which is material and relevant.

(b) The hearing officer may request additional evidence.

(c) Findings of fact shall be supported by substantial evidence. "Substantial evidence," for the purpose of this hearing, means such relevant evidence as a rea-

sonable mind might accept to support a conclusion. (305 U.S. 197, 229 (1938).)

(Implements Sec. 107(a)(1); 20 U.S.C. 2307.)

§ 104.287 Determinations to be made by the hearing officer.

(a) The hearing officer shall determine, with reference to the matters subject to appeal (§ 104.218(c)):

(1) Whether the procedural requirements of the Act have been fulfilled;

(2) Whether the decisions of the State board as set forth in the five-year State plan or the annual program plan are in accordance with the law;

(3) Whether the decisions of the State board in the five-year State plan or the annual program plan are based on substantial evidence; and

(4) Whether the State board's decisions in the five-year State plan or the annual program plan best carry out the purposes of the Act.

(Sec. 107(a)(1); 20 U.S.C. 2307.)

(b) Where the hearing officer decides that the State board has conformed with the provisions of paragraphs (a), (1), (2), and (3) of this section the hearing officer shall issue findings of fact to that effect.

(c) Where the hearing officer decides that the five-year State plan or the annual program plan will best carry out the purposes of the Act, the hearing officer shall recommend a finding for the State board.

(d) Where the hearing officer decides that the State board has not conformed with the provisions of paragraphs (a), (1), (2), and (3) of this Section or that the five-year State plan or the annual program plan will not best carry out the purposes of the Act, the hearing officer shall recommend that the plan not be approved.

(Implements Sec. 107(a)(1); 20 U.S.C. 2307.)

§ 104.288 Commissioner's decision.

(a) The findings of fact and recommendation of the hearing officer shall be conveyed to the parties and to the Commissioner.

(b) The findings and recommendation of the hearing officer shall become the findings and decision of the Commissioner unless the Commissioner reverses the hearing officer's findings or recommendation, in whole or in part, within fifteen (15) work days after the date the hearing officer conveys his or her findings and recommendation to the Commissioner.

(Implements Sec. 107(a)(1); 20 U.S.C. 2307.)

(c) The Commissioner may not unilaterally change a five-year State plan or annual program plan. The Commissioner shall approve a plan or disapprove a plan in its entirety and return it to the State board for revision.

(Implements Sec. 107(a)(1); 20 U.S.C. 2307; Conf. Rept. No. 94-1701, pp. 216, 217.)

§ 104.289 Appeal by State board, or agency to the court of appeals.

A State board, or agency dissatisfied with a final action of the Commissioner

under section 107(a)(1) of the Act may appeal to the United States court of appeals for the circuit in which the State is located in accordance with the procedure specified in section 434(d)(2) of GEPA.

(Implements Sec. 107(a)(1); 20 U.S.C. 1232c.)

SUSPENSION AND TERMINATION OF PAYMENTS FOR NONCOMPLIANCE

§ 104.291 Suspension and termination of payments for noncompliance.

Suspension and termination of payments for noncompliance shall be in accord with section 434(c) of GEPA. Section 434(c) of GEPA reads as follows:

(c) Whenever the Commissioner, after reasonable notice and an opportunity for hearing, finds that there has been failure, by any recipient of funds under any applicable program, to comply substantially with terms to which such recipient has agreed in order to receive such funds, the Commissioner shall notify such recipient that further payments will not be made to such recipient under that program until he is satisfied that such recipient no longer fails to comply with such terms. Until the Commissioner is so satisfied, no further payments shall be made to such recipient. Pending the outcome of any termination proceeding initiated under this paragraph, the Commissioner may suspend payments to such recipient, after such recipient has been given reasonable notice and opportunity to show cause why such action should not be taken.

(Sec. 109(f)(1); 20 U.S.C. 2309, 1232c.)

APPEAL TO THE COURTS

§ 104.292 Appeal by State board on withholding of approval of State plan.

A State board which is dissatisfied with the final action of the Commissioner after an appeal to the Commissioner on withholding of approval of a State plan may appeal to the appropriate United States court of appeals as provided in section 109(d) of the Act.

(Sec. 109(d); 20 U.S.C. 2309.)

§ 104.293 Appeal by eligible recipients to the court of appeals.

An eligible recipient dissatisfied with the final action of the State board (or other appropriate State administrative agency) with respect to approval of an application by such eligible recipient for a grant under this Act may appeal to the appropriate United States court of appeals as provided in section 109(e) of the Act.

(Sec. 109(e); 20 U.S.C. 2309.)

FISCAL REQUIREMENTS

FEDERAL SHARE

§ 104.301 Application of Federal requirements.

(a) Federal vocational education funds shall be used solely to carry out the purposes of the Vocational Education Act and the regulations in this part. All expenditures of Federal funds are subject to the conditions and requirements of the Act and regulations.

(Interprets Sec. 111(a); 20 U.S.C. 2311.)

(b) Federal funds shall be used to share only in expenditures which are made in accordance with: (1) Assurances of the general application; (2) Five-year State plan; and (3) Annual program plan.

(Interprets Sec. 111(a); 20 U.S.C. 2311.)

(c) State and local funds which are applied to the matching requirements and maintenance of efforts requirements of the Act are subject to the conditions and requirements of the Act, regulations, and five-year State plan and annual program plan. This means that every program or activity supported in whole or in part by State or local funds which are used to match Federal funds must meet the same conditions and requirements as those supported by Federal funds.

(Interprets Sec. 111(a); 20 U.S.C. 2311; 20 U.S.C. 19.)

(d) Only actual expenditures of State and local funds shall be accepted as part of the State's matching and maintenance of effort requirements. This means that in-kind contributions shall not be used as part of the State's matching and maintenance of effort requirements. Requirements of 45 CFR 100b.92(b) of GEPR shall not apply to this program.

(Interprets Sec. 111(a); 20 U.S.C. 2311, 20 U.S.C. 19.)

§ 104.302 Federal share of expenditures—annual program plan.

(a) The Commissioner will pay to each State from the funds available under Section 102(a) an amount not to exceed 50 percent of the cost of carrying out its annual program plan.

(b) The State's matching share of expenditures under the annual program plan may be on a state-wide basis.

(c) Except for the fiscal requirements for the national priority programs described in § 104.303, State administration described in § 104.306, and local administration described in § 104.307, it is not necessary that Federal funds be matched by non-Federal funds for each purpose and program under the Act.

(Interprets Sec. 111(a); 20 U.S.C. 2311.)

§ 104.303 Federal share of expenditures—national priority programs.

(a) The Commissioner will pay to each State an amount not to exceed 50 percent of the excess cost (i.e., costs of special educational and related services above the costs for non-handicapped students) of programs, services, and activities under the basic grant in subpart 2 and program improvement and supportive services in subpart 3 for handicapped persons.

(b) The Commissioner will pay to each State an amount not to exceed 50 percent of:

(1) The excess cost (i.e., costs of special educational and related services above the costs for non-disadvantaged persons) of programs, services, and ac-

tivities under the basic grant in subpart 2 and program improvement and supportive services in subpart 3 for disadvantaged persons (other than handicapped persons);

(2) The excess cost (i.e., costs of special education and related services above the costs for persons who are not classified as persons of "limited English-speaking ability") of programs, services, and activities under the basic grant in subpart 2 and program improvement and supportive services in subpart 3 for persons who have limited English-speaking ability; and

(3) Stipends for students entering or already enrolled in vocational education programs who have acute economic needs which cannot be met under work-study programs.

(c) The Commissioner will pay to each State an amount not to exceed 50 percent of the cost of programs, services, and activities under the basic grant in subpart 2 and program improvement and supportive services in subpart 3 for:

(1) Postsecondary programs for: (i) Persons who have completed or left high school; (ii) who are enrolled in organized programs of study for which credit is given toward and associate or other degree; and (iii) who are not enrolled in programs designed as baccalaureate or higher degree programs; and

(2) Adult programs for: (i) Persons who have already entered the labor market; (ii) persons who are unemployed;

or (iii) persons who have completed or left high school and who are enrolled in organized programs of study for which credit is not given toward an associate or other degree.

(Sec. 110; 20 U.S.C. 2310.)

§ 104.304 Allowable expenditures for vocational education for national priority programs.

A State shall use the funds allotted for national priority programs under section 110 of the Act only for expenditures which are attributable to vocational education programs, services, and activities described in § 104.303.

(Section 110; 20 U.S.C. 2310; 45 CFR 100, App. B, Part II.)

§ 104.305 Federal share of expenditures—100 percent payments.

(a) The Commissioner will pay to each State an amount up to 100 percent of the cost of:

(1) Cooperative vocational education programs which include students enrolled in nonprofit private schools pursuant to section 122(f) of the Act;

(2) Exemplary and innovative programs which include students enrolled in nonprofit private schools pursuant to section 132(b) of the Act; and

(3) Special programs for disadvantaged persons in areas of the State which have high concentrations of youth unemployment or school dropouts under section 140 of the Act.

(b) The Commissioner will pay to the Trust Territory of the Pacific Islands, the Northern Mariana Islands, Guam,

§ 104.307 Federal share of expenditures—local administration.

(a) The Commissioner will pay, from the funds allotted pursuant to section 102(a) of the Act, a part of the costs of supervision and administration of vocational education programs carried out by an eligible recipient.

(b) The eligible recipient shall use either the method set forth in subparagraph (1) or subparagraph (2) of this paragraph in determining the payment of local administrative costs.

(1) The percentage of Federal funds used by an eligible recipient for the costs of supervision and administration of vocational education programs may be no greater than the percentage of Federal funds used to support the total vocational education program carried out by the eligible recipient. For example, the total cost of the vocational education program of the eligible recipient is \$100,000 and the Federal contribution to this eligible recipient is \$25,000, or 25 percent of the total. If local administrative costs are \$10,000, then up to 25 percent of this amount, or \$2,500, may be charged against the Federal funds.

(2) Up to 50 percent of the cost of supervision and administration of the vocational education program of the eligible recipient may be charged to the Federal funds: *Provided*, That State funds match the Federal funds dollar for dollar. State funds used to match Federal funds shall be specifically made available for the purpose of local administration. For example, if the total cost of local administration is \$10,000, then up to \$5,000 may be charged to the Federal funds as long as the State contributes the same amount from a specific State appropriation.

(c) The State shall use the following computation in determining the amount of Federal funds available for the costs of local supervision and administration:

(1) Not more than 80 percent of the total amount used for supervision and administration by eligible recipients shall be made from the basic grant in subpart 2.

(2) Not more than 20 percent of the total amount used for supervision and administration by eligible recipients shall be made from program improvement and supportive services in subpart 3.

(d) The computation in paragraph (c) of this section does not require the State to use administrative funds in an 80/20 ratio between subpart 2 and subpart 3 activities. The State may use its administrative funds in whatever proportion best meets its needs.

(Interprets Sec. 111(a); 20 U.S.C. 2311.)

MINIMUM PERCENTAGES

§ 104.311 Percentage requirements with respect to State distribution of Federal funds.

The minimum percentages set forth in §§ 104.312, 104.313, and 104.314 are applicable to each State's allotment under section 102(a) of the Act.

(Interprets Sec. 110(a); 20 U.S.C. 2310.)

§ 104.312 Minimum percentage for the handicapped.

The State shall expend at least 10 percent of the allotment under section 102(a) of the Act for vocational education for handicapped persons as described in § 104.303(a). The State shall use these funds to the maximum extent possible to assist handicapped persons to participate in regular vocational education programs.

(Sec. 110(a); 20 U.S.C. 2310.)

§ 104.313 Minimum percentage for the disadvantaged.

(a) The State shall expend at least 20 percent of the section 102(a) allotment, subject to the conditions of paragraph (b), for the following purposes:

(1) Vocational education for disadvantaged persons (other than handicapped persons) as described in § 104.303(b)(1);

(2) Vocational education for persons who have limited English-speaking ability as described in § 104.303(b)(2); and

(3) Stipends for students entering or already enrolled in vocational education programs who have acute economic needs which cannot be met under work-study programs.

(Sec. 110(b); 20 U.S.C. 2310.)

(b) The State shall use, to the maximum extent possible, the funds expended for disadvantaged persons and persons of limited English-speaking ability to enable these persons to participate in regular vocational education programs.

(Sec. 110(d); 20 U.S.C. 2310.)

(c) The State shall use the following formula in determining its expenditures of funds under paragraph (a) of this section for vocational education for persons who have limited English-speaking ability:

(1) First determine the amount of Federal funds reserved for the purposes of paragraph (a) of this section;

(2) Determine the population having limited English-speaking ability who are between the ages of 15 and 24 inclusively;

(3) Determine the total population of the State aged 15 to 24 inclusively;

(4) Divide step two by step three;

(5) Multiply the quotient from step four by the total amount reserved for paragraph (a) of this section as indicated in step one;

(6) Expend at least this amount for vocational education for persons having limited English-speaking ability. The amount expended for this purpose shall not exceed the total amount reserved for paragraph (a) of this section.

For example, a State reserves \$500,000 for the purposes of paragraph (a) of this section. The State determines its limited English-speaking population between the ages of 15 and 24 is 10,000. The total population of the State aged 15 to 24 is 200,000. 10,000 is divided by 200,000 and the quotient is .05. \$500,000 is multiplied by .05 and the product is \$25,000. Accord-

ingly, the State expends at least \$25,000 for vocational education for persons who have limited-English speaking ability, but no more than \$500,000.

(Implements Sec. 110(b)(2); 20 U.S.C. 2310.)

§ 104.314 Minimum percentage for postsecondary and adult.

The State shall expend at least 15 percent of the section 102(a) allotment for vocational education for:

(a) Postsecondary programs for: (1) Persons who have completed or left high school; (2) Who are enrolled in organized programs of study for which credit is given toward an associate or other degree; and (3) Who are not enrolled in programs designed as baccalaureate or higher degree programs; and

(b) Adult programs for: (1) Persons who have already entered the labor market; (2) Persons who are unemployed; or (3) Persons who have completed or left high school and who are enrolled in organized programs of study for which credit is not given toward an associate or other degree.

(Sec. 110(c); 20 U.S.C. 2310.)

§ 104.315 Expenditures for programs in secondary schools.

(a) The State shall expend from its allotment for the basic grant (subpart 2) approximately the same amount of Federal funds for programs in secondary schools during fiscal years 1978 and 1979 as it had expended during fiscal years 1975 and 1976.

(b) The State shall set forth in the five-year State plan its justification for the need to shift funds in the event the projected Federal expenditures for programs in secondary schools, in either fiscal year 1978 or 1979 are not within 95 percent of the amount of Federal funds expended for programs in secondary schools during fiscal years 1975 and 1976.

(Interprets Sec. 107(b)(3)(A); 20 U.S.C. 2307.)

MAINTENANCE OF EFFORT

§ 104.321 Maintenance of fiscal effort at the State level.

A State shall maintain its fiscal effort on either a per student basis or on an aggregate basis for vocational education compared to the amount expended in the previous year.

(Sec. 111(b)(1); 20 U.S.C. 2311.)

§ 104.322 Withholding of payments.

The Commissioner will not make any payments to a State in a fiscal year unless the Commissioner finds that the fiscal effort of the State for vocational education on a per student basis or on an aggregate basis in the previous fiscal year was not less than the fiscal effort of the State on a per student basis or on an aggregate basis in the second preceding fiscal year.

(Sec. 111(b)(1); 20 U.S.C. 2311.)

§ 104.323 Five percent rule.

Total State fiscal effort for vocational education in the preceding fiscal year

shall not be considered reduced from the fiscal year effort of the second preceding fiscal year unless the per student expenditure or aggregate expenditure in the preceding year is less than that in the second preceding fiscal year by more than five percent. For example, a State which expends an aggregate of \$10 million for vocational education in one fiscal year and an aggregate of \$9,600,000 in the succeeding fiscal year will not be considered to have reduced fiscal effort for the purposes of the Vocational Education Act.

(Interprets Sec. 111(b)(1); 20 U.S.C. 2311.)

§ 104.324 Unusual circumstance rule.

Any reduction in fiscal effort for any fiscal year by more than five percent will disqualify the State from receiving Federal funds unless the State is able to demonstrate to the satisfaction of the Commissioner the following:

(a) In the preceding fiscal year, the reduction was occasioned by unusual circumstances that could not have been fully anticipated or reasonably compensated for by the State. Unusual circumstances may include unforeseen decreases in revenues due to the decline of the tax base;

(b) In the second preceding fiscal year, contributions of large sums of monies from outside sources were made; or

(c) In the second preceding fiscal year, large amounts of funds were expended for long-term purposes such as construction and acquisition of school facilities or the acquisition of capital equipment.

(Interprets Sec. 111(b)(1); 20 U.S.C. 2311.)

§ 104.325 Maintenance of fiscal effort at the local level.

A local educational agency shall maintain its fiscal effort on either a per student basis or on an aggregate basis for vocational education compared with the amount expended in the previous fiscal year.

(Sec. 111(b)(1); 20 U.S.C. 2311.)

§ 104.326 Withholding of payments.

A State shall not make payment under this Act to a local educational agency unless the State finds that the combined fiscal effort of the State and local educational agency on a per student basis or on an aggregate basis of the local educational agency and the State, was not less than the combined fiscal effort in the second preceding fiscal year.

(Sec. 111(b)(1); 20 U.S.C. 2311.)

§ 104.327 Exceptions.

The 5 percent rule applicable to the State in § 104.323 and the unusual circumstances rule in § 104.324 are also applicable to local educational agencies.

(Interprets Sec. 111(b)(1); 20 U.S.C. 2311.)

§ 104.328 Maintenance of fiscal effort by postsecondary educational institutions.

A postsecondary educational institution shall maintain its fiscal effort on

either a per student basis or on an aggregate basis for vocational education compared with the amount expended in the previous fiscal year.

(Sec. 111(b)(2); 20 U.S.C. 2311.)

§ 104.329 Withholding of payments.

A State shall not make any payment under this Act to a postsecondary educational institution unless the State finds that the fiscal effort on a per student basis or on an aggregate basis of that institution, with respect to the provision of vocational education, was not less than the fiscal effort of that institution in the second preceding fiscal year.

(Sec. 111(b)(2); 20 U.S.C. 2311.)

§ 104.330 Exceptions.

The 5 percent rule applicable to the State in § 104.323 and the unusual circumstances rule in § 104.324 are also applicable to postsecondary educational institutions.

(Interprets Sec. 111(b)(2); 20 U.S.C. 2311.)

STATE EVALUATION

§ 104.401 Purpose.

The State evaluations are to be used to assist local educational agencies and other recipients of funds in operating the best possible programs of vocational education and to improve the State's programs of vocational education.

(Sec. 112(b)(1); 20 U.S.C. 2312.)

§ 104.402 Evaluation by State board.

The State board shall, during the five-year period of the State plan, evaluate in quantitative terms the effectiveness of each formally organized program or project supported by Federal, State, and local funds. These evaluations shall be in terms of: (a) Planning and operational processes, such as:

- (1) Quality and availability of instructional offerings;
- (2) Guidance, counseling, and placement and follow-up services;
- (3) Capacity and condition of facilities and equipment;
- (4) Employer participation in cooperative programs of vocational education;
- (5) Teacher/pupil ratios; and
- (6) Teacher qualifications.

(b) Results of student achievement as measured, for example, by:

- (1) Standard occupational proficiency measures;
- (2) Criterion referenced tests; and
- (3) Other examinations of students' skills, knowledge, attitudes, and readiness for entering employment successfully.

(c) Results of student employment success as measured, for example, by:

- (1) Rates of employment and unemployment;
- (2) Wage rates;
- (3) Duration of employment; and
- (4) Employer satisfaction with performance of vocational education students as compared with performance of persons who have not had vocational education.

(d) The results of additional services, as measured by the suggested criteria un-

der paragraphs (a), (b), and (c) of this section, that the State provides under the Act to these special populations:

- (1) Women;
- (2) Members of minority groups;
- (3) Handicapped persons;
- (4) Disadvantaged persons; and
- (5) Persons of limited English-speaking ability.

(Implements Sec. 112(b)(1); 20 U.S.C. 2312.)

§ 104.403 Use of results of evaluation.

(a) The results of the evaluation shall be used as a basis to revise and improve the programs conducted under the approved five-year State plan.

(b) The State board shall make the results of the evaluations readily available to the State advisory council on vocational education.

(Sec. 112(b)(1)(A); 20 U.S.C. 2312.)

§ 104.404 Special data on completers and leavers.

(a) The State shall evaluate, using wherever possible statistically valid sampling techniques, the effectiveness of each program of vocational education which purports to teach entry-level job skills.

(b) The State shall evaluate each of these programs in order to ascertain the extent to which both those students who complete a program and those students who leave before completing a program:

- (1) Find employment in occupations related to their training; and
- (2) Are considered by their employers to be well-trained and prepared for employment.

(Sec. 112(b)(1)(B); 20 U.S.C. 2312.)

(c) The State shall use the following definitions for "program completer" and "program leaver":

(1) "Program completer" means a student who finishes a planned sequence of courses, services, or activities designed to meet an occupational objective and which purports to teach entry-level job skills; and

(2) "Program leaver" means a student who has been enrolled in and has attended a program of vocational education (which is part of a planned sequence of courses, services or activities designed to meet an occupational objective and which purports to teach entry-level job skills) and has left the program without completing it, except that no student shall be counted as a program leaver who is still enrolled in another program of vocational education. The term "program leaver" includes:

- (i) Persons who leave the program voluntarily before its formal completion because they have acquired sufficient entry-level job skills to work in the field, and who have taken a job related to their field of training; and
- (ii) All other leavers.

(d) For the purposes of this section, a State shall report separately on program completers and program leavers in accordance with the survey instructions and sampling standards to be provided by the National Center for Educational Statistics, HEW, as follows:

(1) Those who secure employment in the occupation for which they were trained or in occupations related to their vocational training, including the military;

(2) Those in paragraph (d)(1) of this section considered by their employers to be well trained and prepared for employment;

(Secs. 112(b)(1)(B), 161(a)(3)(B); 20 U.S.C. 2312, 2391.)

(3) Those who are enrolled for additional education and training; and

(4) Those in none of the above categories.

(Implements Secs. 112(b)(1)(B), 161(a)(3)(B); 20 U.S.C. 2312, 2391.)

(e) Persons who are enrolled for additional education and training shall not be counted as "leavers" in the evaluation data.

(Secs. 112(b)(1)(B), 161(a)(3)(B); 20 U.S.C. 2312, 2391.)

(f) The evaluation data on completers and leavers shall be collected at a date to be specified by the National Center for Educational Statistics, HEW.

(Implements Secs. 112(b)(1)(B), 161(a)(3)(B); 20 U.S.C. 2312, 2391.)

§ 104.405 Assurance of compatible data.

In order to assure that the data on program completers and leavers are compatible and can be aggregated and reported for all of the States, each State shall utilize in its data collection and reporting the information elements and uniform definitions which are developed for the national vocational education data reporting and accounting system, as required by section 161 of the Act.

(Sec. 161(a)(3)(B); 20 U.S.C. 2391.)

Subpart 2—Basic Grant

GENERAL PURPOSES

§ 104.501 Authorization of grants.

A State shall use its basic grant, which is equal to 80 percent of the funds allotted pursuant to section 102(a) of the Act, for the purposes set forth in § 104.502.

(Secs. 103(e), 120(a); 20 U.S.C. 2303, 2330.)

§ 104.502 Use of funds under the basic grant.

(a) The State shall expend not less than \$50,000 for each fiscal year from the funds available under the basic grant (section 120 of the Act) for the support of full-time personnel to perform the functions set forth in §§ 104.71 through 104.76.

(Sec. 104(b), 120(b)(1)(F); 20 U.S.C. 2304, 2330.)

(b) The State shall expend not less than an amount of funds it deems necessary for each fiscal year from the funds available under the basic grant (section 120 of the Act) for special programs and placement services which are tailored to meet the needs of the group identified in § 104.621. The scope of these vocational education programs is described in

§ 104.622.
(Sec. 107(b)(4)(B); 20 U.S.C. 2307.)

(c) The State may use the balance of the funds available under the basic grant (section 120 of the Act), in accordance with the approved five-year State plan and annual program plan, for any of the following purposes:

(1) Vocational education programs, described in § 104.511;

(2) Work-study programs, described in § 104.521;

(3) Cooperative vocational education programs, described in § 104.531;

(4) Energy education programs, described in § 104.541;

(5) Construction of area vocational education school facilities, described in § 104.551;

(6) Provision of stipends, described in § 104.571;

(7) Placement services for students who have successfully completed vocational education programs, described in § 104.581;

(8) Industrial arts programs, described in § 104.591;

(9) Support services for women, described in § 104.611;

(10) Day care services for children of students in secondary and postsecondary vocational education programs, described in § 104.611; and

(11) Construction and operation of residential vocational schools, described in § 104.631.

(12) Provision of vocational training through arrangements with private vocational training institutions or other existing institutions capable of carrying out vocational education programs, described in § 104.514;

(13) State administration of the five-year State plan and annual program plan, described in § 104.306; and

(14) Local supervision and administration of vocational education programs, services, and activities, described in § 104.307.

(Sec. 120(b); 20 U.S.C. 2330.)

VOCATIONAL EDUCATION PROGRAMS

§ 104.511 Use of funds.

(a) A State may use funds under its basic grant (section 120 of the Act) for vocational education programs which are described in its approved five-year State plan and annual program plan.

(b) Vocational education programs mean "organized educational programs which are directly related to the preparation of individuals for paid or unpaid employment, or for additional preparation (upgrading and retraining) for a career requiring other than a baccalaureate or advanced degree, and, for the purpose of this paragraph, the term 'organized educational program' means only instruction related to the occupation or occupations for which the students are in training or instruction necessary for students to benefit from such training, and the acquisition, maintenance, and repair of instructional supplies, teaching aids, and equipment, and the term 'vocational education' does not mean the

construction, acquisition or initial equipment of buildings, or the acquisition of rental of land."

(Secs. 120(b)(1)(A), 195(1); 20 U.S.C. 2330, 2461.)

§ 104.512 Vocational instruction.

(a) For the purposes of these regulations, vocational instruction means instruction which is designed upon its completion to prepare individuals for employment in a specific occupation or a cluster of closely related occupations in an occupational field, and which is especially and particularly suited to the needs of those engaged in or preparing to engage in such occupation or occupations.

(b) Vocational instruction may include:

- (1) Classroom instruction;
- (2) Shop, laboratory, and classroom related field work;

(3) Programs providing occupational work experience, and related instructional aspects of apprenticeship programs subject to the provisions of § 104.515;

(4) Remedial programs which are designed to enable individuals, including persons of limited-English speaking ability, to profit from instruction related to the occupation or occupations for which they are being trained by correcting whatever educational deficiencies or handicaps prevent them from benefiting from such instruction; and

(5) Activities of vocational student organizations which are an integral part of the vocational instruction, subject to the provisions in § 104.513.

(c) Vocational instruction may be provided to either:

(1) Those preparing to enter an occupation upon the completion of the instruction; or

(2) Those who have already entered an occupation but desire to upgrade or update their occupational skills and knowledge in order to achieve stability or advancement in employment.

(Implements Sec. 120(b)(1)(A); 20 U.S.C. 2330.)

§ 104.513 Activities of vocational education student organizations.

(a) A State may use funds under its basic grant to support activities of vocational education student organizations which are described in its approved five-year State plan and annual program plan and which are:

(1) An integral part of the vocational instruction offered;

(2) Supervised by vocational education personnel who are qualified in the occupational area which the student organization represents; and

(3) Available to all students in the instructional program without regard to membership in any student organization.

(b) An integral part of vocational instruction includes:

(1) Training in an organized educational program which is directly related to the preparation of individuals for paid or unpaid employment in a career requiring other than a baccalaureate or higher degree; or

(2) Field or laboratory work incident to the vocational training; or

(3) Development and acquisition of instructional materials, supplies, and equipment for instructional services.

(c) An integral part of vocational instruction does not include:

(1) Lodging, feeding, conveying, or furnishing transportation to conventions or other forms of social assemblage;

(2) Purchase of supplies, jackets, and other effects for students' personal ownership;

(3) Cost of non-instructional activities such as athletic, social, or recreational events;

(4) Printing and disseminating non-instructional newsletters;

(5) Purchase of awards for recognition of students, advisors, and other individuals; or

(6) Payment of membership dues.

(Implements Sec. 120(b)(1); 20 U.S.C. 2330; 31 U.S.C. 551.)

§ 104.514 Vocational instruction under contract.

(a) A State may make provision for any portion of the program of instruction on an individual or group basis by private (for profit or non-profit) vocational training institutions (subject to the requirements of paragraph (c) of this section) or other existing institutions capable of carrying out vocational programs through a written contract with the State board or local educational agency. The contract shall describe the portion of instruction to be provided by the institution and incorporate the standards and requirements of vocational instruction set forth in the regulations in this subpart and the approved five-year State plan.

(b) The contract for instruction shall be entered into only upon a determination by the State board or local educational agency that:

(1) The contract is in accordance with State and local law; and

(2) The instruction to be provided under contract will be conducted as a part of the vocational education program of the State and will constitute a reasonable and prudent use of funds available under the approved five-year State plan.

(c) The State board or local educational agency may make arrangements with private (for profit or non-profit) vocational training institutions for the provision of vocational education where the State board or local educational agency determines:

(1) The private vocational training institution can make a significant contribution to attaining the objectives of the five-year State plan and can provide substantially equivalent training at a lesser cost; or

(2) The private vocational training institution can provide equipment or services not available in public institutions.

(d) The State board or local educational agency shall review the contracts with the institutions at least once a year.

(Implements Sec. 120(b)(1)(A); 20 U.S.C. 2330; Sen. Rept. 94-882, p. 67.)

§ 104.515 Apprenticeship programs.

The five-year State plan may provide for related instruction for apprentices who are employed to learn skilled trades. If such programs of instruction are offered, the plan must set forth the following assurances:

(a) The vocational training is supplemental to the on-the-job training experience of the apprentice.

(b) The worker involved in the apprenticeable occupation must be at least 16 years of age, except where a higher minimum age standard is otherwise fixed by law.

(c) The apprentice training agreement must specify a given length of planned work experience training through employment on the job which is supplemented by related instruction.

(d) The skilled trade must possess all of the following characteristics:

(1) It is customarily learned in a practical way through training and work on the job;

(2) It is clearly identified and commonly recognized throughout an industry;

(3) It involves manual, mechanical, technical skills and knowledge; and

(4) It provides equal access to both sexes.

(e) Apprentices will be classified as follows:

(1) Registered. (i) Where the program or the apprentice, or both, are registered under the apprenticeship law of the State in which the apprentice is employed;

(ii) Where the program or the apprentice, or both, are registered by a State apprenticeship agency operating under powers vested in it by legally responsible State authority; and

(iii) Where the program or the apprentice, or both, are registered by the Bureau of Apprenticeship and Training, U.S. Department of Labor, under "standards" or "fundamentals" approved by the Federal Committee on Apprenticeship. Such registration or recognition exists only where neither conditions in paragraph (e)(1)(i) nor paragraph (e)(1)(ii) of this section exist.

(2) Non-registered. Where the program or the apprentice, or both, are not registered under any of the three conditions in paragraphs (e)(1)(i) (ii) and (iii) of this section, but a noncertifiable apprenticeship program is conducted under an implied or written agreement between the apprentice and an individual employer, a group of employees, employer-employee committees, or a governmental agency.

(3) The standards of apprenticeship programs must adhere to the requirements outlined in 29 CFR Part 29 (Department of Labor Apprenticeship Programs).

(29 U.S.C. 50)

WORK-STUDY PROGRAMS

§ 104.521 Use of funds.

A State may use funds under its basic grant (section 120 of the Act) for approved work-study programs, which are described in its approved five-year State plan and annual program plan.

(Sec. 120(b)(1)(B); 20 U.S.C. 2330.)

§ 104.522 Policy and procedure for work-study programs.

A State conducting work-study programs under § 104.521 shall set forth in the approved five-year State plan:

(a) An assurance that the State will adopt policies and procedures to insure that Federal funds used for this purpose will be expended solely for the payment or compensation of students employed pursuant to work-study programs which meet the requirements of § 104.523; and

(b) The principles for determining the priority to be accorded applications from local educational agencies for work-study programs. These principles shall give preference to applications submitted by local educational agencies serving communities having substantial numbers of youths who have dropped out of school or who are unemployed. Work-study programs shall be funded in the order determined by the application of these principles.

(Sec. 120(b)(1)(B), 121(b); 20 U.S.C. 2330, 2331.)

§ 104.523 Requirements of work-study programs.

(a) Work-study programs shall be administered by the local educational agency and shall be made reasonably available (to the extent of available funds) to all youths in the area served by the agency who are able to meet the requirements of paragraph (b) of this section.

(b) Work-study programs shall be furnished only to a student who:

(1) Has been accepted for enrollment as a full-time student in a vocational education program which meets the standards prescribed by the State board and the local educational agency for vocational education programs assisted under this Act, or in the case of a student already enrolled in such a program, is in good standing and in full-time attendance;

(2) Is in need of the earnings from such employment to commence or continue the student's vocational education program; and

(3) Is at least 15 years of age and less than 21 years of age at the commencement of the student's employment, and is capable, in the opinion of the appropriate school authorities, of maintaining good standing in his or her vocational education program while employed under the work-study program.

(Sec. 121; 20 U.S.C. 2331.)

(c) No student shall be employed under a work-study program for more than 20 hours in any week in which classes in which the student is enrolled are in session.

(Implements Sec. 121(a)(3); 20 U.S.C. 2331.)

(d) No student employed under a work-study program shall be compensated at a rate which exceeds the hourly rate prevailing in the area for persons performing similar duties.

(e) Employment under these work-study programs shall be for the local educational agency or for some other public or nonprofit private agency or institution. Students employed in work-study programs assisted under the authority of this section shall not by reason of this employment be deemed employees of the United States, or their service Federal service, for any reason.

(f) In each fiscal year during which the work study program remains in effect, the local educational agency shall expend (from sources other than payments from Federal funds under this section) for the employment of its students (whether or not the employment is an area eligible for assistance under this section) an amount that is not less than its average annual expenditure for work-study programs of a similar character during the three fiscal years preceding the fiscal year in which its work-study program is approved.

(Sec. 121; 20 U.S.C. 2330, 2331.)

COOPERATIVE VOCATIONAL EDUCATION PROGRAMS

§ 104.531 Use of funds.

(a) A State may use funds under its basic grant (section 120 of the Act) for grants to local educational agencies for establishing or expanding cooperative vocational education programs with the participation of public and private employers, when these programs are generally described in the approved five-year State plan and the annual program plan.

(b) The State, in its review of local applications, shall give priority for funding cooperative vocational education programs to local educational agencies in areas that have high rates of school dropouts or youth unemployment.

(Sec. 122 (a), (e); 20 U.S.C. 2332.)

§ 104.532 Assurances in five-year State plan.

A State conducting cooperative vocational education programs under § 104.531 shall provide assurances in the approved five-year State plan that:

(a) Funds will be used only for developing and operating cooperative vocational education programs as defined in Appendix A and which provide training opportunities that may not otherwise be available and which are designed to serve persons who can benefit from these programs;

(b) Necessary procedures are established for cooperation with employment agencies, labor groups, employers, and other community agencies in identifying suitable jobs for persons who enroll in cooperative vocational education programs;

(c) Provision is made, where necessary, for reimbursement of added costs

to employers for on-the-job training of students enrolled in cooperative programs, provided that the on-the-job training is related to existing career opportunities susceptible of promotion and advancement and which do not displace other workers who perform the work;

(Sec. 122; 20 U.S.C. 2332.)

(d) The program provides cooperative on-the-job training that (1) employs and compensates student-learners in conformity with Federal, State, and local laws and regulations and in a manner not resulting in exploitation of the student-learner for private gain, and (2) is conducted in accordance with written training agreements between local educational agencies and employers;

(Implements Sec. 122(c); 20 U.S.C. 2332.)

(e) Procedures are developed and published for use by local educational agencies for providing ancillary services and activities to assure that quality in cooperative vocational education programs is provided for and may include pre-service and in-service training for teacher coordinators, supervision, curriculum materials, travel for students and coordinators necessary to the success of such programs, and evaluation; and

(f) Policies and procedures will be adopted for accounting, for continuous evaluation of cooperative vocational education programs, and for follow-up of students who have completed or left these programs.

(Sec. 122; 20 U.S.C. 2332.)

§ 104.533 Students in nonprofit private schools.

(a) A State using funds under its basic grant (Section 120 of the Act) for grants to local educational agencies for cooperative vocational education programs shall consult with the appropriate nonprofit private schools.

(b) Each local educational agency receiving funds from the State for cooperative vocational education programs shall:

(1) Identify the students enrolled in nonprofit private schools in the area served by the local educational agency whose educational needs are of the type which the cooperative vocational education programs and services may benefit; and

(2) Assess adequately the needs of the students identified in subparagraph (1) of this paragraph for the cooperative vocational education programs and services being offered; and

(3) Provide the students identified in subparagraph (1) of this paragraph with the opportunity for cooperative vocational education programs and services in a manner which will most effectively meet the needs of these students.

(c) The personnel, materials and equipment necessary to provide cooperative vocational education programs and services to nonprofit private school students shall remain under the administration, direction and control of the local educational agency.

(d) Cooperative vocational education programs carried out by local educational agencies which include students enrolled in nonprofit private schools may be supported up to 100 percent with Federal funds.

(e) Federal funds used to support cooperative vocational education programs which include students enrolled in nonprofit private schools will not be commingled with State or local funds so as to lose their identity. In developing policies and procedures, it shall not be necessary to require separate bank accounts for funds from Federal sources, so long as accounting methods will be established which assure that expenditures of the funds can be separately identified.

(Implements Sec. 122(f); H. Rept. 1085, p. 46; 20 U.S.C. 2332.)

ENERGY EDUCATION

§ 104.511 Use of funds.

A State may use funds under its basic grant (section 120 of the Act), when included in the approved five-year State plan and annual program plan, for grants to postsecondary institutions for energy education.

(Sec. 123; 20 U.S.C. 2333.)

§ 104.512 Applications by postsecondary educational institutions.

(a) A State shall make a grant to a postsecondary educational institution only on application by the postsecondary educational institution to the State.

(b) The application shall describe with particularity a program for the training of miners, supervisors, and technicians (particularly safety personnel), and environmentalists in the field of coal mining and coal mining technology, including provision for supplementary demonstration projects or short-term seminars, which program may include curriculums such as:

- (1) Extraction, preparation, and transportation of coals;
- (2) Reclamation of coal mined land;
- (3) Strengthening of health and safety programs for coal mine employees;
- (4) Disposal of coal mine wastes; and
- (5) Chemical and physical analysis of coal and materials, such as water and soil, that are involved in the coal mining process.

(c) Postsecondary educational institutions may use funds for the acquisition of equipment necessary for the conduct of these programs.

(Sec. 123(a)(1)(2) (A) through (E); 20 U.S.C. 2333.)

§ 104.513 Solar energy.

A State may also use funds under its basic grant (section 120 of the Act) to make grants to postsecondary educational institutions to carry out energy education programs for:

- (a) Training of individuals needed for the installation of solar energy equipment; and
- (b) Training necessary for the installation of: (1) Glass paneled solar collectors; (2) Wind energy generators; and

(3) Other related applications of solar energy.

(Sec. 123(b); 20 U.S.C. 2333.)

CONSTRUCTION OF AREA VOCATIONAL EDUCATION SCHOOL FACILITIES

§ 104.551 Use of funds.

A State may use funds under its basic grant (section 120 of the Act) to pay costs of constructing area vocational education school facilities, in accordance with the approved five-year State plan and annual program plan.

(Sec. 120(b)(1)(E); 20 U.S.C. 2330.)

§ 104.552 Types of facilities.

The State may use funds under the basic grant for construction if the facility meets one of the following requirements:

(a) A specialized high school used exclusively or principally for the provision of vocational education to persons who are available for study in preparation for entering the labor market; or

(b) The department of a high school exclusively or principally used for providing vocational education in no less than five different occupational fields to persons who are available for study in preparation for entering the labor market; or

(c) A technical or vocational school used exclusively or principally for the provision of vocational education to persons who have completed or left high school and who are available for study in preparation for entering the labor market; or

(d) The department or division of a junior college or community college or university operating under the policies of the State board which provides vocational education in no less than five different occupational fields, leading to immediate employment but not necessarily leading to a baccalaureate degree. These vocational education programs must:

- (1) Be available to all residents of the State or an area of the State designated and approved by the State board; and
- (2) In the case of a school, department, or division described in (c) or (d), admit as regular students both persons who have completed high school and persons who have left high school.

(Sec. 195(2); 20 U.S.C. 2461.)

§ 104.553 Construction requirements.

An area vocational education school facility constructed under provisions of §§ 104.551 and 104.552 must meet the requirements of (a) non-discrimination provisions in 45 CFR Part 80. This includes 45 CFR 80.3(b)(3) which provides that, in determining the site or location of the facility, a recipient may not make selections with the effect of excluding individuals from, denying them the benefits of, or subjecting them to discrimination on the grounds of race, color, or national origin, Subpart K—"Construction Requirements" in the General Education Provisions Regulations, 45 CFR 100b.155 through 100b.192, and (c) the Architectural Barriers Act

of 1968, 42 U.S.C. 4151, pertaining to standards for design, construction and alteration of buildings.

(Sec. 120(b)(1)(E); 20 U.S.C. 2330; 45 CFR 100b.157 through 100b.192 42 U.S.C. 4151)

PROVISION OF STIPENDS

§ 104.571 Use of funds.

A State may use funds under its basic grant (section 120 of the Act), when included in the approved five-year State plan and annual program plan, for the provision of stipends for students entering or already enrolled in vocational education programs if these students have acute economic needs which cannot be met under work-study programs, subject to the restrictions in § 104.572.

(Sec. 120(b)(1)(G); 20 U.S.C. 2330.)

§ 104.572 Restrictions on payment of stipends.

No funds shall be used for the payment of stipends to students entering or already enrolled in programs of vocational education unless the State board first makes a specific finding in each instance of funding that the funding of this particular activity is necessary due to:

- (a) Inadequate funding in other programs providing similar activities; or
- (b) Other services in the area that are inadequate to meet the needs.

(Sec. 120(b)(1)(G); 20 U.S.C. 2330.)

§ 104.573 Application for payment of stipends by eligible recipients.

An eligible recipient desiring to provide stipends for eligible students under §§ 104.571 and 104.572 shall include a request for funds in the application submitted to the State board and shall provide in the application an assurance that each applicant to be approved meets the requirements of §§ 104.571 and 104.572.

(Sec. 120(b)(1)(G); 20 U.S.C. 2330.)

§ 104.574 Rates for stipends.

Students entering or already enrolled in vocational education programs may be paid stipends at a rate not to exceed the higher of:

- (a) The minimum wage prescribed by State or local law multiplied by the number of hours per week the student is enrolled in the vocational education program; or
- (b) The minimum hourly wage set out under 6(a)(1) of the Fair Labor Standards Act of 1938, as amended, multiplied by the number of hours per week the student is enrolled in the vocational education program.

(Implements Sec. 120(b)(1)(G); 29 CFR 95.34(c); 20 U.S.C. 2330.)

PLACEMENT SERVICES FOR STUDENTS WHO HAVE SUCCESSFULLY COMPLETED VOCATIONAL EDUCATION PROGRAMS

§ 104.581 Use of funds.

A State may use funds under its basic grant (section 120 of the Act), in accordance with the approved five-year State plan and annual program plan, for providing placement services for students

who have successfully completed vocational education programs, subject to restrictions in § 104.582.

(Sec. 120(b)(1)(H); 20 U.S.C. 2330.)

§ 104.582 Restrictions on placement services.

A State shall not use funds for placement services for students who have successfully completed vocational education programs, unless the State board first makes a specific finding in each instance of funding that the funding of this particular activity is necessary due to:

- (a) Inadequate funding in other programs providing similar activities; or
- (b) Other services in the area that are inadequate to meet the needs. For example, if insufficient funds are available under Section 134(a)(3) for the placement of students successfully completing vocational education programs, the State may use funds under the basic grant for this purpose.

(Sec. 120(b)(2); 20 U.S.C. 2330.)

§ 104.583 Application for funds by eligible recipients.

An eligible recipient desiring to provide placement services to students who have successfully completed vocational education programs under § 104.581 shall:

- (a) Include the request for funds in the local application submitted to the State board; and
- (b) Provide assurances that all placement services to be provided meet the requirements of § 104.582.

(Sec. 120(b)(1)(H); 20 U.S.C. 2330.)

INDUSTRIAL ARTS

§ 104.591 Use of funds.

A State may use funds under its basic grant (section 120 of the Act), when included in the approved five-year State plan and annual program plan, for industrial arts programs which meet the requirements set forth in § 104.592.

(Sec. 120(b)(1)(I); 20 U.S.C. 2330.)

§ 104.592 Industrial arts programs.

Industrial arts education programs which may be funded under § 104.591 are those industrial arts programs which are designed to meet the purposes of this Act (including the elimination of sex stereotyping) and which:

- (a) Pertain to the body of related subject matter, or related courses, organized for the development of understanding about all aspects of industry and technology, including learning experiences involving activities such as experimenting, designating, constructing, evaluating, and using tools, machines, materials, and processes; and
- (b) Assist individuals in making informed and meaningful occupational choices or which prepare them for entry into advanced trade and industrial or technical education programs.

(Sec. 195(15); 20 U.S.C. 2461.)

SUPPORT SERVICES FOR WOMEN

§ 104.601 Use of funds.

A State may use funds under its basic grant (section 120 of the Act), when included in its approved five-year State plan and annual program plan, for support services for women who enter vocational education programs designed to prepare individuals for employment in jobs which have been traditionally limited to men.

(Sec. 120(b)(1)(J); 20 U.S.C. 2330.)

§ 104.602 Types of support services.

Support services to be provided under § 104.601 include:

- (a) *Counseling.* Counseling women entering and enrolled in non-traditional programs on the nature of these programs and on the ways of overcoming the difficulties which may be encountered by women in these programs. Counselors may furnish supportive services to assist students in adjusting to the new employment requirements.

(Implements Sec. 120(b)(1)(J); 20 U.S.C. 2330.)

- (b) *Job development.* Programs and activities in the area of job development include the provision of materials and information concerning the world of work which present women students entering, enrolled in, or interested in non-traditional programs the options, opportunities, and range of jobs available in these nontraditional fields. Job development support services may also be carried out through bringing persons employed in these nontraditional fields into the schools, as well as providing opportunities for women students to visit the work place of business and industry so as to afford them a clear understanding of the nature of the work, including an understanding of the work setting in which these jobs are performed.

(Implements Sec. 120(b)(1)(J); 20 U.S.C. 2330; H.R. Rept. No. 94-1085, pp. 23-25.)

- (c) *Job follow-up support.* Support services may be provided to assist women students in finding employment relevant to their training and interests. Follow-up services may be provided to assist students in the work force, and dealing with barriers which women face in working in these nontraditional areas.

(Implements Sec. 120(b)(1)(J); 20 U.S.C. 2330.)

§ 104.603 Support to increase number of women instructors.

In funding programs and activities of support services for women, funds may be used to increase the number of women instructors involved in the training of individuals in programs which have traditionally enrolled mostly males, so as to provide supportive examples for these women who are preparing for jobs

in these nontraditional areas of employment.

(Implements Sec. 120(b)(1)(J); 20 U.S.C. 2330; H.R. Rept. No. 1085, p. 24.)

DAY CARE SERVICES FOR CHILDREN OF STUDENTS

§ 104.611 Use of funds.

A State may use funds under its basic grant (section 120 of the Act), when included in the approved five-year State plan and annual program plan, to provide day care services for children of students (both male and female and including single parents) in secondary and postsecondary vocational education programs.

(Sec. 120(b)(1)(K); 20 U.S.C. 2330.)

§ 104.612 Day care services.

(a) Day care services shall be for the purpose of providing appropriate care and protection of infants, pre-school and school-age children in order to afford students who are parents the opportunity to participate in vocational education programs.

(b) The day care services provided under this section shall be governed by the Federal Interagency Day Care Requirements (45 CFR Part 71).

(Implements Sec. 120(b)(1)(K); 20 U.S.C. 2330.)

VOCATIONAL EDUCATION PROGRAMS FOR DISPLACED HOMEMAKERS AND OTHER SPECIAL GROUPS

§ 104.621 Use of funds.

A State shall use funds under its basic grant (section 120 of the Act) in accordance with its approved five-year State plan and annual program plan to provide vocational education programs for the following special groups:

- (a) Persons who had been homemakers but who now, because of dissolution of marriage, must seek employment;

(b) Persons who are single heads of households and who lack adequate job skills;

(c) Persons who are currently homemakers and part-time workers but who wish to secure a full-time job; and

(d) Women who are now in jobs which have been traditionally considered jobs for females and who wish to seek employment in job areas which have not been traditionally considered as job areas for females, and men who are now in jobs which have been traditionally considered jobs for males and who wish to seek employment in job areas which have not been traditionally considered as job areas for males.

(Secs. 107(b)(4)(B), 120(b)(1)(L); 20 U.S.C. 2307, 2330.)

§ 104.622 Scope of programs.

The State shall fund programs, in accordance with the policies and procedures described in its approved five-year State plan pursuant to § 104.187(b), to

assess and meet the needs of the groups described in § 104.621. These programs shall include:

- (a) Organized educational programs necessary to prepare these special groups for employment, including the acquisition, maintenance and repair of instructional equipment;
 - (b) Special courses preparing these individuals in how to seek employment; and
 - (c) Provision of placement service for the graduate of these programs.
- (Implements Sec. 120(b)(1)(L); 20 U.S.C. 2330.)

CONSTRUCTION AND OPERATION OF RESIDENTIAL VOCATIONAL SCHOOLS

§ 104.631 Use of funds.

A State may use funds under its basic grant (section 120 of the Act) when included in its five-year State plan and annual program plan for the construction equipment, and operation of residential vocational schools, including room, board, and other necessities.

(Sec. 120(b)(1)(M); 20 U.S.C. 2330.)

§ 104.632 Residential vocational schools.

A residential vocational school is an institution which provides vocational education for youths (males and females) who are at least 15 years of age and less than 21 years of age at the time of enrollment, and who need full-time study on a residential basis in order to benefit fully from the education. For the purposes of this section, institutions to which juveniles are assigned as a result of their delinquent conduct are not residential vocational schools. (This does not prohibit States from using funds under section 120 of the Act for the provision of vocational education programs in correctional institutions.)

(Sec. 124; 20 U.S.C. 2334.)

§ 104.633 Special considerations for residential vocational schools.

(a) States shall give special consideration to the needs of large urban areas and isolated rural areas having substantial numbers of youths who have dropped out of school or who are unemployed.

(b) Funds may not be used for schools in which students are segregated because of race.

(Sec. 124(b); 20 U.S.C. 2334.)

§ 104.634 Construction requirements.

When Federal funds are used to pay part of the cost of constructing a residential vocational school, the facility must meet the requirements of § 104.553.

(Sec. 120(b)(1)(M); 20 U.S.C. 2330; 45 CFR 100b.157 through 100b.192.)

Subpart 3—Program Improvement and Supportive Services

§ 104.701 Authorization of grants.

A State shall use 20 percent of the funds allotted pursuant to section 102(a) of the Act for any of the following purposes, except as provided in § 104.762(a):

- (a) Program improvement described in § 104.702;
- (b) Vocational guidance and counseling described in § 104.761;
- (c) Vocational education personnel training described in § 104.771;
- (d) Grants to overcome sex bias and sex stereotyping described in § 104.791;
- (e) State administration of the five-year State plan and annual program plan described in § 104.306; and
- (f) Local supervision and administration of vocational education programs, services, and activities described in § 104.307.

(Secs. 103(e), 130; 20 U.S.C. 2303, 2350.)

PROGRAM IMPROVEMENT

§ 104.702 Purpose.

The purpose of program improvement is to improve vocational education by the support of research programs, exemplary and innovative programs, and curriculum development programs.

(Sec. 130; 20 U.S.C. 2350.)

§ 104.703 Research coordinating unit.

(a) In order to expend funds for program improvement, the State shall establish a research coordinating unit to coordinate the research, exemplary and innovative programs, and curriculum development activities in the State.

(b) The State shall set forth the organizational structure of this research coordinating unit in the five-year State plan.

(c) The State shall develop a comprehensive plan of program improvement which includes:

(1) The intended uses of funds available under section 130 of the Act to support activities of program improvement;

(2) A description of the State's priorities for program improvement; and

(3) The procedures to be used by the research coordinating unit to insure that the findings and results of the program improvement activities in the State are disseminated throughout the State in a coordinated fashion.

(d) The State shall include the comprehensive plan of program improvement in the five-year State plan and annual program plan.

(e) The research coordinating unit shall submit to the Commissioner and to the National Center for Research in Vocational Education the following:

(1) Two copies of an abstract of each approved project for program improvement, within 30 calendar days after approval of the project, containing the source and amount of funds obligated for the project; and

(2) Two copies of the final report resulting from the State project, within three months after the ending date of the project.

(f) The research coordinating unit may use funds available under section 130 of the Act for the purposes set forth in §§ 104.705, 104.706, and 104.708. This unit may contract for the performance of activities described in §§ 104.705, 104.706, and 104.708, or this unit may per-

form the activities set forth in § 104.705, using its own staff. The cost of the professional and support staff of the research coordinating unit is supportable with Federal funds available under section 130 of the Act.

(Implements Secs. 130, 131, 132, 133, 171; 20 U.S.C. 2350 through 2353, 2401; H.R. Rept. 94-1085, p. 44; H.R. Rept. 94-1701, pp. 225-226.)

§ 104.704 Contract requirements.

No contract shall be made pursuant to §§ 104.705, and 104.708 unless the applicant can demonstrate a reasonable probability that the contract will result in improved teaching techniques or curriculum materials that will be used in a substantial number of classrooms or other learning situations within five years after the termination date of such contracts.

(Sec. 131(b), 133(b); 20 U.S.C. 2351, 2353.)

§ 104.705 Use of funds for research programs.

A research coordinating unit may use funds available under section 130 of the Act directly or by contract for:

(a) Applied research and development in vocational education;

(b) Experimental, developmental, and pilot programs and projects designed to test the effectiveness of research findings, including programs and projects to overcome problems of sex bias and sex stereotyping;

(c) Improved curriculum materials for presently funded programs in vocational education and new curriculum materials for new and emerging job fields, including a review and revision of any curricula developed under this section to insure that such curricula do not reflect stereotypes based on sex, race, or national origin;

(d) Projects in the development of new careers and occupations, such as:

(1) Research and experimental projects designed to identify new careers in such fields as mental and physical health, crime prevention and correction, welfare, education, municipal services, child care, and recreation, requiring less training than professional positions, and to delineate within such career roles with the potential for advancement from one level to another;

(2) Training and development projects designed to demonstrate improved methods of securing the involvement, cooperation, and commitment of both the public and private sectors toward the end of achieving greater coordination and more effective implementation of programs for the employment of persons in the fields described in subparagraph (1) including programs to prepare professionals (including administrators) to work effectively with aides; and

(3) Projects to evaluate the operation of programs for the training, development, and utilization of public service aides particularly their effectiveness in providing satisfactory work experiences and in meeting public needs; and

(e) Dissemination of the results of the contracts made pursuant to paragraphs

(a) through (d), as well as the results of other research projects, including employment of persons to act as disseminators on a local level, of these results.

(Sec. 131(a); 20 U.S.C. 2351.)

§ 104.706 Use of funds for exemplary and innovative programs.

(a) The research coordinating unit may use funds available under section 130 of the Act directly or by contract for:

(1) Programs to develop high quality vocational education programs for urban centers with high concentrations of:

(i) Economically disadvantaged individuals;

(ii) Unskilled workers; and

(iii) Unemployed individuals.
